Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE, }
INDIANAPOLIS, IND., December 30, 1896. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILY,
Auditor of State.

DECEMBER 30, 1896.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of Indiana, December 30, 1896
WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer December 30, 1896.
THOMAS J. CARTER,
Clerk Printing Bureau.

PRESIDENT'S REPORT.

BLOOMINGTON, IND., December 1, 1896.

To the HON. CLAUDE MATTHEWS, Governor of Indiana :

DEAR SIR—I have the honor of herewith transmitting to you the biennial report of the Board of Trustees of the Indiana University for the fiscal years ending October 31, 1895, and October 31, 1896.

The progress of the University during the past two years has been gratifying to all friends of higher education. This progress has been not chiefly in the number of students, but much more in the increasing favorable recognition of the University among the educators of the country. The University is known to be one of the most progressive of our institutions, and its peculiar organization of work has attracted wide attention and imitation.

The matter of numbers is in itself no test of the value or the success of an institution of learning, for the most advanced students in any department of study are few. It can, however, be said that the best students will go where the best work is done, and the Indiana University will never lack for numbers so long as its instruction is thorough, and its work is abreast of modern thought and modern methods.

More important than the fact of the increase of numbers is the fact of steady improvement in the quality of work done by professors and students. The reputation of the University, both within and without the State, has been constantly rising. No well-informed person now speaks with disrespect of the work done in the University, while among college men throughout the country, the Indiana University is regarded as one of the most promising schools in the United States. It may be further said that the Indiana University is especially a school for persons of limited means. The great majority of the stu-

dents are not rich, and fully three-fourths of them have earned, by their own work, much or all of the money spent on their education. Connected with this lack of money for lavish expenditures is the fact that in no institution are the students, as a body, more earnest, or their moral tone higher, than in the State University.

Nineteen departments of work are now organized, each department representing some great subject in which three or four or more years of work are offered. The scope of these subjects, as illustrating the great fields of knowledge open to young men and women of Indiana, is indicated by the following enumeration: (1) Greek, (2) Latin, (3) Romance Languages, (4) Germanic Languages, (5) English, (6) European History, (7) American History, (8) Economics and Social Science, (9) Philosophy, (10) Pedagogics, (11) Pure Mathematics, (12) Mechanics and Astronomy, (13) Physics, (14) Chemistry, (15) Geology, (16) Zoölogy, (17) Botany, (18) Fine Arts, (19) Law. With this presentation of the subjects it is evident that our young people can have a very wide range of choice in training. It is considered no longer a tenable proposition that all kinds of minds demand the same kind of training. There is the greatest diversity of gifts, and this must be provided for in any rational system of education.

The purpose of education is to develop power, and this can be developed by the proper study of any subject, but is much aided if that subject has the consent of the pupil's taste. The widest liberty is, therefore, given by the University in the selection of subjects. However, there are groups of subjects which prominently stand for culture, and a certain amount of selection from these groups is required.

It is shown that distorted courses are practically unknown; that the proportion among subjects is practically what it was under prescription; that such studies as English, language, history and economics attract a far larger student body than do either the physical or biological sciences; that very few students graduate with only the minimum requirement. Better results than these which have been tabulated are those which show that this policy has improved the whole student body, by developing self-reliance and that interest which comes from responsibility, and has wonderfully improved teaching through the stimulus of interested learners.

It is these methods and results which have called attention to the University. It will be remembered that Indiana University no longer maintains any preparatory department. The work begins where that of the commissioned high school ends and it is constantly becoming more intimately connected with these schools. That this relationship is becoming more widely recognized throughout the State is testified by the fact that during the present year ninety of our ninety-two counties have sent pupils from their schools to the University.

In comparing the attendance at the University with that of other institutions it must be remembered that the University maintains no preparatory or professional schools of any kind, except that of law, and that in these various schools will be found the largest part of the attendance of the universities that maintain them.

A tabulated view of the attendance for the last fourteen years will show the development of the University within recent years:

	<i>No. Students.</i>	<i>Graduates.</i>
1884.....	144	21
1885.....	156	26
1886.....	202	20
1887.....	263	22
1888.....	275	39
1889.....	300	41
1890.....	321	49
1891.....	394	75
1892.....	497	66
1893.....	576	81
1894.....	633	95
1895.....	771	90
1896.....	879	117
1897.....	929*	124

It will be noticed that the attendance has been nearly doubled within the last five years, and this has necessitated a large increase in force of instruction and an overwhelming demand for room.

In everything that goes to make a University, such as numbers in college classes, variety of subjects presented, method of

*Estimated from those now in attendance.

work, opportunities for advanced and original work, Indiana University stands very high among the universities of neighboring States; but in the matter of income it stands very low. A study of the statistics will show that the State of Indiana can show more for every dollar it has invested in its University than any neighboring State; and it will also indicate what results the State may hope for when it takes a financial interest in the University commensurate with its own resources.

I desire to call careful attention also to the following extract from the President's report to the Board of Regents of the University of Michigan for 1891. President Angell by his long service is more competent than any other man to speak of the position of State Universities in the West:

"While we can not but be gratified at the growth of this University during the last twenty years, we also observe with satisfaction that there has been rapid development of the State Universities generally throughout the West. Their progress, and we may say in the case of almost every one, their assured success, are proofs that the principle upon which the institution was founded is sound, and makes it reasonably certain that the great universities of the West and Southwest are, as a rule, to be those established and supported by the State. They have all frequently and gratefully testified to the helpful influence of this University upon their life. They have, in a large degree, followed our methods. In their success and in their promise we can heartily rejoice. From their increasing strength we also draw strength. Every State from Ohio to California and from North Dakota to Texas now has its State University. Some of these institutions have encountered great difficulties and bitter opposition. But in almost every State of the West, the State University is the best endowed, the best equipped and the most universally attended institution of higher education in the State. The objections raised to them in the outset have proved to be in the main groundless. The States are committed to their support by the large expenditures already made upon them and by the power of public sentiment, which naturally looks with favor on the universities that offer the best type of higher education in arts, in technology and in the professions, almost without money and without price, to every young man and every young woman. While in the East the higher education will continue to be furnished by institutions

resting on private endowments, in the West and Southwest, though similarly endowed colleges will flourish and do a useful work, the great universities will almost exclusively be those sustained by the States."

The pressing needs of Indiana University are as follows:

1. *Additional Buildings and Grounds.*—Four of the departments have their work wholly or part in basements. Two of the professors have their rooms in an attic, and eight of the teachers have their classes in the library. No assembly room is to be found on the grounds of the University. The chapel exercises and other assemblages are held in the men's gymnasium. The University needs an assembly room, a science building, a building for history and political science and English, a general heating plant and an administrative building. These should cost not less than \$250,000. The campus needs to be enlarged.

2. *Additional Annual Income.*—It goes without saying that the doubling of the number of students in the last five years makes an increase in our appropriation for maintenance necessary very soon. Not only will additional teachers be necessary soon, but the great demand for our teachers in other institutions makes it invaluable that we should pay some of our faculty more money. The best men are the cheapest in the long run. During the past six years Indiana University has lost fifteen professors, who are now getting outside the State \$1,000 more than twice the salaries received in Indiana University.

3. *Additional Library Funds.*—The entire work of the University depends upon its library more than upon any other one kind of equipment. It will be remembered that the library was completely destroyed in 1883. Since that time the attempt has been made to keep up with current publications, and to complete a few sets of periodical publications. Special provisions should soon be made for a sufficient equipment of books and periodicals to make the library useful and attractive to advanced students and investigators.

Very respectfully yours,

ISAAC JENKINSON,

President Board of Trustees.

TREASURER'S REPORT.

To the Board of Trustees of Indiana University:

GENTLEMEN—As Treasurer of the University I present the following as my report for the year ending October 31, 1895:

RECEIPTS.

Balance on hand	\$6,831 78	
Kirkwood Hall special appropriation ...	25,000 00	
Annual appropriation.....	40,000 00	
Interest on State bonds.....	7,200 00	
Interest on endowment.....	13,000 00	
College loans	6,000 00	
Fees	12,540 01	
Sundry receipts.....	2,027 06	
Total receipts		\$112,598 85

DISBURSEMENTS.

Contingent expenses.....	\$8,224 00
Professors' salaries	53,488 72
Officers' salaries	4,853 52
Trustees' salaries.....	1,902 00
Library fund.....	3,051 67
Chemistry	2,058 26
Greek	51 73
Zoölogy	663 37
Mathematics.....	24 42
Botany.....	191 07
Geology.....	407 20
Physics.....	702 12
Philosophy	484 53

Buildings and grounds	\$1,896 06	
Men's gymnasium	45 06	
Ladies' gymnasium	7 89	
Indiana Student	150 00	
Y. M. C. A.	25 00	
Kirkwood Hall	21,583 68	
	<hr/>	
Total paid		\$99,790 57
Balance on hand		12,808 28
		<hr/>
Total		\$112,598 85

Respectfully submitted,
WALTER E. WOODBURN,
Treasurer.

TREASURER'S REPORT.

To the Board of Trustees of Indiana University :

GENTLEMEN—As Treasurer of the University, I present the following as my report for the year ending October 31, 1896 :

RECEIPTS.

Balance on hand October.....	\$12,808 28
Interest on Endowment Fund	23,550 00
Interest on College Loans	9,450 00
Interest on University Bonds.....	3,600 00
Specific appropriation.....	18,000 00
Direct tax, one-half	42,678 98
Diploma Fees.....	620 00
Contingent and Library Fees	9,358 00
Conditioned Fees.....	1,421 50
Laboratory.....	1,342 75
Gymnasium.....	308 00
Iowa Land Note.....	898 71
Interest, Jasper County	14 70
Summer School.....	47 35
Total.....	<hr/> \$124,098 27

DISBURSEMENTS.

Professors' salaries.....	\$61,372 00
Officers' salaries	5,667 47
Trustees' salaries	2,702 50
Contingent expenses	12,255 24
Chemistry Fund.....	698 98
Geology.....	600 00

Zoölogy	\$762 51
Physics	399 37
Mathematics	3 60
Library.....	4,725 88
Buildings and grounds.....	12,408 40
Gymnasium Hall	6,333 80
Women's Gymnasium.....	130 48
Philosophy.....	452 70
Latin.....	71 73
Greek.....	100 00
<hr/>	
Total.....	\$108,684 70
Balance on hand.....	15,413 57
<hr/>	
Total.....	\$124,098 27

Respectfully submitted,
WALTER E. WOODBURN,
Treasurer.

THE

TWENTY-SECOND REPORT

OF

PURDUE UNIVERSITY,

THE SAME BEING

FOR THE YEAR ENDING JUNE 30, 1896.

INCLUDING A SUMMARY OF THE PRECED-
ING REPORT.

.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.
1897.

STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, December 22, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, January 6, 1897. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILY,
Auditor of State.

DECEMBER 23, 1896.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, January 7, 1897.

WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer this 7th day of January, 1897.

THOS. J. CARTER,
Clerk Printing Bureau.

BOARD OF TRUSTEES.

TERMS ENDING JULY 1, 1901.

BENJAMIN HARRISON.....	Indianapolis.
CHARLES B. STUART	LaFayette.
WILLIAM A. BANKS	LaPorte.

TERMS ENDING JULY 1, 1899.

JAMES M. BARRETT	Fort Wayne.
JOB H. VAN NATTA	LaFayette.
JOHN S. MARTIN	Brookville.

TERMS ENDING JULY 1, 1897.

DAVID E. BEEM.....	Spencer.

AUDITING COMMITTEE.

SYLVESTER JOHNSON,	WILLIAM H. O'BRIEN,
DAVID E. BEEM.	

FARM COMMITTEE.

WILLIAM A. BANKS,	JOB H. VAN NATTA,
JOHN MARTIN.	

PURDUE UNIVERSITY.

CORPS OF INSTRUCTORS, 1896-97.

JAMES HENRY SMART, A. M., LL. D.,
President of the University.

WINTHROP ELLSWORTH STONE, A. M., Ph. D.,
Vice-President.

STANLEY COULTER, A. M., Ph. D.,
Secretary of the Faculty.

SCIENCE.

STANLEY COULTER, A. M., Ph. D., Professor of Biology.
JOSEPH CHARLES ARTHUR, D. Sc., Professor of Vegetable Physiology and Pathology.
WINTHROP ELLSWORTH STONE, A. M., Ph. D., Professor of Chemistry and Director of Chemical Laboratory.
PERCY NORTON EVANS, B. S., Ph. D., Associate Professor in Chemistry.
KATHERINE ELIZA GOLDEN, M. S., Instructor in Biology.
WILLIAM HENRY TEST, M. S., Instructor in Chemistry.
SEVERANCE BURRAGE, B. S., Instructor in Sanitary Science.

MECHANICAL ENGINEERING.

WILLIAM F. M. GOSS, M. S., Professor of Experimental Engineering.
JOHN JOSEPH FLATHER, Ph. B., M. M. E., Professor of Machine Design.
WILLIAM KENDRICK HATT, A. B., C. E., Associate Professor in Applied Mechanics.
RICHARD ADDISON SMART, M. E., Instructor in Engineering Laboratory.
JOHN HENRY KLEPINGER, B. M. E., Assistant in Engineering Laboratory.
CLARENCE HOVEY ROBERTSON, B. S., B. M. E., Student-Assistant in Engineering Laboratory.
RAYMOND CLARENCE EWRY, B. M. E., Student-Assistant in Mechanical Drawing.
MARK DANA STROUT, Assistant in Engineering Laboratory.

CIVIL ENGINEERING.

FRED MORLEY, B. S., C. E., Professor of Civil Engineering.
 DANIEL BENJAMIN LUTEN, B. S. (C. E.), Instructor in Architectural and Sanitary Engineering.

ELECTRICAL ENGINEERING.

WINDER ELWELL GOLDSBOROUGH, M. E., Professor of Electrical Engineering.
 ALEXANDER WILMER DUFF, A. M., B. Sc. [Edin.], Professor of Physics.
 CHARLES PHILO MATTHEWS, M. E., Associate Professor of Electrical Engineering.
 SAMUEL NEWTON TAYLOR, Ph. D., Instructor in Physics.
 EDWARD ELLSWORTH REYNOLDS, M. E., Assistant Instructor in Dynamo Design.
 CLOYD MARSHALL, B. M. E., Student-Assistant in Electrical Laboratory.

AGRICULTURAL AND VETERINARY SCIENCE.

WILLIAM CARROLL LATTA, M. S., Professor of Agriculture.
 CHARLES SUMNER PLUMB, B. S., Professor of Animal Industry and Dairying.
 JAMES TROOP, M. S., Professor of Horticulture and Entomology.
 HENRY AUGUSTUS HUSTON, A. M., A. C., Professor of Agricultural Chemistry.
 ARVILL WAYNE BITTING, B. S., D. V. M., Professor of Veterinary Science.
 ALEXANDER A. RICE, Lecturer on Rural Law.
 WILLIAM BEECHER ANDERSON, B. S., Assistant Agriculturalist in Experiment Station.

MATHEMATICS.

CLARENCE ABIATHAR WALDO, A. M., Ph. D., Professor of Mathematics.
 MOSES COBB STEVENS, A. M., Professor of Higher Mathematics.
 THOMAS GREENE ALFORD, A. M., Professor of Mathematics.
 ERASTUS TEST, A. M., M. D., Professor of Mathematics.
 EDWIN MORTIMER BLAKE, E. M., Ph. D., Instructor in Mathematics.

LITERATURE, HISTORY AND ART.

MRS. EMMA MONT. McRAE, A. M., Professor of English Literature and Lady Principal.
 THOMAS FRANCIS MORAN, A. B., Ph. D., Professor of History and Political Economy.
 GLEN LEVIN SWIGGETT, A. M., Professor of German and Spanish.
 LAURA ANNE FRY, Professor of Industrial Art.
 PAULINE MARIOTTE-DAVIES, Ph. D., Professor of French.
 ANNA EMBREE BAKER, B. S., Instructor in Wood Carving.
 JOAKIM REINHARD, M. A., Instructor in German.
 MARY DOAN, B. L., M. S., Instructor in English Literature.

ELEMENTARY MECHANICS AND DRAWING.

MICHAEL JOSEPH GOLDEN, M. E., Professor of Practical Mechanics.
 WILLIAM PAYSON TURNER, Instructor in Machine Work.
 JAMES DAVID HOFFMAN, M. E., Instructor in Wood Shop.
 CHARLES PETERSON, B. C. E., Instructor in Mechanical Drawing.
 JOHN ELMER KOLB, B. M. E., Assistant in Forge Room.
 PAUL WILLIAM COVERT, B. M. E., Assistant in Foundry.
 ALPHA PIERCE JAMISON, B. M. E., Student-Assistant in Wood Shop.

PHARMACY.

ARTHUR LAWRENCE GREEN, Ph. C., M. D., Ph. D., Dean and Professor of
 Chemistry in School of Pharmacy.
 JULIUS WILLIAM STURMER, Ph. G., Professor of Pharmacy.
 GEORGE SPITZER, Ph. G., Lectures in Operative Pharmacy.
 BENJAMIN HOAK, Ph. G., Instructor in Pharmacy.
 CLARENCE MELVILLE McKELLIPS, Ph. C., Ph. G., Student-Assistant in
 Chemistry.
 CHARLES EDWIN VANDERKLEED, Ph. C., Ph. G., Student-Assistant in
 Chemistry.

SAMUEL WARREN MILLER, U. S. A., 1st Lieut. 5th Infantry, Professor of
 Military Science.
 FRANK HOMER CURTISS, Physical Director.
 ELIZABETH DAY SWAN, Librarian.

TRUSTEES' REPORT.

HON. CLAUDE MATTHEWS, *Governor of Indiana*:

I herewith submit for your consideration the report of the President of Purdue University for the two years ending June 30, 1896, together with a copy of his report to the Secretary of the Interior for the year ending June 30, 1896. To these reports are appended the financial reports of the Treasurer of the University and of the Secretary of the Board of Trustees for the year ending October 31, 1896.

The report of the President of the University treats of the following subjects, namely:

- I. Attendance.
- II. Courses of Study and Faculty.
- III. Farmers' Institutes.
- IV. Purdue Publications.
- V. The Completion of the Engineering Laboratory.
- VI. The Value of Industrial Education to the State.
- VII. The State's Obligation to Purdue.
- VIII. The Needs of the Institution.

You will notice that in paragraph 1, section VIII, the President of the University refers to a controversy over a supposed appropriation by the Legislature to the University involving \$9,500. In this connection the Board desires to say that under a statute approved February 28, 1889, the University has been receiving for general purposes, for each fiscal year beginning November 1, the sum of \$30,000. The general appropriation bill has invariably carried with it this sum of \$30,000, but in later years has prescribed that it should be paid in quarterly payments beginning January 1.

What is known as the University tax law, approved March 8, 1895, provided that the proceeds of a certain tax should be paid to the University on and after July 1. This supposedly provided for the current expenses of the University from and after July 1, 1896, and not before.

The general appropriation bill, approved March 11, 1895, instead of carrying the usual appropriation of \$30,000 to the University did carry with it an appropriation of \$22,500, as might naturally have been supposed for the purpose of paying to the University the quarterly installments due January 1, April 1 and July 1, 1896, in order to carry the University from November 1 to July 1.

Furthermore, the appropriation of \$22,500 was marked "*Specific*," quite contrary to the usual custom of designating annual and continuous appropriations.

The Attorney-General, in an opinion to the Auditor of State, however, seemed to think that the question was involved in some doubt, and he advised the Auditor to protect the State by retaining \$9,500 of the amount, and suggested that the Trustees of the University had a remedy in an application to the courts for a mandate.

The language of the Attorney General in his opinion to the Auditor of State was, in part, as follows :

"Your communication of April 18th presents questions that I can not answer to my own satisfaction. Inasmuch as the State will be remediless in the event you should pay to those institutions moneys that you are not authorized to pay, and on the other hand those institutions have a very complete and adequate remedy provided by way of mandate against you in the event you should not feel authorized to pay the amount claimed by them, I am of the opinion that you should resolve all doubts on the question submitted in favor of the State, in which case the representatives of those institutions, in case they feel aggrieved, can readily obtain relief in court."

After learning of the Attorney-General's doubts the Board of Trustees, acting on the suggestion contained in the above, submitted the matter to competent attorneys who advised them that, in their opinion, the intention of the Legislature that Purdue University should have the \$9,500 in question was plain. Under these circumstances the Trustees of Purdue University, in conjunction with the Trustees of Indiana State University, whose interest was also involved in the matter, believed it to be their duty to bring suit for the purpose of rendering effective what they believed to be the legislative intent. It is needless to say that this suit was not brought in any contentious spirit, nor for the purpose of obtaining money by taking advantage of a mere technicality. The Board felt that the money was rightfully due and that it was needed to

carry out proper and legitimate purposes for the benefit of the State.

The Board desires to say that this statement is not made for the purpose of arguing the case in advance of any decision that may be rendered, but merely for the purpose of reporting to you their action together with the reasons therefor.

The Board desires also to call the attention of yourself and the Legislature to the needs of the University as presented by its President.

Respectfully submitted,

CHARLES B. STUART,

President Board of Trustees of Purdue University.

To the Board of Trustees, Purdue University:

I herewith submit the twenty-second annual report for the year ending June 30, 1896, as required by the acts of Congress under which the institution is organized, and also the bi-ennial report for the two years ending October 31, 1896, as required by the statutes of the State of Indiana.

I preface this report with a verbatim copy of the annual report to the Honorable Secretary of Agriculture and the Honorable Secretary of the Interior, as required by the act of Congress of August 30, 1890.

These two reports are made out on an entirely different basis, and hence show some apparent discrepancies, although such do not actually exist. Respectfully submitted,

December 8, 1896.

JAMES H. SMART,
President of the University.

REPORT TO THE SECRETARY OF AGRICULTURE AND THE SECRETARY OF THE INTERIOR.

Name of Institution, Purdue University; Post-office, LaFayette; State, Indiana.

REPORT OF THE PRESIDENT of said institution to the Secretary of Agriculture and the Secretary of the Interior, as required by act of Congress of August 30, 1890, in aid of Colleges of Agriculture and the Mechanic Arts.

I. CONDITION AND PROGRESS OF THE INSTITUTION, YEAR ENDED JUNE 30, 1896, ESPECIALLY INSTANCING

1. Course of methods of instruction.
2. Purpose, structural character and cost of new buildings or additions to buildings.

It will be seen by this report that the number of students has not materially changed since last year. The Freshman class, however, numbered about forty more than the Freshman class of 1894-95.

The front of the new engineering building has been completed and was dedicated early in December, 1895. It is built of stone and brick in the most solid and substantial manner; is one hundred and fifty feet long, fifty feet wide and three stories high, with a tower one hundred and fifty feet high. It contains fifteen rooms, which are used for recitation rooms, drafting rooms and offices. This gives us an engineering plant worth about two hundred thousand dollars.

On the first of July last the Board of Trustees of Purdue University was reorganized under an act of the Legislature. The following appointments were made by the Governor:

TERMS ENDING JULY 1, 1901.

BENJAMIN HARRISON	Indianapolis.
CHARLES B. STUART	LaFayette.
WILLIAM A. BANKS	LaPorte.

TERMS ENDING JULY 1, 1899.

JAMES M. BARRETT	Fort Wayne.
JOB H. VAN NATTA	LaFayette.
JOHN MARTIN	Brookville.

TERMS ENDING JULY 1, 1897.

DAVID E. BEEM	Spencer.
SYLVESTER JOHNSON	Irvington.
WILLIAM H. O'BRIEN	Lawrenceburg.

This Board was organized by the election of Charles B. Stuart, of LaFayette, as President, the other officers of the institution remaining the same.

The University has maintained a university extension course during the year, and has projected what may be known as the Purdue Mechanics' Institute, circulars concerning which are herewith enclosed.

Four additions to the Faculty have been appointed for the coming year, as follows: Assistant in Physics, Assistant in the Department of Literature, Assistant in the Department of German, Assistant in the Department of Electrical Engineering.

The University has projected a series of monographs on sanitary science, as follows:

- No. 1. The Nature of Sanitary Science and Its Value to the State.
- No. 2. Some Sanitary Aspects of Milk Supplies and Dairying.

IN PREPARATION—

- No. 3. On the Purification of Water Supplies of Cities and Towns.
- No. 4. Typhoid Fever in Indiana and Its Possible Connection with Water Supplies.
- No. 5. Sewage Disposal in Cities and Towns.

Two of these have been published, the other three are ready for the printer.

Station bulletins during the year have been as follows:

- No. 56. Field Experiments with Wheat. Potato Scab and Its Prevention. August.
- No. 57. The Improvement of Unproductive Black Soils. November.
- No. 58. Hog Cholera and Swine Plague in Indiana. February.
- No. 59. Bacteriosis of Carnations.* March.
- No. 60. The American Persimmon. April.

* Not for general distribution.

The annual report and nineteen newspaper bulletins have also been issued.

II. RECEIPTS FOR AND DURING THE YEAR ENDED JUNE 30, 1896.

1. Balance on hand July 1, 1895, over and above all indebtedness (excluding funded debt, if any)	
2. State aid: (a) Income from endowment granted by State	
(b) Appropriation for current expenses	\$30,000.00
(c) Appropriations for building or other special pur- poses	36,000.00
3. Federal aid: (a) Income from land grant, act of July 2, 1862 ...	17,000.00
(b) For experiment stations, act of March 2, 1887 ..	15,000.00
(c) Additional endowment, act of August 30, 1890..	21,000.00
4. Fees and all other sources	57,183.69
Total	<u>\$176,183.69</u>

III. EXPENDITURES FOR AND DURING THE YEAR ENDED JUNE 30, 1896.

Deficit	\$16,980.08
1. Instruction in the subjects specified in Section 1, act of August 30, 1890	* 121,327.19
2. Experiment Station	16,308.62
3. Instruction in all other subjects, if any, not mentioned in Ques- tion 1 of this series	17,211.16
Total expenditures	<u>\$171,827.05</u>

IV. PROPERTY AND EQUIPMENT, YEAR ENDED JUNE 30, 1896.

Value of all buildings, \$325,000; of other equipment, \$225,000.

Value of above property (an estimate only is expected) not used for instruction in the subjects specified in Sec. 1 of act of August 30, 1890—Buildings, \$40,000; of other equipment, \$5,000.

Total number of acres, 190; acres under cultivation, 149; acres used for experiments, about 100; value of farm lands, \$70,000; amount of all endowment funds (Land Grant Fund), \$340,000.

V. LIBRARY, YEAR ENDED JUNE 30, 1896.

1. Number of bound volumes, June 30, 1895.	5,935
2. Bound volumes added during year ended June 30, 1896.	804
Total bound volumes	<u>6,739</u>
Pamphlets	2,797

* The answer to this question will include not only the amount received under the act of August 30, 1890 ("Morrill Act"), but also all amounts that are expended for the subjects specified in that act, irrespective of the character of the funds the amounts may be drawn from (State, tuition fees, or endowment, etc.).

VI. FACULTY DURING THE YEAR ENDED JUNE 30, 1896.

	<i>Male.</i>	<i>Female.</i>
1. College of Agriculture and Mechanic Arts:		
(a) Preparatory classes. (Have none.)		
(b) Collegiate and special classes	44	5
(c) Total, counting none twice	44	5
2. Number in all other departments (excepting duplicates— Pharmacy)	5
3. Number of staff of Experiment Station	10

VII. STUDENTS DURING THE YEAR ENDED JUNE 30, 1896.

	<i>Male.</i>	<i>Female.</i>
1. Colleges of Agriculture and Mechanic Arts:		
(a) Preparatory classes. (Pharmacy and Applied Chem- istry)
(b) Collegiate and special classes	423
(c) Post Graduate courses	13	1
Total, counting none twice	436	1
2. Number in all other departments—Art, Pharmacy and Science	138	68
3. Number of students that pursued courses in agriculture, 64; mechanical engineering, 144; civil engineering, 71; electrical engineering, 158; mining engineering,; architecture,; household economy,; veterinary science, 64 (all agricultural students take veterinary science); military tactics, 175. (It is not expected that the sum of these figures will equal the number of students given above.)		
4. What degrees and how many of each kind were conferred in 1895-'96:		
On men—B. S., 6; B. S. (A.), 2; B. S. (C. E.), 8; B. S. (E. E.), 30; B. S. (M. E.), 25; M. S., 1; A. C., 3; M. E., 3; M. E. (E. E.), 1; Ph. G., 24; Ph. C., 10.		
On women—B. S., 10; M. S., 3; Ph. G., 1; Ph. C., 1.		
5. What and how many honorary degrees were conferred in 1895-'96? Not any.		

(Signed)

(Title of officer reporting)

JAMES H. SMART,

President of Purdue University.

THE PRESIDENT'S REPORT TO THE BOARD OF TRUSTEES.

The law of the State requires the Trustees of Purdue University to submit a biennial report concerning the operations of the University, and that report is due during the fall next preceding the biennial session of the Legislature.

The report here presented is the report required by the laws of Indiana, and also includes the report called for by the acts of Congress.

I. ATTENDANCE.

ATTENDANCE FOR THE YEAR 1894-95.

The whole number of students in attendance during the year ending June 30, 1895, was 630, classified as follows:

Graduates.....	36	
Seniors.....	79	
Juniors.....	99	
Sophomores.....	125	
Freshmen.....	135	
School of Pharmacy.....	90	
Special Class in Agriculture.....	33	
Irregular and Special.....	37	
		<hr/>
		634
Deduct for names entered twice.....		4
		<hr/>
Total.....		630

ATTENDANCE FOR THE YEAR 1895-96.

The whole number of students in attendance during the year ending June 30, 1896, was 635, classified as follows:

Graduates.....	37	
Seniors.....	81	
Juniors.....	94	
Sophomores.....	114	
Freshmen.....	174	
School of Pharmacy.....	75	
Special Class in Agriculture.....	43	
Special.....	17	
		<hr/>
Total.....		635

The following tables give the number of students in the various departments each year since its opening in 1874:

COLLEGE AND SPECIAL SCHOOLS.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.	1896.
Graduates.....	1	1	1	3	1	2	2	3	3	4	2	3	11	26	34	34	32	37	27	25	36	37
Seniors.....	1	1	1	4	2	7	8	11	15	12	12	16	8	26	29	29	35	45	46	73	79	81
Juniors.....	1	1	6	5	14	11	13	20	13	14	16	10	34	31	32	34	51	56	87	104	99	94
Sophomores.....	3	6	6	12	15	22	30	18	20	20	16	27	49	42	52	66	67	104	138	119	125	114
Freshmen.....	9	8	23	28	34	36	39	47	37	42	67	73	91	78	92	105	151	200	151	166	135	174

COUNTIES REPRESENTED.

Names of counties represented by one or more students:

Adams,	Fountain,	LaPorte,	Rush,
Allen,	Franklin,	Lawrence,	St. Joseph,
Bartholomew,	Fulton,	Madison,	Shelby,
Benton,	Gibson,	Marion,	Spencer,
Blackford,	Grant,	Marshall,	Steuben,
Boone,	Greene,	Martin,	Sullivan,
Brown,	Hamilton,	Miami,	Switzerland,
Carroll,	Hancock,	Monroe,	Tippecanoe,
Cass,	Harrison,	Montgomery,	Tipton,
Clark,	Hendricks,	Morgan,	Union,
Clay,	Howard,	Newton,	Vanderburgh,
Clinton,	Huntington.	Noble,	Vermillion,
Daviess,	Jackson,	Orange,	Vigo,
Dearborn,	Jasper,	Owen,	Wabash,
Decatur,	Jay,	Parke,	Warren,
DeKalb,	Jefferson,	Perry,	Washington,
Delaware,	Jennings,	Pike,	Wayne,
Dubois,	Knox,	Posey,	Wells,
Elkhart,	Kosciusko,	Putnam,	White,
Fayette,	Lagrange,	Randolph,	Whitley.
Floyd,	Lake,		Total, 82.

STATES AND FOREIGN COUNTRIES REPRESENTED.

The states and countries represented in the institution during the present year are as follows :

Arkansas,	Kentucky,	New Jersey,	Virginia,
California,	Maryland,	New York,	Washington,
Connecticut,	Massachusetts,	North Carolina,	West Virginia,
Georgia,	Michigan,	Ohio,	Wisconsin,
Illinois,	Minnesota,	Pennsylvania,	Germany,
Indiana,	Missouri,	South Dakota,	Japan,
Iowa,	Montana,	Texas,	Nova Scotia,
Kansas,	Nebraska,	Vermont,	Ontario. Total, 32.

The attendance for the year 1895-6 shows but a slight gain over that of the previous year. We have simply held our own during a season of financial depression.

I may add that the enrollment at the opening of the present year shows a gain of fifty over that at the beginning of the year 1895-6. If this rate of increase is maintained we shall enroll over seven hundred students during the present year.

It is also worthy of note that we have enrolled forty resident graduates since September 1, and that most of these are candidates for an advanced degree.

The following table will show the growth of the institution in respect to attendance since its organization, the respective figures being for the year ending June 30, of the years named :

	COL- LEGE.	PREPAR- ATORY.	BOTH.
1875	15	49	64
1876	17	49	66
1877	60	79	139
1878	65	101	166
1879	76	119	195
1880	86	117	203
1881	113	141	254
1882	111	127	238
1883	106	113	219
1884	112	101	213
1885	127	132	259
1886	159	156	315
1887	230	162	392
1888	269	99	368
1889	328	111	439
1890	348	115	463
1891	419	111	530
1892	549	94	643
1893	582	95	677
1894	626	56	682
1895	630
1896	635

II. COURSES OF STUDY AND FACULTY.

The courses of study have been considerably modified during the present year, the changes and additions being such as experience has shown to be demanded by the students.

The course in Architecture has been very much extended, and the courses in Modern Languages have been developed in such a way as to produce more satisfactory results than have heretofore been secured.

A glance at the list printed herewith will show that some important changes have been made in the faculty. Ten new names appear. Four of these fill vacancies produced by resignations, and the other six have been appointed to newly created positions, as follows: An associate professor in Applied Mechanics, an assistant in English, an assistant in Physics, an assistant in Electrical Engineering, an assistant in Agriculture and an assistant in German.

These come to us from Cornell University, Columbia College, Clark University, Wesleyan University, and the universities of Berlin, Copenhagen and Paris. They are filling their places most acceptably, and it is safe to say that at no time in the history of the University has the faculty been more harmonious, and at no time has it done such efficient work as it is doing to-day.

III. FARMERS' INSTITUTES.

The report of the Superintendent of Farmers' Institutes, held under the auspices of Purdue University, submitted in separate form, shows that the work is very successful and that it has been carried to a high degree of efficiency. It is, I believe, generally recognized by the thoughtful farmers of the State that these institutes form one of the most powerful agencies for increasing the material resources of the State that has ever been inaugurated. The amount of money appropriated for these institutes has, however, been found to be inadequate.

When these institutes were first organized we were able to carry on the work largely through voluntary efforts. Halls were provided without expense, a good deal of free advertising was secured and instructors in many cases volunteered their services. This condition of affairs did not long continue, and it

has become necessary, in order to secure the best results, to pay for what we get. We are obliged to pay for the services of two instructors at each institute in addition to the ordinary running expenses, and there is an ever increasing demand for the services of the best instructors that can be found in the country. This demand must be met or the interest in the subject, now so strong, will surely wane.

For two years past, the annual appropriation of \$5,000 having been found insufficient to meet the necessary expenses, Purdue University has been obliged to supplement the State appropriation by appropriations out of her own funds. She now provides a Superintendent, furnishes him with an office, conducts the general financial affairs of the Institutes and places her corps of professors upon call without compensation, in order to eke out the meager appropriation. These demands upon the resources of the University are rapidly increasing and can not longer be met. Purdue is willing to do a large share of the supervisory work of the Institutes without expense to the Institute Fund, but more than this she is unable to do. The appropriation should, I think, be increased to \$10,000.

The following table will show something of the extent of the Institute work :

YEAR.	No. County Institutes Held.	Average Attendance per Institute.	Total Attendance.
1889-90	50
1890-91	41
1891-92	90
1892-93	89
1893-94	92	231	21,252
1894-95	92	218	20,056
1895-96	92	272	25,208

In explanation of the above it may be said that as a rule each Institute is in session two days and during that time holds five meetings. The attendance shown in the third column is the average attendance for each of the five meetings, and since many persons attend a part of these only, it is safe to say that the aggregate attendance for the year 1895-6 was 40,000.

IV. PURDUE PUBLICATIONS.

One of the objects of Purdue University is to afford the young men and young women of Indiana an opportunity to acquire a good collegiate education in Mathematics, Science, Literature and Art, and at the same time to secure instruction and practice in such lines of work as will fit them to engage in the productive industries. How well she is carrying out this purpose let our graduates testify.

But Purdue has still another purpose. She has laboratories and trained scientists who are not only able to properly instruct students, but who are also able to produce, through original investigation and research, information of value to the general public.

The Experiment Station connected with the University has a trained corps of men engaged in research who, from time to time, send out bulletins upon subjects of special interest to the farmers. The professors in the College proper also prepare and publish information of a wide general interest upon Sanitary Science, Public Health, Pure Foods, etc.

The following list shows the publications of Purdue University for the year 1896:

STATION BULLETINS.

1. Bulletin No. 58, Hog Cholera and Swine Plague in Indiana.
A. W. Bitting, B. S., D. V. M.
2. Bulletin No. 59, Bacteriosis of Carnations.
J. C. Arthur, D. Sc., and H. L. Bolley, M. S.
3. Bulletin No. 60, The American Persimmon.
Jas. M. Troop, M. S., and O. M. Hadley.
4. Bulletin No. 61, Field Experiments with Wheat.
W. C. Latta, M. S., and W. B. Anderson, B. S.
5. Bulletin No. 62, The Udder of the Cow.
C. S. Plumb, B. S.
6. Bulletin No. 63, Tuberculosis.
A. W. Bitting, B. S., D. V. M.
7. Bulletin No. 64, The Delayed Germination of Cocklebur and Other Paired Seeds.
J. C. Arthur, D. Sc.

NEWSPAPER BULLETINS.

8. No. 18, On the Winter Protection of Live Stock.
C. S. Plumb, B. S.
9. No. 19, Use of Commercial Fertilizers in Indiana.
H. A. Huston, A. M., A. C.
10. No. 20, Kafir Corn in Indiana.
W. C. Latta, M. S.
11. No. 21, Alfalfa Without Irrigation.
W. C. Latta, M. S.
12. No. 22, Oats and Field Peas for Green Fodder.
C. S. Plumb, B. S.
13. No. 23, Spraying with Insecticides and Fungicides.
James Troop, M. S.

- | | | |
|-----|--|--------------------------------|
| 14. | No. 24, Prevention of Potato Scab. | J. C. Arthur, D. Sc. |
| 15. | No. 25, Artichokes as Stock Food. | C. S. Plumb, B. S. |
| 16. | No. 26, Two Important Currant Insects. | James Troop, M. S. |
| 17. | No. 27, Preventing Chinch Bug Ravages. | James Troop, M. S. |
| 18. | No. 28, Destroying the Russian Thistle. | J. C. Arthur, D. Sc. |
| 19. | No. 29, The Use of the Hand or "Baby" Separator on the Farm. | C. S. Plumb, B. S. |
| 20. | No. 30, Killing the Horn Fly. | C. S. Plumb, B. S. |
| 21. | No. 31, Crimson Clover in Indiana. | W. C. Latta, M. S. |
| 22. | No. 32, Stomach Worms in Sheep. | A. W. Bitting, B. S., D. V. M. |
| 23. | No. 33, Winter Oats in Indiana. | W. C. Latta, M. S. |
| 24. | No. 34, Notes from the Experiment Station. | C. S. Plumb, B. S. |
| 25. | No. 35, Shredding Corn Fodder. | C. S. Plumb, B. S. |
| 26. | No. 36, Hog Cholera; Suggestions to Swine Growers. | A. W. Bitting, B. S., D. V. M. |
| 27. | No. 37, Keeping Fall and Winter Apples. | James Troop, M. S. |
| 28. | No. 38, The Setting of Milk. | C. S. Plumb, B. S. |

SERIES RELATING TO PUBLIC HEALTH.

Severance Burrage, B. S.

- | | |
|-----|---|
| 29. | No. 1, The Nature of Sanitary Science and its Value to the State. |
| 30. | No. 2, Some Sanitary Aspects of Milk Supplies. |
| 31. | No. 3, On the Purification of Water Supplies of Cities and Towns. |
| 32. | No. 4, Typhoid Fever in Indiana, and Its Possible Connection with Water Supplies. |
| 33. | No. 5, Sewage Disposal in Cities and Towns. |

SERIES RELATING TO FOOD.

- | | | |
|-----|---|----------------------------|
| 34. | No. 1, Food Adulteration. | Percy Norton Evans, Ph. D. |
| 35. | No. 2, State Laws on Food Adulteration, with a Brief Bibliography. | William Henry Test, M. S. |
| 36. | Dietary Studies at Purdue University, LaFayette, Ind., in 1896. | Winthrop E. Stone, Ph. D. |
| 37. | The Carbohydrates of Wheat, Maize, Flour and Bread, and the Action of Enzymic Ferments on Starches of Different Origin. | Winthrop E. Stone, Ph. D. |

SERIES PREPARED BY ENGINEERING DEPARTMENT AND PUBLISHED IN TRANSACTIONS.

- | | | |
|-----|---|------------------------|
| 38. | Notes Concerning the Performance of the Purdue Locomotive "Schenectady." | W. F. M. Goss, M. S. |
| 39. | Tests of a Ten-Horse-Power DeLaval Steam Turbine. | W. F. M. Goss, M. S. |
| 40. | The Effects upon the Diagrams of Long Pipe-Connections for Steam-Engine Indicators. | W. F. M. Goss, M. S. |
| 41. | The Effect of High Rates of Combustion upon the Efficiency of Locomotive Boilers. | W. F. M. Goss, M. S. |
| 42. | A Hydraulic Dynamometer. | Jas. D. Hoffman, M. E. |

Summary of the Work of the Faculty, Published by the University.

DEPARTMENT.	No.	Pages in Each Edition.	Editions of Each.	Total Issue.	Total Pages.
Station	7	150	14,000	98,000	2,100,000
Sanitary Science	5	92	2,000	10,000	184,000
Food	4	110	2,000	8,000	220,000
Newspaper Bulletins	21	21	600	12,600	12,600
Totals	37	373	18,600	128,600	2,516,600

Published for the Faculty in Transactions.

DEPARTMENT.	No.	Pages in Each Edition.	Editions of Each.	Total Issue.	Total Pages.
Engineering Laboratory	5	115	2,000	10,000	230,000
Grand totals	42	488	20,600	138,000	2,746,600

From the above it will be seen that Purdue sent out forty-two publications during the year, having an aggregate of 488 pages, the sum of the editions amounting to 20,600, and caused to be put into circulation about 3,000,000 printed pages of scientific matter of high economic value, largely the result of original research. This is exclusive of many articles prepared by the faculty and published in various educational and scientific journals throughout the country, of the "Proceedings of the Purdue Society of Civil Engineering," which contains six addresses on scientific subjects, delivered at the University, and of many student publications of general or special interest.

The research work of the Engineering Laboratory has attracted very wide attention, and its results have appeared in many scientific publications, as well as in the transactions of scientific organizations. In addition to this the work of the laboratory has been reproduced and commented upon in seventeen different scientific publications, two of them being European; there being eighty-five different references to Purdue and its work, the matter aggregating one hundred and fifty-seven columns.

The following extracts from the series of bulletins on Sanitary Science and Food Adulteration will explain more fully the purposes of these publications :

LETTER OF TRANSMITTAL, No. 1.

Purdue University is a public institution supported in part by the State. The State has a right, therefore, to demand that the institution should make some substantial and adequate return for the money which it receives. It endeavors to perform this duty in two ways:

1. By the education of young men and young women so that they may become not merely good citizens, but that through their ability to apply knowledge they may build up the material resources of the commonwealth.
2. By the dissemination of useful information among the people by lectures and various scientific publications.

It has carried out this latter purpose for many years by the issuance of quarterly bulletins which carry information to the farmer, the fruit grower and the live stock breeder. The number of these bulletins distributed amounts to 60,000 annually.

The University has recently established a Department of Sanitary Science, and is thus enabled to make its large and well equipped chemical, biological and sanitary laboratories directly available to the people by the issuance of bulletins pertaining to public health, a subject of vital importance to every citizen of the State.

During the current University year it will publish, for general free distribution, bulletins upon the following subjects:

1. Nature of Sanitary Science and its Value to the State.
2. Some Sanitary Aspects of Milk Supplies and Dairying.
3. On the Purification of Water Supplies of Cities and Towns.
4. Typhoid Fever in Indiana and Its Possible Connection with Water Supplies.
5. Sewage Disposal in Cities and Towns.

It is hoped that these bulletins will prove especially helpful to county commissioners, city councils, county and city boards of health, and to the medical fraternity, and that through the kindly aid of the press their information may be brought to the attention of a very large proportion of the citizens of the State.

So important and wide-spreading are the problems involved in Sanitary Science that the force of the Department and the University authorities feel that no higher duty rests upon them than the dissemination of such knowledge as will tend to the maintenance and protection of public health. The work is therefore done in addition to the regular University work in order that the institution may fulfill the high obligation of serving the State in its most vital interests.

JAMES H. SMART,
President of the University.

NOTE—This series will be followed by a series of papers on Pure Foods.

LETTER OF TRANSMITTAL, No. 2.

To the Public:

Food is at once the most costly and the most essential material thing for which man strives. A large proportion of all wages is spent for food, while its preparation for the table is the chief care of the ordinary household, and finally, upon the character, quality and amount of food consumed, depends largely the physical, mental and moral condition of the race.

The truth of these general statements will be conceded by all, and on this account it is the more surprising that popular information is so limited upon the questions of food adulteration and its prevention; upon the comparative value and economy of foods; upon their proper use; upon the prevention of wastes, and many other equally important matters.

One of the modern forms of practical philanthropy is occupied with the question of teaching economy in the purchase and use of food and the application of scientific principles to its preparation, and the choice of diet. To the student in these matters it is evident that there is great need of general popular information on the subject. The authorities of Purdue University believe, therefore, that their policy of disseminating practical and useful information among the citizens of Indiana can be applied to no more important matter than this.

It is, therefore, proposed to issue a series of five or more brief bulletins upon foods, treating of the adulteration of food and its prevention; of the use and economy of foods; and of special studies upon the preparation of foods and upon dietaries. These bulletins will in part give the results of special scientific investigations made at Purdue University and will also aim to present general information from other sources bearing upon the subject. They have been prepared under the general supervision of Professor Winthrop E. Stone, Director of the Chemical Laboratory of the University.

JAMES H. SMART,

President of the University.

November 1, 1896.

V. THE COMPLETION OF THE ENGINEERING LABORATORY.

As recited in a previous report, the Engineering Laboratory, representing a cost of \$170,000, was almost completely destroyed by fire on the night of January 23, 1894. This laboratory consisted of two portions—(1) a three-story front, not quite completed; (2) the rear portion of the structure consisting of extensive working laboratories, which, with equipment, cost about \$123,000.

As shown by that report, we had after the fire an available reconstruction fund, from insurance and other sources, of \$47,754.30. We secured donations from private parties to the amount of about \$30,000, and we borrowed from the general fund about \$25,000. The entire engineering force was put to work to reconstruct some of the machinery, and students and faculty worked untiringly for many months. The result was

that the shops and some of the laboratories were restored and equipped with many additions and improvements, and when completed were valued at about \$150,000.

The General Assembly of 1895 appropriated \$25,000 with which to restore the balance to the general fund referred to above.

The front of the building, not then restored, originally cost, with the third story unfinished, \$47,000. The General Assembly was asked to appropriate \$50,000 for its reconstruction. It did appropriate \$36,000. The Board decided, however, to proceed with the process of re-erection. The front was completed, with the third story unfinished, and without the proposed lighting plant, for the sum of \$45,348.07. In order to do this the Board was obliged to use \$9,348.07 of the general fund—money which might properly have been used for other needed improvements.

I wish to report that, chiefly through the generosity of the Ladies' Matinee Musicale of LaFayette, many of the graduates of the University and of a number of public-spirited citizens of LaFayette, a clock with a peal of four bells has been placed in the tower of the new Engineering Laboratory, the completion of the installation being celebrated by appropriate exercises on April 8, 1896

The clock was furnished by the E. Howard Watch and Clock Company, and the bells by Meneely & Co., of Troy, N. Y., through the agency of C. H. Ankeny, of this city. The clock has proved an excellent time-keeper, but the bells, although fine in quality, were not found heavy enough to serve the purpose for which they were intended. The parties interested have agreed to change the present bells for others better adapted to the purpose without expense to the University. These will doubtless be in position before this report reaches the public.

VI. THE VALUE OF INDUSTRIAL EDUCATION TO THE STATE.

One of the most significant features of recent educational movements is the prominence that has been given to the subject of technical education. During the past twenty-five years a large number of institutions have been established for the purpose of educating young men, and young women also, in

such a way that they may make an application of scientific knowledge to the practical industries. These institutions have marked out new courses of study, have adopted new methods, and have made a somewhat remarkable illustration of the new education. They did not come into existence by accident, they came in obedience to a demand for them. The present age is an industrial age and calls for men who will use their knowledge in utilizing the great forces of Nature for the benefit of their fellow men. It wants men who can build better bridges, better houses and better machinery. It wants men who can grow better crops and can prevent the enormous wastage that comes from the diseases of plants and animals. It wants men who can give us better water supply and better systems of sewerage for our cities and towns. It demands men who understand the principles of sanitary science, and who know how to protect the public from impure foods and contagious diseases.

Men are needed to show us how to prevent the enormous wastage which is occurring in every department of human endeavor.

If the technical schools will turn out one man who through the application of sanitary science will add a year to the average of human life, or one who will show us how to prevent insect ravages and fungus diseases in plants, or one who will show us how to use coal in a locomotive and develop twenty per cent. of its possible power instead of five per cent., as at present, they will produce a man who will be worth as much to the community as the cost of all the technical schools in the United States for the past twenty-five years.

This is precisely what Purdue University is striving to do. The institution is not, however, pervaded by a purely commercial spirit, on the contrary its main purpose is to educate men and women, but to educate them in such a way that they will become directly and practically useful to the community. An effort is made from the beginning of their course to the end of it to give them a spirit of helpfulness and to teach them that their obligation to their fellows is limited only by their ability to serve. An effort is also made to inculcate in them a spirit of loyalty and patriotism, and to imbue them with the idea that since the State has provided an education for them, they should, so far as in them lies, use that education for her benefit.

Surely if the State provides any money for higher education she can well afford to devote money to education of this sort.

I wish now to reinforce the argument I have just made by calling your attention briefly to the experience of European countries in respect to the value of technical education.

In 1851 England built a magnificent Crystal Palace, and invited the civilized nations of the earth to make an exhibition of their natural resources, of the products of human ingenuity, and of the triumphs and trophies of modern civilization. When that exhibition was over all England stood aghast. In all those departments of labor into which artistic design and decorative skill entered France had carried off the honors.

A commission of inquiry was immediately formed, the result of which was that in less than twenty five years England had two hundred well equipped technical schools, one of which cost \$6,000,000, and four thousand other schools in which technical instruction formed a part of the curriculum. As a result England made such an advance in her commercial industries as had never before been known.

The following extract from a competent writer upon this subject will show something of the experiences of France in this matter.

"That education has to do with manual training is a fact that has been recognized in the educational systems of nearly all civilized nations, and the effect of it upon the useful arts and upon the greatness and happiness of a people has not been better illustrated in modern times than in the industrial history of France. We know that the most thorough artisans in the world are found in France, and that the whole earth pays tribute to her art and taste. She has been devastated by mighty wars, her people have been sacrificed by millions, her expenditure has been almost beyond computation, and yet to-day she is, next to Great Britain, the richest of all nations, while perhaps her people are the happiest in Europe.

"We can remember her spoliation in the Franco-Prussian War, and the heavy indemnity with which she was compelled to ransom her peace; and we can also remember how she arose as if by some supernatural influence from a prostration which would have indefinitely destroyed the industries of almost any other nation, and attained at a single step to the summit of prosperity. Just exactly how this was managed puzzled those who did not consider her cultivated arts. She had a monopoly in the markets of the world for many kinds of commodities which depend upon design and finish, and in which she had scarcely a competitor. Her skilled labor brought in its account against the world, and every nation contributed to her prosperity.

"The foundations of her success were laid when art schools were first established for the instruction of her children. Drawing and designing were taught to thousands of pupils, and their eyes and tastes were at the same time instructed by the beautiful statues and pictures of the masters.

"These schools have been multiplied until they exist in all the cities and manufacturing communities in France; and the French workman has become the most accomplished artisan that the world has ever seen.

"An annual importation into this country alone of millions' worth of the productions of French industrial art is evidence that it is not the pauper labor of Europe, but skilled labor of the highest order, that affects our own industries.

"The establishment of these schools by the French accounts largely for their superiority in architecture, engraving, and pottery, as well as for the beauty and elegance of their silks, satins, muslins and brocades; and perhaps it is not too much to say that in all the arts applied to industry the superior excellence of their fabrics is confessed by other manufacturing nations. It is not, therefore, surprising that France has given such a splendid example of industrial or art education."

Such has been also the experience of Germany. It is worthy of note that in certain large districts the value of her agricultural products has nearly doubled within the past thirty years; and Germany has seventy technical schools.

VII. THE STATE'S OBLIGATION TO PURDUE.

In order to show that Purdue is a State institution, and that the State is under an obligation to maintain it, I quote the following from our last annual catalogue, under the heading of

ORIGIN OF PURDUE.

PURDUE UNIVERSITY is an institution organized under an Act of Congress, approved July 2, 1862. This act appropriated public lands to the several States for the purpose of aiding in the maintenance of colleges "where the leading objects shall be, without excluding other scientific or classical studies, and including military tactics, to teach such branches of learning as are related to agricultural and mechanical arts." This act provides that the State shall establish and maintain not less than one college as described above.

It also provides certain conditions under which this shall be done. Among these are:

First—"No portion of said fund, nor the interest thereon, shall be applied directly or indirectly, under any pretense whatever, to the purchase, erection, preservation or repair of any building or buildings.

Second—"Any State which may take and claim the benefit of the provisions of this act shall provide within five years, at least, not less than one college, as described in the fourth section of this act, or the grant to such State shall cease; and said State shall be bound to pay the United States the amount received of any lands previously sold, and that the title to purchase under the State shall be valid."

The State of Indiana, by an act approved March 6, 1865, obligated itself as follows:

"The State of Indiana accepts and claims the benefits of the provisions of the acts of Congress, approved July 2, 1862, and April 4, 1864, and assents to all the conditions and provisions in said acts contained."

The State has accepted from John Purdue, and other citizens of Tippecanoe County, donations to the amount of \$230,000, and pledged the faith of the State to the adequate and perpetual maintenance of the institution. Also from Amos Heavilon the sum of \$35,000 with similar pledge and guarantee.

LOCATION.—By act of the Legislature of 1869 the institution thus provided for was located in Tippecanoe County, and the faith of the State pledged that the location so made shall be permanent.

THE NAME PURDUE UNIVERSITY was also established by legislative act of 1869, as follows: "In consideration of the said donation by John Purdue, amounting to one hundred and fifty thousand dollars, and of the further donation of one hundred acres of land appurtenant to the institution, and on condition that the same be made effectual, the said institution, from and after the date of its location as aforesaid, shall have the name and style of "Purdue University"; and the faith of the State is hereby pledged that such name and style shall be the permanent designation of said institution, without addition thereto or modification thereof."

It thus appears that the University, while bearing the name of John Purdue, is an institution exclusively under State control, and that Government aid was originally extended not for establishing, but for aiding in the maintenance of a State college of a specific kind. This intention is again clearly intimated in the Morrill Act of 1890, by which the United States Government makes additional appropriation "for the more complete endowment and maintenance of colleges for the benefit of agriculture and the mechanic arts."

Purdue University was, therefore, not established by the United States Government, nor by John Purdue, but it was established by the State of Indiana; and not only so, but in accepting the donations from the Government and from John Purdue, the State obligated itself to adequately maintain the institution forever.

While it is to be admitted that the State has so far discharged this obligation well, it is easy to show that for every dollar she has put into Purdue the institution has received two dollars from other sources.

Purdue has received from various sources other than the State of Indiana donations, as follows:

Original land grant	\$340,000.00
United States Treasury, Hatch fund.....	127,500.00
United States Treasury, Morrill act	148,000.00
John Purdue and others	230,000.00
Amos Heavilon	35,000.00
Donations of machinery, apparatus, etc	50,000.00
Total.....	<u>\$930,500.00</u>

Since the organization of the institution the State of Indiana has appropriated for permanent improvements the sum of

\$268,500, while the value of all the University property absolutely owned by the State, upon its present valuation, is \$620,000. In other words, the State now has two dollars and thirty cents' worth of property for every dollar that she has appropriated for permanent improvements. In what way has the State ever received so much for so little? Can not the State under these circumstances afford to deal with Purdue with a liberal hand?

VIII. THE NEEDS OF THE INSTITUTION.

In order to place the front of the Engineering Laboratory under roof and finish the first and second stories we have been obliged, as has been stated in a previous section, to use money from the general fund which the Board had hoped to apply to other purposes. This deficit has placed a great burden upon the University.

If the entire amount which we supposed was appropriated to us by the last General Assembly, for the eight months beginning November 1, 1895, and ending June 30, 1896, namely, \$22,500, had been realized, this embarrassment would have been relieved, but \$9,500 of that amount has not been received by the University, owing to some diversity of opinion as to the terms of the law.

It will be seen that there is a necessity that the Board should secure this amount of \$9,500 from the Legislature if it should appear that it is not still due us under the statute.

2. The history of the permanent improvements made at the University is a history of large enterprises successfully completed, with but limited appropriations therefor. While, as a result of this, the State possesses a very large amount of tangible property as compared with the appropriations she has made, the process by which this result has been reached has been attended by some serious difficulties. For example, the Library has been neglected.

The growth of scientific literature has been so rapid in recent years that constant additions must be made to the library of any institution which makes any pretense whatever of engaging in scientific research. A starved library makes starved professors, and starved professors make starved students.

Again, we have eighteen buildings, some of which are nearly twenty years old. These need thorough overhauling and extensive repairs.

Some of our machinery is antiquated and some of it is worn out and must soon be replaced. For the purposes named in this paragraph I should think \$12,000 would be needed.

3. The report of Professor Latta, in charge of the School of Agriculture, submitted herewith, presents the needs of the schools of Agriculture, Horticulture and Veterinary Science. You will observe that he asks for an appropriation of \$17,000, for the purposes of enlarging the veterinary hospital, building new green houses, enlarging Agricultural Hall and fitting up new laboratories therein.

I fully sympathize with Professor Latta's expression of the needs of his department, and believe that it would be a wise expenditure of money if he could have all that he asks for.

4. From the report of Professor Goss, in charge of the School of Mechanical Engineering; submitted herewith, it will be seen that we have added so much to our machinery that we have not the power to run it. We should, I think, have at once a new power-house with a boiler capacity of six hundred horse-power. Professor Goss estimates the cost of this at \$16,300.

He also estimates the cost of the completion and full equipment of the front of the Engineering Laboratory at \$6,425, making a total cost for the Engineering Laboratory of \$22,725. I think a part of this work only should be undertaken during the present year. It is my opinion that \$15,000 would be a moderate amount to cover the improvements which it would be wise to attempt at this time.

5. The Electrical Department has grown with great rapidity and therefore needs larger quarters. Furthermore it is well known that the rapid advance in the science of electricity requires a constant renewal of apparatus and as constant additions thereto. In no department of our work do the apparatus and machinery become obsolete so quickly and in none is there such a demand for continued outlay.

I hand you herewith a detailed report from Prof. Goldsborough, in charge of the School of Electrical Engineering, showing that he estimates the cost of the improvements which he desires at \$17,500. I have thought it not wise to ask for

this amount at this time and would, therefore, recommend that we make but a portion of these improvements at present, and ask for but \$10,000 for this purpose.

These requests, amounting to \$54,000, are I believe for necessities. They are not based upon estimates padded in view of having them cut in two. They are the result of the most careful computations made by men who understand what they want and how much it will actually cost. I should hope, therefore, that these facts could be so presented to the Legislature that the suggested appropriation would be made.

6. I have in former reports urged upon you the necessity of providing for a Chapel. The one we now use is in the third story of the Main Building, and occupies room needed for other purposes. It seats but three hundred and fifty, and we have at the present time about six hundred and fifty students.

For the past five years we have never been able to hold general chapel exercises, and of course commencement exercises and other general entertainments are, so far as this audience-room is concerned, entirely out of the question.

7. If it were of any use to do so, I could present a very strong argument for the erection of a Gymnasium and Bath Rooms. Yale already has a gymnasium that cost \$250,000, and the President of Columbia College has recently asked for \$350,000 for a similar purpose. With these facts in view, if we were to ask for \$25,000 it should not be regarded as an extravagant demand.

Respectfully submitted,

JAMES H. SMART,

President.

TREASURER'S REPORT.

As Treasurer of Purdue University I hereby submit my report of all moneys received for the year ending October 31, 1896:

From the State of Indiana, interest on State bonds	\$17,000 00
From State of Indiana, reimbursement	12,500 00
From State of Indiana, for reconstruction of engineering laboratory	6,000 00
From State of Indiana, part of annual appropriation	15,000 00
From State of Indiana, educational institution tax.....	30,509 22
From miscellaneous sources	23,380 88
<hr/>	
Total.....	\$104,390 10

As Treasurer of Purdue University I hereby submit my report of all moneys received for the year ending June 30, 1896:

From the U. S. Government seventh installment Morrill Fund.....	\$21,000 00
<hr/>	
Total.....	\$21,000 00

JAMES M. FOWLER,
Treasurer.

Expenditures from General Fund for Year Ending October 31, 1896.

Salary of Faculty.....	\$25,758 50
Supplies	12,406 02
Care of buildings	4,765 20
Improvements.....	4,424 85
Apparatus	2,025 43
Furniture and fixtures	2,040 98
Care of grounds and greenhouse	1,600 65
Labor	1,510 68
Employees	1,320 00
Books and periodicals.....	1,252 80
Repairs	1,125 00
Catalogues, envelopes and stamps	1,075 78
Lectures, principally for short course in agriculture.....	838 60
Insurance	777 74
Advertising.....	649 95
Commencement expenses, including diplomas and tent	686 14
Express, freight and hauling.....	587 39
Printing and stationery	485 75
Postage.....	363 61
Rebate of fees	344 96
Clock and chimes.....	361 51
Trustee' mileage and per diem	311 25
Traveling expenses to Institute and other meetings	262 81
Expense securing Faculty	153 70
Telephones.....	106 45
Dedication of Engineering Laboratory.....	103 86
Publications, bulletins	115 58
Trips of inspection with classes	68 20
Telegrams	31 44
Miscellaneous	20 50
Total	\$65,575 33

The above is a correct statement of expenditures from the General Fund for year ending October 31, 1896.

E. A. ELLSWORTH,
Secretary Board of Trustees.

Endowment Fund, Year Ending October 31, 1896.

Salaries of faculty \$13,725 04

The above is a correct statement of expenditures from the Endowment Fund for year ending October 31, 1896.

E. A. ELLSWORTH,
Secretary Board of Trustees.

Seventh Installment of Morrill Fund.

Paid salaries of professors and instructors \$21,000 00

The above is a true statement of expenditures from the seventh installment of the Morrill Fund.

E. A. ELLSWORTH,
Secretary Board of Trustees.

BIENNIAL REPORT

—OF THE—

INDIANA

STATE NORMAL SCHOOL,

—CONTAINING—

Reports of the President of the Board of
Trustees, the President of the Faculty,
the Secretary of the Board
and of the Treasurer,

—FOR THE—

TWO YEARS ENDING OCTOBER 31, 1896.

TO THE GENERAL ASSEMBLY.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

REPORT OF THE PRESIDENT OF THE BOARD OF TRUSTEES.

To the Honorable, the General Assembly of Indiana :

In compliance with the provisions of Section 13 of the act creating a State Normal School, approved December 20, 1865, I have the honor to transmit the report of the Board of Trustees of the Indiana State Normal School covering the two years ending October 31, 1896, for your consideration, and would respectfully refer to the attached report of the President of the faculty for a comprehensive statement of its scholastic condition, and to the itemized report of the Secretary and Treasurer for its exact financial status, both of which I hope justify the expectation that they may be found satisfactory.

That the importance of this school and its value to the State in its educational progress and intellectual development may be brought to mind, it may be well to call attention to the fact that nearly 15,000 persons have received instruction there and that the schools of the State have largely received the benefit therefrom; that during the last year 1,570 different persons were students in this school, and that ninety-one counties of the State were represented in this manner; that while the cost *per capita* to the State is less than that of most other educational institutions of similar character, the results attained are in the reverse ratio, the repeated testimony of the expert Boards of Visitors having been that it is one of the best examples of what a Normal School should be.

The course of study is adapted to all who come possessed of the elements on which the education of a teacher should be built, and the highest incentives of self-government, character and proficiency are constantly maintained.

That the school may continue to go forward in its usefulness and be able fully to meet the increasing demands for its advantages made by the people of the State, the careful consideration of the General Assembly to the recommendations made by the President of the Faculty and the official Board of Visitors is respectfully invoked.

Respectfully submitted,

WILLIAM H. ARMSTRONG,

President Board of Trustees.

REPORT OF THE PRESIDENT OF THE FACULTY.

HON. WILLIAM H. ARMSTRONG,

President Board of Trustees Indiana State Normal School:

I submit herewith a report of the scholastic condition of the State Normal School for the two years ending October 31, 1896:

THE FACULTY.

There are at present thirty-one members of the faculty, as follows: The President, who is also head of the Department of History and Philosophy of Education; a Vice-President, who is head of the Department of Mental Science; twelve additional heads of departments, twelve assistant instructors, five training-school teachers and two laboratory assistants—thirty-one instructors in all. Owing to the larger attendance in the spring term of each year it is necessary to employ a number of additional teachers for this term.

No departments have been added since the report of two years ago, and no changes have been made in the organization, except that the Departments of Latin and German have been combined and have been placed under the direction of one professor. Besides effecting a considerable reduction in the cost of teaching these subjects, it was thought that to put the combined departments under the direction of one professor, with a sufficient number of assistants would unify more fully the work and make the two subjects mutually helpful in a greater degree. Thus far there seems no reason for regretting the change.

In former years many of the classes in the school were entirely too large to be properly instructed. I am glad to be able to say that, for the first time in several years, there are only a few classes that are considered too large to be taught efficiently as now organized. The increased revenue derived from the direct tax levied in accordance with the law enacted by the last General Assembly, has made it possible to employ

several additional teachers and thus divide many of the classes that would otherwise have been too large for satisfactory work.

Nothing else could have been so great a gain to the school as this. In all successful teaching every individual class must be reached by the teacher and tested frequently enough to be kept in a state of active attention. In a Normal School it is of the highest importance that classes shall not be so large as to render this impossible. Every class exercise in a Normal School should be a model of its kind, and nothing more seriously interferes with this than classes unwieldy by reason of excessive numbers.

THE STUDENTS.

The table given on page 14 of this report shows that in the year ending October 31, 1895, 1,535 different students attended the school, and that in the past year 1,570 attended for a greater or less period. The average attendance per term is about 800. The school has grown very rapidly in recent years, notwithstanding the conditions of admission have been made somewhat stricter and the standard for graduation has been raised.

Since the Normal School was organized and is maintained by the State "to prepare teachers for teaching in the common schools of Indiana," it has at all times limited its work to conferring a thorough, systematic, teacher's knowledge of the subjects taught in the elementary and high schools of the State, and such strictly professional subjects as are fitted to enable the teacher to understand the principles which underlie his vocation. The constant effort has been to make the work of the school thorough, fundamental and organic—to lead students to a mastery of the *principles* of the subjects studied and of the art of teaching.

A long experience with the various classes of students who have attended the school has shown the necessity for a better grade of scholarship and for greater maturity on the part of those attempting the work. The average girl of sixteen or boy of eighteen who has only the general knowledge of the common school branches acquired in the district or grade school has been found unable to pursue the Normal School course to advantage. It has been found necessary to require

this class of students to spend a considerable time in preparatory study before undertaking the work proper of the Normal School.

Township, town and city high schools, and other schools for secondary education, have so multiplied and increased in efficiency in recent years that the Normal School wishes no longer to duplicate the work of these schools. It will, therefore, admit hereafter only such persons as give evidence of the ability and scholarship necessary to pursuing its course with a fair degree of success.

Hereafter it will admit without examination only the following classes of new students: College and university graduates, graduates of commissioned high schools, and persons holding one or more three-year, two-year or one-year county licenses. Persons not included in these classes will be required to pass such thorough examinations in the common school branches as will show their fitness to enter the school. It is strongly advised that all persons secure the grade of license required before presenting themselves for admission. It is believed that a strict adherence to these conditions will enable the school to accomplish in higher degree the object for which it was created.

It is the testimony of most county and city superintendents and school trustees that there is a large surplus of teachers. Probably several thousand persons hold teachers' licenses in Indiana to-day and desire to teach who can not secure schools. The demand, therefore, is not for a larger number of teachers, but for a higher grade of ability, a larger scholarship and a more thorough professional training on the part of those who offer themselves as teachers. The State Normal School must justify its organization and maintenance by securing as students persons of good natural ability and fair attainments and by conferring on these persons a scholarship and professional preparation which shall constantly tend to elevate the standard of public school work in the state. With a reasonable standard of admission, the school can probably meet the demands on it for several years to come.

THE NEW BUILDING.

Realizing several years ago that the one large building occupied by the school would soon be insufficient to accommodate

the large number of students asking admission, the trustees purchased a piece of ground about 100 feet square adjoining the property already owned, with the view of erecting at some time an additional building thereon. The need of additional room became apparent very soon. It was seen that the library, although quite a large room, was entirely insufficient. The library, consisting of about 16,000 volumes, has been built up almost entirely by the library fees paid by students.

It was deemed important, too, to have the chemical and physical laboratories in a separate building, that the main building might be free from disagreeable odors arising from these, and that greater safety might exist.

In 1893, a request was made for an appropriation with which to construct an additional building. The amount asked for was for the construction of the building alone, no furnishings of any kind being contemplated. It was thought that temporary furniture could be used until the General Assembly might feel justified in making an appropriation for the proper furnishing of the building. An appropriation of \$40,000 was made, which proved just about sufficient to enclose the building. It lay idle, therefore, and of no use to the school until the last General Assembly met. A request was then made for \$38,000, with which to complete and equip the building. This request was based on careful estimates as to the cost. An appropriation of \$20,000 was made, and with this, supplemented by several thousand dollars taken from other funds, the second and third stories of the building were completed and equipped for use.

The first and fourth floors are entirely in the rough. It would be of the greatest advantage to the school if these could be completed and placed at the disposal of the school for every day use. The architect estimates that it would require about \$15,000 to complete and furnish these two stories.

It would also be a step in the line of economy, and of great advantage to the school as well, if a small lot for the enlargement of the boiler house could be bought, a dynamo put in, the old building wired for electric lights, and the institution itself take charge of the lighting of its buildings. It is estimated that this could be done for about \$5,000, making the total appropriation desired \$20,000.

LIBRARY.

The library is now comfortably situated in the new building. The entire floor above the basement is devoted to library purposes, thus giving ten thousand square feet to this department. Light, heat, ventilation, architectural beauty, and, above all, adaptability to the special purpose in view, have been prime considerations in its construction.

The library at present contains sixteen thousand volumes. The old library having been entirely destroyed, the books we have are new and carefully selected with reference to the special needs of our school, so that the number alone gives no real conception of its working capacity. A special fund enables us to buy such books and periodicals as are needed in the regular work of the school, and the design is to build up gradually and steadily a large reference library especially strong in pedagogical literature.

PURPOSE, AIM, METHODS.

The library is the general laboratory, or workshop of the whole school. Text-books serve their more legitimate function as guides in the various subjects taught, and students are sent to the library with references more or less specific, according to their advancement and individual needs, to the leading authorities and sources of information.

Instruction in the use of the library is both general and specific. The general instruction is given in the form of talks, explaining briefly (1) the nature and practical use of the card catalogue, the classification and shelf arrangement of the books, the rules and regulations; (2) the use of the title pages, prefaces, indexes, table of contents, etc.; (3) the scope and special value of the general reference books, such as encyclopedias, dictionaries, atlases, periodicals and bibliographies. Besides instruction of this kind, individual assistance, so far as other duties of the librarian will permit, is rendered (1) in the search for the latest and best information upon particular topics, (2) in the guidance and selection of material for collateral and general reading, and (3) in explaining the mechanical contrivances of various authors, and in helping to answer the great number of questions that continually arise.

An immediate advantage of such a method of instruction is the conversion of the routine and spiritless recitation of the old regime into a varied and animated presentation of subject-matter gleaned from many eminent authors and original documents. There is here also an opportunity to meet those individual needs that are determined by the laws of heredity, physiological accidents, and previous training. A knowledge of books, a breadth of view, and an enthusiasm for truth are permanent and sure results of a right use of the library. By systematic training in scholarly habits of research, it is believed that a pupil will leave this school greatly strengthened and enabled to pursue successfully his life work.

NEEDS.

Though much has been done the past year to furnish and equip this department in a manner befitting its importance to the school, much remains to be done even in a material way; but our most urgent need is additional assistance for the care and cataloguing of books. The students themselves also need assistance which we can not at present render in any adequate manner. In the meantime, the library hours should be extended, and provision made for opening in the evening.

STATISTICS.

The following table exhibits the number enrolled during each term since the organization of the school, the average term enrollment for each year, and the whole number of different students for each year.

Hamilton.....	6	Owen.....	52	White.....	21
Hancock	37	Parke ..	50	Whitley.....	6
Harrison	10	Perry.....	6		

The attendance from Vigo County includes many who have removed to Terre Haute from other counties to have the advantages of the school.

Since the opening of the school, in 1870, other states and countries have been represented, as follows :

Arizona.....	2	Kansas	11	Oklahoma.....	1
Arkansas	2	Kentucky	33	Ohio.....	71
Canada.....	2	Louisiana	1	Pennsylvania	7
Connecticut.....	1	Massachusetts ..	2	South Dakota.....	1
Florida	1	Michigan	7	Texas.....	2
Georgia.....	1	Minnesota.....	2	Vermont.....	1
Germany.....	2	Missouri	11	Virginia	2
Idaho.....	1	Nebraska	5	West Virginia...	1
Illinois.....	383	New York.....	3	Wisconsin.....	3
Iowa	3	North Carolina.	4	Unknown.....	51

Total number of different students since the organization of the School, 13,783.

Of the 873 graduates and the 12,910 undergraduates of the institution, it is impossible to determine what proportion are now teaching, but a large majority, it is known, are actively engaged in the school work of the state. It is doubtful if there is a township in the state which has not, at some time, had one or more teachers from this institution, and probably the public schools of no county of the state are at this time without several representatives of the Normal School. Capable graduates and undergraduates experience no difficulty in securing positions at remunerative salaries. The supply of such persons, qualified for systematic, thorough school work, has for several years proved quite unequal to the demand.

FOUR YEARS' COURSE.

FIRST YEAR.	1st Term.	*Physical Geography.	*Reading.	*Arithmetic.	*English Grammar.	*Penmanship.
	2d Term.	*Physical Geography.	*Reading.	*Arithmetic.	*English Grammar.	Vocal Music.
	3d Term.	Political Geography, with Map Drawing.	*United States History.	*Physiology.	*English Grammar.	Vocal Music.
SECOND YEAR.	4th Term.	*Educational Psychology. (Gen. Nature of Mind.)	*United States History.	*Physiology.	Drawing.	Vocal Music. Latin. German.
	5th Term.	*Educational Psychology. (Stages of Knowing.)	Chemistry.	Drawing.	*Rhetoric and Composition.	Latin. German.
	6th Term.	*Educational Psychology. (Feeling.)	Chemistry.	Drawing. Botany.	Rhetoric and Composition.	Latin. German.
THIRD YEAR.	7th Term.	*Educational Psychology. (Will.)	Chemistry.	Algebra.	General History.	Latin. German.
	8th Term.	*Theory of the School.	*Methods. (Language, Reading and Arithmetic.)	Algebra.	General History.	Latin. German.
	9th Term.	*History and Philosophy of Education.	*Methods. (Geography and History.)	Algebra.	General History.	Latin. German.
FOURTH YEAR.	10th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	11th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	12th Term.	*Practice in Training School.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.

Fifty credits are necessary to complete this course. The subjects marked thus * are required; the other subjects are elective.

All students are required to present a satisfactory thesis before graduating.

COURSE FOR GRADUATES OF COMMISSIONED HIGH SCHOOLS.

(THREE YEARS.)

FIRST YEAR.	1st Term.	*Physical Geography.	*Reading.	*Arithmetic.	*English Grammar.	*Penmanship.
	2d Term.	*Physical Geography.	*Reading.	*Arithmetic.	*English Grammar.	Vocal Music.
	3d Term.	Political Geography with Map Drawing.	*United States History.	*Physiology.	*English Grammar.	Vocal Music.
SECOND YEAR.	4th Term.	*Educational Psychology. (General Nature of Mind.)	*United States History.	*Physiology.	Drawing.	Vocal Music. Latin. German.
	5th Term.	*Educational Psychology. (Stages of Knowing.)	Chemistry.	Drawing.	*Rhetoric and Composition.	Latin. German.
	6th Term.	*Educational Psychology. (Feeling.)	Chemistry.	Drawing. Botany.	Rhetoric and Composition.	Latin. German.
THIRD YEAR.	7th Term.	*Educational Psychology. (Will.)	Chemistry.	Algebra.	General History.	Latin. German.
	8th Term.	*Theory of the School.	*Methods. (Language, Reading and Arithmetic.)	Algebra.	General History.	Latin. German.
	9th Term.	*History and Philosophy of Education.	*Methods. (Geography and History.)	Algebra.	General History.	Latin. German.
FOURTH YEAR.	10th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	11th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	12th Term.	*Practice Training School.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.

Thirty-eight credits are necessary to complete this course.

The subjects marked * are required; the remaining subjects may be elected by the student. All students are required to present a satisfactory thesis before graduating.

COURSE FOR PERSONS HOLDING THREE YEARS' COUNTY LICENSE.

(THREE YEARS.)

FIRST YEAR.	1st Term.	†Physical Geography.	†Reading.	†Arithmetic.	†English Grammar.	†Penmanship.
	2d Term.	†Physical Geography.	†Reading.	†Arithmetic.	†English Grammar.	Vocal Music.
	3d Term.	Political Geography, with Map Drawing.	†United States History.	†Physiology.	†English Grammar.	Vocal Music.
SECOND YEAR.	4th Term.	*Educational Psychology. (General Nature of Mind.)	†United States History.	†Physiology.	Drawing.	Vocal Music. Latin. German.
	5th Term.	*Educational Psychology. (Stages of Knowing.)	Chemistry.	Drawing.	*Rhetoric and Composition.	Latin. German.
	6th Term.	*Educational Psychology. (Feeling.)	Chemistry.	Drawing. Botany.	Rhetoric and Composition.	Latin. German.
THIRD YEAR.	7th Term.	*Educational Psychology. (Will.)	Chemistry.	Algebra.	General History.	Latin. German.
	8th Term.	*Theory of the School.	*Methods. (Language, Reading and Arithmetic.)	Algebra.	General History.	Latin. German.
	9th Term.	*History and Philosophy of Education.	*Methods. (Geography and History.)	Algebra.	General History.	Latin. German.
FOURTH YEAR.	10th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	11th Term.	*History and Philosophy of Education.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.
	12th Term.	*Practice Training School.	Zoölogy. Physics.	Geometry.	Literature.	Latin. German.

Fifty credits are necessary to graduation in this course. Fourteen of this number are given without examination or class study—the subjects marked thus †. The subjects marked thus * are required—twelve. The remaining twenty-four credits may be made in the elective subjects.

COURSE FOR COLLEGE GRADUATES.

(ONE YEAR.)

First Term.	Educational Psychology. (General Nature of Mind.)	Educational Psychology. (Will.)	History and Philosophy of Education.	Observation in Training School.
Second Term.	Educational Psychology. (Stages of Knowing.)	Theory of the School.	History and Philosophy of Education.	Methods. (Language, Reading and Arithmetic.)
Third Term.	Educational Psychology. (Feeling.)	Practice in Training School.	History and Philosophy of Education.	Methods. (Geography and History.)

EXPLANATION OF COURSES OF STUDY.

The State Normal School maintains four courses of study, as follows: (1) A four years' course; (2) an abridgment of this course for graduates of commissioned high schools; (3) an abridgment of the same course for persons holding one or more three years' licenses, and (4) a course for college graduates.

The course of four years embraces all the subjects that are found in any and all the courses provided. It is designed to meet the needs of those persons that enter the school having the minimum scholarship. The object of this course is to give as thorough and complete a preparation for common school teaching as can be conferred in the period named. It will be noticed that the course includes much more work than can be done in four years; but the student of average ability, and who possesses a fair knowledge of the common school branches on entering can make credits enough in four years to graduate. Fifty credits are necessary to graduation. In this number penmanship and music are included, and may be taken as fifth studies. Four subjects carried successfully throughout the course, with music and penmanship two terms as fifth studies, give the required credits for graduation. The common school branches and the entire line of professional work are required—about two years. The remaining subjects necessary to graduation may be elected by the student, with the advice of the faculty.

The course of three years for graduates of commissioned high schools is the same as the four years' course, except that such graduates are given a credit of one year—twelve credits—and are thus enabled to graduate in three years. Such graduates are required to take the common school branches and the entire professional work of the course. The remaining subjects may be elected by the student, with the advice of the faculty. Thirty-eight credits are necessary to graduation in this course.

High school graduates usually have only such knowledge of the common school branches as they have acquired at an early age and in the grades below the high school. For this reason they are required to spend one full year in a thorough, professional study of these branches in the Normal School course.

This credit of one year is given to graduates of commissioned high schools, not because they are supposed to have a teacher's professional knowledge of the subjects pursued in the high school, but on the ground that the high school course has conferred a general culture that fairly entitles them to this credit. The thirty-eight credits necessary to graduation in this course must all be made by actual class work in the institution, or by thorough, extended examinations on the subject-matter required for each credit.

A second three years' course is provided for those persons who possess a thorough knowledge of the common school branches. Persons holding one or more three years' county licenses are credited with the common branches—fourteen credits—and are thus enabled to complete the course in three years. Thirty-six credits made in the School by actual class work, or by thorough and extended examinations on the subject-matter required for the credits, are necessary to graduation in this course. Of these the eleven professional subjects, which are starred in the tabulated statement, are required; the remaining twenty-five credits may be made in subjects elected by the student, with the advice of the faculty.

The course of one year for college graduates has been organized to meet the needs of those graduates of colleges and universities who wish to enter the field of teaching and superintending schools, and who feel the need of professional training for this work. It will be noticed that the instruction is of a strictly professional character. In planning this course it is assumed that the student has a liberal and accurate knowledge of the subjects required to be taught in the public graded and high schools. It is further assumed that this academic knowledge and training, important and necessary as it is, does not alone qualify one for the delicate and responsible work of teaching and managing schools. It is sought, therefore, to give the student that professional knowledge and skill that belong peculiarly to the teaching profession. Only such persons are eligible to this course as have graduated from some

college or university maintaining a thorough college course of not less than four years.

Persons holding a life state license to teach in Indiana are credited with two years on the course, and are thus enabled to graduate in two years. Such persons are required to take the eleven professional subjects of the course, and are permitted to elect the subjects in which to make the remaining thirteen credits required for graduation.

The courses of study are planned for students of average ability and attainments. Persons of greater ability and attainments can complete the course in less than four years; those of less ability and scholarship will need more than four years to graduate.

HIGH SCHOOLS.

The following are the High Schools of the State whose graduates are entitled to a year's credit on the course :

CITY OR TOWN.	COUNTY.	SUPERINTENDENT.
Albion.....	Noble	W. A. Fox.
Alexandria	Madison	I. V. Busby.
Amboy	Miami.....	Philip M. Hoke.
Anderson	Madison	John W. Carr.
Andrews	Huntington	J. C. Comstock.
Attica	Fountain	W. A. Millis.
Auburn.....	Dekalb	B. B. Harrison.
Aurora	Dearborn	J. R. Haston.
Bedford	Lawrence	W. E. Alexander.
Ben Davis	Marion	Michael Reiley.
Bloomfield	Greene	Walter T. Brown.
Bloomington	Monroe	W. H. Fertich.
Bluffton	Wells.....	W. P. Burris.
Boonville	Warrick	Charles E. Clark.
Bourbon	Marshall.....	B. McAlpine.
Brazil	Clay.....	John C. Gregg.
Brookville	Franklin	Noble Harter.
Butler	Dekalb	Harry E. Coe.
Cambridge City	Wayne	Paul Wilkie.
Carthage.....	Rush	J. Edwin Jay.
Clinton	Vermillion.....	H. P. Leavenworth.
Columbia City	Whitley	(Miss) L. E. Melhintch.
Columbus.....	Bartholomew.....	J. A. Carnagey.
Connersville	Fayette	W. F. L. Sanders.
Converse	Miami.....	H. S. Bowers.
Crawfordsville	Montgomery	I. N. Wellington.
Crown Point	Lake	Frank T. Heighway.
Danville	Hendricks	P. V. Voris.
Decatur	Adams	A. D. Moffett.
Delphi.....	Carroll	W. S. Almond.
Dublin	Wayne	Samuel Plasket.
Edinburg	Johnson	Charles F. Patterson.
Elkhart.....	Elkhart.....	D. W. Thomas.
Elwood	Madison	Thos. F. Fitzgibbon.
Evansville	Vanderburgh	W. A. Hester.
Frankfort.....	Clinton	B. F. Moore.
Franklin.....	Johnson	Will Featheringill.
Fort Wayne.....	Allen.....	Justin N. Study.
Fowler	Benton	Burton B. Berry.
Garrett	Dekalb	George M. Hoke.
Gas City	Grant	W. O. Warrick.
Goodland	Newton	J. C. Dickerson.
Goshen	Elkhart.....	W. H. Simms.
Gosport.....	Owen	W. O. Hiatt.
Greencastle	Putnam.....	R. A. Ogg.
Greenfield	Hancock.....	George S. Wilson.
Greensburg	Decatur.....	Will P. Shannon.
Hagerstown	Wayne	Lee Ault.
Hammond	Lake	W. C. Belman.
Huntingburg	Dubois	J. T. Worsham.

HIGH SCHOOLS—Continued.

CITY OR TOWN.	COUNTY.	SUPERINTENDENT.
Huntington.....	Huntington.....	Robert I. Hamilton.
Indianapolis.....	Marion.....	David K. Goss.

CONDITIONS OF ADMISSION.

First. Sixteen years of age, if females, and eighteen, if males.

Second. Good health.

Third. Satisfactory evidence of undoubted moral character.

Fourth. A pledge that the applicant will, if practicable, teach in the common schools of Indiana a period equal to twice that spent as a student in the Normal School.

Fifth. A fair knowledge of the following subjects: Spelling, Writing, Reading, English Grammar, Geography, United States History, Physiology and Arithmetic.

The State Normal School has been at work for more than twenty-six years. In this period it has had nearly thirteen thousand different students. This number has included young men and women of nearly all grades of ability and scholarship. A considerable number of college graduates have taken the course provided for such persons; a large number of graduates of commissioned high schools and other schools of equal rank have pursued the course arranged for this class of students; by far the larger proportion of this number have been persons who had little or no scholarship beyond the eight legal or common branches.

CERTIFICATES AND DIPLOMAS.

Section 4557 of the school law of Indiana reads as follows: "The Board of Trustees is authorized to grant, from time to time, certificates of proficiency to such teachers as shall have completed any of the prescribed courses of study, and whose moral character and disciplinary relations to the school be satisfactory. At the expiration of two years after graduation, satisfactory evidence of professional ability to instruct and manage a school having been received, they shall be entitled to diplomas appropriate to such professional degrees as the Trustees shall confer upon them, which diploma shall be considered sufficient evidence of qualification to teach in any of the schools of the State."

Graduates who make application for diplomas under the provisions of the law are required to produce certificates of their success in instruction and school management and as to the number of months taught, from both county superintendents and township trustees, if they have taught in the country, or from superintendents of graded schools of towns or cities and the trustees of such schools if they have taught in towns or cities. Such certificates should be sent to the president of the school at least one month before the close of the academic year.

By a rule of the board of trustees, satisfactory evidence of twelve months' successful experience in teaching, after completing the course of study, entitles the graduate to the diploma of the institution.

As a means of promoting still greater thoroughness on the part of those nearing graduation from the school, the board of trustees, by a recent action, requires "that all candidates for graduation from the Normal School shall be required to hold a county license to teach for a period of not less than two years; said license having been issued within the five years next preceding the date of commencement for the given year. Or that such person shall receive a grade in an examination conducted by the faculty on the questions used in the county examination that would entitle them to a license for not less than two years, if the examination were taken under a county superintendent."

DISCIPLINE OF THE SCHOOL.

The end of all school government and discipline, intelligently conceived and administered, is the rational self-control and self-direction of the pupil. This is to be the outcome in the pupil. The effort is made to derive all rules of government from the inherent nature and purposes of the organization itself. This is the true basis of such rules; from this alone they derive their authority, and not from the teacher's will and utterance. A system of school regulations which aims only at arbitrary restraint, without leading the pupil to order his conduct by clearly conceived principles of right doing, lacks the most essential educative qualities. The formation of correct habits of thought and action, the development of worthy character—these are the true aims of school discipline. The discipline of the Normal School is administered in this general thought and spirit. Students are led to see the reasonableness of the requirements made of them, so that their obedience may be intelligent and educative. In respect to discipline, as in all other particulars, the Normal School seeks to make itself in fact what it must be by definition—a model school.

EXPENSES.

Board, including fuel and light, can be had in good families at \$4 to \$5 per week, according to quality of accommodations. There are good facilities for self-boarding and for club-boarding in the city at a cost of \$2.50 to \$3.50 per week. Nearly all the students board in clubs, thus reducing their entire expenses to \$3.50 per week for good accommodations. The expenses of many do not exceed \$3 per week. The only charge made by the school is a library fee of \$2 per term.

The necessary expenses for a year in the Normal School will not vary greatly from the following estimate:

Room rent, 40 weeks, at \$1.....	\$40 00
Board, 40 weeks, at \$2.50	100 00
Fuel and lights.....	7 50
Washing and incidentals.....	25 00
Library fee, \$2 per term	6 00
Books and stationery.....	15 00
<hr/>	
Necessary expenses for one year, 40 weeks.....	\$193 50

ADVANCED STANDING BY EXAMINATION.

The Normal School is authorized to give a formal credit on its course to four classes of students only, namely: (1) College graduates; (2) graduates of commissioned high schools; (3) persons holding one or more three years' licenses; (4) persons holding life state license to teach in Indiana. These are all admitted without examination.

Persons not included in the above named classes, and wishing to be excused from the study of any subjects in the course, are required to pass thorough, satisfactory examinations in such subjects. Effort is made to give every person full credit for all knowledge of subjects possessed on entering, and to assist him to advance as rapidly and to graduate as soon as is consistent with a thorough, teacher's knowledge of the subjects studied.

Examinations conducted for passing persons out of given subjects without detailed study of these in the school are made thorough, extended and professional in character. The object is not simply to test the applicant's knowledge of the subject in its academic aspects, but to ascertain what he knows of it from a teacher's point of view. The psychology of the subject, its method and its educational value are considered in these examinations.

Examinations for advanced standing will hereafter be conducted on the first and second days of each term.

ELECTIVE WORK.

Students are required to elect work by subjects, not by terms. When a student elects a subject, he is required to take all the work offered in that subject, unless, for good reasons, he is permitted by the faculty to discontinue it and take up another line of study in its place. This rule does not apply to Latin and German, in which subjects the student is required to elect by years.

LIMIT FOR ENTERING SCHOOL.

It is important that all students enter the school at the beginning of a term. Persons who enter after the regular entrance examinations have been conducted and the classification of the students has been made, take the time of the

faculty, which more properly belongs to the regular classes. Besides, experience has shown that in the great majority of cases persons entering several days or weeks after the term has begun find themselves unable to make up the lost lessons and are, therefore, crippled in their work throughout the term. Hereafter new students will not be admitted after the beginning of the fourth week of the term.

REPORT OF BOARD OF VISITORS.

The Board of Official Visitors to the Normal School for the academic year 1895-96 consisted of the following: Edward Ayres, Superintendent of Schools, Lafayette, Ind.; W. H. Hershman, Superintendent of Schools, New Albany, Ind., and John O. Lewellen, Superintendent of Schools, Delaware County, Ind. The following is the Board's report:

To the Board of Trustees of the Indiana State Normal School:

GENTLEMEN—In compliance with Section 4555 of the Revised Statutes of Indiana, the Board of Visitors for the school year 1895 and 1896 desires to make the following report:

The 11th, 12th and 13th of March were spent by the Board in inspecting the various departments of the school; during which time every facility for the fullest and freest examination of the work was offered by the President and Faculty.

The time, though insufficient to furnish an insight into all the details of the work, was yet enough to reveal to the committee the excellent spirit which seems to prevail amongst the students and faculty of the entire institution. The management can feel sure that the school has an earnest, efficient body of teachers and an equally earnest and faithful body of students, who are laboring with a definite purpose toward a definite end—the improvement of the common schools of the state.

Your committee desires to commend in a special manner the action of the last Legislature in regard to the appropriation of funds by which your honorable Board of Trustees was enabled to construct the addition to the Normal School building, so as to give relief to the overcrowded condition of the school.

The laboratories for physics, chemistry and biology constructed in this new building are commodious and well arranged for the very best work, and, when fully equipped with apparatus and appliances, as designed by the managers of the institution, the highest expectations of actual educative force may be realized.

The increasing demands for teachers of accurate and scientific knowledge, such as can be obtained only by individual work in the laboratory, call for just such provisions on the part of the State Normal School, whose purpose is to give teachers the best and most complete preparation for their work.

The committee notes with satisfaction the emphasis placed upon the library, as shown by accommodations provided for it in the recent addition to the building. The reading and consultation room is large and inviting, well-lighted and comfortably arranged. The library itself is well selected and systematized, so as to be of the greatest convenience for students' use.

The number of students availing themselves of the excellent opportunities the library affords is satisfactory evidence of its appreciation, and a sufficient justification of the outlay required to equip and continue it.

It is dependent for its support entirely upon library fees paid by the students. It seems to the committee that direct support from the state is advisable.

The basement of the addition is designed to contain two gymnasia for the students' use, the one for the males and the other for the females. It seems to the committee that the immediate establishment of these gymnasia by an appropriation for this purpose from the Legislature is a vital need of the institution. The influence of an intelligent, wisely directed department of physical training can not be overestimated; because this influence is exerted not only upon the teachers themselves, but through them upon the children of the State. The additional sum necessary to equip these gymnasia for the highest grade of physical training is very slight when compared with the benefits to be derived.

Another much needed improvement is the fitting up of the third story with accommodations for the various literary and debating societies of the school.

When these improvements are completed as contemplated in the plan of the building, the school will be well equipped for the accomplishment of the best results.

With reference to the character of the instruction, the committee finds little to criticize but much to commend.

The serious illness of the head of the Department of Psychology and Methods, at the time of the committee's visit, impaired somewhat for the time the work in these subjects. It is a pleasure to know that Prof. Sandison will probably be able soon to resume the work of this department which is so well known and so highly appreciated by those who have had the benefit of his instruction.

The size of the classes seems to justify an increase in the teaching force, so as to allow closer attention to the individual needs of students.

In the opinion of the committee, the training school is inadequate to provide all the observation and practice work advisable for all the students, and incomplete in that at present it lacks the Seventh and Eighth Grades. The committee is gratified to learn, however, that these deficiencies will be corrected next year.

The committee notes with pleasure that a Summer Course of six weeks has been provided for, so that during the vacation all teachers who wish to avail themselves of the advantages of the institution may do so at a very small expense. There are many teachers of the state who feel that they can not afford to leave their schools for the advantages of a normal school course, especially when a course is likely to mean the loss of a position; yet they are willing and anxious to spend a part or all of the summer vacation in such professional study as shall increase their efficiency as teachers. If this course of instruction could continue through the summer months, the advantages of the school might be enjoyed by a greater number of students, who, without loss of time or position, would in a few years complete the entire course prescribed by the institution.

In general, the committee takes pleasure in expressing its entire confidence in the management of the school and in the efficiency of the work done in all the departments. It most heartily commends the State Normal School to the people of Indiana.

Respectfully submitted,

EDWARD S. AYRES,
Superintendent Lafayette Schools.

W. H. HERSHMAN,
Superintendent New Albany Schools.

JOHN O. LEWELLEN,
County Superintendent, Delaware County, Ind.

REPORT OF THE SECRETARY OF THE BOARD OF TRUSTEES.

INDIANA STATE NORMAL SCHOOL,
TERRE HAUTE, IND, Nov. 1, 1895. }

HON. MURRAY BRIGGS, *President*:

SUMMARY.

November 1, 1896, balance in treasury—		
General Fund	\$17,358 07	
Library Fund	6,970 01	

NOTE.—Since July 1, 1896, the date on which the first installment of the proceeds of the educational tax was due, all funds received from the state are merged into one fund called the General Fund. Out of this all expenses of the institution are paid, except for books, periodicals and supplies for the library. The Library Fund is composed of library fees collected from students, and is devoted exclusively to library purposes. The institution has never received any money from the state for library purposes, the present large library having been purchased exclusively with money collected as library fees.

Respectfully yours,

LEWIS B. MARTIN,

Secretary.

BOARD OF CONTROL'S REPORT.

To the Honorable CLAUDE MATTHEWS,
Governor of the State of Indiana:

SIR—The Board of Control for the Institution for the Education of the Deaf and Dumb has the honor to submit the following report for the fiscal year ending October 31, 1896:

After several years of faithful and useful services rendered the State as a member of the old Board of Trustees, and for one year as a member of the Board of Control, the term of Mr. Thomas L. Brown expired on January 1, 1896, and Mr. Tarvin C. Grooms was, by the Governor, appointed to succeed him. Mr. Grooms at once qualified and entered upon the discharge of his duties as a member of the Board of Control. With this exception there has been no change in the official management during the year.

The school, in all its departments, has been moving along in very much the same lines as at the date of our last report. Its progress has been quite satisfactory to all concerned in its management. It has for several years been advancing, until now we think it stands abreast of the best schools of like kind in the other States of the Union.

For a full and detailed showing of the business and financial transactions of the Institution, as well as for a statement of the cost per capita during the year, and the estimated cost for this year and the two years succeeding; also for improvements made, for value of property and products of farm and garden, amounts paid the Treasurer of State as earnings, amount of clothing furnished indigent pupils; also for what has been and is being done in the Educational and Industrial Departments of the Institution, and what is desired for the school in the future in all its departments, we desire to call your attention to the carefully prepared, comprehensive and able report of our competent and efficient Superintendent, which is filed herewith

and made a part of this report. All of the recommendations therein contained are approved and submitted to you, and, through you, to the coming Legislature for your and their consideration.

We much regret being compelled, after the most rigid economy, to report a small apparent deficit in the maintenance account for the year. We are, however, glad to say, with the Superintendent, that there has been paid out of the appropriation to the Institution during the past two years, for clothing, etc., for indigent pupils, and which has been, or will be, returned to the State, an amount considerably in excess of the apparent deficit (covering two years) reported by the Superintendent. This deficit might probably have been avoided in several ways: By shortening the school year (which is now less than nine months); or by cheapening the kind and quality of the food supplies; or by cutting down the salaries of the teachers, endangering the retention of the best of them, and thus lowering the grade of the school; or by arbitrarily limiting the number of pupils, thus lessening the necessary amount of food supplies and number of teachers. The Board did not think it well to adopt any of these methods; neither do we think that any member of the Legislature, or taxpayer of the State, would desire any of these courses to have been pursued.

The citizens of the State are all proud of its large School Fund, of its common school system, and of its schools, and of the abundant provision made for the education, at public expense, of every hearing child in the State. Should not every deaf child have the same privilege and opportunity given to him? For this purpose, as we understand, was this Institution established, and for this purpose alone has it been liberally sustained. The report of the Superintendent shows that the number of pupils has been increasing gradually for several years, until the dormitories and dining-room are now overcrowded. The question as to what shall be done under the circumstances forces itself upon us. If the number increases for the next two years as it has done for the last three, the time will come, before the meeting of the Legislature of 1899, when they can not be properly provided for in the buildings of the Institution as they are now arranged. We suggest, as the most economical remedy for these difficulties, the erection of a separate dwelling-house for the Superintendent and his family,

at some point on the grounds of the Institution, and their removal entirely from its main building. In this way, with slight changes in the rooms, the capacity for dining-room and dormitory purpose may be so enlarged as to accommodate the naturally increasing number of pupils for the next two years, at least, if not longer. The Board much prefers this to asking for an appropriation to make additions to the old house, or for a separate dormitory building. An examination of the present building is all that will be necessary, we think, to make clear to any one the feasibility and economy of this plan. We, therefore, earnestly recommend it, and respectfully ask an appropriation with which to carry it out.

The oral work in the Institution is increasing rapidly in interest and importance. If the non-speaking persons in the State can be reduced, even to a small extent, by the expenditure of a small amount of money, and the dumb be made to speak, who will begrudge this little increase of expense made necessary in order that these unfortunates may be benefited? We call the especial attention of all interested in this matter to what the Superintendent says in his report upon this subject.

The Board is also in accord with the Superintendent in all his recommendations with reference to the sale of the farm lands belonging to the Institution, but we particularly wish to emphasize the propriety of selling the pasture land lying north of Washington street, in the city of Indianapolis. The income from this land amounts to nothing of any consequence. The city has extended far to the east of it. If it could be sold for near its real value, the interest on the proceeds of the sale, we have no doubt, would much exceed the rise in value of the realty. In addition to this, we suggest, whether it is fair and just to the capital city of the State, for the State to allow itself to stand in the way of the progress and development of the city. The Board consequently strongly recommends that said ground be sold, that a sufficient amount of the proceeds be used in paying for such improvements as are recommended in this report, if the Legislature sees fit to order them as a whole, or in part; that a part of the remainder be used to purchase a dairy farm for the benefit of the institution, if that be thought best; and whatever remains after such purchase is made, if one is made, and after the improvements are paid for, if any are ordered made, shall be placed in the hands of a trustee, to be

selected either by the Legislature or by the Governor, to be by him kept at interest and held for the benefit of this institution and to be used by it only under the direction of the Legislature. We further recommend that a committee be appointed to sell said realty, the same to consist of four State officials, say the Governor, Lieutenant-Governor, Secretary and Auditor of State, and one member of this Board.

We urgently request the out-going and the in-coming Governor, the State officers, the members of the Legislature, and especially the gentlemen who are appointed on the Committees on Benevolent Institutions in the House and Senate, and of Ways and Means in the House, and on Finance in the Senate, to visit the Institution and see what has been and is being done therein, so that they may form their own conclusions as to what should be done for the unfortunate deaf children of the State, based upon actual knowledge, rather than information.

Respectfully submitted,

SAMUEL A. BONNER.
CHARLES E. HAUGH.
TARVIN C. GROOMS.

SUPERINTENDENT'S REPORT.

To the Board of Control:

GENTLEMEN—In accordance with law, and for your consideration, I submit the following statement concerning the financial, scholastic and other transactions of the Institution for the fiscal year ending October 31, 1896, it being my eighth annual report as Superintendent, and the fifty-third of the Institution.

CHANGES IN ROSTER.

There have been several changes in the corps of teachers during the year: Noble B. McKee, A. M., Principal of the Manual Primary Grades; Sarah J. Corwin, Helen E. Bright and Letitia Booth resigned at the close of the year to accept positions elsewhere, Mr. McKee accepting the superintendency of the Missouri State School for the Deaf, and taking with him as teachers Mrs. Corwin and Miss Bright; and Miss Booth taking charge of the kindergarten department in the Central New York Institution for the Deaf. Each of them had given years of faithful service to the Indiana school, and their going out from amongst us was a loss to our State.

To fill the vacancies, Evalyn Heizer has been appointed Supervising Principal of the Manual Primary Grades, and Sarah K. Marshall, Fannie Shideler and Ida Westfall have been given classes in those grades. Edith Fulton has been given charge of the Kindergarten Department. Miss Heizer has had long experience in our own school as a teacher of the primary grades, and is admirably fitted in every way for the responsible position to which she has been appointed. Mrs. Shideler and Miss Westfall have been preparing themselves for this work for two years, and are entering upon their duties with commendable spirit. Miss Marshall comes to us with an experience

of two years in the profession, and thoroughly understands her work. Miss Fulton served, last year, as assistant to Miss Booth, with whose excellent methods she is thoroughly conversant.

Charles Kerney, who was dropped from the rolls one year ago, because of ill-health, returns this year, much improved, and has resumed his work as teacher of one of the manual primary classes. Edward J. Hecker, who served last year during Mr. Kerney's absence, has been given a class in the oral department.

Jennie Parrish, Lucia Hanna and Jessie Underwood, of the Indianapolis Kindergarten and Primary Normal Training School, have been given classes in the kindergarten department and are doing excellent work in their new field.

THE PUPILS AND THE SCHOOL.

The pupils in school-room and shop during the year have diligently applied themselves, and have made good progress in their work. The average of scholarship has advanced, likewise the average of industrial skill. They have been obedient to all rules and regulations—have been contented and happy in their Institution life.

The pupils of this school are not defective in mind, will or emotion. They are not insane, feeble-minded, paupers or criminals, and should not be classed as "defectives."

This Institution is in no sense an asylum, a prison, a reform school, an almshouse or a hospital. Applicants who are idiotic, feeble-minded, afflicted with contagious or offensive disease, or who are invalids so confirmed as to prevent study, are not received. It is strictly an educational institution—a school in its widest and best sense, and as such should be in some degree under the supervision of the State Board of Education, and subject to State laws governing the common schools, of which it is a part. It should be forever removed from partisan control and influence, which blights, warps and dwarfs an educational work. The present management has conscientiously administered its trust without partisan fear or favor, being guided in the appointment and retention of officers, teachers and employes by their competency, faithfulness and honesty—three requisite essentials in public servants.

During the past few years there has been a clearer perception on the part of the public of the causes of being of the Institution, which stands not only as a means of instruction and education for the deaf youth of Indiana, but which must also stand to them *in loco parentis* for nine months of the year. We have to teach not only the material, but also the spiritual—not only nature, with language to express, mathematics to measure and ethical subjects to qualify, not only industrial occupations and obedience to civil laws, but also to assume that duty incident to the home circle—the development of the innate moral nature necessary to life in conformity to divine law.

The boys and girls who come to this school because they are not received into the common schools of the State on account of deafness, receive an education here *not as a matter of charity, but as a matter of right.*

THE HEALTH.

The health of the Institution has been unusually good, and we have been free of the epidemics existing from time to time in the city surrounding us. This is remarkable when we consider the fact that hundreds of visitors pass through our buildings every month, and the further fact that we have thirty-three pupils living in the city, who spend parts of two days at home every fortnight. There is constant vigilance on the part of all connected with the Institution, pupils included, who thoroughly believe that an ounce of prevention is worth many pounds of cure.

The reports of the physicians, filed with the Superintendent at the close of each fiscal year, show that six hundred and thirty-eight pupils have received treatment at their hands in the infirmary during the past two years, as follows:

1894-1895.

Accidents	9	Pertussis	4
Diphtheroid	3	Pneumonia	8
Epilepsy	1	Rheumatism	3
Erysipelas	2	Scrofula	4
Heart disease	1	Skin disease	3
Influenza	49	Sore eyes	4
Jaundice	3	Tonsilitis	7
Malaria	35		—
Measles	113	Total	250
Neuralgia	1		

1895-1896.

Accident	10	Poisoned face	2
Bilious attack	2	Rheumatism	8
Bronchitis	3	Roseola	4
Catarrhal fever	1	Scrofula	1
Erysipelas	4	Skin eruptions	5
Glandular tumor	1	Sore eyes	10
Heart disease	1	Stomatitis	7
Influenza and colds	195	Tonsilitis	6
Measles	110		—
Neuralgia	10	Total	388
Pneumonia	8		

THE ATTENDANCE.

	Boys.	Girls.	Total.
Attendance, November 1, 1895	167	135	302
New pupils received during the year . . .	33	29	62
Readmissions after absence of year or more	4	4	8
Discharged during year and readmitted . .	1	0	1
	—	—	—
Total attendance	205	168	373
Discharged during year	14	17	31
	—	—	—
Leaving enrolled	191	151	342
In attendance October 31, 1896	177	135	312
	—	—	—
Showing absentees entitled to return . .	14	16	30

CAUSES OF NON-ATTENDANCE.

The causes of non-attendance are as follows :

Quarrel between father and uncle (boy)	1
Faith-cure treatment at home (girl)	1
"Can make no further progress" (boy)	1
"Didn't want to come" (girl)	1
"Hard times" (girl)	1
Married (girl)	1
Removal from State (1 girl, 1 boy)	2
Working (boys)	4
Poor health (4 girls, 2 boys)	6
No cause assigned (7 girls, 5 boys)	12
	—
Total	30

DISCHARGES.

The discharges and causes therefor will be shown by the following table :

Frequent absence	1
Age	2
Removal from State	2
Serious cause	4
Expiration of time	7
Graduated	15
Total	<u>31</u>

NON-ATTENDANCE FOR TWELVE YEARS.

The evil of non-attendance is a serious one and demands prompt and vigorous treatment by means of a compulsory-education law. The welfare of the child should be considered more sacred than the right of the parent to control its action. The writer has pressed this matter in annual reports since 1890, and is glad to say that the prospect for compulsory education in Indiana is brighter this year than ever. Twenty-six States now have compulsory-education laws, but, in nearly all of them, the laws are more or less inoperative because the responsibility and penalty are not placed upon parent and officer alike. The non-attendants of this school are of two classes: Those who enter, but do not remain as long as they should, and those who do not enter at all. So far as the former class is concerned, the records of the institution show that since November 1, 1884, 186 pupils have entered, remained a year or two, or more, and then dropped out without discharge when entitled to longer continuance. A small per cent. of this number can be accounted for by deaths and removals from the State, but fully 90 per cent. of it must be charged up to the foolish whims of the child, or to the neglect or cupidity of the parent. The following table will show this part of the evil at a glance :

Enrolled November 1, 1884	319
New pupils admitted since	517
Total enrollment, twelve years	<u>836</u>
Discharged since November 1, 1884	338
Leaving enrolled	<u>498</u>
Actual attendance October 31, 1896	312
Showing non-attendants	<u>186</u>

Concerning the second class of non attendants, those who have never entered the school, I believe they number 250 or more, between the ages of six and twenty-one. Adding this number to the non-attendants of the first class, we have 461, which represents the total number of non-attendants—20 per cent. of the entire number of deaf-mutes in the State.

RESIDENCE OF PUPILS.

Your attention is called to a tabulated statement arranged by counties in a subsequent part of this report, showing the number of pupils received, the number discharged, and the number remaining and entitled to the benefits of the Institution. The number really entitled to its benefits is larger than the number shown at the end of any one year, for this statement refers only to those who have been in attendance at some time during the year, those of former years being dropped from consideration. An inspection of the statement will show that pupils have been received from seventy nine of the ninety-two counties, those not represented being Bartholomew, Benton, Brown, Fayette, Newton, Ohio, Park, Ripley, Scott, Stark, Warren, Wells, Whitley.

Counties having five or more representatives are Boone, 5; Carroll, 8; Cass, 8; Clay, 7; Dubois, 5; Elkhart, 7; Gibson, 8; Grant, 7; Hamilton, 6; Hendricks, 10; Jackson, 5; Laporte, 8; Lawrence, 5; Madison, 7; Marion, 35; Martin, 5; Perry, 6; Pike, 6; Pulaski, 7; Rush, 5; St. Joseph, 5; Steuben, 6; Sullivan, 10; Tipton, 5; Vanderburgh, 7; Vigo, 7; Wayne, 9.

METHODS OF INSTRUCTION.

In the education of the deaf there are two methods and one system of instruction usually recognized :

The Manual or French Method (using sign-language, manual alphabet and writing), of which there is a variety that may be called the "Alphabetic," wherein only the manual alphabet and writing are used.

The Oral or German Method (using speech and speech-reading and writing), of which there is a variety that may be called the "Auricular," wherein special attention is given to the

development and training of the hearing, by means of which instruction is given.

The Combined System (a so-called combination of the two methods).

Some of the leading German instructors, after long years of experience, favor the French Method; some of the French schools have adopted the German Method, but no country, other than America, has generally adopted the Combined System.

The general system of instruction used in this Institution is known as the Combined (American) System, under which all known methods and their variations may be used for the attainment of an object common to all. Speech and speech-reading are regarded as very important, but mental development and the acquisition of language are regarded as still more important. It is believed that with a majority of the new pupils now entering the necessary mental development and acquisition of language may be as well attained by the Oral Method, which results in speech and speech-reading, as by the Manual Method which precludes this much-to-be-desired result. So far as circumstances permit such method (or methods) is chosen for each pupil as seems best adapted to his needs and capacity after thorough trial.

The sign-language is an ideographic language, and its beneficent results in the education of the deaf are difficult of over-estimation. Thousands and thousands of deaf-mutes have been uplifted and educated by means of it, and no one possesses greater regard for its real usefulness than does the writer, who believes that, if not a majority, then a great minority of the deaf must be educated wholly or partially by its means. Every teacher of the deaf, no matter by what method, will surely be better prepared for successful work with the deaf child if he possesses a knowledge of the sign-language, which is not so much misused as it is abused by those who are simply "signers" and nothing more.

Nevertheless, there is a great proportion of the deaf, mute or semi-mute, deaf or semi-deaf, congenitally so or otherwise, who may not only be taught to speak and to read the speech of others by sight, but who may also be successfully educated by these means, and they should certainly be educated mainly by the oral method. It is not intended by this method to make

“elocutionists” of our pupils, but it is intended, in addition to giving them an education, to (1) retain and develop the speech of any who may possess it in any degree; (2) to generate and develop speech in some degree in those who do not possess it; (3) with all, to generate and develop the power of speech-reading; and (4) to give special attention to developing and restoring to use any fragmentary part of hearing which may be left a pupil.

THE SCHOOL.

The school at the present time is divided into five departments—the Manual, the Oral, the Kindergarten, the Art, and the Industrial, the two latter, of course, being composed of pupils selected from the Manual and Oral, according to age and capacity.

THE MANUAL.

The Manual Department, consisting of 200 pupils, is divided into five primary, two intermediate, and three academic grades, the whole with sixteen classes; and a regular and well-graded course of study, given elsewhere, and covering ten years, is closely adhered to. Instruction is given in this department by means of the Manual or Sign Method. A few of the teachers, however, use speech and speech-reading in limited degree, in addition to the sign language and manual alphabet, as means of giving instruction.

But practically, it may be said, almost total dependence is had upon the sign language, and pupils in this department may never hope to articulate words, nor to read by sight the speech of others so far as instruction in school is concerned. This is an injustice to many pupils now in the department, who would have made good talkers and good speech-readers had they been properly started in oral classes upon entering school and retained there. This opportunity, however, was not afforded until two years ago, and then it was limited to new pupils who should enter the school after that date, those already in attendance remaining in the manual classes.

THE ORAL.

The Oral Department, including the advanced or second year kindergarten classes, consists of 86 pupils and seven classes, and the regular course of study is followed as in the manual classes. Instruction is given by means of the Oral Method (speech, speech-reading and writing), the sign language and the manual alphabet being discarded except in limited degree, and during exercises of all kinds in the chapel. The pupils, however, are allowed to mingle freely with those of the Manual Method classes at all times outside of the class-room, and it goes without saying that they soon become ready and proficient sign makers.

Do we use signs and the manual alphabet in the oral classes? We do. Conditions confront us, not theories, and the conditions are such that it is deemed expedient to be directed by them until such time as they shall be changed, *i. e.*, until such time as there may be complete separation of the orally and the manually taught.

I am decidedly in favor of the manual alphabet at all times, and under all circumstances, and under existing conditions in the Indiana school, I believe the use of natural signs and a limited use of conventional signs for objects and actions, will be beneficial rather than harmful—that they will not only not retard, but, on the contrary, advance the cause of education in and by speech and speech reading, providing they be judiciously used, varying from much in the beginning classes to little, if any, in the more advanced. And even though the two classes should be completely separated, I would advocate the use of natural signs—gestures of body and limb, and facial expression—for man can no more separate himself from these than he can from his very nature, and the use of them must, therefore, be beneficial rather than otherwise.

While the use of signs, natural and conventional, may render a little less rapid the advancement in speech and speech reading, they will, it seems to me, render more rapid the advancement in the use of language and in the acquisition of general knowledge during the first years. A little lost at the one end and a little gained at the other will probably result in the greatest good to the greatest number, and this, I take it, is the end in view in a public school.

While our classes in the speech and speech reading method may not be considered pure oral classes by the oralists, I am sure they are not considered manual classes by the manualists. If the advocates of neither are pleased to claim them, I see no other course than to let them stand by themselves, named and known as the *Indiana manual classes*, wherein the principal and most highly prized method of giving instruction is the oral method, but which is somewhat qualified by the use of any other method as existing conditions and the exigencies of each class may require. We simply hold to our school's motto, "Any method for good results—all methods, and wedded to none."

PROGRESS OF ORAL WORK IN INDIANA.

In this connection, and because of the very great interest shown in the matter by parents of deaf children now applying for admission into this school, and nearly all of whom are insisting upon their children being placed in the oral classes and "taught to speak and to read the lips," it will be of some interest to note the progress of the work since its inception here in 1869. The Oral, or German, method, was no new thing at that time, since it had been used in Europe, though principally in Germany, since 1760, when Heinicke first insisted upon using articulation as the sole means of instruction. At this same time the Abbe de l' Epee, in France, devised and perfected the Manual, or French, method, and insisted upon using signs as the sole means of instruction. It was the latter method which was adopted by the founders of the American Asylum for the Deaf at Hartford, Conn., in 1817, the first institution for educating the deaf in the United States. As the work spread from this parent institution, and from State to State, the method in use at the American Asylum was most naturally adopted—the oral method obtained no foot-hold as a means of instruction, and was only incidentally used in rare cases for training in articulation as an accomplishment. But about 1868, one or two schools were started in New England for the purpose of teaching all deaf persons, or deaf mutes, by the previously condemned oral method. Much opposition to this method was expressed by the great body of the profession, and the following, taken from the report of the Superintendent of

the Indiana School in 1868, fairly illustrates the consensus of professional opinion at the time :

“We have no sympathy with the theory, so urgently put forward in Massachusetts, of late years, by a few influential gentlemen, by which articulation is made the basis of instruction, and the language of natural signs is repudiated as injurious. Articulation never can become the chief instrument of instruction with the mass of the deaf and dumb, much less the sole instrument. * * * Heinicke believed that ‘all methods other than his own (articulation) were useless and pernicious, and no less than delusive folly, fraud and nonsense.’ But these extreme views have long since been abandoned by nearly every intelligent teacher in that country (Germany) as well as in most others. It is the more surprising to us, therefore, that we find them taken up and adopted in the new school recently established in Massachusetts” [Northampton].

Prior to 1869, those pupils in the Indiana school who were only partially deaf, or semi-mutes who possessed more or less perfectly the power of speech, were placed in the regular manual, or sign, classes, under hearing-speaking teachers, and were to be trained as best they could be, for it was considered that articulation and lip-reading were mere accomplishments not to be attained in any useful degree except at the sacrifice of the more important intellectual and moral training. But in 1869 the first special teacher of articulation was employed in the person of Dr. Joseph C. Gordon, now of Gallaudet College. The plan adopted was to take certain pupils from the regular sign classes and give each of them a few minutes’ training several times each week, taking only such as had lost their hearing after they learned to talk, and who retained in some measure the ability to articulate words. The number of pupils thus instructed was twenty-five, who were all that “it seemed best to subject to the sacrifices necessary to attain in any useful degree this accomplishment.” In 1873, Dr. Gordon retired to accept the professorship of Natural Sciences at Gallaudet College, and during the next three years no special teacher of articulation was employed, and if instruction was given in speech and speech-reading, it was under the old plan followed prior to 1869, *i. e.*, semi-deaf and semi-mute in regular classes taught by hearing-speaking teachers, who would give “occasional attention” to articulation.

In 1872, however, a young man, named Alexander Graham Bell, since famous as the inventor of the telephone, had been engaged by the American Asylum at Hartford, Conn., to present and teach "Philosophical Speech," the invention of his father, a noted elocutionist of London. Success attending his work, the Indiana school, in 1875, selected and sent a teacher to the American Asylum to qualify herself for the work. Returning with flattering testimonials, she was given a class in 1876. During her first year the plan adopted was the same as under Dr. Gordon, *i. e.*, selected pupils from the regular classes for periodical drill in speech. But it was found that the greatest inconvenience resulted from the interruption to the studies of the pupils in the regular classes by the withdrawal of the semi-mutes at certain intervals for training in articulation. It was also found that the instruction given by signs in the regular classes greatly retarded the improvement of the semi-mutes in articulation. For these reasons, a different arrangement was made the second year, and a class formed wherein not only was instruction in articulation given, but, also, all the other studies of the course were carried on by the new method. This, the first oral class in Indiana, lasted for only one year, and at the next session there was a return to the first year method—selected pupils, special class, daily drill—an itinerant form of articulation teaching, a peripatetic folly, if it is possible to adopt other plans.

This form of instruction in speech and speech-reading as a mere accomplishment continued until 1895, but all the while under painstaking and conscientious teachers, skilled in the work. However, in 1892, one distinct oral class was formed by the writer, and in the annual report for that year he said:

"I believe the end of the year will demonstrate the wisdom of the 'innovation.' Every pupil entering the school should be educated by this method, and taught to speak and to read the lips, if it is possible so to do—it is his right and it is our duty. It remains, then, for us to ascertain who can, and who can not, be educated by it. To do this, each new pupil should be given a fair chance for speech and education by speech, first; afterward, education by other methods if failure results. We must bear in mind that there are deaf and semi-deaf, mute and semi-mute—that a method beneficial to one may not be to another. To accomplish the greatest good for the greatest number, the

very broadest latitude must be allowed, and a school, to be successful, must not be bound down to any one or two methods."

In 1894, it was recommended that two additional oral classes be formed, which was done, and it was then decided to place all new pupils, excepting those assigned to the kindergarten class (which is in large measure preparatory to the oral classes) in the Oral Department, and to keep them there one year, in the meantime making proper tests for a survival of the fittest. If, at the end of the year, it should be found that a pupil may be better educated by another method than the oral, he would be transferred to another class and department, and the time spent in the Oral Department not counted against him. In 1895, it was further decided to abandon all efforts to teach speech and speech-reading to selected pupils from the Manual Department, the idea being to have all in either the one or the other distinct department.

The following will show the admissions to, and discharges from, the Oral Department since the first regular class was organized, in 1892:

Oral class, one, 1892-93	10	
New pupils admitted up to October 31, 1896	103	
Admitted from manual classes	10	
Admitted from the kindergarten	17	
Total	140	
Discharged	1	
Not returned to school	9	
Transferred to special class	1	
Transferred to manual classes	43	
		54
Oral classes, seven, 1896-97		86

If to this we should add the first year kindergarten class, numbering twenty-four, and which, as stated above, is in some measure preparatory to the Oral Department, we would have 110 pupils representative of the department.

At the close of the scholastic year in June last, eighteen pupils were transferred from the Oral to the Manual classes. Some of them were not susceptible of education in and by speech and speech-reading, while others were transferred in order to reduce the size of the Oral classes, financial conditions not warranting the employment of additional teachers—otherwise, a majority of the eighteen would have been retained in the Oral Department.

It is proper to remark here that the percentage of new pupils who possess, in varying degree, either hearing or speech, or both, is much larger now than formerly, and as the school and its objects become better known to the people, I am confident that the number of semi-deaf with speech seeking admission will continue to increase, for it is a well-known fact that there are many hard-of-hearing pupils in the public schools who, not succeeding there, should certainly be in this special school for all too deaf to be educated elsewhere.

KINDERGARTEN.

This department was established in September, 1894, with ten pupils, and has been a gratifying success in every way. Two years are given to the work, the advantages of which are particularly noticeable in such schools as ours, and difficult to over-estimate. During the first year, the pupils, from six to eight years of age, have corrected their faults of standing, walking and sitting, are instructed in deportment and propriety, are trained in hand-skill, observation and imagination, are taught simple numbers in units, writing and the formation of the simplest of sentences, are drilled in proper breathing, in the exercise of the vocal organs by the utterance of sound and in speech-reading by the most natural of methods—constant repetition of spoken words and short sentences. Some attention is also given to speech, more or less, according to the pupil.

During the second year, these kindergarten pupils pass into the advanced kindergarten classes and become a part of the Oral Department. The first year work is carried on, and is merged into primary work, but especially is attention given to speech and speech-reading.

With a properly equipped Kindergarten Cottage, we could take much better care of those now here and provide for an increased number of young deaf boys and girls who must now be refused admission. With proper equipment for taking care of them, children as young as four years of age should be received. There can be no question as to the great good to be accomplished by such procedure.

The following table will show the growth of the department :

Kindergarten class 1894-95 (one)	10
New pupils admitted up to October 31, 1896	40
	<hr/>
Total	50
Not returned to school	3
Transferred to oral classes	17
Transferred to manual classes	6
	<hr/>
	26
	<hr/>
Kindergarten classes, 1896-97 (two)	24

DEPARTMENT ASSIGNMENT.

During this and the four preceding *scholastic* years the school was divided into departments as follows:

	1892-3.	1893-4.	1894-5.	1895-6.	1896-7.
Kindergarten	10	20	24
Oral	10	13	51	60	*86
Manual	260	256	228	225	200
Special	2
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total enrollment	270	269	289	305	312

*Includes two advanced, or second year, kindergarten classes, numbering twenty-three.

ASSIGNMENT OF NEW PUPILS.

New pupils received during this and the four preceding *scholastic* years, were assigned to departments as follows:

	1892-3.	1893-4.	1894-5.	1895-6.	1896-7.
Kindergarten	9	18	22
Oral	5	2	33	34	34
Manual	34	33	1	1	3
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total	39	35	43	53	59

ART DEPARTMENT.

In this department commendable progress has been made by the girls of the advanced classes in the Oral and Manual Departments. Twenty-one have received instruction in drawing, painting in oil and water colors, crayon sketching, pastel work, modeling, designing and wood-carving, and the walls of the art room bear evidence to the diligence and ability of the young ladies during the year.

The art teacher not only directs and teaches the work outlined above, but also teaches drawing to sixteen classes, numbering 241 pupils. The Prang system of drawing is used, and many of the boys and girls are making excellent progress.

INDUSTRIAL DEPARTMENT.

A first-class industrial training is very frequently of more advantage to a young man or woman than intellectual training alone. While not decrying the latter in the least, it is meet that I should insist that the former shall be considered of equal importance with the latter. The hand and mind developed together results in strength—otherwise in weakness. This practical view of the matter may be a theory when applied to hearing-speaking youth—with the deaf it is a necessity. With this in view, we have tried in every way to increase the usefulness of our Industrial Department, and the heads of the classes are teachers—not foremen; the various trades have been taught thoroughly, and the shop room made to rank with the school-room. While we have made great advancement during the past few years, we have much advancement yet to make; but satisfaction goes with the thought that our Industrial Department rests upon the proper foundation, and that the work is along the right line.

At the beginning of the school year assignments were made as follows :

Printing office	22
Cabinet shop	21
Shoe shop	18
Carpenter shop	1
Cooking	3
Baking	4
Electrician	1
Floriculture	1
Barbering	1

Instruction has been given to the girls in all kinds of house work and in plain and fancy sewing, dressmaking, needle work, etc.; in the higher grades they have been taught sketching, painting, designing, modeling and wood carving. Boys not assigned to regular trade courses and other places mentioned have been required to do police duty around the buildings and grounds and to labor on the farm.

With a willing hand and heart, no young man or woman need leave his *Alma Mater* without being possessed of that with which to gain a livelihood. This department is not self-sustaining, and not expected to be. The expenditures the past year on its account amounted to \$2,999.46, its receipts and earnings, \$1,121.83. The following statement will show the classified expenditures (including salaries) and receipts of the department:

	Expense.	Earnings.
Printing office	\$704 90	\$215 29
Cabinet shop	939 66	98 60
Shoe shop	1,001 25	801 30
Sewing room	353 65	1 54
Miscellaneous		5 10
Totals	\$2,999 46	\$1,121 83

From which it will be seen the net expense is \$1,877.63. It should be borne in mind, however, that the printing, wood-working and sewing classes do hundreds of dollars' worth of work for the Institution for which no payment is made—printing of lesson papers, blanks, diet tables, books, pamphlets, etc., the making of various articles of household furniture, and labor in repairs of furniture, buildings and fences, the making of bedding, clothing, etc.

There should be an increase in the number of industries taught the pupils, and I would recommend cooking for the girls and harness making and metal work (iron and tin) for the boys.

OCCUPATION OF FORMER PUPILS.

The following table will show the various occupations of 250 former pupils of the Institution who attended the Reunion of Graduates and Former Pupils, in the summer of 1894. Nearly all of the fifty-two marked "no occupation" are to be added to those (45) marked "housework," for the great majority of the ninety-seven are young women, who, if not married, are living at home with their parents, and are engaged in ordinary household duties.

Abstract clerk	1	Harnessmaker	1
Artist	1	Horse collar maker	1
Baker	1	Hostler	1
Barber	3	Housework	45
Bill-poster	1	Instrument maker	1
Blacksmith	2	Laborer	2
Bolt and iron worker	1	Machinist	3
Bookkeeper	2	Manufacturer	1
Boxmaker	2	Merchant	2
Brewer	1	Minister	2
Broommaker	1	Packer	1
Burnisher	1	Painter	2
Cabinetmaker	10	Printer	10
Carpenter	2	Saw-mill worker	4
Carpenter and builder	1	Section hand	1
Carpet layer	1	Shoemaker	6
Carpet weaver	1	Stone cutter	1
Cigarmaker	1	Supervisor in school	1
Clerk	1	Tailor	8
Cooper	2	Teacher	8
Dressmaker	13	Tinner	1
Engineer	1	Tubmaker	1
Engraver	1	Wheelmaker	1
Farmer	32	Woodcarver	3
Florist	1	Woodturner	1
Gunmaker	1	Woodworker	1
Hairworker	4	No occupation	52

AGE OF ADMISSION AND SCHOOL PERIOD.

The law provides that all the mutes (the deaf) of the State shall be entitled to education in the Institution free of charge, under such regulations as to age, capacity, character, punctual attendance and length of school period as the Board of Control shall adopt. Such regulations have been adopted by the Board, and are set out in a subsequent part of this report, to which your attention is called. In passing, it is interesting to note that Indiana has the proud distinction of having been the first State in the Union to throw open its educational doors to the deaf absolutely without cost to them.

By reference to the regulations spoken of, it will be seen that the age of admission is fixed at from eight to twenty-one, but experience has demonstrated that deaf pupils who enter school for the first time when sixteen years of age or over rarely make satisfactory progress in the acquisition of language or general knowledge. Although the minimum age is given as eight, yet

because of surrounding circumstances, at the discretion of the Superintendent, pupils may be admitted as young as seven, or even six. This has been done in a number of cases with advantageous results to those thus admitted.

The number of years a pupil may remain in the school is regulated by a graded time schedule, and depends upon the mental ability, progress and conduct of the pupil himself. Allowance being made therein for kindergarten and oral trial work, a pupil, according to this schedule, may remain certainly five years, and as much longer up to thirteen years as his work and promotions from year to year may warrant. And even this time may be extended by the Superintendent in individual cases if he deems it for the best interest of the pupil.

TEACHERS' MEETINGS.

It is the resolve of everybody connected with our school that Indiana shall excel in its work, and no effort is spared to make its school work in the highest degree successful. With this result in view, teachers' meetings have been provided for, in three sections, during the present scholastic year. There will be, first, six general meetings of all the teachers, wherein will be papers read and discussions had upon "Mind and Mind Growth;" second, ten meetings of the manual primary teachers, wherein will be given practical exposition of school-room work in those grades, especial attention being given to the development of language work; third, ten meetings of the oral teachers, for the consideration of subjects of interest to only oral teachers, and wherein attention will be given to school-room work and to the anatomy and physiology of the organs of hearing and speech. At the close of the year a final general meeting will be held, at which the Superintendent will sum up the year's work in all departments. During the year Professor Francis M. Stalker, of the State Normal School, Mrs. Eliza Blaker, Superintendent of the Indiana Kindergarten and Primary Normal Training School, and others will make addresses at these meetings.

INDIANA AT CONVENTIONS.

During the past biennial term, three gatherings or National Conventions of the profession have been held, at all of which this school was represented by members of the Board of Con-

trol and corps of teachers, and by the Superintendent. In 1895 the Fourteenth Convention of American Instructors of the Deaf was held at Flint, Michigan—likewise the Ninth Conference of Superintendents and Principals. In 1896 the Fifth Summer Meeting of the American Association to Promote the Teaching of Speech to the Deaf was held in Philadelphia. At the meeting of the Conference, the writer was honored by being elected a member of the Executive Committee—likewise, at the meeting of the Association in Philadelphia, by being elected a member of the Board of Directors. At these various meetings, which were attended by trustees, superintendents, teachers and officers of schools for the deaf in all parts of the United States and Canada, there were discussions concerning the mental, moral and industrial education of the deaf, and a most profitable interchange of practical experiences.

THE NEED OF AN OCULIST AND AURIST.

In this connection permit me to repeat what I said upon the subject in one of my former reports, for it is as applicable now as then :

“Quite a large percentage of the pupils of the school are decidedly hindered in their school work by defective eyesight. The various teachers have reported to me the names of a number of pupils who have difficulty in seeing, or suffer from continued use of the eyes. Some of them have error of refraction that may be corrected by the use of proper glasses; others are suffering from conjunctival inflammation, and some with defective eyesight, the result of the disease causing deafness. Defective eyesight is a most serious matter to the deaf, who, bereft of hearing, must depend upon the eyes.

“During the past four years, of all the new pupils received, only about one-half have had any kind of an inspection of their ears with a view to a correct diagnosis, and I feel certain, from letters of parents concerning this matter, the greater part of the examinations made have been anything but scientific. It is very probable that we have in school quite a number of children whose hearing could be vastly benefited by the treatment of a skilled specialist. With improved hearing would come a better command of written and spoken language.

“From whatever cause defective eyesight or hearing may have resulted, the proper treatment of the child requires the services of an experienced oculist and aurist, and I hope some arrangement may be made for the employment of such a one, who should make careful examination and record of each new pupil entering the school.”

CAUSES OF DEAFNESS, 1890-1896.

The causes of deafness and ages at which it occurred in the new pupils admitted during past two years—also the past six years—will be shown by two of the following tables, as will also the degree of deafness, the number to whom instruction was given previous to admission, and what power of articulation is possessed by them. The power of hearing in many of those marked partially deaf is very feeble indeed, as is also the power of articulation in many of those marked as speaking a few words plainly, and need hardly be taken account of in the majority of cases.

CAUSES OF DEAFNESS IN 2,067 CASES.

Immediately following the above are two tables showing the causes of deafness of the entire number of pupils who have received instruction in the Indiana Institution since its organization in 1844*; also, the ages at which deafness occurred. It will be noticed that the pupils are arranged in groups of 300, so that the causes and their growth or diminution can be more readily seen.

*Up to October 31, 1896.

STREET IMPROVEMENTS.

During the summer of 1889 the extension of Ohio street through our grounds left a strip of land 600 feet long and 126 feet wide lying north of the street and south of the Indiana Reform School for Girls, which the latter enclosed and made part of their grounds.

During the years 1894 and 1895 the city of Indianapolis constructed in and along Washington street, along which the Institution has a frontage of 1,260 feet on the south side and 611 feet on the north, a main sewer, an asphalt roadway and a cement sidewalk on the south side.

During the past year the city has laid cement sidewalks on the east side of Randolph street, along which the Institution has a frontage of 1,265 feet, and on the east side of State street, along which the Institution has a frontage of 2,566 feet.

All of these improvements have been made by the city, acting under the provisions of its charter, and the Institution has had no voice in the matter at all. The work has been performed, and the contractors look to the General Assembly for payment for such improvements not paid for by the last General Assembly.

During the past year the Board of Public Works of the city has agitated the question of opening a new street fifty feet wide through the eastern part of our grounds, running from Washington street south to the Michigan Road, a distance of 1,623 feet.

SIXTEEN ACRES NORTH.

Lying north of Washington and south of Ohio streets the Institution owns sixteen acres, more or less, of pasture land. During the meeting of the last General Assembly a joint resolution passed the Lower House authorizing the city to take this ground for park purposes, the city to make all proper park improvements without cost to the State, and to return land to State use and benefit without expense for improvements made thereupon, when demanded by the Governor of the State. This resolution was passed to the Senate for concurrence therein, where it was amended by making the city liable for all street improvements surrounding the tract. After being returned to

the House it was not again acted upon. Nevertheless it appears in the Acts of 1895, page 368, as having been duly passed by the General Assembly.

Since 1895, street improvements have been made upon two sides of the above tract of land—in Washington and Randolph streets.

IMPROVEMENTS AND REPAIRS.

During the past two years many minor improvements have been made, and the ordinary repairs have been of daily occurrence. Rooms have been papered or painted, new carpets laid, window shades hung, and the dormitories, hallways and cellars whitewashed. Painting has been done in all parts of the buildings by our own force; and the interior of the school-house, wood-work, side walls and ceilings, and other work by contract. New floors have been laid in the small kitchen, and in part of the boys' lavatory. Two thousand feet of picket fence has been rebuilt, part of it requiring new material. The entire fencing on the farm was straightened up, part of it having to be rebuilt with new material. The two driveways leading into Washington street have been graded down and regravelled to conform to the level of the street, the bed of which was lowered; and the entire front along this street was sloped down and sodded. Roofs have been repaired in places; likewise, gutters and down-spouts. The natural gas service pipes within the buildings have been replaced with larger pipe and the system changed. A new carriage and tool house has been built; likewise a new combined cattle and wagon-shed. Three stone gate posts have been placed at the main entrance to the grounds. The dynamo foundation has been rebuilt, and the electric light engine given a general overhauling. Cement walks (3,870 square feet), and brick walks (608 square feet) have been laid, and 4,700 square feet of sodding done. Some new plumbing has been done, and much of the old repaired.

The buildings, excepting the school-house, are old, and the wear and tear increases each year. The engineer, the carpenter, and others, are kept busily engaged the year through making necessary repairs, changes and additions, and lumber, hardware and painters' supplies are ever in demand. Your attention is called to the classified list of expenditures on account of current expenses and repairs in a subsequent part of this report.

FINANCIAL.

A brief outline of the business and financial transactions for the fiscal year is all that is necessary to be given in this place, and your attention is called to the very full and complete exhibit in a succeeding part of this report for all such further information as you may desire.

PROPERTY.

CLOTHING.

Value of clothing, etc., furnished pupils, accounts for same being filed with State Treasurer, for collection from counties, and return to General Fund		1,771 55
	<hr/>	
Total covered into General Fund . . .		\$1,855 57
	<hr/>	

RECEIPTS, DISBURSEMENTS, DEFICIT.

The following statement will show at a glance the receipts, disbursements, debits and bills unpaid for the fiscal year just closed :

Appropriation maintenance	\$54,000 00
Appropriation industries	3,000 00
Appropriation C. E. and repairs	4,500 00
Industrial earnings	1,121 83
Ordinary earnings	80 58
Deficit maintenance	2,433 77
Deficit C. E. and repairs	30 40
	<hr/>
Total	\$65,166 58
	<hr/>
Deficit, 1894-95	\$1,345 11
Debits during year—	
Maintenance paid	55,119 04
Industries paid	2,999 46
C. E. and repairs paid	4,499 89
Maintenance unpaid	1,083 66
C. E. and repairs unpaid	30 40
Returned to General Fund—	
Balance funds	3 44
Ordinary earnings	80 58
	<hr/>
Total	\$65,166 58

It will thus be seen that while the total deficit at the close of the year is \$2,464.17, it includes the deficit for the year preceding (\$1,345.11), leaving the actual deficit for the past year only \$1,119.06.

Now, so far as actual cost to the State is concerned, this total deficit is more apparent than real. During the year clothing paid for out of the appropriation for maintenance, was furnished to pupils, indigent and otherwise, and accounts for same, amounting to \$1,771.55, were presented to the Treasurer of State for collection from the counties from whence the pupils came. When collected, the money passes into the general fund, and does not return to Institution use and benefit. As set out above, the ordinary earnings, amounting to \$80.58, were also paid into the general fund, and passed beyond Institution use and benefit. Another thing to be considered is this: We carry over into the new fiscal year \$627 worth of unused supplies in our storerooms.

In other words, with a nominal deficit of \$2,464.17, the State has had returned by the Institution \$1,855.57 of its year's receipts, and the Institution has on hand \$627 worth of supplies for use during the new year, the whole being \$18.40 in excess of the deficit.

THE FLUCTUATION OF A DEFICIT.

A deficit is a thing to be avoided by good business management, and especially in the conduct of a public institution, and yet there are times and conditions when it is difficult to avoid it without serious injury to the cause for which an institution stands. The reason of our deficit this year dates back four years. The following table will serve to explain it:

Deficit for fiscal year ending:	* <i>Pupils.</i>	<i>Appropriation.</i>	<i>Deficit.</i>
October 31, 1893	261	\$55,000 00	\$2,378 08
October 31, 1894	2 9	60,000 00	892 45
October 31, 1895	293	60,000 00	1,345 11
October 31, 1896	300½	†57,000 00	‡2,433 77

For a number of years prior to 1894, the annual appropriation for maintenance had been \$55,000; for current expenses and repairs, \$3,000. Previous to that date, however (in 1889), there was a demand made for increased efficiency in the work of the Institution. It was found that the number of teachers and departments was not sufficient; that the classes were too large for efficient work, and that in many of them were pupils who

* Average daily attendance.

† Including special fund, \$3,000 for industries.

‡ Deficit maintenance.

had practically accomplished all the good that was possible for them, and who were using the Institution simply as an *asylum*. The Industrial Department was operated under the lease system, which prevented the perfect acquirement of a trade. This system was wrong in principle, pernicious in practice and demoralizing in results. Improvements and repairs were sadly needed.

The change was radical.

Old methods were discarded; the "hangers-on" were discharged; the number of teachers and classes was increased, and the latter reduced in size; the new school-house was erected, all kinds of school apparatus provided, a new graded course of studies adopted, Kindergarten and Oral Departments established and an *esprit de corps* developed among officers, teachers, employes and pupils by judicious discipline. The management of the Industrial Department was changed, and it, with the school, placed upon a purely educational basis. Special appropriations were made for equipping the shops, and for improvements and repairs, which were pushed forward to the extent of the appropriation.

In 1892, the annual appropriations were so inadequate for maintaining the increased efficiency of the Institution, that an increase for maintenance and for repairs was asked of the General Assembly convening in 1893. We had reached the limit—should we go forward or backward? We went forward, for the Assembly increased the appropriations to \$60,000 for maintenance, and to \$5,000 for repairs. At the time of the increase the daily average attendance was 261, and the deficit at the end of the year, \$2,378.08. During the next year, with 269 pupils, the deficit was reduced to \$892.45. In the next year, with an increase in daily attendance of twenty-four, or 293 pupils, the deficit increased to \$1,345.11. For the next year, 1895-'96, the year just closed, we had available for expenses but \$54,000 for maintenance, \$3,000 for industries, and \$4,500 for repairs, the Assembly meeting in 1895 reducing the appropriations to the amounts named. During the year, the average attendance was 300½, and, in spite of the very strictest economy and absolute denial along some lines, the total deficit increased to \$2,464.17.

Had the appropriations not been reduced, there would now be no deficit—on the contrary, there would be \$1,039.27 balances unexpended in spite of the rapid increase in the size of the school.

CONCERNING ANNUAL APPROPRIATIONS.

The annual appropriations for the biennial term ending October 31, 1897, are as follows:

For maintenance	\$54,000 00
Industries	3,000 00
Current expenses and repairs	4,500 00

The amount for maintenance is not sufficient for the proper support of the Institution along its present lines, and with its increased enrollment of pupils—312 at the present time, as against 261 in 1893, when the appropriation for maintenance and industries combined was made \$60,000. The present appropriation should be increased.

The amount for industries is barely sufficient to cover the year, and should be increased \$500 to properly maintain the department as it stands at present. If it is to be extended, as it certainly should be, by the teaching of other industries, the present appropriation should be increased \$2,000.

The amount for current expenses and repairs will be sufficient for the new biennial term and no increase should be asked.

The annual appropriations for the biennial term ending October 31, 1899, should be:

For maintenance	\$63,500 00
Industries	\$3,500 00 or 5,000 00
Current expenses and repairs	4,500 00

WHY AN INCREASE IN MAINTENANCE.

The greatest item of expense in a State school for the deaf is the salaries paid the teachers, who are required to be persons skilled in a peculiar art, and whose remuneration is in great degree regulated by salaries paid in similar schools throughout the United States. When one school falls below the general average, that school is very likely to lose some of its best prepared teachers, who are offered positions in other States where better salaries are given. The demand for *skilled* teachers is great and the supply is not equal to the demand.

In this school a maximum salary is established, and teachers are allowed a yearly increase of \$50 until it is reached, and they

are usually employed with that understanding. This increase was refused to a number during the past year, and likewise for the present year, because of reduced appropriation. These amounts should in justice be made up to such as are still with us and who are entitled to it, and the natural increase should be given during the years for which the new appropriations are to be made.

Because of the great success attending our new oral department, wherein dependence is had upon speech and speech-reading, and in which there should be smaller classes than in the Manual Department where signs are depended upon, and because of the probable increase in enrollment during the coming biennial term, two or three additional teachers are needed.

The number of pupils enrolled and in attendance at the present time is 312, all that will be received during this schoolastic year ending in June next. In this connection it may be stated that a number of both old pupils and new applicants have been refused admission, because of existing financial conditions. Of the thirty old pupils not returning this schoolastic year, one-half will probably wish to return next year, at which time the new pupils to be received will probably number fifty, thus making sixty-five to be added to the present enrollment, or 377 in all. Now, deducting from this number the discharges in June next (about 27) and those who will not return at the next annual session of school (about 25), it will be seen that the enrollment will be about 325—probably more.

On this basis the following estimate has been made. The cost for the past year is given for comparison:

	For new bi- ennial term, 325 pupils.	Past year, 300½ pupils.
Pay-roll	\$37,431 28	\$33,581 33
Office expense	400 00	331 54
Household equipment	2,573 00	1,973 00
School expense	700 00	546 79
Heat, light and power.	5,000 00	4,237 20
Grounds, stock and stable	1,000 00	996 33
Food supplies	13,000 00	11,717 39
Pupils' personal expense	2,200 00	1,884 46
Miscellaneous classifications	1,000 00	938 16
Over payments		1 50
Total	<u>\$63,304 28</u>	<u>\$56,207 70</u>
Per capita	\$194 78	\$187 04

PUPILS' PERSONAL EXPENSE.

This item includes clothing, traveling expenses, etc., for pupils, and in connection with the estimate for support during the next biennial term, permit me to call attention to these expenses for pupils, indigent or otherwise, whose parents either can not, will not or neglect to provide for them. The law provides (Secs. 2464, 2465 R. S. 1881) that in all cases where suitable clothing and means for defraying traveling expenses are not otherwise supplied to the pupils, the same shall be provided by the Superintendent, who shall make out and file with the Treasurer of State accounts therefor against the counties from whence the pupils come, not exceeding \$40 per annum for every such pupil. These accounts are to be paid by the County Treasurer to the State Treasurer, and the receipts would be credited to the maintenance fund of the Institution for its benefit and use were it not for the provisions of the general appropriation bill, which provides that the appropriations therein made shall "include all * * * receipts for clothing and maintenance repaid by counties and persons." In fixing the appropriations this account, for which I have asked \$2,200, should be given consideration, and the fact not lost sight of that it is to be returned to the State by the counties.

SPECIAL APPROPRIATIONS NEEDED.

Certain special appropriations should be asked for. Because of the rapid increase in attendance on the one hand, and the reduction in appropriations for the present biennial term on the other, which caused a deficit at the end of the past year, a special appropriation for maintenance is needed to complete the present year without injustice to the school. I recommend that the following be asked for:

To cover deficit at close of year 1894-5	\$1,345 11
To cover deficit at close of year 1895-6	1,119 06
For household equipment, badly needed	500 00
For increased attendance, 12 pupils at \$187.04	2,244 48
Total	<u>\$5,208 65</u>

At the last session of the General Assembly a special appropriation was asked for the purpose of purchasing and properly housing a new boiler, which was absolutely necessary for the purpose of properly heating the Institution. This special ap-

appropriation of \$2,000 was made, and, believing it available at any time after the passage of the bill, and during the biennial term for which the general appropriations were made, the purchase of a boiler, etc., was deferred until November, 1895, at which time it was found that by a mistake in the use of the word "shall," instead of "may," in the act, it was obligatory upon us to make use of said appropriation *prior to October 31, 1895*. The wording of the act is as follows :

"Said specific appropriations for the Institution for the Education of the Deaf and Dumb *shall* be paid during the fiscal year ending October 31, 1895."

The intent of the committee having the appropriation bill in charge was to use the word "may," instead of "shall," in the bill, as I was informed at the time, and since, by the chairman (Hon. J. G. Allen, of Daviess). Through some error the phraseology of the bill was changed, and the result was an opinion of the Attorney-General of the State that the money could not be drawn, the same having reverted to the General Fund.

I recommend that the same amount for the same purpose be again asked for. The cold weather of last winter again emphasized the urgent need for greater heating capacity.

A brick addition should be built to the wash-house, to be used as an ironing-room. The room used for the purpose at the present time is inconveniently situated, too small, and is badly needed as a play-room for the small girls. Its only equipment consists of a few sadirons, two iron heaters almost worn out, and a number of ironing boards to be placed upon the backs of chairs, the whole forming the most primitive of arrangement. And yet, in this room is ironed the bed and table linen, toweling and wearing apparel for 365 persons, the most of it being unsatisfactorily done by the girl pupils, the great majority of whom are now too small to be placed at the work. A proper addition to the wash-house, equipped with collar, cuff and bosom ironer, body ironer and mangle, with proper steam connections, will cost about \$3,500.

On the boys' side there should be erected a plain wooden structure, 70x30x20 feet, which would provide the boys with a play and lounging-room in inclement weather, and in which should be placed some of the gymnastic apparatus to be found in gymnasiums. At the present time the only place under

shelter for them during rainy or cold weather is their study-hall, filled with school desks. This improvement would cost \$1,800.

The beds of the pupils in use at the present time are heavy, clumsy affairs of wood, made years ago, jointed, glued and riveted together into one piece, without springs, difficult to move and uncomfortable to sleep upon. These should be replaced by iron beds with woven wire mattresses for many reasons. The cost of this change will be \$1,500.

The ramshackle affairs that pass for green-houses were built years ago, mostly of old material, are beyond repair, and in imminent danger of falling down. The two are valued at \$50. A new green-house with propagating rooms should be erected. This improvement would cost \$2,500.

In the main kitchen a new and enlarged equipment is needed—range, steam kettles, utensil rack, steam tables, etc. The bake-oven needs repairing, if not rebuilding. To make these improvements will cost \$1,000.

Some steps should be taken to increase the dining-room and dormitory capacity. At the present time 312 pupils are seated in a dining-room that will comfortably accommodate about 250. The dormitories are so crowded that in not a single one of the twelve is there sufficient room in which to place chairs, one for each bed, as should be the case, the occupants of the beds having to sit upon them to undress, and having to pile their clothing upon them at night. There must be a rearrangement of some kind to comply with sanitary requirements. The Secretary of the State Board of Health has visited and inspected the dormitories, and has pronounced them too crowded, there being but 514 cubic feet of breathing space for each pupil.

If the attendance is not to be limited to 325, the probable number next year, then the school-room capacity must be also increased, for at present every room in the building excepting one is in use. Two additional rooms may be gained by reducing the size of the art-room, and making a new school-room at either end thereof, but this would ruin the art-room. One additional room may also be gained by reducing the size of the library.

It is hoped that the committees of the General Assembly having such matters in charge will visit the institution and make due and careful examination of its pressing needs. If

they will do this, I am confident their recommendations for appropriations will be just and satisfactory. Actual inspection will present necessities much better than words.

RECAPITULATION.

Special appropriations for—

Present year	\$5,208 65
Boiler, etc.	2,000 00
Ironing-room addition	3,500 00
Boys' play-room	1,800 00
Change of beds	1,500 00
Greenhouse	2,500 00
Change in kitchen	1,000 00

OTHER IMPROVEMENTS AND REPAIRS.

Other improvements and repairs should be made in the near future, if the school is to be placed in first-class condition and so equipped as to properly and successfully fulfill its mission.

The buildings should be repainted within the next two years, as the paint is scaling off in many places, and the walls are beginning to look shabby. The slate roofs upon two of the buildings are in very bad condition and need replacing, if not now, certainly within a short time. A detached hospital building should be erected, for at the present time the sick-rooms are on the third floor immediately over the bake-shop, kitchen and dining-room, and are shut in by high walls on each side. A kindergarten cottage should be erected for small boys and girls, so as to prevent their association with the larger ones at all times, which is undesirable. A gymnasium building of brick should be erected and fully equipped, for the use of both boys and girls, so that proper attention could be given to physical culture. A store-house should be built, curbing should be placed along the driveways, the pond from which we get our ice supply cemented and its banks riprapped, and the lighting capacity increased.

SALE OF PRESENT LAND.

The land belonging to the Institution amounts to *102 acres, more or less, there being twenty-five acres in the main central tract, sixteen north of it and sixty-one to the south, the whole being valued at \$270,840, and costing originally less than \$6,000. As is well-known, the city has grown up to and far be-

* This does not include the 1¼ acres enclosed by the Reform School for Girls, valued at \$3,720, reference to which has been made. In the inventory this ground is included.

yond this land, which really constitutes a farm within the city. The land north and south is well worked out, and at its best is constantly open to depredation, so far as its crops are concerned.

In view of the high value of our present holdings and the urgent need of improvements necessary for the Institution to work out its greatest good and place itself in the front rank of educational institutions for the deaf, a credit to the cause and to our State, would it not be advisable to sell as much of this land as may be necessary to make the necessary improvements?

It was originally purchased for the benefit of this Institution by far-sighted Trustees, who foresaw the time when it would be valuable, and its equivalent in money needed by the Institution for improvements. For the benefit of the Institution it was all deeded to the State "for the only proper use and behoof of the Trustees of the Indiana Asylum for Educating the Deaf and Dumb, and their successors and assigns forever," and the Institution has at least an equitable right to its proceeds, if it should be sold. And would it not be well to sell part of it, using the proceeds, first, to purchase a dairy farm of 160 acres farther out, at a ten-fold cheaper rate; and second, to make the necessary improvements?

DAIRY FARM.

If such a farm should be purchased, a man and his wife, with one assistant, living thereon, could raise nearly all the produce, provender, etc., that would be needed, at less cost than now, for more could be gathered, and at less cost than we would have to pay, if purchased in the open market. Slops would no longer prove a nuisance, and could be used for fattening hogs to be butchered each winter for our own tables, thus reducing the yearly cost of meat and lard. In many ways such a farm would be of great benefit to the Institution. While the yearly increase in the price of our present land will be lost, will not the improvements made and yearly increase in the price of the land to be purchased offset it? The city is growing rapidly, and eastward, too, and the new land will certainly advance in value very rapidly. Under all the circumstances, while being liberal to deaf mute education, would it not be an economic way in which to make absolutely necessary improvements, and also good policy?

CHANGE IN LOCATION.

Concurrent with the suggestion for a sale of part of the land, is the thought: Would it not be wise to sell all of it and move the Institution to another site, north of the city, containing two hundred or more acres, where a farm could be directly connected with the Institution? The present buildings are old, two of the main ones having been erected in 1850, and are not arranged agreeably to modern thought and progressiveness. Two railroads pass through the grounds very near to the buildings, the shops and yards of one company being at one end of the park, and the yards of the other at the other end. The regular trains and the switch engines are constantly passing and repassing, and are a nuisance with their noise, smoke and dirt. And for many other reasons which will readily suggest themselves, this is not an ideal site for such a school as this, with over three hundred pupils.

A PERMANENT FUND.

If it should be deemed best to retain the present location, and unwise at the present time to either purchase a dairy farm or to use the proceeds arising from a sale of part of the land for improvements, then I suggest that part be sold, and that the proceeds constitute an endowment fund, the interest on which should be credited to the principal, and the whole held until some future time, when a change in location shall become imperative.

PER CAPITA EXPENSE.

Maintenance deficit, 1894-95, brought forward.		\$1,345 11
Maintenance, 1895-96.		56,207 70
Total maintenance		\$57,552 81
Less deficit at end of year, 1895 96.		2,433 77
Total payments, maintenance, 1895-96		\$55,119 04
Less value of clothing furnished pupils and to be re- funded to the State by counties	\$1,771 55	
And ordinary earnings paid general fund.	80 58	1,852 13
Balance total payments		\$53,266 91
Average daily number of pupils, 300.5.		
Net per capita expense to State, payments.		\$177 26
Per capita, industries, payments		9 98
Per capita, C. E. and repairs, payments.		14 97
Total net per capita expense to State, payments		\$202 21
Per capita, maintenance, deficit \$(1,88.66)	\$3 62	
Per capita, C. E. and repairs, deficit (\$30.00)	10	3 72
Total net cost to the State for year		\$205 93

In making comparison with other similar schools in other States (and this is the only fair comparison to make), the total net per capita payments for maintenance and industries (\$187.24, excluding maintenance deficit) should be taken, for it has been found that other schools do not include repairs in their showing of per capita expense—they confine themselves to payments for ordinary expense (maintenance). Another thing should be borne in mind: We have taken as the divisor the average daily number of pupils present (300.5), and not the total number of those enrolled during the year (373), which latter number is most frequently used for the purpose of computing per capita expense. With 373 as a divisor, the net per capita would appear to be very much less than as given above. While this would not be correct, it is not as incorrect as one would suppose, if thought be given to the fact that a certain fixed number of officers, teachers and employes must be provided, whether the number of pupils during the year be more or less, as they are of both sexes and in or from twenty-five classes.

In New York, which has seven schools for the deaf, the general average per capita expense for the past year was \$231.56, exclusive of clothing. Several of the schools are sectarian, and the cost for the teachers is nominal, else the per capita expense would be still higher. In the Philadelphia school, which is the largest in the world, the per capita expense one year ago was \$283. Investigation will show that in most schools which are well equipped and in the front rank, the per capita expense is far greater than in Indiana, and it is with such schools that Indiana files abreast.

If comparison be made with benevolent, penal and reformatory institutions of Indiana, it should be borne in mind that this is purely a school in every sense of the term; that a greater number of teachers and smaller classes are required than in ordinary schools, and that teachers who must necessarily be skilled in a peculiar work command higher salaries than do teachers in any other line of work.

Taking the entire number of literary teachers in all the benevolent, penal and reformatory institutions of the State, and considering salaries paid them, it is found that this Institution has 47 per cent. of the whole number, and pays 60 per cent. of the salaries.

CONCLUSION.

I appreciate the uniform courtesy and kindness shown me at all times by your Board, and have been encouraged in the performance of my duties by your unselfish devotion to the cause. During my fourteen years' connection with the Institution, six in a subordinate position and eight as Superintendent, I can recall no year more successful or more pleasant in all its phases than the past one.

In conclusion, gentlemen, I submit the foregoing, and the tabulated statements, rules and regulations for the admission of new pupils, course of study in detail, roster of pupils, and the various reports and exhibits hereinafter set out and hereof made a part, as my annual report for the fiscal year ending October 31, 1896.

Respectfully,

RICHARD O. JOHNSON,

Superintendent.

COURSE OF STUDY IN DETAIL.

At the beginning of each school year, review the last year's work until October 15; then begin the regular grade course.

PRIMARY GRADES.

GRADE 1—*Language*—Past, present and future tenses of the active voice, including past, present and future of “to be”; these to be taught in the three sentence forms, positive, negative and interrogative. *Arithmetic*—Notation 1 to 10; mental addition. *Penmanship*—Instruction with slate pencil and crayon, followed by pen and ink exercises on paper.

GRADE 2—*Language*—All tenses of the active voice and the verb “to be.” *Arithmetic*—Notation 1 to 20; addition and subtraction, mental and written. *Penmanship*—Copy-book work, Nos. 1 and 2. *Drawing*—First principles, using blackboard and slate; drawing book No. 1. *Letter Writing*. *Object and Observation Lessons*.

GRADE 3—*Language*—All tenses, active, passive and progressive; journal writing. *Arithmetic*—Notation 1 to 50; addition and subtraction; dollars and cents; buying and selling; mental and written. *Penmanship*—Copy-book work, Nos. 3 and 4. *Drawing*—Drawing books, Nos. 2 and 3. *Letter Writing*. *Object and Observation Lessons*.

GRADE 4—*Language*—Verb forms and sentence models continued, introducing idioms; journal writing. *Arithmetic*—Notation 1 to 100; addition and subtraction; multiplication and division, with single figure in multiplier and divisor; dollars and cents; mental and written. *Geography*—Written by teacher, concerning Institution, city, county and State; show principal towns, rivers, lines of railway, highlands and lowlands; map drawing. *Penmanship*—Copy-book work, Nos. 5 and 6. *Drawing*—Drawing books, Nos. 4 and 5. *Letter Writing*. *Object and Observation Lessons*.

GRADE 5—*Language*—Verb forms and sentence models completed; systematic instruction in idioms; journal writing. *Arithmetic*—Practical problems in the four fundamental rules, introducing properties of numbers, cancellation and fractions; United States currency. *Geography*—First lessons; general

division and features of land and water and form of the earth; map drawing. *Penmanship*—Copy-book work, special selection. *Drawing*—Drawing books, Nos. 6 and 7. *Letter Writing*. *Object and Observation Lessons*.

INTERMEDIATE GRADES.

B GRADE—*Language*—General review of verb forms and sentence models; systematic instruction in idioms continued; journal writing. *Arithmetic*—Common fractions continued; denominate numbers begun; practical problems in money. *Geography*—Geographical reading lessons, elementary mathematical, physical and political; map drawing. *History*—September to January, written by teacher, concerning Institution, city, county and State; January to June, stories of American History. *Drawing*—Special selection. *Object and Observation Lessons*.

A GRADE—*Language*—General reading and idioms continued; compositions. *Arithmetic*—Common fractions completed; decimals; denominate numbers completed; exercises in commercial forms. *Geography*—World's mathematical and physical; globe and map studies and map drawing. *History*—Elementary United States.

ACADEMIC GRADES.

*** JUNIOR GRADE**—*Language*—General reading and idioms continued; compositions. *Arithmetic*—Percentage; practical problems in profit and loss, commission, insurance, taxes, duties, etc.; exercises in commercial forms. *Geography*—World's political; map drawing. *History*—September to January, Complete United States, beginning of Revolution to present; January to June, selected General History; stories of both.

*** MIDDLE GRADE**—*Language*—Grammar and general reading; compositions. *Arithmetic*—Interest; discount; exchange; partnership; ratio and proportion. *History*—English. *Physiology*—

*During the present year the Junior and Middle Grades are combined into one, and the following shall be the course of study :

Language—Grammar and general reading; compositions. *Arithmetic*—Percentage; interest; discount; exchange; partnership; ratio and proportion. *History*—September to January, Complete United States; January to June, English. *Geography*—World's Political; map drawing. *Physiology and Anatomy*—Elements of, and lectures, making use of anatomical models, skeletons, etc.

Books Used—As provided for in Middle Grade, adding Higginson's United States History and Indiana Complete Geography.

Elements of, and lectures, making use of anatomical models, skeletons, etc.

SENIOR GRADE—*Language*—Grammar and literature. *Arithmetic*—Analysis; roots; mensuration; general review. *Natural Philosophy*—Lectures and experiments. *Natural History*—Elements of, and lectures. *Moral Philosophy*—Lectures. *Civics*—Outline in general, United States in particular, by lectures.

TEXT BOOKS USED.

GRADE 1—No books; lesson-papers.

GRADE 2—No books; lesson-papers.

GRADE 3—First Reader (Cyr); lesson-papers.

GRADE 4—Stories for Language Study (Kellogg).

Elementary Arithmetic (Indiana).

MS. Geography (Teacher).

Lesson-papers.

GRADE 5—Stories of Great Americans (Eggleston).

Elementary Arithmetic (Indiana).

First Lessons in Geography (Monteith).

Lesson papers.

B GRADE—Stories of American Life and Adventure (Eggleston).

Elementary Arithmetic (Indiana).

Elementary Geography (Indiana).

MS. History (Teacher).

First Book of American History (Eggleston).

A GRADE—Lessons in Language, Part I (Tarbell).

Book of Tales (Ed. by Swinton).

Complete Arithmetic (Indiana).

Complete Geography (Indiana).

Elementary History of the United States (Quackenbos).

JUNIOR GRADE—Lessons in Language, Part I (Tarbell).

Old Stories of the East (Baldwin).

Complete Arithmetic (Indiana).

Complete Geography (Indiana).

United States History (Higginson).

General History (Anderson).

MIDDLE GRADE—Lessons in Language, Part II (Tarbell).

Ten Great Events in History (Johonnot).

Complete Arithmetic (Indiana).

English History (Berard).

Eclectic Physiology (Brown).

SENIOR GRADE—Lessons in Language, Part II (Tarbell).

Primer of English and American Literature (Clarke).

Shakespearean Primer (Institution edition).

Complete Arithmetic (Indiana).

Natural History of Animals (Tenny).

Natural Philosophy, lectures and experiments.

Moral Philosophy, lectures.

Civics, lectures.

COPY BOOKS—Indiana Series.

DRAWING BOOKS—Prang's.

SPECIAL INSTRUCTION.

Special instruction is to be given pupils by special teachers, as follows:

DRAWING—Grades 3, 4a, 4b, 4c, 5a, Tuesday and Thursday mornings; grades 5b, 5c, B1, B2, 1st oral, Monday and Wednesday mornings; grades 2a, 2b, 2d, 3d and 4th oral, Friday mornings.

PAINTING—Girls of Academic and A grades, afternoons.

INDUSTRIAL DEPARTMENT.

Instruction will be given in this department to assigned pupils as follows:

Carpentry, cabinet-making and turning.....	6	years' course.
Shoe and leather work.....	6	"
Printing—Composition, press-work, binding.....	6	"
Tin work when added.	3	"
Cooking when added.....	1	"
Sewing, plain	3	"
Dressmaking—Cutting, fitting, draping.....	2	"
Sewing—Fancy needle-work	2	"

Instruction will also be given to the girls in all kinds of house-work as may be arranged for by the Superintendent. Certain boys will also be assigned to the bake-shop, kitchen, carpenter shop, greenhouse and farm. Boys not assigned to regular trade courses and other places mentioned shall be required to do police duty around buildings and grounds.

Admission to the regular trade courses for boys will be from Grade 5.

Admission for the girls will be from Grade 3.

In addition to the above, the girls in the Academic and A Grade will be taught drawing, designing, modeling and wood carving. Boys may be admitted to these classes.

NOTES ON COURSE OF STUDY.

The vocabulary of a class will be governed by the verb forms taught, and the daily incidents of each particular class-room. The general course in language is a graded one which must be closely adhered to as prescribed in "The Indiana Language Manual" prepared for use in this school by Noble B. McKee, formerly Principal of the Primary Grades, and in which are set out systematically the verb forms and sentence models for each particular grade.

For journal writing, a good, substantial book will be provided, which must remain in the possession of the teacher, except when pupils are writing therein. It must be explained by the teachers that the book is to be a four years' record of journal writing (third, fourth, fifth and sixth years) and must show neatness, tasteful arrangement and legible penmanship, otherwise it will be to their discredit when promotions are to be made.

The journal record is intended to show progress in the use of language and in the assembling of ideas, and will largely qualify the "marking" upon which promotion will be based. The record must be submitted to the supervising principals for inspection at such times as they may direct.

Compositions upon assigned subjects must be written by pupils in the A, Junior and Middle grades at least once every two weeks. At the end of every six weeks the compositions last written must be submitted to the Superintendent for his inspection.

In journal writing and composition, corrections must not be made upon the written page. The journals and compositions must be left and submitted just as written by the pupil. Common errors, however, must be noted by the teacher, written upon the blackboard, and thoroughly explained to the class.

Reproduction of stories read and rearrangement of stories incorrectly written on the blackboard may occasionally be substituted for journal writing and compositions.

Letter writing will be done on alternate Mondays. If pupils be absent from class because of sickness, accident or similar cause, a card or envelope, properly addressed, must be sent to the Superintendent, who will write concerning the pupil. Letter writing in proper form must be *taught* by the teacher—it is not sufficient to see that it is done—it must be seen that it is *properly* done.

When written lessons or lectures are to be prepared by the teacher, it is expected that the greatest care shall be taken in their preparation. A poorly written one is worse than none at all, and will work a positive injury to the child.

Daily language lessons for the printed lesson-papers must be written as directed by the supervising principals, and must be submitted to them not later than 12 o'clock each day.

Concerning Object and Observation Lessons, it is desired that special attention be given this matter, and teachers must exercise their ingenuity as to what, where and when; and, in the words of a noted educator of the deaf, if they have no ingenuity, "let them get some."

While believing that of any given number of deaf pupils taken at random, many thereof must be educated by means of the sign language, it is nevertheless folly to persist in the use of signs upon any and all occasions, to the total exclusion of the manual alphabet—absolute folly. It is well known, and, in fact, conceded by all, that the use of the manual alphabet tends to more speedy acquisition of *word-language* in grammatical form than do signs. A child must first possess ideas, then language to express. Let signs be used to generate or explain ideas, abstract or otherwise—and in *manual, oral, or auricular* classes; let the manual alphabet and writing, and speech where possible, be used to teach *word-language*, for this is absolutely indispensable to the deaf-mute in either verbal or written form, unless he is intended for one of a "deaf-mute variety of the human race."

WHICH ALL MEANS—

That officers, teachers, employes and pupils must make as great use of the manual alphabet during the year as may be

possible, and especially in school-room work during and after the second year—more especially in the upper grades.

That the only way to know a *word-language* is to use such a one.

That while the sign-language may and should be used, perhaps, for the awakening of ideas, and for lectures, demonstration or explanation, and in social intercourse, it must be remembered that it is an ideographic one, and that its use all of the time becomes an abuse for which the pupil suffers.

In the industrial classes the instruction must be thorough and systematic. Attention must be given to all branches of the work. It must be remembered that the shops are industrial class-rooms, and are to be kept in orderly and cleanly manner, open to the inspection of visitors at all times.

NOTICE.

All plans for school-room work, preparations for lessons (excepting the daily lesson paper), etc., must be made out of school hours.

RULES CONCERNING THE ADMISSION AND RETENTION OF PUPILS AND WHAT SHALL BE TAUGHT THEM.

(Adopted by the Board of Trustees July 6, 1893.)

1. This Institution is open to all the deaf of the State free of charge, provided they are of suitable age and capacity for receiving instruction, and are too deaf to be educated in the common schools.

2. Pupils will be considered of proper age between the years of eight and twenty-one. No applicant who is idiotic, feeble-minded, afflicted with sore eyes or with a contagious or offensive disease, or who is an invalid so confirmed as to prevent study, will be received.

3. This Institution is in no sense an asylum, neither is it a hospital. It is strictly an educational institution—a school.

4. Applications for the admission of pupils must be made upon regular blanks of the Institution, which will be furnished the applicant by the Superintendent. All questions on these blanks must be fully answered, and the requirement of the certificate of a Justice of the Peace on the back thereof (that the person seeking admission as a pupil is a legal resident of the county named), must be complied with. *See section 2762, R. S. 1881.*

5. Pupils will be admitted on the following conditions: (1) The pupil, provided with clothing, must be brought to the Institution punctually at the beginning of each session, unless detained at home by sickness. (2) The pupil is to remain in school until the second Wednesday in June of each year. (3) No parent or guardian will be allowed to take a pupil out of the school during the session without some urgent reason. Pupils will not be allowed to go home during the holidays.

6. The annual session of school begins on Wednesday of the week during which the State Fair is held (*usually September 20 to 24*) and closes on the second Wednesday in June. Pupils must come promptly on or before the first day of the month.

7. No pupil, unless under extraordinary circumstances, can be received at any time other than at the beginning of the annual session.

8. The Institution will provide for each pupil regularly admitted, boarding, lodging, washing, superintendence of conduct, manners and physical needs, instruction, school supplies, etc., but will not pay traveling expenses of pupils in coming to or going from the Institution, nor supply them with clothing, except under certain conditions mentioned in Paragraph 11.

9. All traveling expenses of pupils to and from the Institution must be defrayed by their parents or guardians. They are also required to furnish annually to each pupil sent by them, a sufficient quantity of suitable clothing to last until the close of the term. *See Sec. 2763, R. S. 1881.* A good, stout trunk must also be supplied. The name of the pupil should be written with indelible ink upon the articles of clothing, as they are liable to be lost when not so marked.

10. The applicant must deposit with the Superintendent, when the pupil is admitted, a sum not less than \$5.00 to defray incidental expenses for said pupil during the year. If any part of said deposit should remain unexpended at the close of the annual session, it will be returned or carried forward to the next session, as the applicant may desire.

11. When it is established that a person is in indigent circumstances, and the parents or guardians are either unable or neglect to furnish the necessary clothing, or to pay the necessary traveling expenses, they, or either of them, will be supplied by the Superintendent in pursuance of the following legislative enactment:

Sec. 2464, R. S. 1881. In all cases where suitable clothing and means for defraying traveling expenses are not otherwise supplied to the pupils, the same shall be provided by the Superintendent, who shall make out and file with the Treasurer of State accounts therefore, separate in each case, against the respective counties from which such pupils are sent, in an amount not exceeding forty dollars per annum, for every such pupil, which accounts shall be severally signed by the Superintendent and attested by the seal of the Institution under his charge; and the Treasurer of State shall charge each account thus certified to the county from which the pupil named therein was sent.

Sec. 2765, R. S. 1881. The Treasurer of State shall forward each account so filed with him to the Treasurer of the proper county, who shall cause it to be paid out of the County Treasury to the Treasurer of State; *and such county shall, in the name of the county, and by suit, if necessary, collect the amount of such account from the parents or estate of such pupil, as the case may be, where there is ability to pay: Provided, That at least three hundred dollars of the property of such parents shall be exempt from the payment of such account.*

12. The course of study in the Institution is so arranged as to cover ten years, and is divided into primary, intermediate and academic courses. The primary and intermediate courses embrace spelling, reading, writing, arithmetic, geography, history and grammar. The two courses are divided into seven grades, five primary and two intermediate, and the time required to complete them in seven years. The academic course comprises a three years' course of advanced primary and intermediate work, and a study of the sciences. The number of years a pupil may remain in the school is regulated by a time-schedule, and depends upon the mental ability, progress and conduct of the pupil himself. He may remain certainly five years, and as much longer up to thirteen years as his conduct and promotions from year to year may warrant.

13. The Superintendent shall have the power at any time to discharge a pupil from the Institution for inability to receive an education, for failure to make the necessary progress, for violation of the rules of the Institution, or where his retention would prove a detriment to others or to the school. He may also, when he thinks the facts warrant it, extend the period of instruction in individual cases.

14. It is the intention of the Trustees to render the pupils self-supporting in greater or less degree after leaving the Institution, by requiring them to become proficient in some useful trade or occupation while in attendance at the Institution. In accordance with this design all the pupils will be required to labor a portion of each day, the girls performing the lighter kinds of house work and various kinds of needle work, such as plain and fancy sewing, dressmaking and tailoring; and the boys at various trades, such as printing, cabinet-making, carpentry and wood turning, tailoring, shoemaking, farming, floriculture and baking. Pupils will be assigned to one or more of

these occupations, or others, as the Superintendent may deem them most fitted for. In addition to the above, the girls in the Academic Department will be taught drawing, painting, modeling, designing and wood carving. Boys may be admitted to these classes.

15. In the education of the deaf there are two methods and one system of instruction usually recognized.

The Manual or French Method (using sign language, manual alphabet and writing), of which there is a variety that may be called the "Alphabetic," wherein only the manual alphabet and writing are used. The Oral or German Method (using speech and speech-reading and writing), of which there is a variety that may be called the "Auricular," wherein special attention is given to the development and training of the hearing, by means of which instruction is given. The combined system (a so-called combination of the two methods).

The general system of instruction used in this Institution is known as the combined (American) system, under which all known methods and their variations may be used for the attainment of an object common to all. Speech and speech-reading are regarded as very important, but mental development and the acquisition of language are regarded as still more important. It is believed that with a great number of the new pupils now entering, the necessary mental development and acquisition of language may be as well attained by the Oral Method, which results in speech and speech-reading, as by the Manual Method, which precludes this much-to-be-desired result. So far as circumstances permit, such method (or methods) is chosen for each pupil as seems best adapted to his needs and capacity after thorough trial. In short, the rule will be, "*any method for good results—all methods, and wedded to none.*"

16. The Institution is non-sectarian, but thorough moral and religious instruction will be given, especially on the Sabbath, the nature of it being general and such as is accepted by all churches and creeds.

17. Those persons bringing pupils to or taking them away from the Institution can not be furnished with board or lodging.

18. The pupils will be sent home to spend the vacation on the day following the close of the School.

19. Being *Sec. 2767, R. S. 1881*. Whenever it shall be deemed necessary by the proper officers of the Institution in accordance with the by-laws and regulations, to have any pupil removed, either temporarily, or on account of ill health, or the vacation of the school, or permanently on account of having completed his course of instruction, or been found disqualified from any cause for a longer continuance in the school, the parents or guardians of such pupil, if he have any, shall promptly remove him upon the requirement of said officers; and in case he shall not be thus provided for, it shall be the duty of the Superintendent of the Institution to cause him to be so removed and delivered to the Trustee of the Township where he resided before coming to the Institution; and the expense of such removal shall be refunded to the Institution in the same manner as provided in Sections 2764 and 2765; and the County Treasurer shall charge the same to the proper township, and collect it in the manner as provided in aforesaid sections.

20. All business letters or letters of inquiry in regard to pupils, or their concerns, or in regard to new pupils whom it may be designed to place in the Institution, must be addressed to the Superintendent and not to subordinates, otherwise no attention will be paid to such letters.

PUPILS BY COUNTIES.

The Following Table Shows by Counties the Number of Pupils Admitted and Dismissed From Each During the Year, and the Number Remaining, Enrolled and Entitled to the Privileges of the Institution on the 31st of October, 1896:

COUNTIES.	Admitted.	Discharged.	Remaining.	COUNTIES.	Admitted.	Discharged.	Remaining.

To the Board of Control:

GENTLEMEN—I submit the foregoing Exhibits 15 and 16 as an itemized statement and inventory of all resources and liabilities of the Indiana Institution for the Education of the Deaf and Dumb, on October 31, 1896.

RICHARD O. JOHNSON,
Superintendent.

STATE OF INDIANA, }
MARION COUNTY. } ss:

Personally appeared before me, a Notary Public in and for the said State and county aforesaid, Richard O. Johnson, Superintendent of the Indiana Institution for the Education of the Deaf and Dumb, who, being duly sworn, upon his oath, says, that the foregoing exhibits are a complete inventory of all the property, real and personal, belonging to the State of Indiana and connected therewith, or in use in or about the same on the 31st day of October, 1896.

RICHARD O. JOHNSON.

Subscribed and sworn to before me this 15th day of November, 1896.

WILLIAM E. TODD,
Notary Public.

INDIANA INSTITUTE FOR THE BLIND.

INDIANAPOLIS, INDIANA.

INFORMATION.

1. The purpose of this Institute is purely educational, and it is in no sense an asylum or home for the aged or helpless. The aim is to give a practical education to the young blind of both sexes residing in the State. All the common school branches are taught, besides several industrial trades, such as broom and mattress-making, carpet-weaving, cane-seating chairs and piano-tuning. The girls learn sewing, by hand and machine, knitting, crocheting, bead and fancy work. The idea is to make the pupils useful, contented, self-supporting citizens. An extensive course in music is available to all who have talent in this direction. Instruction is given on the piano-forte, organ and brass band instruments, while for purposes of vocal training the pupils are divided into two choirs. A gymnasium is equipped and a special teacher drills the pupils in systematic physical exercises. Pupils while out of recitations are in charge of a governess. Neatly furnished hospitals are provided for the sick.

2. The school year commences on the second Wednesday of September, and continues in session forty weeks. There is no vacation during the session.

3. As a rule, applicants who are under six or over twenty-one years of age, are not admitted, but exceptions are sometimes made in favor of those who are over age, at the discretion of the Board of Control.

4. No person of imbecile or unsound mind, or of confirmed immoral character, will be knowingly received into the Institute; and in case any pupil shall, after a fair trial, prove incompetent for useful instruction, or disobedient to the regulations of the Institute, such pupil will be thereupon discharged.

5. The Institute is maintained by the State, and tuition, board and washing are furnished free of cost to all pupils residing in Indiana. The parents or friends of pupils are expected to supply them with comfortable clothing, suitable for summer and winter wear, in such quantity as will admit of necessary changes. Each article of clothing should be distinctly marked with the owner's name, and must be sent in good condition. The traveling expenses of pupils must be defrayed by parents or friends.

6. It is positively required that every pupil shall be removed from the Institute during the annual vacation of the school, as well as at any other time when such removal may be deemed necessary by the proper officers thereof; and in case of the failure of the friends of any pupil to comply with this requisition, provision is made by the law for the sending of such pupil to the Trustee of the township in which he or she resides, to be by him provided for at the expense of the county.

7. Persons bringing pupils to the Institute or visiting them while there, can not be accommodated with boarding and lodging during their stay in the city.

8. All letters to the pupils should be addressed in the care of the Institute in order to insure their prompt delivery.

9. Parties desiring the admission of a pupil are required to fill up the required form of application and forward the same to the Superintendent of the Institute, giving truthful answers to the interrogatories therein contained, and procuring the signature of a justice of the peace to the certificate thereunto attached; and the pupil must in no case be sent until such application shall have been received and favorably responded to by the Superintendent.

10. The Superintendent will cheerfully give information in regard to the Institute, and will thankfully receive any information concerning those who should be receiving its benefits.

That the work of the institution may be done to the highest good of all, it is necessary that *every* pupil shall be present at the opening of the term. Faithful work and prompt and regular attendance are essential to advancement and promotion. No pupil who is tardy at the beginning of the term, is irregular in attendance, or drops out before the close of the term, can hope to do acceptable work and receive promotion. Unless there is an excellent reason for doing otherwise every pupil should be present on the first day and remain throughout the term.

Each pupil before entering the institution should be supplied with the following clothing of good quality:

BOYS—Two hats, two suits of clothes, two extra pairs of pants, four pairs of socks or six pairs of stockings, four shirts, two suits of underwear, two pairs of shoes, six handkerchiefs, two pairs of suspenders, a tooth brush, a clothes brush, and a comb and hair brush. Small boys need no suspenders, but should be supplied with an extra suit of underwear.

GIRLS—Two woolen and two cotton dresses, four aprons, three night dresses, two suits of summer and three of winter underwear, two dark and two light skirts, six pairs of stockings, six handkerchiefs, a wrap, a hat, rubbers, two pairs of shoes, a tooth brush, a clothes brush, a comb and hair brush.

This amount of clothing will be necessary within the year, that the children may be kept clean and comfortable. When parents are *not able* to furnish the required clothing they should not hesitate to call upon the Township Trustee, who will cheerfully provide for the needs of those who are worthy. All clothing should be marked with indelible ink.

The appropriation for this institution has been materially reduced, making it necessary for us to reduce the cost of maintenance in like proportion. To this end it will be necessary for parents, guardians, etc., to provide for *all incidental expenses* of pupils. It will likewise be necessary for all persons sending children to the institution to furnish them transportation to their homes at the close of the term.

REPORT OF BOARD OF CONTROL.

HONORABLE CLAUDE MATTHEWS, *Governor* :

In presenting the fiftieth annual report of the Indiana Institute for the Education of the Blind we are pleased to state that the past year has been one of unusual prosperity in the institution. The general health of the pupils has been good. One case of scarlet fever developed in the institution, but the prompt action of our physician prevented the spreading of the disease. One death occurred within the year—that of a pupil who was ill when sent to the institution. The pupils have made commendable progress under the systematic and unified efforts of the officers and teachers of the institution. We desire to call your attention to the report of the State Board of Charities concerning this institution and to our appended financial report for the year just closed. The General Assembly of 1895 materially reduced the appropriation for the maintenance of this institution, yet we are pleased to report that we have been able to bring our expenses within the appropriation and at the same time to keep the buildings and grounds in a good state of repair.

One hundred and thirty-nine pupils were enrolled last year. Of these ten graduated from the literary department and two from the industrial departments. Two of those who graduated from the literary department also received diplomas from the music and tuning departments, and two were granted diplomas from the industrial departments. Number of pupils in attendance at the present time, 126.

The new green-house has been completed and is now occupied. The ventilation of the building has been much improved by cementing the basement of the new part of the building. The air entering the radiators formerly passed over the loose dirt thrown out in digging the trenches for the foundation walls. This loose dirt has been removed and the entire basement cemented, so that the air now passes over a clean smooth

surface. The barn has been repaired and the floor cemented ; the dining-rooms and pupils' sitting-rooms have been repaired and papered ; and considerable whitewashing, calsomining, and painting has been done throughout the building.

We have shown our appreciation of the earnest and faithful service of the officers and teachers of the institution by re-employing them for another year.

The following is a statement of all moneys received and expended during the year :

RECEIPTS.

Appropriation for maintenance	\$27,000 00
Appropriation for repairs.....	2,500 00
Appropriation for industrial departments	1,000 00
Appropriation for library.....	500 00
Maintenance receipts from industrial departments	1,089 49
Total.....	\$32,089 49

EXPENDITURES.

Maintenance account	\$28,089 49
Repair account.....	2,498 46
Library account	500 00
Industrial account	995 12
Total	\$32,083 07
Unexpended balance for work shops	\$4 88
Unexpended balance for repairs.....	1 54
Miscellaneous receipts paid State Treasurer	38 20
Receipts from counties for clothing paid State Treasurer	90 63
Total amount returned to State Treasurer..	\$135 25

Respectfully submitted,

NELSON BRADLEY,
JAS. L. ALLEN,
JOHN F. HENNESSEY,
Board of Control.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Control:

GENTLEMEN—I hereby submit to you my second annual report as Superintendent of the Indiana Institute for the Education of the Blind. In doing so, I am pleased to report that in all departments there has been satisfactory progress and that there has been perfect harmony and coöperation among the officers and teachers of the institution. In all my efforts I have met with a most sympathetic and loyal support from all the employes. The spirit of unity prevailing, we have been able to expend all our energies for the good of the institution.

The changes made at the close of last year have proven very satisfactory. The Broom Department has never been more prosperous, and an equal number of pupils has never done a greater amount of satisfactory work in this department than has been done during the past year. The girls' workroom has more than met my expectations. The work in this department is practical and well organized. In the light of these favorable conditions I thought it wise to retain the same corps of officers, teachers and other employes.

The institution has been blest with excellent health throughout, though one pupil died in the institution. W. C. Hobbs entered the institution September 26 and died October 10. He was ill when he came to us and grew worse until his death occurred. Though his application, signed ten days before the opening of the term, stated that he was in good health, it was afterward ascertained that his health had been failing for several weeks before the application was made.

One of our pupils also died at his home. Park Giles went home in usual health October 18, 1895, and died December 18. Every one in the institution loved Park. He was always hopeful and always kind, never causing the officers and teachers any trouble nor his schoolmates any pain.

There was one case of scarlet fever in the institution, but the prompt action of our physician prevented the spreading of the disease. In this connection I desire to commend Dr. Frank A. Morrison for the faithful and skillful manner in which he has performed his duties as attending physician.

EXHIBIT.

An exhibit of the work done during the year was made at the close of the term of 1895-6. The assembly room was put in order and in the room was arranged the work of the various departments. The arrangement of the work was completed on Friday afternoon and on Saturday morning the room was opened to the public and remained open until Tuesday evening. Though it rained almost the entire time, many visitors were present both from the city and from out of the city. The city papers sent representatives and published full reports of the work on exhibit.

I feel justified in saying that this exhibit will be of much educational value both in and out of the institution. Each teacher, busy with his own work, could know but little of what other departments were doing. It was possible for the Superintendent only to know the system of organization and the relation of the various departments. The bringing of the work of the whole institution together and correlating it enabled the officers and teachers more fully to understand and appreciate the work of each department and the relation of each department to the others. In this manner effort was stimulated and the organization emphasized. In like manner the pupils were encouraged when they saw brought together in one display the work of their hands. Through the press and those who visited the exhibit we hope the work and purpose of the institution will be rightly interpreted to others.

THE FITZPATRICK FUND.

Amount on hand November 1, 1895	\$630 27
Interest one year at 6 per cent	37 82
	<hr/>
Amount on hand November 1, 1896	\$668 09

RECOMMENDATIONS.

It is a cause for congratulation that our expenses have been brought within the appropriation made by the last General Assembly without injury to any of the departments of the institution. While the scope of the work remains the same as it now is, and provisions remain at present prices, the appropriation for maintenance need not be increased. I would respectfully recommend the following annual appropriations:

For maintenance.....	\$27,000 00
For industrial departments	2,000 00
For library and museum	500 00
For repairs.....	2,500 00
Total ..	<hr/> \$32,000 00

While the institution continues to occupy only its present field and to work with the same facilities, our present appropriation for maintenance is sufficiently large; but there are new lines of work which we have not essayed to take up, and there are possibilities along old lines which we have not reached and can not reach with our present appropriation. Hence, when I recommend an appropriation of \$27,000, I do so knowing that the Indiana institution can not, with such an amount do its highest work, nor will it be able to take rank with the best institutions of the country.

I have recommended an appropriation of \$2,000 for the industrial departments because such an amount is necessary for their proper maintenance.

The salaries for four teachers in these departments are	\$1,425 00
Supplies and materials for the past year	887 62
Total	<hr/> \$2,312 62

In this estimate no allowance has been made for replacing worn out machinery and apparatus.

The appropriation of \$500 annually for a library and museum is proving a profitable investment. The literature for the blind is yet very limited, hence blind pupils are greatly dependent upon their teachers, who read to them daily from current and general literature, science, history, etc., and must supply them with information supplementing the text-books

studied. It is evident that a good, general library is essential to the highest development of the pupils. The museum is constantly drawn upon for general lessons and regular class work, and its usefulness will grow as it is enlarged. I doubt whether any other investment of a like amount has brought to our pupils more of pleasure and profit.

The appropriation for repairs has already been reduced from \$3,000 to \$2,500, and the buildings and grounds can not be kept in a proper condition for a less amount. I would also ask for a special appropriation of \$2,800, made available at once, with which to purchase an iron fence, to replace the old wooden one around the northern half of the Institute grounds. The boards and posts of the old fence are much decayed, making necessary a new fence of some kind, and an iron fence will be the more economical as well as more ornamental. The institution is in the main resident portion of the city, and should not be enclosed by a fence that is objectionable to the citizens living near. The City Board of Public Works recently called the attention of the Superintendent to a number of complaints made concerning the wooden fence to which I have referred. A committee of prominent citizens also called upon the Superintendent and urged the replacement of the old fence with one more in harmony with the surroundings. It will require 1,200 feet of fence to replace the one now in use. On Meridian and Pennsylvania Streets, 800 feet at \$2.50 per foot, \$2,000; across the north end of the grounds, 400 feet at \$2 per foot, \$800; making a total of \$2,800.

GENERAL DISCUSSION.

Though classed as a benevolent institution, the Indiana Institute for the Education of the Blind is in spirit and purpose a part of the public school system of the State. In some respects its course of study is more inclusive than the courses of our secondary schools and higher institutions, but it does not contain any subject which is not taught somewhere in our system. The institution maintains three departments—Literary, Industrial and Musical. The Literary Department embraces a twelve-years' course, as follows:

Reading, writing and spelling—six years.

Arithmetic—eight years.

Language and Grammar—eight years.

Geography—three years.

U. S. History—two years.

Physiology—one year.

Composition and Rhetoric—two years.

Algebra—two years.

Geometry—two years.

Physics—one year.

General History—two years.

Civil Government—one year.

Literature—two years.

The text-book study in geography is preceded by the reading of "Seven Little Sisters," "Each and All," "World and Its People, No. III," and "Brooks and Brook Basins." The reading of "Stories of Our Country," "From Colony to Commonwealth" and "Eggleston's History of the United States" precedes the text-book study of history. Much kindergarten work is done in the lower grades.

The course of study is so arranged that promotions are made and graduations occur biennially. Last year in this department 128 pupils were enrolled and a class of ten was graduated.

The institution also maintains an Industrial Department, in which trades are taught, that the pupils may become more self-helpful and be able better to serve the State. A department of this kind is not common to the schools of the State, yet work of this nature is done by Purdue University and the Indianapolis Training School, in both of which tuition is free. There is no good reason why the idea of charity should attach to the State's effort in educating a broom-maker or a piano tuner in the Institute for the Blind than to its effort in educating an electrician or machinist in Purdue University or the Indianapolis Training School. In both cases the State is alike serving its own interests.

The Industrial Department really embraces four departments under the management of different teachers. The Tuning Department is under the direction of a former pupil of the school. In this department pupils are taught to tune, repair, repolish and restring pianos. Eight pupils received instruction in tuning last year, three of whom received diplomas.

The Broom Department is likewise under the direction of a graduate of the institution. Here are made all kinds of brooms. Last year this department enrolled 21 pupils and graduated four. Two others were sufficiently advanced to enable them to open broom shops for themselves. During the past year this department made 7,724 brooms, as follows: 7,312 house, 242 factory, 7 ceiling and 163 whisk-brooms.

In the Cane and Mattress Shop the pupils are taught to do all kinds of cane seating, and to make husk, cotton, hair and moss mattresses. They are also taught to weave hammocks, repair chairs and make mops, dusters and brushes. In this department last year thirty-two pupils were enrolled and four completed their trades and received diplomas. The work done in this department is as follows: Chairs resealed, 397; mattresses made, 115; dusters and brushes, 103; mops, 102.

The Sewing Room is chiefly for the girls, though the small boys also spend a portion of their time here. The girls are expected to spend at least one hour each day in this department, where they are taught bead and fancy work, crocheting, and sewing by hand and on the machine. Each girl is taught to thread her own needle and as far as possible to mend her own clothing. This department enrolled eighty pupils, and made and mended the following articles last year:

Articles mended.....	170
Articles crocheted.....	17
Number pieces of bead work made.....	290
Aprons made.....	15
Dresses made	5
Scrap bags made.....	8
Towels hemmed	76
Table clothes hemmed	34
Side-board covers hemmed	4
Bed spreads hemmed.....	21
Sheets hemmed	120
Napkins hemmed.....	383
Skirts made.....	4
Tea towels hemmed.....	50
Pillow cases made.....	50
Pairs of curtains hemmed.....	7

Three teachers devote their entire time to the teaching of music. Though this subject does not receive the same attention in the seeing schools that it here receives, yet in the public schools of the towns and cities and in the colleges of the State to some extent pupils and students are given instruction in music, tuition free. In this the Institute for the Blind is unlike the seeing schools only in the emphasis it places upon the teaching of music. In this department last year five pupils received instruction on the pipe organ, fourteen were instructed in band music, fifteen were given special voice culture, and fifty received instruction on the piano. There were two graduates only. The school is divided into two choirs in which the pupils are given class instruction and are trained in chorus singing. A class in theory and harmony is also sustained and pupils are taught to read and transcribe their own music in the point system.

There is nothing contained in the course of study that is not found in the public school system, and nothing that marks the Institute for the Blind as a benevolent institution more than other departments of our public school system. However, the pupils of the institution are furnished board and lodging and the pupils of the public schools are not. But the State does this as a matter of economy. The State has acknowledged its obligation to furnish its children opportunities for an education. In establishing and maintaining this institution it is simply giving to the blind what it gives to the seeing. To discharge its obligation to its blind children the State would be compelled to furnish them special teachers, as the work can not be well done in the seeing schools. It is more convenient and economical to the State to bring them all into one institution and provide for them special teachers than to educate them at home. In leaving their homes they must sacrifice home influences, home training and home association—greater sacrifices for themselves and the State than the State makes for them. Considering the sacrifices, when the State has provided in this way for them, it has done no more for them than for the seeing children.

The objection to the "asylum" idea in connection with this institution is not based on sentiment, but is a legitimate objection. This idea is a real hindrance in educating the blind. Many parents are slow to send their unfortunate children away

from home while they are yet young and commit them to the care of strangers. They are even more loth to send them as subjects of charity to be educated as "inmates" of an "asylum." A seeing boy usually points with pride to his alma mater, but few boys of merit and spirit would proudly claim to have been educated in an "asylum." The boy who acquiesces in the idea that he is a subject of charity is half unfitted for development and life, and is more than half fitted for mischievous things. We can not expect to find in such a boy very high and worthy aspirations, nor can he be brought fully to understand the value of property and the rights of other people. It is an unfortunate thing for any child to be impressed with the idea that he is a subject of charity. It is an unfortunate thing for the blind children of the State that their school should be denominated an "asylum" and themselves considered "inmates."

All instruction in the institution is based upon the pedagogical principles underlying the teaching in seeing schools, though the method of presentation must be varied to suit the prevailing conditions. As soon as the pupils learn to read, which is not a very difficult task for many of them, the work of instruction proceeds chiefly as it does in seeing schools. The system of reading is the New York Point, which consists of six embossed points arranged in such manner as to represent the letters of the alphabet, punctuation marks, ten combinations of letters and numbers.

The materials used in the kindergarten work are the same as those used in seeing kindergartens. The typewriters used in the institution are the same as those used by seeing people, and the forms and figures used in mathematics are the same as used in the public schools. The kleidograph is an instrument for writing point, made after the plan of a typewriter. In geometry the figures are constructed on heavy paper by means of a common ruler and a simple device used to indent the paper that the figure may be presented through the sense of touch. The slate used by the pupils is a tablet of wood on which is placed a double plate of brass or steel called a guide. In the upper plate are cut a number of cells, and on the lower are indentures to correspond to the six points in the system. The paper is placed between the plates and pressed into the indentures with a pointed steel stilus. The maps are carved out of wood, and on them are represented all the physical features

of the different countries. The maps are also cut into sections to represent the countries. For class use embossed paper maps are used. To present to the pupils the musical characters and notation as it appears to the seeing, one of the teachers in the Music Department has prepared a board on which are represented the lines and signatures of staves. The musical characters and signs have been cut from wood and mounted on small pins. The pupils are taught to write music on the board by inserting the pins in the small holes made in the board. The physical apparatus is the same as used in the high schools of the State.

Culture and discipline are the chief ends in view in the education of the blind. With a memory strong from necessity it is easy for a blind child to become the possessor of a great mass of facts and render himself a mere machine. It is difficult for the best teacher to prevent such a condition. Careful and skilled effort is necessary to so control the acquisition of knowledge as to bring to the child growth as well as information. Paramount to this is the tone of the information acquired. Hence the culture side of all studies is earnestly emphasized.

ACKNOWLEDGMENTS.

The officers, teachers, and pupils of the institution desire to express their appreciation of the many courtesies that have been extended during the year.

The Chapel exercises have been conducted by Dr. Dewherst of the Plymouth Church, Dr. Sims of the Meridian Street M. E. Church, President Parsons of the State Normal School, Dr. Rondthaler of the Tabernacle Church, Dr. Haines of the First Presbyterian Church, Dr. Ellison of the First Baptist Church, Rev. Shannon of the United Brethren Church, Mrs. Ratliff, Dr. Fellows of Chicago University, Dr. Carstensen of St. Paul's Episcopal Church, Mr. C. E. Newlin, Dr. Shepardson of Chicago University, and Superintendent H. B. Jacobs of the Western Pennsylvania Institution for the Blind.

Lectures have been delivered in the Chapel by President Parsons of the Indiana State Normal School, Mrs. McRae of Purdue University, Dr. Fellows of Chicago University, A. O. Samuels of Persia, Dr. Bryan of Indiana University, Elia L. Yovtchef of Bulgaria, and Dr. Mary Wood-Allen of Ann Arbor.

Tickets have been furnished the pupils of the institution gratis to lecture courses, recitals and concerts by the following persons and organizations: Mr. Pierce and Mr. Hanson to their recitals, the Schliewen Quartet to their concerts, Dixon & Talbott to all the operas given in the English and Grand Opera Houses during the winter, the Directors of the May Festival thirty season tickets, and the Damrosch Opera Company twenty season tickets.

Superintendent Graham, with a quartette of young ladies from the Soldiers' and Sailors' Orphans' Home, gave a delightful recital in the Chapel of the institution, and the Cunningham Quartette of Paris, Illinois, also gave an enjoyable concert in the Chapel.

Mr. Carl Schneider very generously invited all the pupils of the institution to attend the concert given at the Grand Opera House by the Symphony Concert Company.

ANNUAL CONCERT.

CONCERT PROGRAM.

PART FIRST.

1. Joy! Joy! Freedom To-day. BENEDICT
Chorus.
2. Piano Duet—Spanish Dance. MOZKOWSKI
Harry Monroe and Chas. Parker.
3. Blow, Ye Winter Winds. ARRANGED
Girls' Chorus.
4. Piano Solo—Le Papillon. LA VALLEE
Nellie Ebersole.
5. Vocal Solo—It Was Not So To Be NESSLER
Chas. Parker.
6. Piano Trio—Festival March BEHR
Rose Pryor, Nellie Clark, Margurite Alleman.
7. Off for Philadelphia. SMITH
Boys' Chorus.
8. Organ Solo—Coronation March. MEYERBEER
Frank Topmiller.
9. The Sea Hath Its Pearls PINSUTI
Chorus.

PART SECOND.

1. Trio (Brass)—Serenade GEIBEL
Frank Reese, John Smith, Alphonso Johnson.
2. Sweet May BARNBY
Girls' Chorus.
3. Piano Solo—March from Tannhauser LISZT
Alphonso Johnston.
4. Mixed Quartette—Stars of the Summer Night HATTON
5. Duet (Piano and Organ)—Doux Espior Nocturne BATTMANN
Harry Monroe and Lillie Ball.
6. The Old Canoe. ROOT
Boys' Chorus.
7. Piano Trio—Overture—Barbier de Savilla ROSSINI
Frank Reese, Frank Topmiller, Alphonso Johnston.
8. Gaily O'er the Ocean AET
Chorus.

COMMENCEMENT.

The biennial commencement exercises were held in the institution chapel at 10 A. M., Tuesday, June 9, 1896. The class, consisting of four girls and six boys, was an unusually strong one. The pleasure of the occasion was marred by the sudden death of the father of Ida Powell, a member of the class. She was called home on Friday, and could not return to deliver her address, which, at the request of the class, was read by the Superintendent.

Governor Matthews was present and addressed the class. I regret that I am unable to insert his address in full, as every thought was lofty and full of inspiration.

PROGRAM.

- March—Enquirer Club BRANDT
Montani Bros.' orchestra.
- Invocation DR. C. N. SIMS
- Overture—Fest. LATANN
Orchestra.
- "The Value of Music as an Educator" FRANK HEINRICH TOPMILLER
- "John Milton". PHEBE ISABELLE CLARK
- "Reality of Thought" CHARLES ELLSWORTH PARKER
- "Laurels Longed for Should Be Earned" PEARL ETTIE HOWELL
- Gavotte—Viola HILL

Orchestra.

"The Marvel of Nations". LEWIS EDGAR PEAK

"Down Ercs, Up Mars!" LILLIE ISABEL BALL

"Should the United States Government Recognize the Cuban Insurgents as Belig-
erents?"

Affirmed by MOSES JOSHUA DENNY.

Negated by CHARLES CARROLL GREEN.

Cornet solo—Colina Polka LIBERATI

Master Nicholas Montani.

"The Power that Moulds" ANNA IDA POWELL

"Ideals" FRANK HART REESE

Spanish waltz ESPANITA-ROSY

Orchestra.

Remarks. GOVERNOR MATTHEWS

Presentation of diplomas.

Orchestra.

Class motto: EXCELSIOR. Class colors: BLUE AND GOLD.

Very respectfully,

W. H. GLASCOCK,

Superintendent.

REPORT OF THE BOARD OF TRUSTEES.

To His Excellency CLAUDE MATTHEWS, *Governor of Indiana:*

At the close of another fiscal year we have the honor to submit to you the eighteenth annual report of the Board of Trustees of the Indiana Soldiers' and Sailors' Orphans' Home.

With reverence we acknowledge our deep obligation to Him who "doeth all things well," for His protecting care and many mercies that have surrounded this institution and its inmates during the year of its history just closed.

The very full and comprehensive report of Professor A. H. Graham, which, with the reports from the various departments, is herewith submitted, renders it entirely unnecessary to repeat the details of the year's work; briefly summarized, the work of the year has been entirely satisfactory in every department, to the Trustees. Harmony and good will have prevailed during the entire year among the Trustees, various officers and employes, and good order and discipline among our pupils.

In June last, twenty-two of our wards, having satisfactorily completed the school course, were graduated. During the year the Trustees have discharged from the Home, for various causes, 121, and admitted 110. We had, October 31, 1896, 623 orphans, and near two hundred applicants for admission.

The resignation of Major H. H. Woods, our financial officer, January 1, 1896, made it necessary to select and elect his successor. This office is one of great importance to the Home, and the qualifications of this office might be properly listed as follows:

First. He must be an honorably discharged Union soldier.

Second. The duties of his office require that he should be an accurate book-keeper and accountant; also with sufficient experience, judgment and knowledge to enable him to purchase the food, clothing, farm supplies, materials for repairs, and in

fact everything used by a colony of from 620 to 650 people, and keep the expenses within the bounds of a limited appropriation.

Third. His duties and his association with the other employes and the pupils make it essential that he should be a man of good morals and the strictest integrity. We soon learned that all discharged Union soldiers were not eligible, and that of those who were fitted for the office, they had employment more congenial and far better paid. A salary of six hundred dollars per year is, in our judgment, an inadequate compensation for the financial officer, and we respectfully suggest that, if your judgment confirms this, you ask the General Assembly to increase the pay of the financial officer to nine hundred dollars per annum.

The Board elected Charles O. Nixon to succeed Major Woods, and have had no cause to regret the appointment.

We desire to call your attention to the reduced appropriation of the last General Assembly for maintenance, which was reduced from \$100,000 to \$90,000, but there was appropriated \$6,000 for the purchase of additional land. It could scarcely be expected that \$10,000 per annum could be derived from \$6,000 worth of real estate, and during the year we have been compelled to refuse admission to children entitled to the full benefits of the Home, on account of our inability from a lack of a sufficient appropriation to feed, clothe and instruct the maximum number of inmates.

It has been suggested, if not urged, that we might reduce the number of employes by having their duties performed by our children. Answering this we say: It is necessary that our wards should receive the benefits of our school and be trained and fitted for some trade or vocation in life, and both of these must be accomplished before the child attains the age limit of discharge, sixteen years. At the age of thirteen, which is fixed by law, each child becomes a member of the industrial school; one-half day devoted to acquiring a trade, the other half to obtaining an education. About two hundred of our children have arrived at the age of thirteen. Any of the routine work would necessarily have to be done by children under the age of thirteen years. For this reason a per capita comparison of the Home with other State institutions is to the disadvantage of the former, as their inmates are retained to a more advanced age.

It is our judgment that the appropriation for maintenance should be \$100,000 per annum, that of the library \$300 per annum, and for all repairs on farm and buildings should be increased to \$3,000. The cost of the buildings amount to near \$200,000; many of them have been built nine years and the present appropriation is inadequate to keep up the buildings and farm in a good husbandable manner. We do not deem it necessary to make any argument upon this subject; a statement of the existing facts should be all that is necessary to obtain the desired relief.

We have the most gratifying reports from our graduates and ex-pupils who have left the fostering care of the State and commenced the battle of life in earnest for themselves; they are all taking a front rank in their several chosen vocations, and to be a graduate of the Indiana Soldiers' and Sailors' Orphans' Home is now a mark of distinction and a badge of honor. The annual reunions of the ex-pupils, held at the close of each school year on the Home grounds, are well attended by ladies and gentlemen of polished manner and address, who owe all their early training and education to the generous provision made by our State for the children of our country's defenders on battle plain and tented field, and manifest by their gratitude and conduct that the seed sown and money expended at this institution has not been in vain, but returns more than "an hundred fold."

Again renewing our thanks to you and the General Assembly of the State for the interest manifested in this institution this report is

Respectfully submitted,

BEN. L. SMITH,
JULIA S. CONKLIN,
JOHN H. BOGART,
Board of Trustees.

A VIEW FROM THE HOSPITAL.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Trustees:

In compliance with your requirement, I have the honor to submit the Eighteenth Annual Report of the Indiana Soldiers' and Sailors' Orphans' Home for the year ending October 31, 1896.

The year throughout has been one of prosperity. After a careful review of the work accomplished in the education of these children, the good health that has prevailed, and the happy escape from any casualty to life or property, we must acknowledge our debt of gratitude to the Giver of all good.

POPULATION.

The following tabular statement exhibits the present enrollment, and the changes that have occurred during the year beginning November 1, 1895, and ending October 31, 1896:

	<i>Boys.</i>	<i>Girls.</i>	<i>Total.</i>
Number present November 1, 1895.....	378	258	636
Number admitted during the year.	64	46	110
Total.....	442	304	746
Discharged at age limit.....	43	25	68
Discharged upon request of friends.....	17	13	30
Discharged on account continued absence	7	7
Number indentured.....	2	7	9
Sent to Plainfield.....	3	3
Died... ..	2	4	6
Total.....	74	49	123
Total enrolled October 31, 1896.....	368	255	623

The enrollment is somewhat smaller at this date than usual for the reason that during the past two months (September and October) applicants now on file and waiting for admission have not been called in to take the place of children discharged during these months. As is well known, diphtheria in very malignant form prevails at this time in every quarter of the State. Fearing the introduction of it here, where its ravages would be so hard to control, we have deferred calling in any to fill vacancies until the dread disease abates.

HEALTH.

We have had no reason to complain during the year in the matter of health. While our mortality list exceeds the number of the year before, the deaths, except in one case, were due to consumption. In the months of February and March a light form of scarlet fever or scarlatina prevailed, but it was successfully controlled by our physician and the hospital attendants, and left us without serious results.

The closest attention has been constantly given to the sanitary condition of all the buildings and their ventilation, to drainage, proper care of grounds and driveways, sewerage, etc. We have been richly rewarded in seeing the children bright and happy and in the enjoyment of vigorous health.

I can not speak too highly of the care exercised by Dr. Holloway, our physician, in his responsible duties; of Mrs. Forbes, the hospital matron, in her care of the sick and the management of that department. For the details of the health conditions, I respectfully refer you to the report of the physician.

THE HOME SCHOOLS.

To educate, in the broadest sense, the children placed here as the wards of the State is justly the prime purpose of this institution. That poverty and ignorance lead to crime is indisputable. It is therefore the highest type of economy and an exhibition of truest wisdom for any State to provide for its destitute children and furnish them the opportunity of instruction. Our great State has dealt bountifully with these children in this regard. A handsome and well furnished school building of fourteen rooms, capable of seating all the children

the Home can accommodate, occupies a central place. The regular school work of the year just closed has been very successful. We were quite fortunate in the selection of teachers for the different grades. They were not only well qualified for the work, but were painstaking and industrious in the discharge of duty. In this connection it is becoming to announce in the annual report the death of Miss Mary W. Hitt, teacher of the second grade. Her sudden death from heart disease occurred on March 6. Bright and happy socially, earnest in her work, desirous to help others, her death brought sorrow to all hearts. The vacancy in the corps of teachers was filled by Miss Stella Reed. Details of the year's work in the schools, with the course of study, will be found in another place and need not be presented here.

The educational report would be incomplete without mention of the moral and religious development of the children. Every effort to promote the better emotions of the child is put forth. Religious services are held regularly, to which all are encouraged to come. The meetings of the Christian Endeavor societies, organized two years ago, are very generally attended, and the results have been marked by great improvement in the daily deportment of the children. Enjoying the State's generous provisions, and surrounded by such benign influences, we may confidently predict that a great number at least of these children will prepare to meet manfully the trials of life and to fulfill the duty of intelligent citizens.

LIBRARY.

Our library now contains 1,330 volumes of miscellaneous books, selected with all possible care to interest and instruct the readers. The appropriation, three hundred dollars, has enabled us to considerably overcome the wear from use of the books and periodicals, and to build up the library. The reading-room is accessible to employes and to children who are old enough to enjoy and appreciate reading. In addition to the miscellaneous books the library is supplied with books of reference, periodical literature, daily, weekly and monthly papers. The room is open every day.

THE INDUSTRIAL DEPARTMENTS.

The work in the different departments of the Home has been set forth from month to month in the brief reports of the respective foremen. The food producing departments, the farm and garden, have had a successful season. The crops have been above the average. The draining of the new land, begun last year, was finished this spring, and there is now scarcely a square yard of the arable land of the Home farm that is not productive. Some portions yet need fertilizing, which is being done from time to time.

The boys who assist in producing and gathering the crop are taught by the foremen in all the details of the work, and are thus prepared to become useful men in this very important industry.

In all the remaining industrial branches, the work has been carried on in the nature of a school, and the instruction given by the foremen has served the double purpose of educating the pupil and serving the Home at the same time. That the instruction is thorough, and gives the pupil the requisite qualification for carrying on the work alone after leaving the Home, the great number of our boys and girls in printing offices, shoe shops, bakeries, engine rooms, sewing rooms, greenhouses, and in offices requiring stenographers and typewriters, must attest. They are found in all parts of the State. In addition to the course of instruction in cooking the girls are taught the various duties of housekeeping, mending, setting and serving tables, etc., work with which they should be familiar.

Children are assigned to these industrial pursuits upon the decided preference of the pupil himself, his fitness and taste being duly considered by the Superintendent. The following table presents the number of children in each industrial department:

	<i>Boys.</i>	<i>Girls.</i>
Farming	3	
Gardening	10	
Floriculture	16	
Printing	30	
Carpentry	6	
Engineering	11	

	<i>Boys.</i>	<i>Girls.</i>	
Baking	16		
Shoemaking	14		
Tailoring.....	2	13	
Sewing		32	
Cooking.....		17	
Stenography and Typewriting.....	15	14	
	<hr/>	<hr/>	
Total number in trades.....	123	76	199
	<hr/>	<hr/>	

BUILDINGS AND IMPROVEMENTS.

For the information of the general reader, I herewith present the principal buildings of the Home and the dimensions of each :

Main building, frontage 152 feet, and a width of 64 feet; two wings (north), 89 by 43 feet; (south) 100 by 45 feet—all three stories high.

School building, 105 by 113 feet.

Dining-room and W. R. C. Hall, 141 by 75 feet; two stories.

Six cottages for boys, each 67 by 58 feet; two stories.

Industrial building, 100 by 78 feet; two stories.

Laundry and bakery, 80 by 68 feet, two stories.

Storeroom, 43 by 43 feet, one story.

Hospital, 85 by 85 feet, two stories.

Lincoln Hall, 96 by 77 feet.

Power house, 70 by 50 feet.

These buildings are all of brick, with slate roofs, mainly heated by steam and lighted with electricity. Most of the private rooms are furnished with hot and cold water, as are also the bath-rooms. To keep the buildings in perfect condition, and make repairs incident to natural wear, to hail and wind storms, to unavoidable accident and thoughtless acts of children, is a constant drain upon our repair fund. In many cases we are compelled to repair so cheaply that it can only be called a temporary patching. Work of that kind soon needs attention again. It is economy to take best possible care of buildings and all other property in time. The present appropriation for repairs is not adequate to keep roofs, gutters, doors, breakage of glass, electric light plant, heating apparatus, streets,

curbing, sewerage, etc., in perfect order. There is much painting that now needs to be done; our boiler-house must be recovered; some of our pumps which have been in constant use for several years need overhauling, and much graveling of streets must be done soon. A small room, built by our carpenter and his force of boys, was lately added to the laundry. In it was placed the iron heater. By this means the volume of heat was taken out of the ironing-room. This proved a great relief to the women and girls of that department. A small room was also built back of the wash-room and adjoining, in which is now stored the barrels of soap. This gave much-needed additional space in the wash-house.

The work of regravelling our streets has been begun and carried on from time to time as rapidly as our teams could be spared from the farm work.

The frame cottage occupied by our engineer as a family residence was moved from the garden grounds to its present place, thoroughly repaired, and set upon a brick foundation. By this we gained considerable garden ground, saved the building from further injury, and made its occupants comfortable.

The wood floors of our store-room were so worn out as to necessitate repairs. They were replaced with cement, and we now have a building which is fire-proof, and in which it is difficult for rats or mice to find way.

OUR NATURAL GAS PLANT.

The Home has eight gas wells at this time. Our gas supply during the last winter was somewhat diminished by the accumulation of water in several of our wells. During the month of July we placed a siphon in each well thus affected, and have greatly improved the flow of gas by removing the water as fast as it collects. We hope the improvement will continue to overcome the difficulty. To guard against a shortage in fuel, we drilled four gas wells during the year. These fully supply the loss from three wells which have failed.

POWER, LIGHT AND HEATING.

For your information I present herewith a detailed statement made from a careful survey by Mr. Caseley, our engineer, of the present condition of this department. We have four boilers—two of the Babcock & Wilcox water-tube safety of 120 horse-power each and two tubular boilers, each 100 horse-power, making a total of 400 horse-power. They are sufficient to furnish power for our machinery and steam-heating apparatus. Our engine is a 14x20 automatic cut-off Atlas, rated at 93 horse-power. It gives good satisfaction. Our dynamo is of Thomson-Houston make, a continuous current machine, 110 volts. We have 563 indoor-lamps 16 candle-power, 3 outdoor-lamps each 300 candle-power. The dynamo is not equal to this demand. When we use the chapel-lamps we are compelled to cut out the division-rooms and outdoor-lamps to lighten its load.

OUR VISITORS.

The past year has been noted in the history of the Home for kind calls of friends of the school from all parts of the State. They came in answer to a deep interest in the education of these children and to satisfy themselves as to the extent and condition of the Home. The Boards of Visitors of the G. A. R., W. R. C., and Sons of Veterans have given in the reports to their respective organizations the most gratifying declarations of their approval. These bodies remembered the children at the holidays by sending and distributing to every child in the Home suitable and pleasing presents. This custom was bountifully observed on the last Christmas. A very touching and unexpected gift to augment the fund for presents came from the old soldiers in the National Military Home at Marion. These kindly remembrances at that happy season of the year made it an occasion of gladness that will be cherished by these children so long as life shall last.

CONCLUSION.

In closing the report I desire to express my gratitude to all who have labored here with me during the past year in caring for these children. A spirit of patriotism is manifest in all their labors, and I feel sure that a great majority of those who perform any part in the education of the youth under their care are impelled by charity that is born of strong desire to help others.

I remember with much pleasure the unchanging kindness of each member of your Board throughout the year. Your meetings from month to month have been like resting places to me when responsibilities and lesser cares weighed heavily. Expressing my grateful appreciation, I respectfully submit this report.

A. H. GRAHAM,
Superintendent.

REPORT OF THE FINANCIAL OFFICER.

To the Honorable Board of Trustees of the Indiana Soldiers' and Sailors' Orphans' Home:

I have the honor to submit to you the following report of the receipts and disbursements for the fiscal year ending October 31, 1896.

CHARLES O. NIXON.
Financial Officer.

MATRON'S REPORT.

To A. H. Graham, Superintendent

Indiana Soldiers' and Sailors' Orphans' Home:

I herewith submit my report for the part of the year I have served as Matron :

Mrs. Woods, our estimable Matron, left the work, on January 1, 1896, in as near a perfect condition as possible, and it has been my earnest endeavor to keep the different branches of the work up to this high standard.

If there is one predominating object to be attained in the general housework of the Home, it is cleanliness. In my weekly inspection visits to division rooms, dormitories, bath-rooms and closets, I have found no reason for criticism in this regard.

The different dining rooms are well managed and kept in a cleanly, attractive condition. Due regard is paid in the children's dining-room to teaching the children table etiquette.

An abundance of well-cooked food has been prepared in the kitchens.

I feel that all departments are trying to be as economic as possible.

The responsibility of the children's moral training is felt by all who have personal oversight of them. The Senior, Intermediate and Junior Endeavor Societies are doing good work, and more than half of the children enrolled are workers in one of these societies. This work is not compulsory.

The general deportment of the children has been good.

An unusual amount of work has been done in the sewing and tailoring departments. Last June saw the largest number of age-limit discharges in the history of the Home. This necessitated additional work in making outfits in both these departments. The children learning these trades are doing well and like their chosen trades.

The laundry work this year has been very satisfactory, both as to promptness and quality of work done.

The cooking-school is full to overflowing with bright, interesting girls, who are fully convinced that we may exist without a great many things, but not "without cooks."

The general health of the children can not well help being good, with the regular bathing, hours of sleep, exercise and regular, well-cooked meals they are constantly receiving.

I am greatly indebted to all the employes for cheerful, conscientious effort to please. They have been the means of making my duties pleasant to me, for which I am truly grateful.

Respectfully submitted,

MRS. N. T. GRAHAM,
Matron.

SPRING VALLEY.

PHYSICIAN'S REPORT.

*To the Superintendent and Board of Trustees of the
Indiana Soldiers' and Sailors' Orphans' Home:*

In comparing the health record of the past year with those of former years, I find that we have had less acute illness among the children of the Home than for several of the preceding years.

We have had a marked increase of those disorders due to malarial influences, but those conditions have also prevailed in the surrounding country. We have had to deal with a greater number of those children who have come to us bearing the evidences of hereditary taints than is usual and the mortality record shows that the large per cent. of deaths was due to these causes.

While we have cared for all those suffering from acute troubles in the hospital we have also arranged during the past year to take care of the crippled and deformed children in that building, thus giving them better care as to diet and their general health and allowing them greater liberties regarding their coming and going than they could possibly have under the rules and regulations necessary in the division rooms. The large roomy veranda with which the hospital is now provided allows these children nearly every day in the year, sunshine, fresh air and exercise, without exposure or undue exertion.

We have also made it the rule to take care of the babies and very small children in this building, as we can in these cases as in the above, guard better their diet and give them greater liberties than the division rooms afford. We have as a result less sickness among them than was noticed in previous years.

On two different occasions during the past year we were threatened with what gave promise of being severe epidemics of scarlet fever and of diphtheria, but early recognition and a

vigorous system of quarantine prevented it. Never have we had so fully demonstrated the value of our quarantine system as during this critical time. The advance of the exposed children from the general ward to the suspect ward and then to the sick ward, if occasion required, worked to perfection, and resulted in the rapid stamping out of the contagion. We had, in all, sixteen cases of scarlet fever and three cases of diphtheria, all of which recovered without sequella. The benefits of the antitoxine treatment in diphtheria as an abortive, as well as a curative means, was fully demonstrated.

The effort has been continued to maintain the almost perfect sanitary condition of the Home and its surroundings. The only two conditions which in any way menace the good health of the children, from a sanitary point of view, are the limited supply of pure water and the imperfect system of disposing of the sewerage. The need of a larger supply of pure water, not only for domestic purposes but as a protection in case of fire, is clearly evident, thereby doing away entirely with the necessity, under any circumstance, of turning the water of the lake or reservoir into the mains which carry the water for domestic uses.

The lake of stagnated water maintained solely for fire protection, and so often turned into the mains, is a constant source of danger. It should be drained and abolished.

There should also be devised some means of emptying the sewerage at a greater distance from the Home grounds or destroying it in some safe and perfect manner.

The following is the mortality record of the past year, with dates and causes of death :

Retta Fair, age 13; consumption; November 9, 1895.

Della Fellers, age 6; membranous croup; January 15, 1896.

Julius Allen; age 13; consumption; March 17, 1896.

Marina Keemer, age 17; consumption; May 4, 1896.

Zema McAlister, age 5; tuberculosis; June 29, 1896.

Blaine Keemer, age 11; consumption; July 12, 1896.

To the officers, nurses and governesses of the Home I am under many obligations for the aid and assistance extended to me.

Respectfully submitted,

O. E. HOLLOWAY,
Physician.

REPORT OF SCHOOLS.

To Prof. A. H. Graham, Superintendent

Indiana Soldiers' and Sailors' Orphans' Home:

The immediate application the pupils of the Home school must make of the education received here, necessitates the instruction to be most practical.

This characteristic of their education has been most constantly kept in view during the past year. The training in the industrial departments contributes much to the consummation of this very important feature.

To enable the pupils to engage in the ordinary business pursuits, to lay the foundation of a thoughtful, well regulated life, and to stimulate them to further educate themselves, is the constant effort of the school.

The work in the special departments of music, stenography, and domestic economy showed marked importance at the close of the school year.

The recital of the music pupils bore evidence of thorough, conscientious work in that department.

The fact that stenography and type-writing pupils secure good positions upon leaving the Home is a sufficient recommendation for any department.

The Cooking School exhibition given during commencement week demonstrated the fact that the girls taking the course are taught scientific and practical cooking.

The school property receives good care. All necessary supplies are furnished for the school and used economically.

A class of twenty-two pupils graduated at the close of the school year, 1896. The following is a list of the class and themes:

Mollie Kiehl....."History of the Violin."

Lucien Husted....."Get Thy Spindle and Thy Distaff
Ready, and God will send Thee Flax."

Grace Stockwell....."Mary Queen of Scots."

- John Humphries.....“ The Silver Dollar.”
 Estella Heaton.....“ The Bicycle Craze.”
 Grace Kennedy.....“ Class History.”
 Margaret Ransdell.....“ The Necessity of Observing Little Things.”
 Della Walters.....“ The Love of Fame.”
 Eva Gough“ Echoes.”
 William Austin.....“ We Plant a Rose.”
 Cora Means.....“ Progress of the Colored Race.”
 Fanny Roll“ Influence of Music.”
 Lenora Purdy“ Response.”
 Bert Herbert.....“ Progress of Floral Culture.”
 William North.....“ A Place for Every Man.”
 Jay Moore.....“ Which Shall It Be?”
 Frank Metsker.....“ The Star Spangled Banner.”
 John Douglas.....“ Immortality of Influence.”
 Ottabine Muckley.....“ The Vanity of Human Grandeur.”
 Agnes Gilbert.....“ Our Goverment and Cuba.”
 Garfield Walker.....“ Now and Afterward.”

The school entertainment, in which all the pupils of all ages and grades were represented, consisted of the beautiful cantata, “Queen Esther.”

A concert by the Home Band was highly satisfactory.

An oration by a member of the class on the planting of the “Class Rose,” and the “Class History,” were interesting features of the commencement week.

The following days were observed with appropriate exercises : Thanksgiving, Christmas Eve, George Washington’s Birthday, and Easter Sunday.

School reopened September 7, 1896, with an enrollment of 607 children and sixteen teachers in charge.

The following course of study, with but few changes, is the same as used last year.

Credit is due to the corps of able and faithful teachers for the degree of merit the school has attained.

With grateful acknowledgment of their earnest co-operation, and your assistance and encouragement, this report is

Respectfully submitted.

LAURA A. WACHTSTETTER,
Principal.

BOYS OF 1896.

SCHOOLS.

COURSE OF STUDY.

KINDERGARTEN.

By means of stories and general talks and the use of the Froebel Gifts and Occupations are taught:

- I. NUMBER—General.
- II. POSITION AND DIRECTION.
- III. COLOR—Tint and shade.
- IV. LINES—Straight, curved, slanting.
- V. GEOMETRICAL FIGURES—Square, triangle (isosceles, equilateral, obtuse, right angled, scalene), cube, sphere, cylinder, circle, semi-circle, beauty and symmetry of form.
- VI. HISTORY—General.
- VII. GEOGRAPHY—General.

FIRST PRIMARY.

Spelling.—Words of First Reader and Appleton's Chart, oral and written.

Reading.—Appleton's Chart; First Reader completed with supplementary reading; drill in sight reading and diacritical marks.

Writing.—On ruled slates and paper; all small and capital letters; copy single sentences from blackboard; analysis of letter.

Numbers.—Counting of objects to 100; writing numbers to 100; Roman numerals to XX; ideas of $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$; all combinations

to 12; measures to a gallon and a yard; coins to a dollar; analysis to original problems; counting by 1's, 2's, 3's, 4's, 5's to 100.

Language.—Description of objects; reproduction of stories; simple forms of letter-writing; composition on general topics; Long's First Reader work.

History.—The early discoveries and settlements of our country.

Drawing.—Prang's systems of forms and models.

Music.—Blackboard models and Music Primer.

General.—Calisthenics; talks on morals and manners; talks on hygiene and scientific temperance work; description of plants and animals; memory gems; the cardinal and semi-cardinal points; the Home grounds; hills, mountains, rivers, lakes, etc., on sand table; talks on formation and motion of the earth and general outline; clay modeling.

SECOND GRADE.

Spelling.—Words of Second Reader, oral and written; names of the days, weeks and months, and of the county and State; diacritical marks.

Reading.—Second Reader completed, with supplementary reading; the poetry of the lesson committed to memory.

Writing.—Reading lessons and stories written on slates; lessons on analysis of small and capital letters; Indiana Copy-book, No. 1.

Numbers.—Combinations to 30; ideas of fractional units continued; measures of liquids, distance and weight; rapid addition; mental work; original problems; and Mrs. Cropsy's third-year work.

Language.—Memory gems committed; reproduction of stories; letter-writing.

History.—Stories of Indians and mound builders; early settlements; Pilgrims and Puritans.

Geography.—County, township, with review of sand table-work of the first year.

Drawing.—Prang's system of forms and models.

Music.—Board models and Music Reader, No. 1.

General.—Calisthenics; talks on neatness, self-control, hygiene and scientific temperance work.

THIRD GRADE.

Spelling.—Words selected from reading lessons, together with special list; diacritical marks.

Reading.—Third Reader completed; reproduction of lesson, oral and written; attention given to reading at sight; general reading encouraged.

Writing.—A lesson each day with pen and ink; analysis of small and capital letters taught; movement drills; Indiana Copy-book, No. 3.

Numbers.—Elementary arithmetic to page 114; analysis of problems; rapid work in fundamental principles; supplementary work in Mrs. Cropsy's fourth year work.

Language.—Description of pictures and objects; letter-writing; narrations.

Geography.—Review of work taught in second year; stories from "Seven Little Sisters;" Indiana.

History.—"Stories of American History," Vol. I, by Miss Pratt.

Music.—Board models and Music Reader, No. 2.

General.—Lessons on common objects; gems, poems, conduct; talks on hygiene and scientific temperance work; calisthenics; nature studies.

FOURTH GRADE.

Spelling.—Selected words from readers, geographies and special lists; diacritical marks; use of dictionary taught.

Reading.—Fourth Reader to page 116, with supplementary reading and choice selections committed and recited.

Writing.—Special attention given to analysis of letters, position and movement; special drills on exercise paper; Indiana Copy Book, No. 4.

Arithmetic.—White's Arithmetic; rapid calculations in fundamental principles; L. C. M. and G. C. D.; common fractions to decimals.

Geography.—Elementary to page 32; United States oral geography of Indiana, embracing location of principal cities, streams and routes of travel; its productions, occupations and schools.

GIRLS OF 1896.

Language.—Description of objects; letter-writing and study of words; Mary F. Hyde's Lessons in English, Part II and III.

History.—"Stories of American History," Vol. II, by Miss Pratt.

Music.—Board Models and Music Reader No. II.

General.—Exercises in declamations; talks on the history of our country, flag and forefathers; study one author and take a selection from his work each month; talks on hygiene and scientific temperance work; nature studies.

FIFTH GRADE.

Spelling.—Selected words; diacritical marks and use of dictionary.

Reading.—Fourth Reader completed; general reading under the direction of the teacher.

Writing.—Special attention given to movement drills; Indiana Copy Book, No. 5.

Arithmetic.—White's Elementary Arithmetic; review common fractions; begin decimals and continue to percentage.

Geography.—Elementary completed; oral instruction and outline maps of foreign countries.

Language.—Reed and Kellogg's Graded Lessons in English, page 95; letter writing and description.

History.—"Stories of American History," Vol. III, by Miss Pratt.

Drawing.—Prang's system of forms and models.

Music.—Board Models and Music Reader No. III.

General.—Talks on home, city, State and U. S. government; Lessons from "Nature Readers;" general work from poets and national heroes; talks on physiology and scientific temperance.

SIXTH GRADE.

Spelling.—Selected words; diacritical marks; use of dictionary.

Reading.—Fifth Reader, part I; general reading under direction of teacher.

Writing.—Analysis of letters; position and movement exercises observed; Indiana Copy Book, No. 6.

Arithmetic.—White's Elementary completed; White's complete to denominate numbers.

Geography.—No. 2 completed, with supplementary work from library.

Language.—Reed and Kellogg's Graded Lessons in English, completed; letter and sketch writing.

History.—"Stories of American History," Vol. IV, by Miss Pratt.

Music.—Board Models and Music Reader No. 4.

General.—Talks on government; lives of heroic men and women of the age; Longfellow; Hawthorne; Lamb's "Tales of Shakespeare" and stories from general history; talks on hygiene and scientific temperance work.

SEVENTH GRADE.

Spelling.—Selected words; diacritical marks and use of dictionary.

Reading.—Fifth Reader, part II, and general reading under direction of teacher.

Writing.—Special attention given to analysis of letters; Eclectic Copy Book, No. 4.

Arithmetic.—White's complete from denominate numbers to partial payments; selected examples and business forms.

Geography.—Text-book No. 2, to page 64.

Language.—Reed and Kellogg's Higher Lessons in English to page 187; letter-writing.

History.—Barnes' to Revolutionary period.

Music.—Board models and Music Reader No. 4.

General.—Talks on Physiology; scientific temperance work; morals; study of Whittier; Bryant, Tennyson, and Lamb's Tales of Shakespeare.

EIGHTH GRADE.

Spelling.—Selected words in use by the class; care given to secure correct spelling in all manuscript work; use of dictionary.

Reading.—Poetry, biology and stories of American progress.

Writing.—Practical writing; correct arrangements of manuscripts; Eclectic Copy Book No. 5.

Arithmetic.—The book completed and reviewed; work from supplementary arithmetic.

Language.—Reed and Kellogg's Higher Lessons in English completed.

History.—United States History completed; Declaration of Independence and Constitution read and discussed.

Physiology.—Jenkins' Advanced Lessons in Human Physiology; use of manikin.

Music.—Board models and Music Reader No. 5.

NINTH GRADE.

Spelling.—Selected words; use of dictionary.

Reading.—Selections from various authors.

Arithmetic.—Topically reviewed.

Algebra.—Ray's Elementary throughout the year.

Physical Geography.—During six months of the year.

Civil Government.—Townsend's Shorter Course, throughout the year.

Literature.—Review of authors of seventh and eighth grades; Merchant of Venice.

Music.—Board models; G. F. Root's Repertoire with exercises; supplementary singing from Book 5; Glee and Chorus Book.

MUSIC.

PIANO.

- | | |
|------------|--|
| Grade I. | Mason's Touch and Technic, Book I, Major Triads and one octave scales, and first grade pieces. |
| Grade II. | Mason's Book I, Mathews' Book II, Major Triads in three positions, two octave scales and second grade pieces. |
| Grade III. | Mason's Grade I and II, Mathews' Book III, dominant 7th chords in all positions, slow arpeggios without notes, and third grade pieces. |
| Grade IV. | Mason's Book I, II and III, Mathews' Book IV, fast scales and arpeggios without notes, common and seventh chords in all positions and fourth grade pieces. |

- Grade V. Mason's I, II, III and IV, Mathews' Book V, study of chords and their resolution continued and fifth grade pieces.⁹
- Grade VI. Mason's Technic IV, Mathews' Book VI, minor scales and minor chords studies with special care and sixth grade pieces.
- Grade VII, VIII, IX and X. Mathews' Studies, Mason's Technic with regard to the pupils' particular deficiencies, collateral studies, Concone, Heller, Kuhlan, Mohr, Czerny, Clements; pieces by classic and modern writers.

VOICE DEPARTMENT.

- Grade I. Concone's Studies with English words, Concone's Scales.
- Grade II. Vaccai with English words.
- Grade III. Marchesi.

A VIEW IN COTTAGE PARK.

GENERAL INFORMATION.

HOW TO SECURE THE ADMISSION OF CHILDREN TO THE HOME.

When it is desirous to secure the admission of a child to the Indiana Soldiers' and Sailors' Orphans' Home blank application papers may be obtained for the purpose by addressing the Superintendent. These are to be filled out in accordance with the instructions given and to be returned to the Superintendent. At the meeting of the Board of Trustees next after applications are received they will be submitted for approval or rejection. In either event official notice will be given by the Superintendent as to the action of the Board of Trustees, and if the action thereupon has been favorable, the date will be fixed on which the child may be brought to the Home.

No fund has been provided for defraying the railroad expenses of children that have been admitted to the Home. If friends have not the means, aid can generally be obtained from the Township Trustees or the County Commissioners.

Family relatives are allowed to visit the children once every six months and to remain twenty-four hours on each visit.

Children may be taken away during vacation, but the Home can not bear any part of the expenses of transportation, and they must be returned in due time to enter school at the opening of the session.

Whenever parents desire to take the permanent custody of their children application for discharge, in writing, should be made through the Superintendent to the Board of Trustees.

LAWS GOVERNING THE ADMISSION OF CHILDREN.

SECTION 9. The Trustees and (under regulations and a form of application which they shall prescribe) the Superintendent are authorized and required to receive, as pupils of the Indiana Soldiers' and Sailors' Orphans' Home, orphans and children residing in this State, under the age of 16 years, who may be destitute of the means of support and education, in the following order:

First. Orphans, children of deceased Union soldiers or sailors in the army or navy of the United States in the late civil war, said orphans not having mothers living.

Second. Orphans, children of such deceased soldiers or sailors, said orphans having mothers living. If there be not applications for admission of persons of said two classes sufficient to fill said Home, then, in like manner, there shall be admitted:

Third. Children of permanently disabled or indigent soldiers or sailors of said service, residing in this State, or in National Military Homes, having been admitted thereto from this State.

All children admitted to said Home, as pupils thereof, shall be supported and educated therein until they shall be 16 years of age, unless for good cause sooner discharged. Any of said pupils who, by reason of physical disability or other cause, may be, in the judgment of said Board, unable to earn a livelihood, shall be retained as pupils of said home until they shall be 18 years of age.

SEC. 10. Each county in this State shall be entitled to have in said Home a number of pupils proportionate to the number of soldiers furnished by it to the Union service in said war, which proportionate number shall be fixed by said Board according to the capacity of said Home. Applicants from a county already having its full quota in said Home shall be admitted, if the Home shall not be filled at the time of making application; but in the admission of applicants, when all applying can not be accommodated, preference shall be given to those from counties not then having in the Home as many pupils in proportion to their quotas, as fixed by said Board, as other counties from which applications may be pending shall have therein.

RULES GOVERNING THE HOME.

For the information of the public and those personally interested the rules governing the Home are here inserted :

1. All employes are under the supervision of the Superintendent, and must give implicit obedience to his orders.

2. In the absence of the Superintendent the Financial Officer will be in full charge and obedience to his orders is required.

3. The Superintendent is responsible for the proper use, care and disposition of the property belonging to the Home, and for the due administration of its affairs, but the hearty co-operation of all officers and employes is expected, and a ready and cheerful compliance with all orders and regulations is required.

4. No one will be knowingly employed or continued in service who does not possess the necessary qualifications or fitness for the particular duties to be performed.

5. Cordiality of feeling among the employes is the basis of co-operation, hence no one will be continued in service who can not heartily unite with all for the good of all.

6. Any fact prejudicial to the moral character or standing of any officer or employe coming to the knowledge of another should at once be communicated to the Superintendent, but espionage, tattling and tale-bearing are forbidden.

7. Governesses, teachers and heads of departments must acquaint all under their charge with the rules and regulations of the institution, and will be held accountable for the efficient and faithful performance of the duty that devolves upon them respectively.

8. No case of discipline must be referred to the Superintendent unless beyond the control of the governess. Corporal punishment may be administered when other remedies have failed, but excessive punishment is not to be inflicted at any time. Children deprived of their play hours as a penalty shall be entitled to the liberties of the other children on all intervening holidays and Sundays.

9. It shall be the duty of every officer and employe to report to the governess of the child any misdemeanor or irregularity of conduct coming to their knowledge, and such information must be received and given in a spirit of kindness, and with a view to the best interests of the institution.

10. Under no circumstances will an employe be allowed to apply to the children any language or epithet calculated to irritate, humiliate, or degrade them. No rough expressions or slang phrases must be employed; but, on the other hand, a correct and discreet use of language in the presence of the children must be observed.

11. The heads of each department shall see that the industry conducted by him is taught and practiced in a thorough and comprehensive manner, so that each pupil shall obtain, as far as possible, a practical knowledge of the same in all its parts. He shall be at his post of duty at the beginning of business hours, preserve good order among his pupils, and secure close and constant application to the work in which they are engaged.

12. Smoking upon the grounds or in the presence of the children by employes is strictly forbidden.

13. Heads of departments and governesses shall return to the storekeeper remnants of articles broken or worn out by use, as vouchers.

14. Employes are expected to attend Sunday services. Habitual neglect of this duty will be regarded as a lack of proper interest in the religious training of children under their care.

15. Leave of absence will be granted by the Superintendent or Financial Officer when the Superintendent is not present.

16. In urgent cases relief from duty will be granted.

17. In case of severe illness, or death of relatives or friends, reasonable leave of absence will be granted.

18. In case of absence on the part of an employe, a substitute satisfactory to the Superintendent must be provided.

HOURS.

19. All persons residing in the institution are expected to be in their rooms by 10 P. M., at which hour the building will ordinarily be closed.

20. Lights in private rooms, dormitories and division rooms must be extinguished at 10 P. M., except by special permission.

21. Ladies may receive gentlemen in the public parlor, which will be open to public use until 10 P. M. Except in the case of relatives, ladies will not entertain gentlemen in their private or division rooms. When ladies are appraised of the coming of gentlemen, the Superintendent or Matron must be informed and consent obtained.

22. Willful violation of the foregoing rules will subject the offender to a forfeiture of position.

VISITORS

23. Are heartily welcome, and all employes are required to show every possible courtesy to all persons who may wish to pass through the various buildings and about the grounds of the institution.

24. Visitors are not allowed to go through the buildings without an attendant.

25. The buildings will be open to visitors every day in the week except Sunday.

HOSPITAL.

HISTORICAL SKETCH OF THE INDIANA SOLDIERS' AND SAILORS' ORPHANS' HOME.

The site of this institution was known for many years before the war as the "Knightstown Springs," and was visited as a health resort by many. The spot now known as Spring Valley was dotted with tents during the summer months, and the occupants made a business of drinking the water, bathing in it and believing themselves greatly benefited. Bath houses were finally erected, and so well were these patronized that a Mr. Aaron Aldrich built a hotel on the west of the road and directly above the larger springs. This afforded new and substantial conveniences for health seekers, and the place soon began to enjoy a general reputation.

But greater and grander history than all this could make was destined to be written of the "Knightstown Springs." The fame the place then boasted only served to attract the public attention when its healthful location and its springs of pure water were wanted for a higher and nobler purpose.

Early in the summer of 1865 a meeting was called in the office of Governor Oliver P. Morton to devise ways and means to establish a State Soldiers' Home. About fifty gentlemen responded to the call. At the suggestion of the Governor, a Board of Directors was appointed and incorporated with this end in view. At first the city hospital building at Indianapolis was used, but early in 1866 the "Knightstown Springs," with fifty-four acres of ground, including the aforesaid hotel and several other buildings, was purchased as a Soldiers' Home. The money to effect this purchase (\$8,500) was raised by private gifts, and many patriotic hearts went in all parts of the State asking for donations. Among these persons may be mentioned Rev. Armstrong, Captain Atkinson, and Chaplain John Hogarth Lozier, who is sometimes spoken of as the "financial father" of the Home.

The Directors soon found they could not rely upon voluntary contributions to meet all the necessary expenses, and the property passed into the hands of the State, and was placed under officers appointed by the Legislature.

On the 1st day of March, 1867, the Home for Disabled Soldiers became one of the institutions of the State, for the maintenance not only of sick and disabled soldiers and seamen, but also of their widows and orphans. It was formally opened June 15, 1867.

Now to return to the meeting in the Governor's office in 1865. One of the patriots attending that meeting was George Merritt, now of Indianapolis. He stood as the first advocate of a home for soldiers' orphans. Before any decision was reached he addressed the meeting in behalf of the orphans of the soldiers who had given their lives for their country. He related to the meeting some of his experiences during the war, in hospitals and on the battlefields where it was his privilege and duty to care for the wounded and dying. He pictured to them the one unsatisfied and overmastering anxiety of the dying soldier for his children when he was gone. He declared to the meeting that he had always given the assurance, in such cases, that the country would provide for their children, and to make good that pledge he offered, if the meeting would include the soldiers' orphans in their scheme, to give five thousand (\$5,000) dollars for their benefit.

After a long discussion it was decided by a majority vote that to combine the two would be so great an undertaking as to endanger the success of the enterprise, and that it was best to undertake first the Soldiers' Home.

This decision left Mr. Merritt free to fulfill, at least, his share of the country's obligation and his promises. His wish was that the orphans might be divided into families of ten, that were to be given to one woman, to whom a fixed monthly allowance should be given in money, to be expended as, in her judgment, would best promote the welfare of the children. He expected to find these foster mothers among the soldiers' widows and maiden ladies whom the war had left alone, and thus he thought to provide, in a measure, for both classes.

In Miss Susan Fussell he found a woman well qualified and willing to undertake the care of ten orphans in the manner indicated. On the 24th day of November, 1865, she commenced

her work in two rooms in the Military Hospital at Indianapolis, with four soldiers' orphans, taken from the Orphans' Asylum of that city. In a short time she had the full number (ten), from different parts of the State, all without friends to care for them. In April, 1866, Miss Fussell moved to the Knightstown Springs, and, with her little family, occupied the little cottage on the hill on the east side of the road, and here we find the first Soldiers' Orphans' Home at this place, while the Soldiers' Home had just been located, by private enterprise, in the hotel on the opposite side of the road.

When the State assumed control of the Home, in March, 1867, the Legislature appointed Henry B. Hill, Charles S. Hubbard and William Hannaman Trustees, and the following classes were admitted to the Home:

1. Totally disabled soldiers and seamen.
2. Partially disabled soldiers and seamen.
3. Orphans, under fifteen years of age, of deceased soldiers (neither father nor mother living).
4. Orphans of the same class whose mothers are living.
5. Widows of deceased soldiers.

The Trustees appointed Dr. M. M. Wishard, long identified with this Home, the first Superintendent. Here, however, Miss Fussell lived for ten years with her charge of ten orphans, independent of the State Home, except that they attended the schools established by the State. They maintained a separate family life, wherein they so nearly forgot that they were orphans that they often spoke of the others as "the orphans." Miss Fussell has passed over the river to her rest and reward, but she lived long enough to see most of her children happily married and in homes of their own, all blessing her for the care and helpful influence she had exerted on their young lives.

Mr. Merritt, who is reliable authority for these statements, bears witness "to the faithfulness and unselfishness of that noble band of men and women who during the time he was an observer of the work, had charge of the Soldiers' Orphans' Home." In a short time the number of admissions was so great that more room was required, and five acres of ground east of the road and directly opposite the Hotel Home, were purchased and a new building erected thereon at a cost of fifty-six thousand dollars (\$56,000). To this new building the old

soldiers were transferred, and the children were left in the hotel.

In 1870, however, the children so far outnumbered the old soldiers that they exchanged quarters, the children taking the new Home and the soldiers returning to the hotel.

Early on Christmas morning, 1871, the old hotel was burned, and soon thereafter the soldiers were removed to the National Military Home at Dayton, Ohio. This left the orphans in full possession of the Home, until, in 1879, an asylum for the feeble-minded children was attached to the institution. This continued until the Legislature of 1887 separated them, sending the feeble-minded (May 17) to Richmond, leaving the orphans sole possessors of the ground again, which arrangement still continues.

The Orphans' Home has been twice burned. First, on the 8th of September, 1877, at about eleven o'clock P. M., the building was discovered to be on fire. Although nearly all were sleeping soundly when the alarm was given, those in charge gave themselves so energetically to the work of saving the children that no one was lost. With commendable zeal the Trustees began to build at once, so that in September, 1878, the new building was again occupied. The second fire occurred on July 21, 1886, at two P. M. There was no loss of life, but the building and most of its contents were consumed. Temporary shelter was immediately provided for the children, making them as comfortable as possible under the circumstances. In September, the Trustees rented the Valley House in Knightstown, and the soldiers' orphans were removed there, while the feeble-minded children were assigned temporarily to the frame school building upon the Home grounds.

The contract for rebuilding was let at once, and with characteristic promptness the Trustees pushed the work to completion.

The corner-stone was laid on the 17th day of November, 1886, and June 28, 1887, the south wing was completed and occupied. The remaining part of the administration building was occupied as rapidly as the halls and rooms were completed.

The new school building was completed in January, and on the 6th day of February, 1888, the children took possession. The present industrial building was erected in the year 1888. The three cottages on the east side of "Cottage Park" were

LOOKING HOME.

built in the year 1889, and the three on the south side were added in the year 1891.

Lincoln Hall was begun in October, 1891. The cornerstone was laid on November 3d of the same year, and it was dedicated June 23, 1892.

The following purchases of land for the use of the Home have been made, and together constitute the Home farm :

	<i>Acres.</i>
March 1, 1867	54
— — —, 1869	5
April 20, 1887 (Murray estate)	75
April, 1895 (Morris estate).....	80
April, 1895 (Ramsey estate).....	33
<hr/>	
Total Home farm.....	247

The following are the names of Superintendents who have had charge of the Home from its beginning :

	<i>Term Began.</i>	<i>Term Ended.</i>
M. M. Wishard	Sept. —, 1865.	Feb. 14, 1877.
Rev. R. F. Brewington (acting)..	Feb. 14, 1877.	Nov. 11, 1877.
W. B. McGavern, M. D.....	Nov. 1, 1877.	May 29, 1879.
John Hunt, M. D.....	May 29, 1879.	Nov. 1, 1879.
B. F. Ibach.....	Nov. 1, 1879.	April 1, 1881.
J. W. White, D. D. S.....	April 1, 1881.	May 1, 1885.
Rev. T. M. Smith.....	May 1, 1885.	Aug. 5, 1885.
Rev. A. H. Morris.....	Aug. 5, 1895.	March 1, 1890.
Rev. J. W. Harris.....	March 1, 1890.	June 11, 1891.
H. H. Woods (acting)	June 11, 1891.	July 1, 1891.
A. H. Graham, A. M.....	July 1, 1891.

The following legislative acts are worthy of a place in this record :

ACTS OF 1867.

March 11. The General Assembly passed a law establishing the Indiana Soldiers' and Sailors' Orphans' Home.

ACTS OF 1869.

Made no further change than to make Trustees legal guardians of the children and permitted them to indenture them.

ACTS OF 1871.

Made a specific appropriation of five thousand dollars (\$5,000) to pay debts and maintenance from January to April 1, 1871.

ACTS OF 1873.

Made an appropriation of thirty-eight thousand dollars (\$38,000) for each.

ACTS OF 1875.

Made an appropriation of thirty-five thousand dollars (\$35,000) from 1875 to 1876.

Made an appropriation of thirty-eight thousand dollars (\$38,000) from 1876 to 1877.

ACTS OF 1877.

Made an appropriation of twenty thousand three hundred dollars (\$20,300) for 1877.

Made an appropriation of thirty-four thousand dollars (\$34,000) for 1878.

Made an appropriation of three thousand four hundred dollars (\$3,400) for 1879.

ACTS OF 1879.

March 15, 1879, an act established an Asylum for Feeble-Minded Children, located at the Soldiers' Orphans' Home. It abolished the Trustees of the Soldiers' Orphans' Home and makes the Trustees of the Feeble-Minded Institution to have charge of the Soldiers' Orphans' Home.

ACTS OF 1883.

Amended act of 1879.

ACTS OF 1885.

Creates the Soldiers' Orphans' Home and makes it a corporation. The Board of Trustees to be composed of two men, one from each of the two leading political parties, and one lady.

ACTS OF 1887.

Creates the Indiana Soldiers' and Sailors' Orphans' Home. The law locating the Asylum for Feeble-Minded Children at the Home repealed. The purchase of seventy-five acres of land

authorized. Appropriations authorizing the erection of buildings costing, in the aggregate, one hundred and sixteen thousand dollars (\$116,000.) The office of Steward was created and the fifteen dollar (\$15) per capita law passed.

ACTS OF 1889.

February 23 the Legislature made the following appropriations:

For dining-room.....	\$10,000
For six cottages.....	24,000
For hospital.....	10,000
For improvement of grounds.....	6,000
For library for 1890.....	200
For current repairs for year 1890.....	500
For maintenance for year 1891.....	72,000
For current repairs for year 1891.....	2,000
For deficiency for year 1888.....	55,530

ACTS OF 1891.

For the year ending November 1, 1892:

For maintenance.....	\$95,000
For current repairs.....	2,000
For library.....	200
For salaries of trustees and officers.....	3,600
For assembly hall or chapel.....	13,000
For addition to hospital.....	3,000
For six cottages.....	18,000
For additions to shops.....	6,000
For addition to school building.....	5,000
For farm cottage.....	500
For completing dining-hall.....	1,000
For water supply.....	2,000
For gymnasium.....	1,500
For electric light.....	2,000
For water closet.....	3,000
For library.....	300
For maintenance for year ending October 31, 1893.....	95,000
For salaries of trustees and officers for year ending October 31, 1893.....	3,600
For library for year ending October 31, 1893.....	200

ACTS OF 1893.

For maintenance.....	\$100,000
For current repairs of buildings, premises and incidental expenses.....	1,000
For library and reading-room.....	200
For putting down two wells, making connection of same with the water supply, and for the extension of sewer and decoration of grounds	5,000

ACTS OF 1895.

For maintenance	\$90,000
For current repairs	2,000
For library and reading-room.....	300
For purchase of land.....	6,000
For fencing and rebuilding	1,000

Since the creation of the Indiana Soldiers' and Sailors' Orphans' Home by the Legislature of 1887, the following enrollment on the 31st day of October, of each year, as presented by reports of Superintendents, will show the growth of the institution:

Year.....	1887.	1888.	1889.	1890.	1891.
Enrollment.....	167.	340.	448.	574.	592.
Year.....	1892.	1893.	1894.	1895.	1896.
Enrollment.....,	624.	644.	644.	636.	623.

The foregoing sketch of the Home is gathered from different persons yet living, from articles which have appeared from time to time in different papers of the State, and from the annual reports of the Trustees and Superintendents. The purpose has been to present briefly the steps that have been taken in the growth of this institution from the first thought to the present time. Nothing more. Of the loyalty and liberality of our noble State, of the faithful men and women who devoted their best days to service in the Home, history may make little note, but their praise shall be sung by those who, as soldiers' orphans, inherited the State's special protection and were helped and guided in orphaned childhood by teachers and governesses of the Home.

A. H. GRAHAM.

INDIANA

STATE SOLDIERS' HOME.

REPORT OF TRUSTEES.

—1896—

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1896.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, November 19, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, November 25, 1896. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILY,
Auditor of State.

INDIANAPOLIS, November 25, 1896.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, November 25, 1896.

WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer November 25, 1896.

THOMAS J. CARTER,
Clerk Printing Bureau.

TRUSTEES' REPORT.

INDIANA STATE SOLDIERS' HOME, }
NEAR LAFAYETTE, November 1, 1896. }

To His Excellency, CLAUDE MATTHEWS,
Governor of Indiana:

Under the provisions of the act establishing the Indiana State Soldiers' Home, it is made the duty of the Board of Trustees to make report to you of the condition of the Home, and a full and detailed statement of the transactions of the Board of Trustees, such report to be made annually, on the 31st day of October.

The first report of this Board was for October 31, 1895. At the time of filing our report for 1895, the buildings were not then completed, and we were busy in the work of their erection and completion, and clearing out of the grounds. We, at that time, could not do much more than report progress.

That the matters properly belonging to our report for the year 1896 may be fully understood, it is necessary that we refer to the leading subjects embraced in the report of 1895, these principal subjects being:

First. The passage of the act creating the Soldiers' Home, and the appropriation therefor.

Second. The appointment of the Board of Trustees and their entry upon the discharge of their duties.

Third. The official acts of the Board in making the contracts for, and the erection of, the buildings specified in the act and included in the appropriation of the sum of \$75,000, for the erection of the same.

No act, fraught with such grave and great responsibilities, and at the same time promising so much good to a very large and deserving class of the citizens of the State of Indiana, ever found a more generous and patriotic response and support in

the Legislature of Indiana. The act was adopted upon the affirmative vote of every member of both houses of the General Assembly. The Governor approved the bill and it became a law February 23, 1895.

Under the law creating the Indiana State Soldiers' Home, a Board of Trustees, to consist of five members, was to be appointed by the Governor, from the two great political parties in the State. The Board was appointed by the Governor immediately after his approval of the bill, and consisted of James R. Carnahan, of Indianapolis; Isaiah B. McDonald, of Columbia City; David N. Foster, of Ft. Wayne; Christopher J. Murphy, of Evansville, and James B. Wallace, of Lafayette.

The appointees convened at Indianapolis February 28, 1895, and organized the Board of Trustees by the unanimous election of the following officers:

President, James R. Carnahan.

Secretary, David N. Foster.

Treasurer, James B. Wallace.

The law required that the term of the first members of the Board should be determined by lot, and at the first meeting of the Board February 28, 1895, the lots were cast, which resulted in giving the one-year term to James B. Wallace, the two-years' term to James R. Carnahan and Isaiah B. McDonald, and the three-years' term to David N. Foster and Christopher J. Murphy.

The Board of Trustees, having organized and determined the term of each member, as required by law, were ready to begin the work for which it was created.

The law required that the Board of Trustees should contract for and erect certain buildings on certain lands in Tippecanoe County that had been donated to the Department of Indiana Grand Army of the Republic.

Before the erection of the buildings could be commenced and before any portion of the appropriation for buildings could be made available for that purpose it became necessary, by the provisions of the law, to have the lands transferred by the Department of Indiana Grand Army of the Republic to the State of Indiana by a clear and unimpeachable title. These lands had been donated and deeded to the Grand Army of the Republic by Tippecanoe County, the city of Lafayette, and by

Colonel Richard P. DeHart—three separate tracts of land on the west bank of the Wabash River, about four miles northwest of the city of Lafayette.

The Grand Army of the Republic had pledged itself to transfer the lands to the State of Indiana in consideration of the passage of a law whereby the State should create and provide for the maintenance of a Soldiers' Home. The first thing necessary, therefore, was to secure the transfer of the lands to the State.

The lands in question were historic grounds, in part known as "The Tecumseh Trail," and other lands that had been the camping grounds of that famous Indian warrior and his braves before the battle of Tippecanoe, and were afterward deeded by the General Government to members of the Indian tribes that had lived along the Wabash River.

These lands had been sold and transferred by the Indians, and it was deemed best by the Attorney-General that a full and complete abstract should be had of them, and also that, in addition to the abstract, there should be a legal opinion of some competent lawyer as to the legality of each and all the transfers from the original grant by the General Government to the date of the proposed transfer to the State of Indiana by the Grand Army of the Republic. The descriptions of the lands in the various transfers were long and intricate, and required a very careful analysis, and it became necessary, in the opinion of competent attorneys, to procure two additional deeds to complete a perfect chain of title. All this was done, and the titles were, in the opinion of the Attorney-General, complete and perfect in the Department of Indiana Grand Army of the Republic, and that body was found to be duly incorporated under the laws of the State and qualified to execute a deed to the State of Indiana for the lands in question. These questions having all been settled satisfactorily to the officers of the State, the Encampment of the Department of Indiana held at the city of Muncie on the 28th day of March, 1895, by resolution unanimously adopted, instructed the officers of that body to convey said lands by warranty deed to the State of Indiana, for the purposes of a Soldiers' Home.

Upon securing the transfer of the lands to the State, the appropriation embraced in the act establishing the Home became available, and the Board of Trustees was able to begin

the work of improving the grounds and also to commence the preparations for the erection of the buildings specified in the act. No time was lost by the Board in this matter.

The appropriation by the State was \$75,000, and with this sum it was provided that the following improvements should be made and buildings should be erected: A headquarters building, a kitchen and dining-room, a hospital, cottages and dormitories, a laundry and power house, heating and lighting plant, a stable, storeroom, ice house and other necessary buildings, water-works, sewers, grading walks and roads, and improving grounds, and for miscellaneous expenses.

In addition to the sum of \$75,000 appropriated by the State there was in the hands of the proper officers of the Department of Indiana Grand Army of the Republic, an unexpended balance of \$3,945.80, which had been donated by Tippecanoe County at the same time the lands were donated, to aid in the erection of the Home, or for the improvement of the grounds. This sum of \$3,945.80, in conformity with the act establishing the Soldiers' Home, was paid into the State Treasury and became available in the work before us, giving in all the sum of \$78,945.80.

The lands on which the buildings were erected were heavily timbered, and it was therefore necessary that the lands should be cleared and a sufficient space should be opened up for the erection of the buildings. The matter of having the grounds judiciously laid off and platted was fully considered and determined upon. To secure the proper result, William K. Eldridge, an experienced civil engineer and landscape gardener, was employed to lay out the grounds and locate the sites for the various buildings, the plat thus to be laid off and platted being sixty-five acres of the lands lying west of the Lafayette and Battle Ground road and extending west up the hill, and covering the level ground at the top of the bluff, which, when fully complete, will give a magnificent view of and from the buildings for a number of miles to the east and south. The work done by this Board in improving these grounds has thus far been limited to clearing this portion of the lands sufficiently to permit the erection of the buildings named in the act, and for the cottages which have been erected, and those now in contemplation which are to be built from donations, provided for in the act, and for the building of such roadways, walks and

sewers as were absolutely necessary for immediate use. The great and ultimate work of beautifying and completing the work according to the designs adopted, as a matter of necessity being left to the future provisions of the State for that purpose.

It was apparent that the appropriation was not sufficient to erect and complete all the buildings originally contemplated, and after full consultation and advice with the Attorney-General, it was decided to erect and complete the buildings hereinafter named.

In order to secure the best possible designs and plans for the proposed buildings, it was decided to invite competitive designs therefor, and this was done. The invitation for designs brought out the genius and skill of a number of the very best architects of the State—men of experience in the profession, both as designers and builders. Before the time fixed, however, for the submitting of the plans and designs, this Board visited several of the National and State Homes for the purpose of seeing the plans and designs then constructed and in use, the better to know the plans in actual use, and to avoid, as far as possible, any errors that might have been committed by others, and to learn of any improvements that might be suggested by officers who were experienced in the management of similar institutions. The visitations proved of great value when we came to an examination of the plans that were afterward presented for our consideration.

At the time fixed for receiving plans and for their examination, after giving careful consideration thereof, the plans and designs of James F. Alexander & Son, architects, of Lafayette, men of large experience and judgment, were adopted, and the contract was awarded to them for the plans and specifications and for the superintendence of the erection of the buildings.

The Board having adopted the plans and specifications, advertised for bids for the construction in leading papers of the larger cities throughout the State, and put the plans and specifications on file in Indianapolis, Lafayette, Ft. Wayne and Evansville for inspection by contractors and builders.

It was imperatively necessary that the Water-Works plant for the Home should be put up and fully completed before the work could be successfully begun on the main buildings, and

bids for the construction and completion were asked for in advance of the bids for the others. The contract for the Water-Works plant was let May 3, 1895, and the work was begun immediately thereafter.

The water plant consists of a brick and stone building, in which are the boilers, engines and pumps for the lifting of the water. The supply of water is derived from three six-inch driven wells just at the low-water mark of the Wabash River. These wells are in fact artesian wells, from which the water pours in greatest abundance when the pipes are uncapped. The temperature of the water as it flows at the wells is only 48 degrees. No surface or river water, in case of the rise of the river, can enter the wells, and the Home is certain of an abundant supply, both for domestic and fire purposes, of as near pure water as is possible to be obtained anywhere. Professor H. A. Huston, of Purdue University, after a careful analysis of the water from these wells, reported that "it could not be improved on."

The present pumping capacity is 6,000 gallons per hour.

The pumping-house has been built large enough to admit of increased pumping facilities whenever such increase may be needed.

The water is raised from the low-water mark of the river to the level ground of the Home, a height of 185 feet, and from that level 90 feet higher into a 40,000 gallon steel tank, and from thence conducted through iron water-mains to the buildings and fire-hydrants in front of each of the principal buildings and elsewhere about the grounds for the protection of the cottages and other uses as it may be needed.

The entire cost of the water-works plant of the Home, as now completed and in use, was \$10,664.74.

On July 8, 1895, the time fixed to receive bids for the construction of the various buildings, the Board convened in the city of Lafayette for that purpose. Bidders came from a number of the larger cities of Indiana, and some few from outside the State. A sufficient time had been allowed for all bidders to make careful estimates, and the competition was in all cases sharp and strong. The bids all came in sealed, and each bidder was present when they were opened, and as each was opened it was read aloud in the presence and hearing of each and every

competitor. The highest and lowest bid on each building is given herewith for your information, to wit:

Old People's Building—Highest, bid \$26,310; lowest bid, \$13,924.

Dining Hall and Widows' Home—Highest bid, \$18,708; lowest bid, \$9,297.

Hospital—Highest bid, \$16,475; lowest bid, \$8,740.

Quartermaster's Building—Highest bid, \$8,995; lowest bid, \$2,343.

Power House, Electric-Light House and laundry Building Combined—Highest bid, \$5,690; lowest bid, \$2,693.

The lowest bid in each case was made by the firm of Campfield & Harrison, of Richmond, Indiana, men of large experience in erection of large public buildings, and the contracts were awarded to this firm on their bids.

The State is to be congratulated upon securing the contract for the erection of the buildings at her Soldiers' Home at such low figures at the hands of men so thoroughly competent and responsible as was the firm named. The contract thus awarded for the six buildings, to wit: The old people's home, the dining-hall and widows' home, the hospital, the quartermaster's building, the commissary building, the power-house, electric light building and laundry, combined, was \$41,937, and adding thereto the cost of the water plant as fully completed, \$10,-664.74, we had as the aggregate for the construction, \$52,601.74.

These figures, however, it must be borne in mind, are only for the buildings and not for the equipment of any of them, except for the water plant.

In connection with the power-house, electric light building and laundry, we have added an electric lighting plant. The contract for this plant was awarded to the Ft. Wayne Electric Corporation, for the sum of \$4,448.47. We think we state truly when it is said, that no better electric light machinery can be made than that which is in our Home. We now have all of the buildings on the ground wired and lighted in a complete and substantial manner, as also are the grounds on which the buildings stand, also the roadway leading up from the public highway to the grounds.

The main buildings are all heated by steam, and the cooking is done, in a great measure, in the same manner. The steam heating plant cost \$4,737. The plumbing contracts for all of

the main buildings cost \$1,966.80. The cooking apparatus and bake oven, which includes the cooking apparatus for the main dining-hall and for the old people's home, and for the hospital, cost \$1,585. The laundry machinery, complete, was put in at a cost of \$1,250. The barn, \$200.

An ice plant, as provided for in the act establishing the Home, has also been added to the commissary building, and we now have an ice machine capable of manufacturing a ton of ice every day, and, in addition thereto, furnishing the large cold storage apartments that are built in connection with the commissary building. The cost of the ice plant was \$3,600, exclusive of the building.

We submit herewith an itemized statement of the amounts expended by this Board in the erection of the buildings, and the appliances connected with the construction of the buildings and their equipment, together with estimated cost of work on the grounds. See Exhibit "A." For full financial statement see Treasurer's report, Exhibit "B."

In the act establishing the Home no appropriation was made for furnishing the Home after the buildings were erected, so that it could be occupied by those for whom the Home was intended. As the time approached for the completion of the buildings, the Board of Trustees, after full consultation on the subject, decided to solicit bids for the equipment of the Home, for its occupancy. For this work, as has been said, there was no appropriation, and the only thing left for this Board to do, in the premises, was to go ahead and on their own individual responsibility purchase such furniture as would be necessary to thoroughly equip the buildings. Bids were received for furniture and bedding. The Board, after careful examination of the bids and examination of the furniture and bedding, which were submitted as samples, finally procured furniture for most of the rooms in the Home. The furniture and bedding so purchased cost \$12,000.00, and for the payment of this sum, together with interest thereon, the Board of Trustees, in their own individual names, borrowed the money, executed their notes and paid for the same. In addition to the furniture thus purchased quite an amount of furniture was supplied by the Woman's Relief Corps Auxiliary to the Grand Army of the Republic and the Ladies of the Grand Army of the Republic of Indiana. The contributions made by these two patriotic

organizations were part in money and part in bedding and rugs necessary for the equipment of the rooms. A detailed statement of the money so furnished for furniture is filed herewith, Treasurer's Report, marked "Exhibit B." The value of the articles furnished by these organizations we are not able to estimate, but the money contributed aggregates \$1,074.94.

ELECTRIC RAILWAY.

As the Home is situated four miles from the city of Lafayette, it became necessary that some means of transit should be obtained to the city and the Home for the convenience of the occupants of the Home and the general public. The Lafayette Electric Street Railway Company proposed to build an electric line from the city of Lafayette to the Home without expense to the State or to the Home, provided that a right of way on to the grounds should be given by the Board of Trustees.

The Board accepted the proposition made by the Lafayette Electric Railway Company, and gave a right of way for the company through the grounds, from the west line of the grounds extending across the grounds eastward to the brow of the hill overlooking the Lafayette and Battle Ground gravel road, commonly known as the "River Road." This railway is now completed and ready for operation, and will be of very great service and convenience to the Home.

The Electric Railway Company have agreed to erect a handsome depot upon the grounds at their own expense, without cost to the State. The plans for this depot have already been made by the Home architect, and have been accepted and approved by the Board. The electric railway is now completed ready for travel to the city of Lafayette and the Home grounds, and the depot will be erected in the near future.

The building of this electric line of road will add materially to the value of the Home grounds, not only by reason of the convenience furnished thereby, but will add to the money value of the Home grounds also.

COTTAGES.

In addition to the buildings that were erected under the appropriation made by the State, the Grand Army of the Republic, the Woman's Relief Corps and the Ladies of the Grand Army of the Republic contributed money for the erection of cottages on the grounds. These organizations having taken up the work of raising funds for the erection of cottages, brought the matter before the County Commissioners of the several counties of the State.

Twenty-six cottages have been erected, completed and furnished, and are now occupied. A complete schedule of the amounts contributed for cottages, and by whom contributed, is filed here with Treasurer's report, marked "Exhibit B." From this schedule it will be seen that the sum of \$26,172.11 has been paid in and added to the appropriation made by the State for cottages for the proper care of the disabled and needy soldiers of the Republic, their wives and widows.

Of the sum of \$5,000 donated by the Grand Army of the Republic in notes and mortgages we have received \$3,488.09; there is yet due to the State from said appropriation, the sum of \$1,500 with interest. This sum, which yet remains unpaid, is secured by note and first mortgage on real estate, now in our hands, which is now due and it is expected will soon be paid. From the amount already received from the Grand Army fund, four double cottages have been erected, and the balance of the fund, when collected, will also be used for the erection of other cottages on the grounds.

The construction of all of the main buildings herein named, and also the erection of the cottages, was carried on simultaneously, so that the whole matter of furnishing, both of the main buildings and of the cottages, was in progress at one and the same time.

Each of the cottages bears on its front an inscription showing by whom, or by what county, such cottage was donated.

HOME OFFICERS.

Prior to the opening of the Home, and upon nearing the completion of the buildings, our Board felt that it was necessary to secure for the Home, a competent person for Commandant of the Home, and also some one who was thoroughly capable of discharging the duties of Adjutant of the Home.

At a meeting of the Board, held in the city of Lafayette, October 3, 1895, the applications for these two positions were received and opened for consideration. All of the applicants for these two positions had been requested to appear before the Board at that time, to present their requests for the position in person, and that the Board might know, personally, as to the fitness of each applicant. This examination of applicants required almost a whole night's work. There was no lack of applicants who were, in most cases, competent to take charge of the work.

The Board, after an examination and thorough inquiry into the merits of each applicant, selected Captain John P. Megrew as Commandant, and Captain Wilbur F. Havens as Adjutant. The Board at that time felt that it was especially fortunate in being able to secure the services of Captain Megrew for the very important and responsible position of Commandant. They were fortunate not only because he was a man of great integrity, but because of his character and eminent fitness, from experience in such duty, for the position. He had had nearly three years of experience as Commandant of the State Soldiers' Home of South Dakota, and added to this were recommendations and endorsements as to his character and as to the efficient manner in which he had discharged his duties in the South Dakota Home.

The Board has been fully convinced, since Captain Megrew entered upon his duties as Commandant of the Indiana State Soldiers' Home, that they made no mistake, whatever, in selecting him for the position which he has filled so competently and well since the opening of the Home. As to his services as a soldier, he was one of the early enlistments of Indiana boys in 1861, as a private, in the Eleventh Indiana Infantry. During all of the years of the war, from April, 1861, until the close of the contest, Captain Megrew saw active service in the

field. From the rank of private he rose for meritorious service, to Sergeant, from that to Lieutenant, then Adjutant, and then Captain, in his old regiment, and served throughout with great credit to himself and honor to his regiment and State.

Captain Megrew gave most valuable service to this Board in the equipment and furnishing of the Home. He entered upon his duty the 1st of December, 1895, and, under his experienced hand, order was brought into every detail of the work necessary to place the Home in condition to receive members. He superintended the cleaning up of the buildings, receiving the furniture, placing it in position, and, in short, took charge of everything that was necessary to be done in connection with the opening of the Home. Since that time he has given his undivided attention, his energy and intelligent oversight to everything connected with the management and government of the institution.

It was especially fortunate for us, in the opening of the Home, that we had one who had had experience with the United States Government in the management of a State Soldiers' Home. Had it not been for his knowledge in this last subject, the Home might have been involved in trouble and delay in getting matters into such shape that the State of Indiana could draw from the General Government the sum allotted by the United States, for each soldier that was to be a member of the Home. We are glad to state that so thoroughly was the work done by Commandant Megrew that the State of Indiana has drawn the allowance from the General Government, to assist in maintaining this Home, from the time at which the Home was formally opened, until the present time, without clash or friction in any way.

In regard to the Adjutant selected, Captain Wilbur F. Havens, we have found him to be a man thoroughly competent in every respect to discharge the multitudinous duties that pertain to this office, as defined in the statute governing the position. Captain Havens is also an Indiana soldier who rendered distinguished service during the entire War of the Rebellion. His books and accounts are open to investigation and inspection, and this Board would be glad if the Legislature of this State would appoint a committee to make a careful inspection and examination of the books of the Home, and ascertain for itself, and for the people of the State, how carefully

and well the duty has been discharged, both by Commander Megrew and Adjutant Havens.

The office and clerical work connected with these two offices, and especially that of Adjutant, is, under the law, both intricate and difficult, but in this work no mistakes have yet occurred.

The Indiana State Soldiers' Home in all of its departments, and also the office books, accounts and reports of the Commandant and Adjutant have been examined by General Averill, the Inspector of Soldiers' Homes, appointed and acting under the laws of the United States, and it has been pronounced by him most perfect and complete in every respect.

OPENING OF THE HOME.

On July 8, 1885, as hereinbefore stated, the contracts for the erection of the permanent buildings were made and the work was pushed as rapidly as possible. In January, 1896, the buildings were sufficiently completed to begin the admission of ex soldiers and their wives or widows; but the Home was not formerly opened until the 1st day of February, 1896. The Home was rapidly filled by worthy though destitute or crippled soldiers. Since the opening there has been admitted to the Home, 250 men, 97 women, and there was on the 31st day of October, 1896, men, 191; women, 83; total, 274. We submit herewith an exhibit showing the names of all who have been admitted to the Home since it was first opened, giving not only the names, but the counties from which they entered the Home, and also a statement of their service. See Exhibit "C." There have been five deaths at the Home since it was opened. Four of those who died have been buried on the Home grounds, and one was returned to his friends in Vanderburgh County.

There are 42 applications for admission approved, on which applicants have not yet reported.

MAINTENANCE.

By the act of the Legislature establishing the Indiana State Soldiers' Home it was provided that, to meet the current expenses of such Home, there should be appropriated annually out of any moneys in the State treasury, not otherwise appropriated, a sum equal to \$10.50 per month for each inmate, officer

and employe residing at the Home. This amount of \$10.50 per month, for maintenance, was a compromise amount, the original draft of the bill specified \$12.50 per month for each member, officer and employe at the Home. By some it was thought that the Home could exist on \$10.50 per month for maintenance, and the friends of the bill consented to the change to the sum now named for maintenance, believing that if this was not a sufficient amount to meet the expenses of the Home, the next General Assembly of the State of Indiana would provide adequate means for maintaining the Home.

In the management of the Home, up to the present time, the most rigid economy has been practiced both by the Board of Trustees and by the Commandant of the Home, yet, with all of this careful and economical management, it has been found that a per capita of \$10.50 per month is not sufficient to meet the necessary expenses of maintaining and conducting the Home in a manner creditable to the State of Indiana.

The employes at the Home who must be paid out of this maintenance fund are the Assistant Surgeon, the Matron, the Assistant Matron, the chief cook and chief baker, the laundryman, the engineers at the electric light and power house, and one engineer at the pumping station. Besides this, it is necessary to have an electrician, who must also be paid in the same way. The Quartermaster-Sergeant, the Commissary-Sergeant, the Book-keeper, the Stenographer and Typewriter are to be paid, under the law, from this maintenance fund. There are other minor employes that are required about the Home, and these must also be paid from the same fund.

In addition to the employes, all repairing, painting and whatever necessary work there is to be done must be paid from the maintenance fund; but none of this can interfere with the proper supplying of food to the members of the Home. In addition to the food expense that must be provided, we must also provide clothing to such of the members of the Home as do not draw sufficient pensions to pay for their clothing. Under the rules of the Home we require that all who draw in excess of \$6.00 per month must pay for their own clothing; but there is a very large number of the members of the Home, both male and female, who draw no pensions, have no income of any kind, and must therefore be supplied by the State with such clothing as is needed. We must also provide

the medicines and surgical appliances that must be used in the hospital.

Also, from this maintainance fund must be provided the fuel for the Home. In short, every expense connected with the management of the Home; also additional furniture and bedding for additional buildings must be paid, under the law, out of this fund. We found, on the 31st day of October, 1896, the date at which, under the law, the financial statement of the Home must be made, that we lacked \$1,512.55 of having sufficient to meet these expenses. See Adjutant's Report, "Exhibit D."

We wish to call your attention to the one item of fuel alone. The fuel used for the Home during the first year was provided altogether from the timber that was cleared from the land in order that the buildings might be erected, and in the clearing up of the grounds. The supply of fuel, however, from this direction is now about exhausted, and the Home will have to look to another source for its fuel supply.

The fuel used during the first year came, in a great measure, from the appropriation by the State for the erection of the Home, for the reason that, in order to prepare the grounds for building, we were compelled to cut the timber, and that timber, so cut, in preparation for the buildings, did not come out of the maintenance fund. Had we been compelled to purchase fuel at market prices during this first year, the \$10.50 per capita for maintenance would not have met the expenses necessary to maintain the Home, and our deficiency would have been increased.

We can not in the future look for any more free fuel; we must purchase our fuel. This supply of fuel must be obtained either through the purchase of coal for running the furnaces for supplying the necessary heating of the buildings and cottages, and also for the pumping-station, the electric light and power house, or it must be done by piping natural gas from the city of Lafayette to the Home grounds. In either event the maintenance fund as now provided will not be sufficient to furnish the fuel and keep up the other necessary expenses attendant upon the Home. If natural gas should be used—and that would be the cheapest fuel—perhaps then it will be necessary to have a specific appropriation for the purpose of laying the pipes for the gas from the city of Lafayette to the Home,

a distance of at least four miles. In the judgment of this Board it would be far better for the State, and much more economical after the pipes are laid, to use natural gas; and we would respectfully recommend that the pipes be purchased and laid for natural gas.

In addition to the matter of fuel as an expense, as the Home has grown, additional expense is required in order to properly take care of those who are admitted to the Home. Quite a number of those who have been admitted have been absolutely helpless, and it has required the service of special attendants for each one, in order that they might be properly cared for. Such service can not be obtained without compensation to those who render the service. As the years go by there will be more and more who will require this special attention. Not only this; under the law there is no way whereby this Board or the State can collect the cost of burial of deceased members of the Home, who have died at the Home, from the counties from which such persons may have been admitted. Special provision, in addition to the mere maintenance fund, should be provided for burials.

At the opening of the Home, and during its first few months of existence, the Board was able to have the necessary clerical work, and such other work as required constant attention, done by a few persons; but now that the Home has grown the duties have increased and the work has grown in like proportion and requires more help than we are at present able to employ.

We have been able, up to this time, to procure the services of a home surgeon at a merely nominal sum, but his duties have grown so fast that they now require all of his attention and time, and we recommend that a fixed salary should be established by the Legislature for the services of such home surgeon. Those who come to the Home crippled and broken down from wounds or disease are in need of constant and skilled attention. This can only be had by the State paying a reasonable amount for such professional service.

The State of Indiana to-day is paying less for the care of her destitute and needy soldiers than is being paid elsewhere. The State is now paying annually, under the present appropriation for maintenance, \$126 per year for each soldier and member of the Home, but out of this amount so paid should be

deducted \$100 paid by the General Government to the State for each veteran who is a member of the Home.

A careful examination of the reports of fifteen of the State Soldiers' Homes now established in various States shows that there is being paid an average of \$189.86 for each inmate of those fifteen homes. The maintenance in these various homes ranges all the way from \$141.19 to \$228.58, as against \$126 annually appropriated by the State of Indiana.

With this showing of cost required in other States, the Board of Trustees of the Indiana Home believe that the sum already appropriated is too small, and our experience has established this as a fact. This Board is of the opinion that if the sum for maintenance should be increased from \$10.50 per month to \$12.50 per month per capita, for the next two years, that that sum would be sufficient to meet all of the expenses for food, clothing, medical attendance, for fuel, and additional expense of all employees.

We sincerely trust, Governor, that, in your message to the Legislature, you will give attention to the necessity of increasing this appropriation.

One other matter in connection with the expense of the Home: Under the present law, the only two officers that are paid salaries out of the general funds of the State are the Commandant and Adjutant. The salary of the Commandant, under the present law, is \$1,000 per year, and the salary of the Adjutant is \$800 per year. For the amount of work required and the responsibility that must be borne by these two officers, we feel that the salary is altogether inadequate, and we would recommend that the salary of the Commandant should be raised to \$1,500, and that the salary of the Adjutant should be raised to \$1,000. It requires all of their time and attention, from morning until night, and late into the night, to conduct the affairs of the Home in a proper manner, the Adjutant discharging the duty of Adjutant and Quartermaster. They are held responsible to the State for the preservation of its property and for the honest expenditure of all funds that may come into their hands by reason of their official positions. The care and anxiety attendant upon their duties in properly providing for the inmates of the Home is by no means light, and their responsibility for the men and women entrusted to their keeping is very great. For all of this they should be compensated in a manner worthy of their service.

ADDITIONAL BUILDINGS REQUIRED.

Applications for admission to the Home have been carefully scrutinized, and none have been admitted except in full compliance with the law. Guarding this admission, however, as carefully as the Board may, there is forced upon us the fact that the Home, as it is at present constructed, is not nearly adequate to meet the wants and necessary requirements intended to be met by the act establishing the Soldiers' Home. At this time every room in the permanent buildings and in the cottages is filled. There is not room or space for another individual except as vacancies are made by death or removal of those already admitted.

The Quartermaster's building is now used as the headquarters building and offices for the Commandant and Adjutant. No more space can be occupied in that building than is now used, and it is not nearly adequate to the demands.

It is absolutely necessary that an administration building should be erected—one in which the Commandant can have his office and place of business, and in which there can be a proper office or room for the transaction of the business of the State, in looking after the Home, by the Board of Trustees. This building should also be made the home or residence of the Commandant.

The Old People's Home was originally intended to be used simply for married men and their wives, but we have been forced to use it not only for married, but for unmarried members—old men. This building is overcrowded, and we should carry out the original intention of the Home in the erection of an Old Men's Home.

An additional dining hall should also be erected to accommodate the growing needs of the members of the Home.

There is no chapel or assembly room, and no provision was made in the act creating the Home whereby one could be erected. This Board earnestly recommends that such a chapel or assembly room should be built, so that the members of the Home may have the privilege of having sacred worship and a place where they can have lectures and addresses for the benefit of the members of the Home.

We shall have to put in an additional dynamo, as the buildings are completed and new cottages are erected.

There should be, also, much improvement in the grounds of the Home in the way of drives and walks. Additional sewers should be put in to meet the growing and increased demand of the Home.

The cottages are now heated with stoves. While this is the best and cheapest manner that is at present possible for heating these cottages, there should be erected upon the grounds at least two heating plants large enough to heat all of the cottages that are now built or that shall hereafter be built upon the grounds. We have already referred to the matter of putting in pipes and piping the buildings for natural gas.

At present, the engineer at the pumping station has no cottage or place for keeping his family, save and except in the pumping house, and we recommend that a cottage be built near to the pumping station for the benefit and use of the engineer.

The Home also needs fire protection in the way of hose and fire apparatus.

For the purpose of erecting these buildings named and for furnishing them and making the necessary improvements on the grounds the State should appropriate not less than \$125,000. In asking for this appropriation we wish to call your attention to what the State has already received by donations and from the General Government in the care of its needy soldiers. The State has expended \$75,000 in the erection of the Home. For that \$75,000 she has received for her permanent use unincumbered real estate, two hundred forty-seven acres of as fine land as can be found in the State of Indiana; she has permanent buildings erected on these lands that to-day can not be duplicated for less than 50 per cent. additional to that it has already cost the State. The State has received by way of donations for cottages the further sum of \$26,172.11. While the State has paid \$10.50 per month for each soldier and employe in the Home it has and will receive from the General Government the sum of \$100 per year for each soldier now or who may hereafter be an inmate of the Home; so that in truth and in fact it has cost the State of Indiana only \$26 per year for each veteran that is now in the Home or that may hereafter come to the Home.

TREASURER'S RECEIPTS.

We submit herewith the report of the Treasurer of the Board of Trustees for all sums of money received by him and expenditures thereof, from all sources, since he entered upon his duties as Treasurer of this Board, up to and including October 31, 1896, said report, marked "Exhibit B," showing a total amount of \$108,862.57.

ADJUTANT'S RECEIPTS AND EXPENDITURES.

Under Section 15 of the act creating the Indiana State Soldiers' Home the Adjutant is required annually, on the 31st of October, to make a complete and full report of all receipts and expenditures for and on account of the Home; and we submit herewith the official report of the Adjutant of the Home for the term ending October 31, 1896, showing that there has been received by the Adjutant of the Home, from all sources, the total amount of \$19,993.64, with expenditures of \$21,506.19. See "Exhibit D" herewith.

In the matter of clothing it should be stated that there are a large number in the Home who must be provided with clothing at the expense of the State, and this clothing has to be paid for out of the maintenance fund.

RULES AND REGULATIONS.

The law establishing the Home required that rules and regulations should be devised by this Board for admission to the Home. These rules and regulations have been prepared and a copy of the same is filed herewith for your information and the information of the General Assembly of the State of Indiana. Exhibit "E."

In concluding this, our second annual report, this Board wishes to extend to you, as Governor of the State and as an individual, an expression of our high appreciation of the interest which you have taken in the Home, from the time it was first brought to your attention by petitions to the Legislature for its establishment, and for your active and hearty coöperation in all that has been done by this Board to build up an institution

that should be not only a refuge for the poor and disabled soldier and his wife, and the widow of the deceased soldier, but an institution which should be in truth and in fact a home for those men who dared all in the defense of the nation in its hour of peril, and who now, in their old age, are broken by disease and wounds, and should be and are the honorable and worthy wards of the great State of Indiana.

Respectfully submitted,

JAMES R. CARNAHAN,
DAVID N. FOSTER,
JAMES B. WALLACE,
C. J. MURPHY,
ISAIAH B. McDONALD,
Trustees

I hereby certify that the foregoing is a true and correct statement of the receipts and expenditures of the Indiana State Soldiers' Home from the 2d day of January, 1896, to October 31, 1896.

W. F. HAVENS,
Adjutant and Quartermaster.

EXHIBIT E.

RULES GOVERNING ADMISSION TO THE INDIANA STATE SOLDIERS' HOME.

WHO MAY BE ADMITTED.

1. All honorably discharged soldiers, sailors and marines, who have served the United States in any war, and who have been residents of the State for one year immediately preceding the date of application, who may be disabled or destitute. Also the wives of such disabled or destitute soldiers, sailors and marines; and destitute widows over forty-five years of age, of such soldiers, sailors and marines, and who have been citizens of the State one year immediately preceding the date of application, and who are, at the time of making such application bona fide residents of the State. *Provided*, That such wives or widows shall have entered into the contract of marriage prior to February 23, 1895.

2. Each applicant before being admitted will be required to execute before an officer having a seal, a formal application, giving (if a male) domestic and military history, nature and degree of disability, which will be attested by a practicing physician in good standing, certificate of identification of at least two persons, as to citizenship. If the applicant is a wife, proof of marriage. If a widow, proof of service of her husband, and her widowhood must accompany the application, as also evidence as to her identity and citizenship. On receipt of these, due notice will be returned as to acceptance or otherwise. This must not, however, be taken as an assurance of admission, as this can only be definitely determined by the medical examination of the Home surgeon. Discharge papers and pension certificates must accompany the application and will be retained in the office of the Home during membership.

3. No person will be admitted who may be receiving a pension in excess of twelve (\$12.00) dollars per month: *Provided, however*, That such applicant may by reason of advanced age or other infirmities, be admitted, conditioned upon paying out of such pension such sum as may be required for his or her

special care and attention: *It is further provided*, That such application shall, before being accepted, be referred to the Executive Committee of the Board of Trustees for their action.

4. Members receiving a pension of six (\$6.00) dollars or upwards will be required to pay for all clothing, tobacco, etc., but such member will not be bound by this rule if he is providing for dependent family.

5. Insane persons will not be admitted, and the surgeon of the Home shall be the sole judge of the fitness of such applicants.

6. Non-pensioners, having requisite qualification for membership, will in the event of being crowded be given preference in the order of admission, and members who are in receipt of pensions may, in the discretion of the Board of Trustees, be discharged or granted leave of absence to make room for those who are without pension and other means of support.

7. Discharged members of the National Home (Marion Branch) will not be admitted until the expiration of two months from the date of such discharge, except as otherwise ordered by the Board of Trustees.

8. It is expected that all persons admitted to the Home will cheerfully accord the management their support in the enforcement of such rules as may be laid down for their guidance, and to perform such reasonable service as may be required and is warranted by their physical condition.

All necessary blanks will be furnished on application to James R. Carnahan, President Board of Trustees, Indianapolis, Indiana, to whom all correspondence relative to admission should be addressed. These rules shall be in force until such time as they may be changed by the Board of Trustees of the Home.

By order of the Board of Trustees Indiana State Soldiers' Home.

JAMES R. CARNAHAN,

D. N. FOSTER,

President Board of Trustees.

Secretary.

REPORT OF BOARD OF CONTROL.

To the HONORABLE CLAUDE MATTHEWS, Governor of Indiana :

SIR—In accordance with the requirement of the laws of Indiana governing the benevolent institutions, we, the members of the Board of Control for the Central Indiana Hospital for the Insane, hereby respectfully submit our report for the fiscal year ending October 31, 1896, setting forth in detail our various acts relating to the management of said Hospital for the year, and suggesting such changes and appropriations as the necessities of the same demand for the period covered by the appropriations that will be made by the next General Assembly. Many of the much needed changes and improvements the Board had anticipated making during the year just past had to be abandoned on account of the great reduction made by the last General Assembly in the appropriations for the various funds constituted for the support of the institutions.

The value of the property belonging to the Hospital is, upon a careful appraisement, estimated as follows :

Real estate.....	\$1,534,177 70
Personal property.....	228,668 57
Total.....	<u>\$1,762,846 27</u>

For the support of the institution during the last year, the following sums were appropriated to the various funds by the last General Assembly, to wit :

General Appropriations.

Maintenance	\$240,000 00
Clothing.....	10,000 00
Repairs.....	10,000 00

Special Appropriations.

Painting.....	5,000 00
Plumbing.....	5,000 00
Laundry.....	8,000 00

All of the above sums have been expended during the year, which is not surprising when we consider that they are many thousand dollars less than the appropriations made for the institution during each of the ten preceding years. A report in detail showing the expenditures from the various funds above mentioned is submitted herewith, the monthly allowance and expenditures being shown at the beginning thereof.

The waste and discarded material sold from the institution during the fiscal year amounted to \$1,719.51, which sum has been paid into the State Treasury.

During the year both departments of the Hospital have continued in that overcrowded condition of which we spoke in our last report, and some step should be taken by the General Assembly to give relief in this respect, thereby greatly adding to the health and comfort of the unfortunate individuals within the institution. To this end we wish to call special attention to the suggestions made by the Superintendent in his report to us, which is submitted herewith.

The number of patients at the Hospital during the year is as follows :

Total number at beginning of year.....	1,543
Number received during year	483
Number discharged during year.....	306
Number died during year.....	134
Total number treated during year.....	2,026
Number on rolls at close of year.....	1,586
Daily average number on rolls.....	1,578.4

The per capita cost for maintenance during the year estimated upon the total expenditure of the Maintenance Fund, was \$152.05. But their having been expended from the fund the sum of \$11,777.70 for permanent improvements, this should be deducted in estimating the per capita cost, thus leaving the true amount expended for purely maintenance purposes \$228,822.30, making the actual per capita cost for maintenance \$144.97.

It is on account of the abundant supply of vegetables raised on the farm land during the season, which was very favorable, coupled with the exceedingly low market price prevailing for provisions of all kinds, that we have been able to maintain those in the institution at this low per capita cost.

The new kitchen into which we were moving at the time of filing our last report was entirely completed and equipped during the early part of the year. It has been furnished with the most modern equipments, so that now, with its abundant facilities for ventilation, the labor of those employed therein is greatly lightened, and the work can be done with a much smaller force than was required in the old one. We have also constructed in connection therewith, large ice chests, in which supplies and edibles are kept, thus keeping them fresh and wholesome. We have also erected small elevators leading from the kitchen to the tunnels through which the edibles are distributed to the various departments.

The young trees set out to take the place of the forest trees killed by the drouth of two years ago are growing rapidly and will, in a few years, add much to the shade and beauty of the grounds.

The special appropriation of \$5,000 made by the last General Assembly for painting has been used in painting the gutters and outside woodwork of the two main buildings. Before the gutters could be painted it was necessary for us to make many repairs upon the tin and metal work connected therewith.

The inside woodwork of the two main buildings is suffering for want of paint. Much of this has never been painted, and in many places that which was originally painted has worn entirely bare. An appropriation of \$10,000 should be made for this purpose.

The special appropriation of \$5,000 made for plumbing has been used in repairing a portion of the plumbing in the main building of the Department for Men. But with this small sum only a portion of the work needed in this building could be done. The condition of the old plumbing remaining in this building, together with much of that in the main building of the Department for Women, is such as to require immediate repair. For this purpose we would ask that an appropriation of \$10,000 be made.

During the summer, the boilers supplying the steam and heat for the institution have been repaired and put in good condition.

During the summer we added some new and improved machinery to the carpenter shop of the Hospital, by which all

the molding and carved woodwork used is now made by the carpenters' force, thus saving much money to the institution, as the purchase heretofore of this material has been very expensive.

The new building for the pathological department has now been fully completed, and equipped with all the necessary means for scientific research and study, for which this department was intended. Much credit is due the Superintendent for the services rendered by him in the erection and equipment of this building. This new department will be formally opened in a few weeks by appropriate ceremonies, conducted by the Marion County Medical Society.

Many cement walks have been built during the past year, adding much to the beauty and convenience of the grounds immediately surrounding the buildings.

There should be constructed a tunnel leading from the power house to the Department for Men. This is necessary in order that the pipes conveying steam and heat to this department may at all times be easy of access, and any breaks can be quickly discovered and repaired. For this purpose, a special appropriation of \$4,000 should be made.

A new fence is badly needed along the east, south and west sides of the Hospital grounds. To the low fence now existing on these sides of the grounds is due many of the escapes of patients from the institution. For this purpose an appropriation of \$5,000 is necessary.

It is necessary that two new dining rooms be erected, one on each side of the wing in which is located the new kitchen. By this the present dining rooms would be moved from the close proximity to the patients' wards, where they are now located, and be entirely relieved from unpleasant odors and foul air coming from said wards. We would also by this arrangement be enabled to equip the present dining rooms so that the same could be used for patients, thus relieving in part the crowded condition of the institution. To accomplish this an appropriation of \$20,000 is necessary.

We would again renew the recommendation so often made for an appropriation of \$5,000 to construct a new greenhouse. The great comfort derived by the patients from the flowers cultivated during the winter months, when their confinement is close, should, without further argument, cause this request

to be granted. The dilapidated condition of the old greenhouse greatly detracts from the beauty of the grounds, being located near the front of the main building of the Department for Men, and it also requires great additional labor to preserve only a few flowers during the winter season.

The special appropriations asked above for painting, plumbing, tunnel, greenhouse, fence and dining rooms, are absolute necessities, and the welfare of the institution demands that they receive favorable consideration at the hands of the General Assembly.

The needs of the entire institution demand that the appropriations for the general funds constituted for the support of the Hospital should be restored to the old figure at which they had been maintained for ten years prior to this year, viz.: Maintenance, \$260,000; repairs, \$15,000, and clothing, \$12,000. Words can not too strongly express the necessity for the restoration of these appropriations to the old amounts. Every argument that can be advanced demands it. The increased number of those demanding admission, together with the fact that all the buildings and personal property belonging to the institution need more care each year, requires an increased, rather than a decreased appropriation.

The excellent service rendered during the past year by the Superintendent, Steward and all the officers and employes, and the excellent discipline maintained throughout all the departments of the institution merits special mention.

In closing, permit us to again urge that the requests herein made for new appropriations and the restoration of those regular funds to the old amounts, are not mere idle requests, but are made with the utmost earnestness, and every need of the institution demands that they be granted; and we invite the Committees on Benevolent Institutions that may be appointed by the General Assembly to visit this institution and, by personal inspection, judge of the merits of our request.

In managing the affairs of the institution, it has been our constant aim to add to the welfare and comfort of the unfortunate beings confined therein, keeping in mind, also, the duty we owe to the people of the State, the expenditure of whose money has been entrusted to us. We have endeavored in all

things to do our full duty in the performance of this trust,
rendering due service to each one concerned.

J. L. CARSON,
JOHN OSTERMAN,
D. H. DAVIS,

Board of Control.

Indianapolis, Ind., October 31, 1896.

SUPERINTENDENT'S REPORT.

To the Board of Control of the Central Indiana Hospital for the Insane:

GENTLEMEN—In accordance with the usual custom, the following abstract from the statistical tables embodied in the report is arranged for your convenience:

At the beginning of the year there were enrolled 1,543 patients, 705 men and 838 women. At the close of the year we have remaining 1,586 patients, 711 men and 875 women.

Four hundred and eighty-three patients, 251 men and 232 women were admitted during the year. Discharged were 306 patients, 167 men and 139 women; of these, two women were discharged as having been not insane. One hundred and thirty four patients, 78 men and 56 women, died during the year.

Of the 251 men admitted, 240 were white and 11 colored. Of the 232 women admitted, 227 were white and five colored.

Total number of patients under treatment 2,026; 956 men and 1,070 women. The daily average number under treatment was 1,578.4; 712.8 men and 865.6 women.

One hundred and fifty patients, 80 men and 70 women, were discharged as recovered. Of the 483 patients admitted during the year, 71 men and 59 women recovered; 37 men and 39 women were discharged as improved, and 29 men and 16 women died.

Percentage of recoveries to the total number of patients under treatment, 7.45. Percentage of recoveries to daily average number under treatment, 9.5. Percentage of recoveries to the total number admitted during the year, 31.05.

Percentage of deaths to the total number patients enrolled, 6.69. Percentage of deaths to the daily average number under treatment, 8.43.

Two women were discharged to be transferred to the Northern Indiana Hospital for the Insane. There are yet seven men and forty-six women in care of this Hospital who belong to other districts of Indiana Insane Hospitals.

MEDICAL STAFF.

The same physicians constitute our Medical staff as in previous years of our administration.

ESCAPES.

During the year there were seventeen escapes, all but two of these were recaptured.

CASUALTIES.

None to report this year.

IMPROVEMENTS AND REPAIRS.

Outside of those especially mentioned in this report, we were not able (financially) to inaugurate any.

BOILER HOUSE.

This department has been repaired in its entirety, all boilers and pumps being placed in good condition.

PLUMBING AT DEPARTMENT FOR MEN.

The plumbing at this department has been partially remodeled; there yet remains a great deal to do before this department is in a sanitary condition.

KITCHENS.

The "Officers'" and the "Night" kitchens at D. F. W. have been supplied with new ranges, the old ones being absolutely beyond repair.

NEW KITCHEN AT D. F. M.

This kitchen is now in successful operation, and its removal from the basement has added greatly to the sanitary condition of the Department for Men.

FIRE DEPARTMENT.

The facilities for fire services are now in very fair condition; quite a number of fire extinguishers were purchased during the year.

CEMENT WALKS.

The policy of constructing cement walks has been continued.

SHADE TREES AND SHRUBBERY.

Quite a large number of shade trees were planted, most of them in the grove adjoining the Department for Women.

AMUSEMENTS.

These have been continued as opportunity offered, consisting mainly of entertainments, dancing and base ball.

RELIGIOUS EXERCISES.

There has been an apparent increase in the attention given these services.

GENERAL LIBRARY.

A number of new books were purchased. In addition to these the Library received the usual donation of twenty-five dollars for the purchase of books from P. H. Jameson, M. D., whose interest in the patients is very praiseworthy.

CHAPEL.

This has been thoroughly overhauled, being repainted and refloored.

SURGERY AND DINING ROOM.

The surgery and dining-room on the "sick" ward at the Department for Men have been repainted and provided with new furniture. They are now in as good condition as the building will permit.

PAINTING.

During the year the wood work on exterior of both main buildings has been painted.

TIN WORK.

This class of work on both buildings has been repaired and is now in good condition.

PATHOLOGICAL DEPARTMENT.

This department is now practically complete. It is a great credit not only to the State, but reflects the greatest wisdom upon the part of the Board of Control. The benefits to the people will be very great. Personally I can not command language sufficiently strong to express my full appreciation of your progressive conduct in the matter.

For the information of the Board of Control, and also for those who do not receive our large report, I have included in this an invoice of our working facilities in this department.

This will enable other persons (professional and otherwise) to correctly estimate whether our claim made in former reports is justifiable.

In connection with this department it is with pleasure that we acknowledge a donation to the Medical Library of fifty-five volumes from William Wood & Co., New York.

RECOMMENDATIONS.

It is to be hoped that the coming General Assembly, upon a full and complete investigation of the actual condition of our property will see the necessity for sufficient appropriations to retrieve the same from the decay into which it has fallen, and without attempting to indicate to you just what sums should be asked for, I trust that for the sake of humanity you will make the strongest appeal possible.

KITCHEN DEPARTMENT FOR WOMEN.

This kitchen and its entire outfit, with the exception of the range, is a disgrace to the institution and should be removed. The old boiler house presents the best location for this purpose.

SLEEPING ROOMS.

Sleeping rooms should be provided to accommodate all the employes who are now occupying rooms upon the wards.

BAKERY.

A separate building should be constructed for this purpose, as it is at present not only inadequate, but a constant menace to the Hospital and the lives of its inmates.

TUNNEL.

A tunnel of sufficient diameter to carry all pipes, etc., from the Power House to the Department for Men should be constructed.

GREEN HOUSE.

The present structure is a blot upon the grounds of the institution. It is absolutely dangerous to life as well as unsightly.

FENCE.

I again call your attention to the necessity of constructing a fence on the north and west side of our grounds.

FURNITURE.

An especial effort should be made the coming year to replace the greater portion of our furniture, much of which is absolutely beyond repair and unfit for use.

GARBAGE.

In awarding the next contract for the removal of garbage it is essential to demand that the contractor provide air-tight vessels for its storage and removal.

HOSPITAL.

The Legislature should be asked to provide additional room for the patients of our district. We are not only greatly overcrowded, but have a great many cases awaiting admission. I would urge that the proper action under the circumstances is to provide a hospital with a capacity for 100 beds, thus relieving the "sick" wards in our present buildings and utilizing the room thus secured for our patients.

It is unnecessary for me to argue to you that I believe this building should be absolutely modern in its construction and facilities, fully equipped to meet all legitimate requirements.

NEW DINING ROOMS, D. F. M.

In addition to the room secured by the construction of the Hospital there should be provided at the Department for Men two new buildings for dining-room purposes. This will permit the vacation of wards now used and will give us an additional space for patients. It is absolutely necessary for sanitary reasons to remove these dining rooms from the building.

DETENTION DEPARTMENT.

I will once more call your attention to a building that is essential for the proper conduct of Hospital service. This is a department for the detention of acute cases, where they may be individually studied and treated and their proper place in the Hospital determined.

PAVILIONS FOR CONTAGIOUS DISEASES.

In my previous report I also called attention to the great need of pavilions for the treatment of contagious diseases. The necessity for the same has not passed away.

BUILDINGS FOR CONVALESCENTS.

A building at each department should be provided for convalescents. This would greatly enhance the prospect of recovery in many patients

PAINTING.

The entire interior of the Hospital needs painting for sanitary reasons. Some of the wards have never been painted.

PLUMBING.

The plumbing at both departments needs attention, the work so well begun at the Department for Men should be completed, and that at the Department for Women entirely remodeled.

FIRE SERVICE.

I most respectfully but urgently recommend to the Board that a contract be entered into with the Indianapolis Water Company to provide a line of water pipe encircling both main buildings for fire use only. In addition to the above I repeat my request for several fire-escapes, especially at the Department for Men.

PAVILIONS.

A number of pavilions for patients should be constructed in the grove adjoining the Department for Women; they are absolutely necessary for the proper protection of our patients.

EMPLOYEES.

The employes have, as a rule, been faithful and prompt in the discharge of their duties.

In conclusion, I again acknowledge myself under obligations to the Board for many acts of kindness, but above all for their great interest and hearty coöperation in all that pertains to the welfare of the institution and the patients therein.

Very respectfully,

G. F. EDENHARTER,
Superintendent.

Movement of Population Fiscal Year 1895-1896.

GENERAL RESULTS.	Men.	Women.	Total.
Remaining at beginning of the year	705	838	1,543
Admitted during the year	251	232	483
Whole number treated	956	1,070	2,026
Discharged as recovered	80	70	150
Discharged as improved	68	51	119
Discharged as unimproved	19	16	35
Discharged as not insane		2	2
Died	78	56	134
Remaining at close of the year	711	875	1,586
Per cent. recovered of whole number treated during the year	8.36	6.54	7.45
Per cent. died of whole number treated during the year	8.15	5.23	6.69
Average daily number under treatment	712.8	865.6	1,578.4

Admissions, Discharges and Deaths from Beginning of the Hospital.

RESULTS.	Men.	Women.	Total.
Admitted.	10,016	9,015	19,031
Discharged as recovered.	4,413	3,908	8,321

2 $\frac{1}{4}$ dozen foot bolts	8 00
1 $\frac{1}{2}$ dozen knob spindles	1 00
8 gross shutter knobs	28 00
9 gross drawer knobs	5 40
10 piano locks.	3 00
6 thumb latches	60
3 $\frac{1}{2}$ dozen heavy lock-guards	2 75
6 dozen hinge holders.	75
4 $\frac{1}{2}$ dozen brass padlocks.	34 00
26 sets spring blind hinges	6 75
300 lock escutcheon rings.	5 00
4 dozen curtain pins, large	9 00
3 $\frac{1}{2}$ dozen curtain hooks	1 75
24 gross wrought staples, assorted	11 20
3 dozen sash-lifts and locks combined	6 00
16 gross stove bolts, assorted.	6 40
14 gross machine screws.	4 00
5 $\frac{1}{2}$ gross picture nails.	16 00
3 chalk-line reels and awls	60

6 dozen hanks chalk lines.	\$3 00
7 screw pulleys.	3 30
$\frac{1}{2}$ doz. sash pulleys, small	60
6 chair arm ratchets	30
11 doz. drawer knobs	9 50
10 pairs drawer handles.	4 60
6 doz. sash fasteners	14 50
3 doz. commode buttons.	1 80
6 bell pulls	30
$2\frac{3}{4}$ doz. chain bolts	16 00
25 gross screw hooks, assorted	30 00
20 gross screw eyes, assorted	18 00
$5\frac{1}{2}$ doz. door springs.	10 00
1 doz. tory door springs	2 20
6 doz. cupboard turns.	15 00
2 doz. picture rod hooks.	4 50
2 doz. brass door pulls	3 60
$6\frac{1}{2}$ doz. lifting handles	11 70
50 pairs chest handles.	30 00
2 doz. shutter bars	5 00
1 doz. cooler turns	7 00
5 doz. round door plates.	3 60
23,000 furniture nails.	13 75
48 doz. key escutcheons.	400 00
1 doz. box corners	1 75
9 doz. picture hooks	18 00
$3\frac{1}{2}$ doz. elbow catches	3 60
6 lbs. glazier's points	1 75
16 doz. papers steel carpet tacks	7 00
3 doz. papers gimp tacks	40
23 lbs. copper belt rivets.	5 75
27 boxes picture cord	13 50
8 pairs shutter flap hinges.	2 40
87 pairs bronze loose pin butts	43 00
11 pairs pin hinges	2 20
2 pairs double-acting spring hinges.	3 50
28 doz. pairs wrought brass butts, assorted	33 60
28 doz. pairs door butts D. F. W.	23 00
17 doz. pairs wrought butts, assorted	21 00
13 pairs cast butts	60
11 wooden rosettes	20
21 washita slips	2 25
48 papers double-pointed carpet tacks	2 30
$1\frac{1}{2}$ doz. brooms	3 60
4 lawn benches	16 00
683 gross common wood screws, assorted	196 00
117 gross round head blues, assorted	31 50
20 electric wire cut-out box locks.	6 00
112 gross flat-head brass screws, assorted	75 00
310 gross round-head brass screws, assorted	320 00
123 gross round-head nickel screws, assorted	285 00

12 lbs. register tins	\$1 75
5 doz. cupboard turns, assorted	18 00
6 doz. door bolts	14 40
7 Yale cupboard locks	4 20
1½ doz. heavy lock keepers	3 60
7 doz. curtain rings	70
7 doz. shutter catches	1 50
1 doz. belt hooks	30
1½ doz. cupboard hooks	90
4 sets screen door trimmings	2 40
1 doz. drawer pulls, brass	2 30
2 doz. cupboard catches	3 60
17 pairs bronzed shutter butts	2 80
2 trip gongs	3 00
1 gross buttons and plates	2 50
3 dozen drawer pulls	9 00
5 gross hooks and eyes	7 50
6 gross cup hooks	5 00
30 pairs rod brackets	3 00
96 yards safety chain, nickel	12 00
2½ dozen base knob door-holders	3 00
1½ dozen pairs nickel hinges	75
5 large door springs	10 00
120 pass locks, D. F. M	108 00
64 dead locks, D. F. M	47 60
7 dozen crutch sockets	2 50
103 pairs T-hinges	20 60
124 pairs strap hinges	37 20
80 lbs. brass spring wire	14 00
30 lbs. steel braids	1 20
32 large chair rockers	9 60
8 camp stands	6 00
1 moulded mantel	4 00
1 water-cooler bracket	2 00
5 laundry clothes racks	7 00
3 dozen meat hooks	2 50
1½ gross angle irons	14 00
100 sets bed irons, assorted	18 00
45 hinge hasps	4 50
54 hammer handles	5 90
12 pick handles	1 20
1½ dozen brass hasps	2 70
2 spirit levels	3 50
1 pacher ratchet	2 00
4 pairs pliers	3 50
12 butchers' saw blades	7 00
20 dozen files, assorted	45 00
2 expansive bits	1 75
4 counter brushes	1 75
3 pairs dividers	1 50
1 steel rule	60

1 tram	\$1 00
12 boxes wooden rules	4 80
5 work benches.	50 00
8 tool cases	32 00
1 large glue can	1 10
1 glasscutters' table	6 00
1 steel square	1 50
2 iron squares	80
1 combination square.	4 00
1 patent auger handle	50
1 shive wheel, with ropes	1 50
1 feather duster	20
5 stepladders	5 00
3 sprinkling cans	90
2 shovels	1 50
1 wheelbarrow	2 50
1 mirror	1 00
1 emery-wheel grinder	1 50
2 pinch bars.	2 00
$\frac{1}{2}$ dozen cold-chisels	1 20
1 diamond glass-cutter	7 50
12 steel glass-cutters	1 25
1 diamond glass-cutter, worn	1 00
1 set drawing tools.	10 00
1 set paring chisels.	10 00
1 board rule.	1 50
1 lace leather cutter	40
1 hand wagon	5 00
$\frac{1}{2}$ doz. screw drivers.	4 00
1 breast drill.	3 00
1 set auger bits.	10 00
1 differential pulley	18 00
2 tape lines	5 00
1,000 ft. manilla rope.	150 00
1,000 lbs. steel wire nails, assorted	20 00
2,000 ft. quarter-sawed oak lumber.	120 00
2 hand saws	3 00
1 inkstand.	50
1 revolving belt punch	75
1 corner brace	2 50
1 giant nail puller	1 25

b. LABORATORY UTENSILS AND CHEMICALS.

1 No. 1 skeleton.....	\$36 00
1 skeleton.....	35 00
1 oak and glass case for same.....	12 50
1 skull.....	13 00
1 cut skull.....	8 00
3 adj. lary. brackets.....	17 55
3 s. s. condensers.....	16 50
1 condenser (repaired).....	1 20
1 gauge and tube.....	6 50
1 Becker balance and weights.....	100 00
2 dist. flasks, 64 oz.....	1 40
2 assay flasks, 2 oz.....	20
2 assay flasks, 16 oz.....	40
4 assay flasks, 4 oz.....	54
6 assay flasks, 8 oz.....	1 00
1 Chaddock support 2 bar.....	2 50
1 weighing bottle, 80x15.....	20
1 Argand burner, $\frac{3}{8}$	59
3 triangles.....	15
2 vol. flasks, 200 c. c.....	70
2 vol. flasks, 250 c. c.....	84
2 vol. flasks, 500 c. c.....	1 05
2 vol. flasks, 1,000 c. c.....	1 25
12 Nessler jars select.....	4 80
2 supports 6 R.....	2 10
1 plat. tipped tongs.....	5 00
2 Chaddock beaker clamps.....	54
2 Chaddock t. t. clamps.....	54
2 universal small clamps.....	1 35
2 large holders for clamps.....	35
$\frac{1}{2}$ doz pipettes, 2 c. c.....	42
2 only pipettes, 5 c. c.....	20
2 only pipettes, 10 c. c.....	25
2 only pipettes, 20 c. c.....	34
2 only pipettes, 50 c. c.....	54
2 only pipettes, 100 c. c.....	80
2 Awater dessicators.....	3 30
1 doz. porcel. dishes, No. 3.....	3 24
$\frac{1}{2}$ doz. porcel. dishes, No. 4.....	1 80
$\frac{1}{3}$ doz. porcel. dishes, No. 1.....	75
2 sp. gr. bottles, 25 c. c.....	1 15
2 sp. gr. bottles, 50 c. c.....	1 68
1 weighing bottle, 50x25.....	21
1 Young's water bath.....	4 30
1 condenser, 20 inch.....	1 20
2 Soxhlet ext. tubes, 6 oz.....	2 80
1 Fletcher argand $\frac{3}{4}$ burner.....	1 11
1 set cork borers, $\frac{1}{12}$	1 50

LABORATORY UTENSILS AND CHEMICALS—Continued.

1 sharpener for borers.....	\$0 70
1 lb. rubber stoppers, $\frac{3}{8}$ in. to $1\frac{1}{2}$ in.....	2 50
2 gro. assorted corks, $\frac{3}{8}$ in to 2 in.....	2 70
4 funnels, $2\frac{1}{8}$ in	40
3 funnels, $2\frac{3}{4}$ in.....	45
2 funnels, $3\frac{3}{8}$ in	37
2 funnels, 4 in.....	45
1 Liebig condenser, 24 in.....	1 10
3 aluminum dishes, $2\frac{3}{4}$ in.....	1 50
1 barium hydroxide bottle, 4 oz.....	35
1 soda potass. tartrate bottle, 1 lb.....	65
1 sodium nitrate bottle, 4 oz	50
1 Meuncke's gas regulator, 5 adjustments.....	12 00
2 oz. phosphomolybdic acid, 10 %	40
2 oz. molybdate ammon. and bottle.....	35
1 lb. c. p. borax cryst	50
2 oz. nickek sulphate	20
$\frac{1}{4}$ lb. potass. permanganate c. p.....	16
$\frac{1}{4}$ lb. potass. bisulphate c. p.....	16
$\frac{1}{4}$ lb. barium chloride.....	11
$\frac{1}{4}$ lb. copper sulphate.....	14
$\frac{1}{4}$ lb. sodium phosphate.....	14
$\frac{1}{4}$ lb. ammon.....	29
$\frac{1}{4}$ lb. ammon. oxalate.....	20
$\frac{1}{2}$ lb. ammon. chloride.....	26
$\frac{1}{4}$ lb. ammon. carbonate	15
$\frac{1}{2}$ lb. sodium carbonate	20
$\frac{1}{2}$ lb. sodium carbonate, dry.....	23
$\frac{1}{2}$ lb. magnes. chloride.....	15
1 lb. asbestos..	94
1 lb. sodium hydrate.....	77
1 lb. potass. hydrate	77
2 oz. silver nitrate	1 14
2 oz sulphanillic acid	28
300 filters, 7 ctm., No. 3 swed.....	25
300 filters, 9 ctm., No. 3 swed	45
300 filters, 11 ctm.	50
300 filters, 15 ctm.....	74
$\frac{1}{2}$ doz. funnels, 2 in.....	66
3 oz. zinc, abs. po.....	50
1 oz. uranium acetate	15
2 oz. picric acid	20
$\frac{1}{2}$ lb. ammon. ferrous sulphate.....	28
$\frac{1}{2}$ lb animal charcoal	05
$\frac{1}{4}$ lb. ammon. nitrate.....	15
$\frac{1}{4}$ lb. ammon. sulphate	10
1 oz. bromine	25
1 lb. calcium chloride.....	35
1 oz. cobalt chloride	20

LABORATORY UTENSILS AND CHEMICALS—Continued.

1 lb. acetic ether.....	\$0 65
2 lbs. formalose	1 30
1 oz. bengal. indigo.....	20
2 oz. iodine resubl.....	80
1 oz. lithium carbonate.....	25
1 wash bottle, 16 oz.....	1 85
1 water blast, with pump.....	4 35
2 test tubes, $\frac{3}{8}$ in.....	45
4 aluminum dishes, $2\frac{1}{2} \times \frac{5}{8}$ in.....	2 00
1 Geissler alkalimeter.....	1 40
1 wing-top for P. burner	17
1 Bunsen blast lamp.....	2 70
1 plat. Gooche cruc., 25 c. c.....	16 75
1 Gooche filter flask.....	45
1 filter tube, special.....	50
1 quire filter paper.....	75
3 condensers, 1 pint.....	3 50
2 Squibb's 8 oz. sepy. funnels	2 60
1 support for pipette.....	1 50
2 quires filter paper	1 50
4 forceps, brass, straight.....	75
4 forceps, brass, bent.....	75
4 forceps, ivory tips.....	1 95
2 forceps, steel—fine	38
2 forceps, steel—plain	30
2 forceps, gooseneck	75
3 Schellbach's burettes	5 75
2 pipettes, 25 c. c.....	40
3 aluminum dishes, $2\frac{3}{4}$ in.....	1 50
1 Richards' filter pump.....	1 25
4 sq. inches plat. foil.....	1 34
2 thermometers 250 c. c	2 40

Fifth Biennial Report . . .

. . . OF THE . . .

Board of Control and
Medical Superintendent

. . . OF THE . . .

NORTHERN

Indiana Hospital for Insane

AT LONGCLIFF, NEAR LOGANSPOUT.

. . . FOR THE . . .

Biennial Period Ending October 31, 1896.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1897.

THE STATE OF INDIANA, }
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, November 30, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE, }
INDIANAPOLIS, December 1, 1896. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILEY,
Auditor of State.

DECEMBER 2, 1896.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, December 2, 1896.

WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer this 2d day of December, 1896.

THOS. J. CARTER,
Clerk Printing Bureau.

NORTHERN INDIANA HOSPITAL FOR INSANE.

1896.

Board of Control.

JACOB J. TODD, President, Bluffton.
DENNIS UHL, Treasurer, Logansport.
EDWARD S. SCOTT, Warsaw.

Medical Superintendent.

JOS. G. ROGERS, M. D., Ph. D.

Assistant Physicians.

JAS. W. MILLIGAN, A. M., M. D.
ROBERT HESSLER, A. M., M. D.

Steward.

WALTER G. ZAHRT.

Clerk.

CHAS. W. GARRETT.

Storekeeper and Quartermaster.

AUGUST W. DORSCH.

REPORT OF BOARD OF CONTROL.

To the HON. CLAUDE MATTHEWS, Governor of Indiana :

SIR—As required by law, the Board of Control of the Northern Indiana Hospital for Insane respectfully submits its report and that of the Medical Superintendent for the biennial period ending October 31, 1896.

This Board, as now constituted, established by an act of the General Assembly, approved March 11, 1895, and appointed by Your Excellency April 6, 1895, on assuming official functions in April, 1895, found ample warrant for the good repute which the institution had heretofore maintained, in the excellence of its organization, its *personnel*, its methods, the good repair of its buildings and other appurtenances, the condition of its farm and garden lands, its equipment, and last but not least, in the fact that practical fitness was the sole basis of employment and retention in its work. Therefore, no duty of reorganization has devolved upon this Board, but rather one of continued effort to maintain the schemes of improvement already instituted.

Systematic and frequent inspections of all departments have been made at the monthly meetings, and the practical results of the entire biennial period have been carefully considered, and the Board feels warranted in giving a favorable judgment upon what has been accomplished and upon present conditions. For details reference is made to the accompanying report of the Medical Superintendent. It is deemed proper here, however, to refer cursorily to a few important matters.

First of all, as to the condition of the inmates, it is gratifying to be able to testify that they are, one and all, cared for according to their just needs and possibilities, physical, mental and moral, kindly, carefully, liberally and skilfully. They are abundantly fed, comfortably and as neatly as possible clothed, live in pleasant, cheerful rooms, well warmed in winter, and sleep on far better beds than usually fall to the lot of the average citizen. Occupation and amusement is abundantly furnished to all who can appreciate; so are books and newspapers for those who will read, and sunlight, fresh air and exercise daily for all who can walk at all—out-doors when the weather is pleasant, winter and summer—otherwise in-doors. The grounds are beautifully decorated in the floral season, and flowers grace the wards abundantly in the winter time. In short, nothing is omitted that can add to the welfare of the patient which is reasonably available, and no effort is neglected in its application, to the end that feeble bodies may be comforted and clouded minds be cheered.

To maintain the Hospital, with its increased population, especially under the reduced fund of the last year, has required careful economy and some denial of reasonable requirements, but the term has been concluded satisfactorily without a deficit.

Two years ago the capacity of the Hospital was limited to 506 beds for inmates. An appropriation of \$20,000 by the last General Assembly for the construction of two annexes to the terminal buildings was promptly used, and nine months thereafter the annexes were equipped and occupied. This improvement added eighty-four beds, and with other minor expansions raised the total capacity to 610, equally divided between the sexes and in a way to better allot suitable accommodations among the various classes of inmates. For the present the demand for room can be met, and all proper cases occurring within the Northern District for Insane are promptly admitted. That this condition will continue, however, can not be hoped until the capacity shall have been increased to the normal ratio of 1 to 600—that is to say, estimating the population of the district to be half a million, 880 beds.

The water supply of the Hospital having been always more or less inadequate, and particularly so in recent years, in spite of frequent additions to the water system, in the course of the last two years three deep wells have been successively made, equipped with proper steam pumps and connected with the mains, for various purposes, with fairly good results—sufficient, it is hoped, for the present demand.

The river frontage has been greatly improved by the removal and reconstruction elsewhere of the old buildings, heretofore a dilapidated frontispiece. Much work has been done for the improvement of the grounds, the farm, the orchard and the garden of a permanent character, with decided gain in both fruitfulness and beauty.

At the same time the buildings have been kept in general good repair, and numerous minor betterments have been made here and there, from time to time, adding notably to their convenience, comfort and usefulness.

Subsistence supplies have been largely furnished from the farm, and, as a result, disbursement on this account has been relatively light. The tables of production submitted by the Superintendent show the gross value of products to have been, at a wholesale valuation, for the year 1894-5, \$9,569.62; for the year 1895-6, \$13,251.24.

The balance account shows the assets of the Hospital to be as follows:

Real estate.....	\$484,276 58
Personal property.....	63,948 19
Total.....	\$548,224 77

Indicating a gain for the biennial period of—

Real estate.....	28,059 91
Personal property.....	16,068 77
Total.....	\$44,128 68

The following is a fiscal summary by years and months:

Appropriation for fiscal year 1894-95.....		\$95,000 00
Allowances in November.....	\$7,329 66	
Allowances in December.....	7,972 38	
Allowances in January.....	7,454 40	
Allowances in February.....	8,454 74	
Allowances in March.....	7,969 74	
Allowances in April.....	7,345 79	
Allowances in May.....	7,529 19	
Allowances in June.....	7,037 06	
Allowances in July.....	7,082 07	
Allowances in August.....	6,977 45	
Allowances in September.....	6,668 65	
Allowances in October.....	13,178 87	
		<u>95,000 00</u>

Appropriation for fiscal year ending 1895-96.....		\$90,000 00
Allowances in November.....	\$8,106 59	
Allowances in December.....	7,542 10	
Allowances in January.....	8,219 55	
Allowances in February.....	7,441 89	
Allowances in March.....	6,844 58	
Allowances in April.....	8,169 34	
Allowances in May.....	6,989 34	
Allowances in June.....	6,721 94	
Allowances in July.....	6,695 52	
Allowances in August.....	7,173 31	
Allowances in September.....	7,444 68	
Allowances in October.....	8,651 16	
		<u>90,000 00</u>

In the matter of special needs, for paving the basements of all the wards with cement, 42,257 square feet; for facing the walks used by the inmates, with vitrified pavement, 30,000 square feet; and for the construction of a cold store for milk, butter, eggs, etc., an appropriation of \$8,500 is respectfully recommended, and is urgently needed, for sanitary reasons if for none other.

In the matter of maintenance, in view of an increase of population of 27 per cent. since the last appropriation (\$90,000 annually for the two years ending October 31, 1897) was made, it is clear that there must be an increase in the fund for the care of inmates. To this end, for the fiscal years 1897-8 and 1898-9, for current expenses, including clothing, minor improvements and repairs, the sum of \$100,000 annually will be required.

Very respectfully,

JACOB J. TODD,
DENNIS UHL,
EDWARD S. SCOTT,

Board of Control.

REPORT OF MEDICAL SUPERINTENDENT.

To the Honorable Board of Control:

GENTLEMEN: I respectfully submit a report of the operation of the Northern Indiana Hospital for Insane for the biennial period ending October 31, 1896, and its immediate needs, as required by law, as follows:

MOVEMENT OF INMATES.

For the Fiscal Year ending October 31, 1896.

MOVEMENT.	MEN.	WOMEN.	TOTAL.
Enrolled November 1. 1894.....	270	237	507
Admitted.....	130	85	215

Unimproved.....	3	...	3
Died.....	40	11	51
Enrolled October 31, 1895.....	283	275	558

For the Fiscal Year ending October 31, 1896.

MOVEMENT,	MEN.	WOMEN.	TOTAL.
Enrolled November 1, 1895.....	283	275	558
Admitted.....	116	96	212
Discharged.....	53	51	104
Recovered.....	30	38	68
Improved.....	9	6	15
Unimproved.....	11	6	17
Not Insane.....	3	1	4
Died.....	33	15	48
Enrolled, October 31, 1896.....	313	305	618

The appendix contains a table of the movement of inmates since the opening of the Hospital, July 1, 1888. The total number admitted to date is 1905; of these 525 have recovered and 316 have died. For further particulars, see the table.

No transfers have been made to other hospitals and none have been received from the same. Under provisions of the law, a limited number have been admitted from counties outside the Northern District for Insane and I am advised that an equivalent number belonging to this District are being cared for in the other hospitals of the State under the same provision.

The Northern District for Insane includes the following counties:

Cass.	Kosciusko.	Newton.	St. Joseph.
Dekalb.	Lake.	Noble.	Starke.
Elkhart.	Laporte.	Porter.	White.
Fulton.	Lagrange.	Pulaski.	Whitley.
Huntington.	Miami.	Steuben.	Wabash.
Jasper.	Marshall.		

The number of patients admitted from the several counties is set forth in the appendix.

The Medical Tables hereto appended show statistically the medical history of the Hospital from the beginning, but in more particular detail for the last biennial period.

Diagnoses of Admitted Cases. There have been admitted 427 patients. Of these, 120 (28 per cent.) were cases of acute mania; of chronic mania, there were 102 (24 per cent.); of melancholia, 95 (22 per cent.); of epileptic mania, 24 (6 per cent.); of epileptic dementia, 3 (1 per cent.); of primary dementia, 12 (3 per cent.); secondary dementia, 15 (4 per cent.); senile dementia, 16 (4 per cent.); epilepsy, simple, 4 (1 per cent.); general paresis, 18 (4½ per cent.); paranoia, 5 (1 per cent.); katatonia, 2 (½ per cent.); progressive chronic chorea, 1; idiotic, 5 (1 per cent.); not insane while in Hospital, 5.

Diagnoses of Recovered Cases. During the first year of the biennial term, 74 (34 per cent. of the number admitted) were discharged recovered; during the second year, 68 (32 per cent.). Of these, combining the two years, there were 77 recoveries from acute mania (64 per cent. of the number of this class admitted); of chronic mania, 15 (15 per cent.) recovered; of melancholia, 47 (50 per cent.); of epileptic mania, 3 (12 per cent.).

Duration of Recovered Cases. Of cases admitted with a diagnosis of acute mania, the largest number of recoveries occurred at about the sixth month of duration, although numerous at shorter periods; the next largest, at the twelfth month; almost as many at the eighteenth; then

fewer each year of duration to the fourth, after which there were none. The recoveries allotted to chronic mania show a duration of from one to four years. The duration of recovered cases of melancholia varies irregularly from six months to four years. In the cases of epileptic mania above referred to, conditions were reduced to those of simple epilepsy to an extent warranting discharge.

Mortality. The total number in Hospital during the first year was 722; the mortality was 51 (7 per cent.); during the second year the number in Hospital was 770; the mortality was 48 ($6\frac{2}{10}$ per cent.). Combining the two years, the mortality is assignable to diagnoses as follows: acute mania, 9; chronic mania, 29; epileptic mania, 3; senile dementia, 7; primary dementia, 1; secondary dementia, 7; epileptic dementia, 13; melancholia, 12; general paresis, 17; chronic progressive chorea, 1.

The complications and immediate causes of death were as follows: cerebral apoplexy, 13; pulmonary tuberculosis, 13; enteritis 7; maniacal exhaustion, 4; paretic exhaustion, 12; inanition of melancholia, 4; cardiac thrombus, 3; inanition of dementia, 3; encephalitis, 4; septicaemia, 1; pneumonitis 2; peritonitis, 1; cystitis, 2; typhoid fever, 4; senile exhaustion, 3; lumbar abscess, 1; la grippe, 1; chronic nephritis, 2; chronic progressive chorea, 1; amyloid degeneration, 1; marasmus, 8; gastric carcinoma, 1; angina pectoris, 1; status epilepticus, 1; Graves' disease, 1; stricture of oesophagus, 1; epilepsy, 1; intestinal obstruction, 1; railway concussion, 1; auto-strangulation, 1.

In the case of intestinal obstruction, the exact pathological condition could not be determined in the absence of an autopsy, which was not permitted by the friends of the patient. The death from railway concussion occurred in a case of chronic mania, originally sentenced for life to the women's prison for husband murder, who, becoming insane, was pardoned and committed to Hospital some years ago. She was struck by a train which she met on a railway embankment while making her way to her home, having eloped from the Hospital, evidently miscalculating the width of the moving train.

The auto-strangulation recorded occurred in the case of a female melancholiac, persistently suicidal, who, after frequent frustrated attempts, finally succeeded in hanging herself while in the water closet. She was almost immediately taken down, not moribund, but died thirty-six hours later from engorgement of the lungs. The Coroner of Cass County made prompt inquest in both cases and relieved the attendants from any possible charge of lack of reasonable diligence.

SANITARY CONDITIONS.

Typhoid Fever. Until the fall of 1895 no case of continued fever had ever occurred in this Hospital. At this time an accident occurred to the well furnishing the drinking water, which interrupted its use for four days. During this time other sources of supply were used, including a reservoir fed by a stream. Two weeks later there commenced an epidemic of typhoid fever which had a history of eleven cases and four deaths, two following perforation. Since then no cases have occurred. Subsequently it was developed that there were several cases near the head waters of the creek referred to just before the outbreak in the Hospital.

Tuberculosis still continues to claim its victims, but not so numerously as in former years. Every possible means is used towards isolation and disinfection with a view to a continued reduction.

Erysipelas has not appeared for many months.

Malarial Fevers of various types have continued to afflict both patients and employes; much less, however, during the past year. This relief I attribute to the abundant rainfall, which has doubtless interfered with the distribution of plasmodial spores in the atmospheric dust.

Sanitary Conditions. With the exception of the absence of pavements of any sort in the basements under the wards, hereinafter referred to, the general sanitary conditions of the Hospital itself are perhaps as good as they can be made.

Pathological Work. Every opportunity has been used to establish a pathological collection, consisting of numerous mounted microscopic sections of diseased tissues, and a very considerable amount of preserved material for future study and distribution. Every case of interest has been investigated by autopsy, where possible, and the results have been carefully noted. These data being, in my judgment, fitter for pages devoted to the medical reader, none are given here; suffice it to say that the opportunities for research afforded by the institution are not being wasted.

A Fleischl's hematometer and a centrifuge have been added to the equipment, which is now deemed to be reasonably complete. The medical library has been increased by the addition of numerous important works, and may be said to be up to date. Several prominent medical periodicals are regularly received.

ORGANIZATION

Legislation. It affords me great gratification to make record in this report, of a most important advance in legislation. The General Assembly of 1895, in response to a universal and most positive demand on the part of the press and people, enacted a law barring the hospitals for insane of the State against partisan political influences and making employment and tenure dependent solely on practical merit and fitness. While this institution, from the beginning of its operation, has had nothing of this sort to complain of practically, at the same time, it is a source of pride and satisfaction to know that a good and time honored custom has now become a written law of the commonwealth, and that Indiana was the first among the States to set forth this principle plainly in her statutes. May there never be a step of retrogression. In this connection, I desire to state that this policy has always obtained in this institution, without exception, and has always had the earnest support of all Trustees and other officers. That the results have been satisfactory can not be questioned, for every employe has known that permanency of employment depended solely on proper performance of duty and that all other influences have been without effect.

Regulations. The edition of the Regulations printed in 1890 having become exhausted, a careful revision and amplification of the same was submitted to and approved by your honorable board, March 14, 1896, and two thousand copies have been printed for distribution and local use, going into effect June 1, 1896.

Hospital Staff. No changes have occurred in the medical corps; Dr. J. W. Milligan and Dr. Robert Hessler continue to render efficient service. On February 1, 1895, Mr. Chas. A. Dunkleberg, Jr., resigned the functions of Steward, after five years of well performed service, to enter commercial business in Logansport, much to the regret of the entire population. Mr. Walter G. Zahrt, Clerk for three years, was thereupon promoted to be Steward, which position he continues to fill with efficiency. He was succeeded by Mr. Ben. Levering, upon whose resignation in January, 1896, after a year's satisfactory service, Mr. Charles W. Garrett was employed as Clerk and at present fills the place very satisfactorily. Mr. A. W. Dorsch continues to efficiently perform the duties of Storekeeper and Quartermaster. The heads of the various other departments remain unchanged.

In this connection I take pleasure in stating that particular recognition is due, in connection with the recent new constructions, to Mr. Henry M. Melton, head carpenter, for special service as architect, and superintendent of construction, to Mr. Howard H. York, engineer, for

ingenious designing and work on the heating apparatus; and to Mr. Chas. Boner for careful and excellent work in painting and varnishing the buildings and installing the light system.

IMPROVEMENTS.

Annexes. The most important improvement of the biennial period has been the construction of two annexes to the two terminal buildings of the Hospital. These are two stories high, contain eighty rooms, 8 ft. by 10 ft.; four rooms, 10 ft. by 14 ft.; two stairways, four corridors, 6 ft. by 110 ft., communicating with those of the original buildings, and four two-story galleries, 10 ft. by 30 ft., with low attics and roomy basements. Additional accommodation for eighty-four patients is thereby afforded. The foundation walls are of local, silico-magnesian limestone, laid in Louisville cement, pointed with Portland cement; the sills and water tables of oolitic limestone; the walls of common local brick, of special large size, laid in Flemish bond, 12 inches thick for outside and corridors, 8½ inches thick for partitions, smooth-faced inside as well as outside; the roofs are redipped, old-style tin, with special, extra heavy box-cornice, overhanging gutters, ridge coping and finials of galvanized iron, each roof surmounted by three extra large globe ventilators; the floors of pine joists, supported on wall plates, 2 in. by 8 in., secured to the walls by heavy iron through-bolts, and Michigan maple flooring, underlaid with mineral wool on false floor; the ceilings of embossed steel, in panels, with ogive cornice of same, covering wall plates; inside finish of selected ash, varnished; doors the same, with panels flush on inside; wrought steel butts and Yale locks, with solid bronze trimmings of special design; windows 4 ft. by 8 ft., with panes 5 in. by 7 in., double strength glass, pine sash, varnished; window guards of No. 8 steel wire, 1-inch channel iron frame, 1½-inch diamond mesh, each secured by two strong iron dowels below and a bronze four-tumbler Sargeant lock above; inside wall finish, face brick, well filled with a thick wash of Portland cement, in glue water, and two coats of paint, in boiled oil; base-boards of varnished ash, caulked with oakum and putty; stairs of black slate, polished, set in brick work, the stairways including ample closets and clothing chutes, with doors of access on each story. The galleries are equipped with wire guards for summer use, and glazed sash for winter use. For heating, each room is provided with an 8 in. by 10 in. lock register, communicating by a flue with an air chamber in the basement, 6 ft. by 100 ft., containing 2,100 feet of 1½-inch steam pipe coil, connected with the general steam system, fresh air being distributed properly and equally throughout the length of the hot air chamber by means of a full length air duct, having graduated openings at proper intervals. For ventilation in each room is a register, connecting with a flue, leading upward

to the attic, exit being had through the globe ventilators before mentioned. The corridors and some of the rooms are lighted by ceiling lamps controlled by switches, located in the door jambs, connected by lead-covered wiring with the general electric system of the Hospital. Each room is furnished with a standard hospital bed, of ash, equipped with a wire mattress, a 15-lb. mattress of long, drawing black hair, a 4-lb. pillow of soft South American hair, and an ample supply of special 5-lb. blankets, sheeting, etc. Entrances and stairs are arranged so that any part of either ward may be reached by three different ways. Sunshine reaches every room for a number of hours each day, and the outlook from all is over a pleasing landscape in all directions. The interiors are bright and cheerful in every particular, and afford added facilities for convenient and agreeable classification.

For the construction of these buildings the last General Assembly made an appropriation of \$20,000. Immediately thereafter your honorable Board adopted plans and specifications prepared by Mr. Henry M. Melton, head carpenter of the Hospital, and the undersigned, and bids for certain parts of the work and for all the material, by the unit of measurement or piece, were asked for by ample advertisement, by correspondence and in the six newspapers of Logansport.

Bids were received as follows:

WOODWORK MATERIALS.

Parker & Johnson,	Stevens Bros.,	Watson Lumber Co.,
	E. S. Rice & Son.	

STONEWORK.

A. Gleitze,	Heady & Linquist,	Barnes & Price,
J. H. Price,	John Medland,	Goodall & Co.,
	J. E. Barnes.	

BRICKWORK.

Barnes & Price,	A. Gleitze,	Ray & Kaiser,
Elwood Brick Co.,	Goodall & Co.,	John E. Barnes & Son.
John Medland,	J. M. Leach & Co.,	

METAL ROOFS AND GUTTERS.

Flanegin & Crismond,	C. A. Eberline,	Max Jennings.
----------------------	-----------------	---------------

METAL CEILINGS.

Max Jennings,	Flanegin & Crismond,	A. Northrup & Co.
---------------	----------------------	-------------------

SLATE WORK.

Pickel Mantel Co.,	Slatington-Bangor Syndicate.
--------------------	------------------------------

LOCKS.

Yale & Towne Manufacturing Co.

BUILDING HARDWARE.

I. N. Crawford,	E. S. Rice & Son,	Parkhurst & Co.
J. F. Johnson,	Joseph Aman,	

WROUGHT IRON PIPE.

J. B. Clow & Sons,	Knight & Jillson,	King Drill Co.
--------------------	-------------------	----------------

PAINTS, ETC.

A. Burdsal & Co.,	Berry Bros.,	National Linseed Oil Co.
	Standard Oil Co.	

And awards and contracts were made as follows to the lowest and best bidders:

Parker & Johnson	Woodwork materials.
A. Gleitze.....	Stonework.
Ray & Kaiser	Bricks.
Barnes & Price	Brickwork.
Max Jennings.....	Metal roof work.
A. Northrup & Co	Metal ceilings.
Flanegin & Crismond	Metal ceilings.
Slatington-Bangor Syndicate	Slate stairs.
Yale & Towne Manufacturing Co.....	Locks.
E. S. Rice & Son.....	Building hardware.
E. S. Rice & Son.....	Glass and putty.
Parkhurst & Co.....	Building hardware.
Knight & Jillson.....	Wrought iron pipe.
King Drill Co.....	Pipe-hangers.
A. Burdsal & Co.....	Paints.
Berry Bros.....	Varnishes.
National Linseed Oil Co.....	Oils.
Standard Oil Co.....	Oils.

The amount paid on account of each class of material or work is set forth in the following schedule of cost, and to whom paid in Exhibits Nos. 8 and 9 in the Appendix.

The work of excavation, sewers, grading, carpenter work, ceilings, painting and varnishing, glazing, electric wiring, and heating apparatus was done exclusively by the regular force of Hospital mechanics and other employes, with such temporarily engaged assistance as was required. The stone masonry, including material, was let to A. Gleitze, at

\$1.50	per perch,	for rubble work,
1.65	" " "	range work,
1.90	" cu. yd. "	concrete,
.60	" lin. ft. "	water table

The brick was furnished by Ray & Kaiser at \$5.00 per thousand. The brickwork was done by Barnes & Price at \$7.59 per thousand, mason's measurement, in the wall, and was paid in part, by the brick furnished by the Hospital at \$5.25 per thousand, actual count. The metal roof, at \$6.90 per square, and gutter work, at 65 cents per foot, and leaders at 25 cents, including material, was done by Max Jennings.

COST OF CONSTRUCTION OF ANNEXES.

Advertising	\$26 03	Steel Ceilings.....	\$482 23
Excavation	25 09	Electrical Equipment.....	13 70
Concrete Footings.....	247 89	Window Guards.....	351 26
Rubble Masonry.....	339 01	Glass	51 60
Range Masonry.....	446 72	Steam Heating	487 97
Water Table	239 50	Mineral Wool.....	141 75
Door Sills.....	32 00	Loggia Screen.s.....	192 22
Window Caps.....	65 00	Locks and Knobs	227 08
Window Sills.....	109 31	Loggia Roof.....	146 36
Flue Liners	231 99	Sewers and Drains.....	75 85
Bricks	2,437 21	Incidental Labor	175 00
Brick Work	3,196 81	Carpenters	2,307 05
Registers	237 03	Painters	661 43
Lumber	3,376 72	Steam Fitters.....	224 40
Hardware	271 58	Roofs and Gal. Iron Work...	882 86
Painters' Supplies.....	580 36		
Slate Stairs.....	90 62	Total cost of construction..	\$18,407 18

The additional furniture required on account of this increase of capacity was furnished competitively as follows:

Bedsteads.....	J. W. Henderson & Sons.....	\$227 50
Dining Tables.....	J. W. Henderson & Sons.....	50 50
Wire Mattresses.....	The Smith-Davis Mfg. Co.....	324 40
Hair Mattresses and Pillows.....	Schultz & Hirsch.....	680 25
Blankets.....	Beckman & Co.....	540 00
Sheets, Pillow Cases and Spreads.....	John Gray.....	120 36
Table Ware.....	Fox & Dunkleberg.....	73 16

Total cost of equipment..... \$2,016 17

Total cost of annexes..... \$20,423 34

The Water Supply having continued to be inadequate, in the spring of 1895 a well, 6 inches in diameter, 224 feet deep, cased with iron for 22 feet from the surface into solid rock, was drilled by Mr. Geo. A. Linton, near the west pump house, under a contract awarded competitively, at a cost of \$306.70. In this was placed the Cook's steam pump formerly used in the boiler house well (recently abandoned and filled with concrete, because of insufficiency and possible contamination), the 4-inch pumping barrel being placed at a depth of 76 feet, with a suction pipe 25 feet long below, so that water is drawn from a depth of 101 feet. It is of good quality, though hard, and is available to the extent of 25,000 gallons in

24 hours. Steam connections were made with the existing plant adjacent and water connections with the 3-inch main leading to the general water system and connecting with same under the west ward, at a cost of \$15.00. The well and pump were enclosed by a proper annex to the existing pump house, covered with corrugated iron costing, for material and extra labor, \$40.80.

In the fall of the same year it was determined to test all the strata for water, entirely through into the shales. To this end a well 8 inches in diameter and 609 feet, 3 inches deep, below the boiler house floor, and cased with iron to a depth of 156 feet, 3 inches, 8 feet east of the boiler house, was drilled, under contract, by W. L. Benson & Co., of Kokomo, at a cost of \$1,478.00. To include this, a brick pump house, with the roof connecting with the boiler room, was built by Barnes & Price, contractors for the annex brick work, 13 feet, 6 inches by 18 feet, 6 inches by 10 feet high, exclusive of excavation and carpenter work, which was done by the Hospital force.

In this well was placed an 8x36-inch Cook's pump, with 4-inch barrel, 216 feet deep. Steam and water connections were made with the adjacent systems. The cost of pump, tubes and connections was \$395.45, exclusive of labor, which was done by the engineer's force. The output of this well was, and is, about 25,000 gallons per diem; not as much as was hoped for, but still enough to warrant the expense of equipment and operation. The water is pure and potable, but hard.

The water supply, in dry seasons, promising still to be insufficient to meet reasonable requirements, it was determined to proceed at once to drill another well near the west pump-house, in order to tap the promising water bearing stratum pierced by the well at that point. Accordingly, pursuant to a contract with Mr. Geo. A. Linton, this was done in the spring of 1896 at a cost of \$507.80. This well has a depth of 356 feet, is 6 inches in diameter for 100 feet, 5 inches for the remainder. It is equipped with a Cook's pump, 8x36 inches, with 4-inch barrel located 90 feet below the surface, with a suction tube 22 feet long, costing, complete with tubes and connections, exclusive of labor, \$273.19. It is enclosed by an annex to the original pump-house, of wood covered with corrugated iron, costing for material and extra labor, \$31.41. A recent test of this well gave an output of 79,000 gallons per diem. It is hoped that this may be maintained when in regular use; if so, the available water supply will be sufficient and a long-felt want will have been satisfied.

Minor Improvements. Within the last two years a very considerable number of minor improvements have been made of decided value to the Hospital and advantageous to its operation, involving some expense and much labor on the part of the Hospital mechanics.

The following are the more important: The old barn and farm house on the riverside, long since ruinous, have been removed, their site graded and planted, and a new barn has been built 40x60 feet at the southwest corner of the garden (\$562.96); the rear center basement has been substantially floored in cement (2,179 square feet, \$201.47); a yard containing two sheds for storing boxes, barrels and lumber, 76x50 feet, has been built (\$52.00); the cold stores have been remodeled (\$174.83); four arc lights have been placed so as to light the campus efficiently (\$201.72); a large exhaust-head has been provided for the engine room (\$57.00); twenty-six additional window-guards have been placed (\$58.57); the main irrigation flume has been extended one thousand feet and an irrigation ditch fifteen hundred feet long has been made along the foot of the cliff (\$124.90); the rear center area wall, dilapidated by frost force, has been rebuilt in a way to stand the strain (\$85.00); a new Page fence has been built around the barnyard (\$39.00); a poultry yard, 100x144 feet, containing three double houses 14x24 feet, properly enclosed and divided by wire netting eight feet high, has been constructed (\$226.12); the old hot-bed yard has been demolished and graded, and a new one with 178 sashes has been made in a better location, provided with water pipes and hydrants and a new tool house (\$277.17); the vineyard has been improved by the provision of 7,686 feet of galvanized wire trellis on red cedar posts, which will last a lifetime, (\$180.44); an additional food-elevator has been constructed, connecting the general kitchen with the central dining-hall (\$71.36); the domestic gas system has been extended to all wards, and each ward is equipped with a substantial and safe gas-stove for special cooking, water heating, etc. (\$186.40); the hot-water pipes throughout the Hospital have been covered with felt and canvas, duly sized and painted, thus securing a decided economy in heat and fuel (\$119.62); much has been done toward the improvement of the grounds, roads, walks, etc., and trees, shrubs and perennial plants have been largely increased in number (\$448.60); exposed lawns have been generally protected by low but substantial fences (\$78.75); three summer houses of neat design and permanent construction have been built (\$327.00); a potting-house and store-room 16x27 feet (\$186.10) and a propagating house 18x64 feet (\$451.33) have also been constructed.

The foregoing items, together with all other improvements, with full values, including labor, are set forth in the inventory which is summarized in the Appendix.

ECONOMIC HISTORY.

Subsistence. Owing to the large amount of subsistence supplies produced on the Hospital farm, the amount disbursed on this account has been relatively small—for the last fiscal year only $9\frac{15}{100}$ cents *per diem*, *per capita*, of total population. An abundance of every sort of vegetables

available in this latitude, many kinds of small fruits, the milk product of a numerous herd of Holstein-Friesian cattle, about 25,000 gallons a year, and a very considerable quantity of fresh beef, veal and pork, produced on the farm, all go far to reduce the amount paid from the maintenance fund for food supplies. Unremitting attention has been given to the garden, farm and herds with a view to the above results. In the care of these departments, skilled employes have had valuable assistance from a large number of inmates, who, while finding agreeable occupation in the work, have, many of them, learned to be themselves skillful and have become very useful.

Repairs. Nowhere more than in an institution for the insane will the adage apply that "a stitch in time saves nine." With this in view, the regulations of the Hospital make it an important part of the duty of the head of every department and ward to report in writing daily every observed need for repair and prompt action is taken to secure the same. A competent corps of mechanics is maintained in the Hospital and it is rare to have to call for help from the outside in this connection. No serious accidents have ever befallen the property of the institution, but constant attention and labor is required to keep every part of it and all of its movable belongings in good condition. As a result of the system employed, however, every part of the buildings, as a rule, and all appurtenances are about as good as if new.

Farm and Garden. The arable land of the institution has been decidedly improved during the past biennial period by a liberal use of phosphates, bone meal and stable manure. Scarlet clover and rye, plowed under in June have also been extensively used as fertilizers. During the first year, owing to early and extreme drought, the meadow land produced nothing. For several years the irrigation system, described in previous reports, proved itself indispensable, but during the last year the skies have favored us with ample rains, and crops have been large without artificial watering. A detailed showing of products is set forth in the Appendix. For the year 1894-5, their value at market rates was \$9,569.62, for the year 1895-6, \$13,251.24.

AMUSEMENTS, OCCUPATIONS, ETC.

The tonic effects of amusing diversions and agreeable as well as useful occupation for inmates have been kept in view as heretofore; and every possible effort has been made to afford the same by all available methods.

All holidays have been fully observed and celebrated as joyously as possible; the weekly dance has kept its supremacy, but frequent concerts, plays, etc., have lent variety to the general entertainment. The

library has been made freely accessible to all, and newspapers and the current magazines have been liberally and regularly distributed. Of the women, many are employed in useful house labor, laundry work, sewing, etc., and of the men, many are engaged in the garden, fields, woods, laundry, kitchen and wards, altogether to the average extent of 40 per cent. of the whole number of inmates.

Religious services are continued, as heretofore, in the Assembly Hall, by the various clergymen of Logansport, regularly, in which many inmates show much interest. A well organized choir and a very excellent organ add much to the variety and impressiveness of these services.

Thanks are due to the publishers of the following periodicals which are furnished regularly to the inmates of the hospital:

South Bend Times.	Winamac Democrat Journal.
Deutsche Zeitung.	Rochester Sentinel.
Laporte Argus.	

Also to Miss Eva Daniels for the Christian Herald for 1896, and some volumes for the library, and to Mrs. R. Kistler, Mrs. S. T. McConnel, Miss Emily Fuller, Miss Lizzie Higgins, and Dr. N. W. Cady, for like favors.

The benevolent contributions of goods and money for the Christmas festivals of 1894 and 1895 from the following donors is also gratefully acknowledged:

Miss Higgins, Logansport and Wabash Valley Gas Co., Chas. Wool, J. C. Lauber, Carrie Weddell, J. H. Chubb, M. Manlove, Benj. Spencer, Mrs. S. D. Frazer, Parker & Johnston, Swift & Co., J. W. Youche, Susan Ensign, Kroeger & Strain, W. Robinson, E. H. Jennings, Henry Tucker, Seybold Bros, H. Frank, L. Solimano, A. Burdsal Co., H. Wiler & Co., Standard Oil Co., Wm. Heppe, Fox & Dunkleberg, Elliott & Co, L. Pilling, J. H. Foley, E. S. Rice & Son, Geo. A. Schaefer, Dan Taggart, J. B. Clow & Son, Geiger Bros., E. A. Vogeding, Clement, Bane & Co., Hiram Collins.

FISCAL.

Inventories. Monthly inventories, carefully checked, are made in all departments; a yearly inventory is made by the Quartermaster, and, when approved by the Superintendent, is used in closing the Hospital ledger. A summary is set forth in the appendix. The summary for this biennial period shows the value of property to be:

Real estate	\$484,276 58
Personal property	63,948 19
Total	\$548,224 77

And the gain over the inventory of Oct 31, 1894, to be :

Real estate	\$28,059 91
Personal property	16,068 77
Total	<hr/> \$44,128 68

The appropriations for maintenance for the two fiscal years of the past biennial period, respectively \$95,000 and \$90,000, have been used without residue.

The appropriations for new annexes, total, \$20,000, were sufficient for construction purposes and for the major part of the necessary equipment. For the remainder, the sum of \$423.35 was paid out of the maintenance fund.

Details of disbursements, by voucher numbers, payees, for what and amounts paid are set forth in Exhibits 4 and 5 for Maintenance, and in Exhibits 8 and 9 for the Annexes, in the Appendix.

NEEDS.

Maintenance. Since the opening of this Hospital, in 1888, the annual appropriation for the maintenance, including clothing, minor improvements and repairs, until October 31, 1893, five years, was \$85,000; for the next two years it was \$95,000; the last General Assembly appropriated \$90,000 each for the years 1895-6 and 1896-7 for these purposes. Meantime, in nine years, the capacity of the institution has been raised from 398 to 610. For the first year of the biennial term just ended \$95,000 was available, for the second year \$90,000. For the present year, ending October 31, 1897, a like sum is appropriated. Notwithstanding the increase in the number of inmates to be cared for, these sums have so far been sufficient to meet urgent requirements, but that they have been is due to fortunate absence of accidents involving expenditure and to the very low prices of supplies. I do not think it safe to leave the institution longer at the mercy of fortune and most earnestly urge that your honorable board vigorously recommend an annual appropriation for each of the years 1897-8 and 1898-9 of \$100,000. The additional capacity afforded by the new annexes (84) is already half occupied. In a few months at farthest the total capacity (610) will be entirely filled. During the current year privation as to some reasonable needs, with a diminished appropriation, is inevitable. To avoid this condition during the ensuing two years, with a constantly increasing population, it is clear that there must be a proportionate increase of the fund for maintenance. An appropriation less than the sum suggested will be inadequate to meet actual needs. Even with that, the annual per capita share, for a population of 610, will be less than has been expended in any past year in this or any other institution of this class in the State.

The present appropriation of \$90,000 was made when the actual average population was 480. The present actual population is 565. That it will reach the limit of capacity, 610, before the next appropriation is available, one year from now, in the light of experience, must stand without question. An increase of 27 per cent. in population will certainly warrant an increase of 11 per cent. in the maintenance fund, and on behalf of the inmates of this Hospital I pray that it may be granted.

Special Appropriation is asked :

1. For the reconstruction of the walks used by inmates connecting the various wards and leading to the central dining hall and to the assembly hall, in cement or vitrified paving blocks, 25,000 square feet. The existing walks, of gravel and crushed stone, in wet or thawing weather, are always muddy, and in places at times so soft as to be impassable. They have to be traversed six times daily by half the population of the Hospital, regardless of weather.

2. For a cold store for the separate preservation of milk, butter, eggs and similar supplies. The store now in use is too small for all purposes, and is needed in its entirety for meats, etc.

3. For cement floors in the basements of all wards, 42,257 square feet. These basements have never been paved ; the floors consist of the natural soil, as left by the original excavation, and present a variable surface of dry dust, sand, gravel and mud, which it is impossible to keep in a clean and sanitary condition. Now inasmuch as all the air furnished to the wards is taken by the flues from these basements, they should be paved in such a manner that they can be kept thoroughly clean, pure and dry.

The demand for the above special improvements is based on very obvious sanitary reasons, made especially so by the recent wet season. The sum required therefor is \$8,500.

In conclusion, I desire to acknowledge the conscientious and efficient service of all officers and employes, almost without exception, and to express a grateful recognition of the valuable and considerate support which your Honorable Board has afforded me.

Very respectfully,

JOS. G. ROGERS,
Medical Superintendent.

APPENDIX.

MEDICAL TABLES

REV. F. I. COLLINS.

REPORT OF BOARD OF CONTROL.

TO THE HON. CLAUDE MATTHEWS,

Governor of Indiana:

In view of the fact that the biennial period, ending October 31, 1896, has seen a continuation of the improvements and progress which mark the preceding years of the history of this Hospital, and has left unbroken its record of freedom from any incident of a distressing nature, the duty of making this report imposed upon us by statute becomes a privilege and a pleasure.

THE NEW BUILDING.

The General Assembly of 1895 made an appropriation of \$30,000 for the construction of additional buildings.

Several plans for increasing the capacity within this limit were carefully considered and it was finally decided to adopt the one maintaining the congregate plan originally designed for this Hospital. It seemed in every way the most practicable plan proposed and a contract for the erection of the addition was let on the 23d day of September, 1895, to Pearce & Morgan, of Indianapolis, for \$30,000. The building is an oblong structure three stories high, 54x158 feet, and in its interior arrangement is a duplicate of the wings of the original building, and is connected with them by a covered colonnade leading from the northwest wing, directly north. It is heated by the hot blast system and will accommodate one hundred and fifty persons. Owing to the fact that no appropriation was made to furnish the addition or to maintain an increased population, the new wing has not yet been opened for the reception of patients.

The contract for the erection of the building did not include lighting, wire guards for the windows nor a number of other details necessary to its proper completion. These items we have supplied from the maintenance fund from time to time as could be done without encroaching upon the care and comfort of the present population.

These items occasioned an expenditure of \$2,816.89, distributed as follows:

Plans and specifications	\$1,500 00
Extra excavating	150 07
Tiling colonnade floor	300 00
Cement floor in tunnel	36 00
Cold air shaft	90 00
Sewer plates	16 82
Electric wiring	360 00
Wire guards for windows.....	269 00
Lightning-rods.....	95 00
Total.....	<hr/> \$2,816 89

THE GROUNDS.

As stated in former reports all improvements to the grounds have been made in accordance with plans adopted by the Board upon the organization of this Hospital in 1890. Up to the time of making the last biennial report many thousand feet of macadamized roadways and walks had been constructed, as has been set forth in detail in that and preceding reports. Within the present period one thousand and sixty lineal feet of ten-foot walk, which lead through the grounds east of the building and which had been prepared for the reception of metal at the time of making our last report, have been completed.

Connecting with the main avenue at two points south and west of the buildings a walk ten feet wide and nine hundred and twenty lineal feet has been constructed. It has a twelve-inch cinder base with a three inch top dressing of limestone screening. This walk leads to the greenhouse, and when completed will finish a system of walks which makes an entire circuit of the grounds and buildings.

Cement walks measuring 3,282 square feet have been laid about the new building, connecting it with the walks from the other wings and with the avenues.

GRADING AND EXCAVATING.

In the work of excavating done during this period on lake No. 4, as shown by the plans, 10,000 cubic yards of earth were handled and placed to complete the east bank of this lake and to fill the depression west of the buildings.

SODDING.

Nineteen hundred and fifty three square yards of blue grass sod taken from a point within the Hospital grounds was hauled by our own teams and placed by our own men about the new building and along the walks leading to the greenhouse. In addition, 3,044 square yards were placed along the walks east of the buildings and on the bank of lake No. 1.

TREES.

In the fall of 1895 two hundred and eighty forest and ornamental trees were purchased and set out at a cost of \$212.00. One hundred and fifty native forest trees were secured without cost to the Hospital, except the labor of hauling and setting them out, which was done by our own men and teams. A large per cent. of these trees is in an apparently good condition.

WATER PIPE.

In order that the lawns might receive the necessary attention a line of pipe was carried through those parts of the grounds devoted to lawns. Openings were made at convenient intervals for the attachment of hose, and by this arrangement ample water is distributed for the proper care of the grass. This was done at a cost of \$144.38. In order that the roadways might be kept in good condition and free from dust, a tank sprinkler with a capacity of 600 gallons was purchased at a cost of \$125.

The expenditures occasioned by these improvements on account of the grounds amounts to \$2,107.91, distributed as follows:

Broken stone.....	\$315 15
Cement walks.....	213 46
Sodding.....	181 53
Trees.....	212 00
Water pipe.....	144 38
Tank sprinkler..	125 00
Labor.....	916 39
Total.....	<hr/> \$2,107 91

GATES.

To prevent the avenues leading through the grounds being used as public highways, thus endangering the safety of patients during the day and disturbing their rest at night, there has been placed at the front entrance, heretofore unguarded, durable and handsome gates at a cost of \$720.

THE MOTOR HOUSE.

In view of increasing the capacity of the Hospital as well as to obviate the risk of danger, should any accident happen to the single set of wells and machinery in use, we have put in a duplicate set of wells and pumps, thus increasing the water supply and overcoming the probable consequence of entire dependence upon a single set of pumps and wells.

The additional wells were sunk thirty feet west of the original ones, and to get them all under one cover it was decided to replace the small wooden structure over the original wells by a brick building in harmony with the other buildings and ample in dimensions to protect all the machinery. The old structure was moved to Pavilion Circle, east of the buildings, where it is used as a tool-house by the florist.

This work occasioned an expenditure of \$4,631.77, distributed as follows:

Wells and pumps	\$2,340 00
Electric motor.....	237 50
Construction of motor house.....	1,700 00
Plans and specifications	51 00
Extra excavating and dressing lumber for ceiling ...	50 17
Putting in motor foundation.....	12 00
Cement floor	126 10
Moving old house.....	115 00
Total.....	<hr/> \$4,631 77

THE GREENHOUSE.

A greenhouse 18x62 feet, complete with an independent heating apparatus has been put up at a cost of \$844.

EXTRAORDINARY REPAIRS AND MINOR IMPROVEMENTS.

PAINTING.

The entire interior of the Hospital buildings has been painted. The work is mainly three-coat work and has added an air of cleanliness and cheerfulness to the wards and other apartments. All the doors, window frames and sashes, stairways and shutters have been varnished. This work was done at an expenditure of \$3,567.07.

WATER HEATER.

The heater put in at the time of the construction of the Hospital buildings has been replaced by a new one of the same make and size at a cost of \$375.

ROOFING.

The corrugated iron roofs on the barn, carriage house and coach house have been replaced by slate roofs at a cost of \$616.95.

VERANDA.

A double-decked veranda running along the front and sides of the administration house has been built at a cost of \$2,550. This veranda replaces the one put up at the time of the construction of the buildings, and which, for reason of its unsafe condition, was removed.

TILE FLOORS.

The wood floors in the water-closets and bath rooms in the wards have been replaced by tile floors at a cost of \$1,739.40.

ASSEMBLY ROOM.

The work of frescoing and painting the walls and ceiling in the assembly room, which was in progress at the time of our last report, was finished at an expense of \$340.82.

ROTUNDA STAIRWAY.

The brick ledge heading the stairway leading from the rotunda to the second floor was so constructed as to darken the hall running back of the stairway. This ledge was removed and replaced by a light brass rail at a cost of \$56.

CARRIAGE HOUSE.

The cinder floor in the carriage house has been replaced by a cement floor at a cost of \$116.61.

CRACKED WALLS.

The offset from the back wings, which contains the water-closets connected with the day rooms, showed signs of weakening at its attachment to the main wing. These walls were strengthened by anchor rods at a cost of \$141.40.

SEWER PLATES.

A sectional wood covering along the sewers and pipes through the general kitchen has been replaced by cast iron plates at a cost of \$159.30.

ADDITIONAL RADIATORS.

In the two halls occupied by the older and more feeble patients in both departments two forty-two coil radiators have been placed at a cost of \$107.50.

ADDITIONAL FURNITURE.

A number of rugs and a quantity of furniture for the halls, including tables for invalids, have been added. This occasioned an expenditure of \$917.40.

SEWING MACHINES.

The sewing machines in use since the organization of the Hospital have been replaced at a cost of \$162.50, the old ones being applied on the purchase.

AMUSEMENT APPARATUS.

An arc-light stereoptican and a number of musical instruments have been purchased at a cost of \$435.90.

LIGHTNING RODS.

Two copper-tipped lightning rods have been placed on the administration house at a cost of \$55.

VEHICLES.

The conveyances bought at the opening of the Hospital have all been replaced at a cost of \$440, the old ones being applied on the purchase.

In addition to the above items of extraordinary expenses we paid out of our appropriation for maintenance the sum of \$422.75 for the expenses of the Legislative Committee of the General Assembly of 1895 and for the services of an expert employed in examining the books of the Hospital by order of that committee.

From this and the foregoing statements it will be seen that we have spent from the maintenance fund for permanent improvements and extraordinary items during the biennial period the sum of \$23,324.17, distributed as follows:

New building	\$2,816 89
Grounds	2,107 91
Gates.....	720 00
Motor house with water supply	4,631 77
Greenhouse	844 00
Painting.....	3,567 07
Heater	375 00
Roofing.....	616 95
Veranda	2,550 00
Tile floors.....	1,739 40
Assembly room.....	340 82
Rotunda stairway.....	56 00
Cement floor for carriage house	116 61
Anchor rods.....	141 40
Sewer plates.....	159 30
Radiators	107 50
Furniture.....	917 40
Sewing machines	162 50
Amusement apparatus	435 90
Lightning rods	55 00
Vehicles	440 00
Legislative committee.....	442 75
Total	<u>\$23,324 17</u>

Every item of ordinary repairs to furniture and buildings is excluded from this statement.

Appropriation biennial period	\$161,500 00
Amount returned to State Treasury	15 20
Amount expended during biennial period.....	161,484 80
Deduct amount of permanent improvements.....	23,324 17
Actual maintenance for two years.....	\$138,160 63
Average for one year	\$69,080 31

The average number of patients cared for during the period was four hundred (400), thus making the per capita, including maintenance, clothing and ordinary repairs as follows:

Per capita per year	\$172 70
Per capita per month.....	14 39
Per capita per day	48

In justice to institutions not enjoying the advantages of a farm, the food supplies furnished by the farm should be taken into a calculation of the per capita. The products consumed from the farm during the biennial period amount to \$4,526.63. Adding this to the cost of maintenance we have:

Food, clothing and repairs.....	\$69,080 31
Farm products	4,526 63
Total	\$73,606 94

Thus increasing the per capita to the following figures:

Per capita per year.....	\$184 01
Per capita per month.....	15 33
Per capita per day.....	51

FARM AND GARDEN.

The system established at the opening of this Hospital of charging the farm with all the items of its expense and crediting it with its products at market prices has been kept up, and for the biennial period ending October 31, 1896, it shows the following results:

Net proceeds year October, 1895	\$1,311 17
Net proceeds year October, 1896	688 02
Net proceeds for two years.....	\$1,999 19

In this connection we urge the necessity for more land for farming purposes.

SEWAGE.

The sewage problem remains unsolved. The matter will be fully set out to you in a separate report, which covers the condition of affairs from the opening of the Hospital to the present date.

RECOMMENDATIONS.

The new wing built during the period is an addition to the Department for Men. A corresponding addition is needed to the Department for Women. Both of these wings must be furnished and properly equipped.

With the increased number of buildings additional heating and lighting apparatus will be necessary, demanding also enlargement of the power house. We estimate the cost at \$35,000.

Our assembly room is wholly inadequate to accommodate the present population. With the contemplated increase it can not serve its purpose.

We need more farm land, and recommend an appropriation of \$15,000 for this purpose. On the above statements we base the following recommendations:

For addition to Department for Women	\$40,000 00
Furniture to Department for Women	12,000 00
Furniture to Department for Men.....	12,000 00
Chapel and furnishing	12,000 00
Additional heating and lighting apparatus and enlarging and remodeling power house.....	35,000 00
Land	15,000 00
Total.....	<hr/> \$126,000 00

APPROPRIATIONS.

The General Assembly of 1895 reduced our appropriation for maintenance and repairs from \$85,000 to \$76,500. While we have been able to maintain the Hospital on this sum and to make therefrom a number of permanent improvements, we feel that any less sum for the maintenance of four hundred

patients would be inadequate to supply the care and comfort heretofore given; especially would this be true should there be any advance in the present low prevailing prices. It will be necessary to increase the maintenance and repair fund for the support of the additional one hundred and fifty we will be able to care for within the next few months. Upon the assumption that we receive the appropriation asked for on the addition to the Department for Women, a sufficient amount for the maintenance of this increase will be needed before the next session of the Legislature—we therefore ask that the appropriation for maintenance and repairs be fixed as follows:

Appropriation for 400 patients for 1896-1897.....	\$80,000 00
150 patients for seven months, 1896-1897.....	16,800 00
Appropriation for 550 patients, 1897-1898.....	110,000 00
150 patients for seven months, 1897-1898	16,800 00

The report of the Medical Superintendent is made a part of this report and to it we refer you for the history of the more immediate management of the Hospital.

Respectfully,

S. B. BOYD,
J. B. WILSON,
W. L. SWORMSTEDT,
Board of Control.

SOUTHERN INDIANA HOSPITAL FOR INSANE,
EVANSVILLE, INDIANA, Nov. 25, 1896.

REPORT OF THE MEDICAL SUPERINTENDENT.

SOUTHERN INDIANA HOSPITAL FOR INSANE, }
EVANSVILLE, INDIANA, November 20, 1896. }

S. B. Boyd, Dr. J. B. Wilson, W. L. Swormstedt, Board of Control:

GENTLEMEN—According to Section 11, Chapter XLIX, of the Acts of the General Assembly of 1889, I present to you the fourth biennial report of the work of this Hospital for the period of 1894-1896:

TOTAL NUMBER OF PATIENTS ADMITTED, DISCHARGED AND DIED IN THE
BIENNIAL PERIOD—NOVEMBER 1, 1894, TO NOVEMBER 1, 1896.

	Men.	Women.	Total.
Remaining over October 31, 1894.	207	217	424
Admitted during 1894-1896	85	67	152
Total number treated	295	284	576
Discharged recovered	42	29	71
Discharged improved	1	4	5
Discharged unimproved	5	8	13
Discharged not insane.	2	1	3
Total discharged during 1894-1896	50	42	92
Died during 1894-1896	28	21	49
Total discharged and died	78	63	141
Remaining over October 31, 1896.	214	221	435

Per cent. of deaths on total number treated during 1894-1895.	6.2
Per cent. of deaths on total number treated during 1895-1896.	3.5
Average.	4.8
Per cent. of recoveries on total number treated during 1894-1895.	5.2
Per cent. of recoveries on total number admitted during 1894-1895.	35
Per cent. of recoveries on total number treated during 1895-1896.	10.6
Per cent. of recoveries on total number admitted during 1895-1896.	70
Average on number treated during 1894-1896.	7.9
Average on number admitted during 1894-1896.	52.5

This table shows that the death rate is a trifle less than it was two years since, but the rate of recoveries is not so large, owing to the continued accumulation of incurable cases. The death rate in 1892-94 was 4.9, now it is 4.8. The rate of recoveries in 1892-94, on total number treated, was 13.2, now it is 7.9. The rate of recoveries on number admitted in 1892-94 was 58.5, now it is 52.5.

TREATMENT OF PATIENTS.

We beg leave to reiterate our opinion heretofore expressed that occupation, amusement and good wholesome food are the three important factors in the treatment of the insane.

The drug which reaches or acts directly upon the mind diseased has not been discovered. There is no specific medicine in the treatment of insanity. Medication, however, is used to meet certain symptoms and indications in certain cases.

It must not be supposed, however, that the medical officer is an unimportant factor in an institution of this kind. He has much to do besides writing a few prescriptions. It is his duty to look after the sanitary condition of the halls, see that they are properly ventilated, heated and cleaned. It is his duty to inspect the food after it is cooked and see that it is properly served to the patients. He must be a person of tact and good judgment, as he has to meet many people who appeal to him for encouragement and comfort regarding their friends, who are under his charge. He must be just to the attendants under his charge, but see that the rights of the patient are not invaded. Above all he must be kind, generous, patient and helpful to the unfortunates placed in his care. If he does these things he possesses a soul which comes from the fullness of the Lord.

OCCUPATION.

We try to persuade all our people, who are able, to engage in some kind of work. The men work on the farm, in the garden, kitchens, laundry, boiler house and other places where their services can be made available. Much of the work in the sewing room, laundry and housekeeping department is done by the women. The women also do all of the mending for the Department for Men, make rugs, quilts, lace and fancy articles.

EXERCISE.

Our grounds are well arranged for the exercise of the patients. We have miles of walks and avenues, which are never muddy, and even in winter, unless rain is falling or there is snow on the ground, the patients take their walks twice a day. In the spring and summer they spend several hours each day in the groves, which are supplied with comfortable benches. The rule is for every one who is able to walk to go outdoors every day unless such exercise is forbidden by the medical attendant.

FOOD SUPPLY.

Our supplies are purchased every thirty days on competitive bids. Samples are furnished and all articles must come up to the standard. All supplies are carefully inspected, and if there is found any deficiency in any article it is promptly rejected and the contractor required to supply another in its place. The food is of sufficient variety and is prepared by good cooks.

AMUSEMENTS.

There is a dance one night in each week. In pleasant weather these dances are held outdoors in the grove.

The operas "Erminie" and "Mascot" were presented by the Hospital Opera Club, under the management of Professors Will Davidson and W. McKee Blake. The operetta of "Little Red Riding Hood" by our own people.

Christmas celebration, with Santa Claus, snow house, distribution of gifts, dancing and closing with a negro minstrel performance.

During the winter months, when there is sufficient snow on the grounds, the sleighs are kept busy all day on the avenues. This amusement is enjoyed by even the oldest of the patients.

Graphophone concert by Mr. C. Melzer, of Evansville. This was a very interesting entertainment.

The "Fourth of July" is always celebrated with speeches, recitations, songs and reading of the Declaration of Independence. In these exercises some of the patients recite and read. The Declaration is always read by a patient.

"May Day" was also properly celebrated. The young ladies of Holy Innocents Church presented the laughable sketch of "The Only Young Man in Town."

A certain number of patients attend the circus and the fair every year. Nutting parties, persimmon parties, and visits to places adjacent to the Hospital are also indulged in. Nearly every fall a party of men patients under charge of the Assistant Physician of the Department for Men and the Steward of the Hospital go on a hunting expedition into Warrick and Spencer counties. This year they remained three days and brought home wild turkey, quail, rabbits, pecans and hickory nuts. These occasions are much appreciated by the men.

During the past summer the Evansville Cycle Club, numbering sixty persons, gave an exhibition of fancy riding in our grounds. This was a beautiful exhibition, it being given at night.

One party of women and men visited the coal mines at Newburg, ten miles east of the Hospital, making the trip on the dummy railway.

There has been purchased for the benefit of the patients a large stereopticon for use both in the house and outside. Also a smaller one for use in the halls occupied by the patients.

RELIGIOUS EXERCISES.

Our services consist of Sunday-school in the morning and preaching in the afternoon every Sunday. The attendance at both services is increased to the full capacity of the assembly room.

The Chaplain, in addition to preaching on Sunday, is present at the burial of all patients who are interred in the Hospital cemetery, visits the Hospital one afternoon of each week, and comes on special occasions when sent for. Besides services by our regular Chaplain, we have had visits from Revs. W. H. Xanders, of Michigan City; G. A. Carstensen and Swan, of Indianapolis, and our former Chaplain, Rev. A. A. Abbott, now of Warren, Ohio. During the past summer several ministers, attending Conference of the German Reformed Church in this city, visited the Hospital. The services were turned over to them, and there were sermons both in English and German.

The work of our Chaplain brings much comfort to many of the patients.

GYMNASIUM.

We opened this year, in a small way, a gymnasium for the patients, a class of men drilling in the morning and a class of women in the afternoon every day except Saturday and Sunday. At the close of the course in May an exhibition drill, with a selected class of twenty, was given. I think the exercise of these drills was quite a benefit to some of the patients. Our gymnastic apparatus is not extensive, but it will be added to as it is needed.

TRAINING SCHOOL.

The school for attendants is now in its fourth year. Two classes of seven men and nine women have been graduated and diplomas issued to them under seal of the Hospital. We find much benefit from this system of teaching. The efficiency of the attendant is much improved, his respect for his vocation increased, and his appreciation of his relations to the patient is enlarged, which adds much to the comfort of the patient. This year the school opens with a class of forty pupils.

DISPOSITION OF SEWAGE.

The destruction or disposal of the sewage of this Hospital is yet a vexed question. No solution has yet been reached. I refer you to the report on this subject made by a former Board of Trustees to the Governor in 1895, and leave the question in your hands.

NEW BUILDINGS.

The General Assembly of 1895 made an appropriation of thirty thousand dollars to this Hospital for additional buildings. After proper advertisement the contract was awarded to Pearce & Morgan, of Indianapolis, for the total amount of the appropriation. The plans were made by F. J. Schlotter, of this city. The plan of the addition is a precise copy of one of the wings of the Hospital, connected with the first and second floors of the original building by a brick and stone colonnade with tile floors. The capacity of the addition is one hundred

and fifty beds. The work of construction was finished June 1, 1896, the work approved and accepted by the Board of Control on the 10th of that month.

OTHER IMPROVEMENTS.

A new motor house has been erected upon the site of the old one, and the old building removed to east side of the grounds to be used for a tool house.

Two additional wells were sunk adjacent to the other two, which were put down five years ago. We now have a water supply of half a million of gallons per day. In fact we may say the supply is inexhaustible as long as the Ohio river does not go dry.

A green house for flowers, with an increased capacity for vegetables, has been built, at a comparatively cheap outlay in consideration of the benefit to us. We will be able now to have certain vegetables in the winter as well as summer.

The barn, carriage house and coachman's house have been reroofed with slate. A cement floor also has been laid in the carriage house.

The entire interior of the house has been repainted, and all window-shutters and staircases, including those in the administration house, have been varnished.

One hot-water heater has been placed in the boiler-house, a new motor with the necessary machinery in the well-house, an armature for old motor and a volt meter for boiler-house have been purchased.

LAKE NO. "4"

Has been partially completed and some work done on Lake No. "1," which is now completely sodded. These lakes furnish the patients some amusement. They catch large quantities of fish and enjoy the sport very much. In severe winters a considerable quantity of ice has been gathered from them. These lakes also make an excellent skating ground.

A NEW VERANDA,

Very handsome in its architectural design, has replaced the old portico of the administration house. The old one was falling down, and it became necessary to remove it. The new veranda not only adds to the appearance of the house, but increases to a great degree the comfort of the occupants.

THE MAIN ENTRANCE

To the Hospital has been without a gate until now. A handsome entrance gate of iron and stone has been erected there. This prevents a great annoyance caused by people using the grounds as a public thoroughfare, endangering the lives of patients and creating a nuisance which was difficult to control.

MINOR IMPROVEMENTS.

Tile floors have been laid in the water-closets and bath rooms in all the halls occupied by patients. Screens have been placed in all the windows of the new building, lightning rods erected on the administration house. A brass railing has been placed on the main stairway of the central block, where the brick was cut away to increase the amount of light in that locality.

Six invalid tables were purchased for the use of sick patients who take their meals in bed. One radiator was added to White Halls east and west each.

Five sewing machines were purchased, the old ones being taken as part pay. A pair of scales adapted for weighing patients was purchased, as it is important to weigh certain patients upon admission and to continue it for some time.

Three additional stations were added to our Watchman's time detector. Anchor rods were put in to strengthen two wings of the old building which had several large cracks, probably the result of the earthquake which occurred October 31, 1895.

FURNITURE.

About nine hundred dollars' worth of furniture, consisting of settees, chairs, rockers, tables, rugs and book cases, have been added to the halls occupied by the patients.

THE GROUNDS.

Much work has been done on the grounds. This consisted of sodding, preparing walks, and planting trees and flowers. Nearly five hundred trees were planted. During the summer we had a large quantity of flowers, which were used for the benefit of the patients.

THE FARM AND GARDEN.

Has been carefully cultivated and we have had plenty of all kinds of vegetables and melons, and some fruits. The apple orchard has been a failure. The trees are worn out. It is, I believe, the oldest orchard in this county. The crop of potatoes with us was a failure, but fortunately this vegetable can be bought at low prices. A statement in the appendix will show the products of the farm and garden.

APPROPRIATIONS.

I would recommend that the following amounts be asked from the General Assembly:

Furniture for new addition	\$12,000 00
Addition to boiler house—three additional boilers, dynamo, engine, pump, and other machinery.....	35,000 00
Additional building for accommodation of one hundred and fifty patients, Dep't for Women	40,000 00
Furniture for same	12,000 00
For chapel and furniture	12,000 00
One hundred acres of land	15,000 00
Appropriation for 400 patients for 1896-1897	80,000 00
For 150 patients for seven months, 1896-1897.....	16,800 00
Appropriations for 550 patients for 1897-1898.....	110,000 00
For 150 additional patients for seven months, 1897-1898.....	16,800 00

The appropriation of \$16,800 asked for would be for the support of the patients who would occupy the addition to the Hospital which is now completed. It is supposed we can furnish it and commence receiving patients by April 1, 1897.

The second item of like amount for 1897-1898 is asked for upon the assumption that we receive money enough to build and furnish a building of the same kind within the time specified.

Unfortunately the new building, owing to lack of means to buy furniture, has not been occupied. Had it been furnished, I could have filled it with patients in sixty days from the time it was delivered to you by the contractors.

This Hospital should not be increased beyond a capacity of 700 beds. The capacity now is 550 beds, including the new addition not furnished. If we get the money asked for, the capacity within the next eighteen months can be increased to 700 beds.

THE NECESSITY

For increased capacity needs no argument. An examination of the jails and poor-houses and a visit to many private families will quickly prove to any one the necessity of increased accommodations for the insane. Every member of the General Assembly should visit the jail and poor-house of his county before assuming his legislative functions at Indianapolis this winter.

In some counties a very distressing state of affairs exists. Women have been placed in jail and kept there while awaiting admission to the Hospital. I have, I think, taken from the jails every insane woman to whom my attention was called. Very few of the counties have any facilities for caring for insane persons in the poor-houses. In fact it is not the intention of the law that insane persons should be kept in poor-houses.

An appropriation is asked for additional land on account of the future increase of our population. Land can be bought at lower prices now than it can in a few years from this time.

A new and larger chapel or assembly room, with perhaps a general dining-room for patients in connection therewith, is needed for the same reason.

In estimating for appropriations I have taken two hundred dollars as the per capita cost per year, as there is no doubt that all articles which we use will be increased in cost within the next few months.

THE BOARD OF STATE CHARITIES,

Through its committee and Secretary, have paid us the usual visits. We have found the Secretary and members of the Board ready and willing at all times to aid us. In fact we derive much pleasure and profit from these visits and only wish they could be made more frequent.

ATTENDANTS.

The character and quality of our attendants are improving all the time. I believe we are getting better material—the attendants are becoming more permanent and regard the service as more respectable. There can be no better person in the world, nor one more deserving a pleasant life and a happy hereafter than the good attendant. They have much to try them in every way, and if they live up to the precept of the Golden Rule, their reward will surely come to them.

STATISTICS.

In the appendix will be found the medical tables, the financial statement, inventory, reports from the sewing room and other information.

LAUNDRY.

The following is the work done in the laundry :

Pieces laundered during 1894-1895	234,055
Pieces laundered during 1895-1896	271,769
Total	505,824

ORGANIZATION.

Under the act of the General Assembly of 1895, the Board at the April meeting was organized as follows :

President.....	S. B. Boyd.
Vice-President	Dr. J. B. Wilson.
Treasurer.....	W. L. Swormstedt.

Under this law, the Board is now known as the Board of Control, and not Board of Trustees.

INSANE CONVICTS.

We received two insane convicts from the State Prison South, at Jeffersonville, Indiana.

One was convicted in 1894 of murder and sentenced to the penitentiary for life. He was received in this Hospital July 12, 1895.

Another case was convicted May 17, 1895, of grand larceny, and sentenced for a term of three years. He was received in this Hospital May 23, 1896.

These men were sent to this Hospital in pursuance of an act of the General Assembly of 1895, which authorizes the Governor of the State to transfer insane persons from the penitentiaries to the Hospitals for Insane. This act was approved March 9, 1895.

GENERAL.

In the past two years our work has proceeded along the same quiet lines. Common sense and good judgment have prevailed in the treatment of patients and management of the affairs of the Hospital. The record has been kept up and there have been no suicides nor homicides.

Nothing has happened to reflect in the least degree upon the management. All of the officers, heads of departments and employes have attended strictly to the duties required of them and have conducted themselves in a creditable and conscientious manner, I desire to thank every one of them. They have assisted in making the Hospital what it is and are entitled to a part of the praise.

In conclusion I thank the members of the Board of Control for their kindness shown to me on many occasions, for the confidence they have placed in me, and the aid rendered me by them at all times. I am sure a careful examination and inspection of the record you have made in your capacity as managers of this Hospital will give you the approval of all fair and thoughtful people.

Very respectfully,

A. J. THOMAS,
Medical Superintendent.

APPENDIX

General Medical Statistics.

TABLE I.

Movement of Patients from October 31, 1890 (Beginning), to October 31, 1896.

	Men.	Women.	Total.
Whole number admitted	490	446	936
Discharged, recovered	153	124	277
Discharged, improved	16	10	26
Discharged, unimproved	20	13	33
Discharged, idiotic	3	2	5
Discharged, not insane	3	2	5
Total discharged	195	151	346
Total died	81	74	155
Total discharged and died	276	225	501
Remaining October 31, 1896	214	221	435

TABLE II.

Total Number of Patients Admitted, Discharged, and Died in the Biennial Period November 1, 1894, to November 1, 1896.

	Men.	Women.	Total.
Remaining over October 31, 1894.	207	217	424
Admitted during 1894-1896	85	67	152
Total number treated during 1894-1896 . .	292	284	576
Discharged, recovered	42	29	71
Discharged, improved	1	4	5
Discharged, unimproved	5	8	13
Discharged, not insane	2	1	3
Total number discharged 1894-1896	50	42	92

SPECIFIC APPROPRIATION.

By act of the General Assembly, approved March 11, 1895, the sum of \$30,000 was appropriated for the construction of new buildings. During the fiscal year ending October 31, 1895, fifteen thousand dollars were expended on this account, leaving a balance of \$15,000.

Appropriation for sewage purposes was fixed at \$15,000. No expenditures have been made from this fund, thus leaving this amount on hand at close of the fiscal year.

EARNINGS.

From sale of rags and bones	\$69 59
-----------------------------------	---------

This sum was turned into the State Treasury, as shown by the Auditor of State's quietus No. 7933.

The following is a complete list of vouchers paid during the fiscal year ending October 31, 1896, copies of which, properly signed and sealed, may be found on file in the office of the Auditor of State:

BOARD OF CONTROL'S REPORT.

To HON. CLAUDE MATTHEWS, *Governor of Indiana* :

SIR—Complying with that provision of the statutes which requires biennial reports from the boards of the several institutions of the State, we, the undersigned, members of the Board of Control of the Eastern Indiana Hospital for the Insane, at Richmond, Indiana, beg leave respectfully to submit the following report, for the period ending October 31, 1896:

ORGANIZATION.

In pursuance of an act of the General Assembly, approved March 11, 1895, William D. Page, E. Gurney Hill and Silas W. Hale, appointed by you as members of the Board of Control of the Eastern Indiana Hospital for the Insane, met at the Hospital on Tuesday, April 9, 1895, and organized by the election of the following officers of the Board: President, William D. Page; Vice President, E. Gurney Hill; Treasurer, Silas W. Hale.

At this meeting Dr. Samuel E. Smith was reappointed Medical Superintendent of the Hospital, and Secretary of the Board of Control.

The term of office of Wm. D. Page having expired January 1, 1896, he was reappointed by you for a term of three years.

At the meeting on the second Tuesday after the first Monday in January, 1896, the above organization of the Board was continued for the current year, and Dr. S. E. Smith was reappointed.

The term of Silas W. Hale will expire January 1, 1897, and that of E. Gurney Hill will end January 1, 1898.

FINANCES.

Your Board is pleased to be able to report that notwithstanding the increased enrollment of patients, the appropriation for maintenance and repairs has been sufficient to meet the

needs of the institution. But it seems proper to remind you that this consummation has been due rather to the very low prices at which we have been able to purchase supplies than to the fact that the appropriation would be adequate under conditions that are liable to obtain hereafter, and we most heartily concur in the recommendation of the Medical Superintendent for an increased appropriation by the forthcoming General Assembly.

The special appropriation of \$50,000, granted for new construction, has been found ample to meet the demands for which it was made, and we feel assured that the results attained, to which your attention and that of the General Assembly are respectfully invited, will more than justify the expenditure of the sum appropriated.

During the period covered by this report, many needed repairs have been made to the buildings and to the heating, lighting and water supply appurtenances of the institution, reference to all of which is made in the detailed report of the Medical Superintendent, submitted herewith.

It affords us great satisfaction to be able to report the close of the fiscal year with no outstanding claims against this institution.

We submit the following summary of orders drawn on the maintenance fund :

Maintenance, Fiscal Year 1894-95.

November 13, 1894	\$5,265 09
December 11, 1894.....	7,804 83

January 14, 1896	8,977 21
April 14, 1896	555 35
May 12, 1896.....	447 71
Total	<hr/> \$24,994 57

Summary of Expenditures from Specific Fund.

Rear center annex	\$46,819 38
Boiler-house addition	1,485 01
Covered hallway to rear center.....	1,355 00
Alterations of rear center	335 18
Covered into State Treasury	5 43
Total	<hr/> \$50,000 00

The daily average number of patients actually present during the fiscal year 1894-95, was 436.4; during the fiscal year 1895-6, 465.6. The total capacity is 540. There were present October 31, 1896, 506 and enrolled 519. The department for men is again crowded. All vacant beds are in the department for women.

Appropriation for 1894-95	\$95,000 00
Appropriation for 1895-96	90,000 00

The per capita cost of maintenance, not including repairs and minor improvements was, for the first year, \$175.27; for the second year, \$170.58.

The per capita cost of all expenditures was, for the first year, \$217.63; for the second year, \$193.29.

Repairs and minor improvements for the first year amounted to \$15,598.23, and for the second year \$10,574.10.

The receipts from sales covered into the State Treasury were for the period \$127.23.

RECOMMENDATIONS.

The State of Indiana having assumed the care of her insane population, it becomes her duty to care for all of them without discrimination. It is manifestly unjust to provide suitable hospital accommodations for a portion of these unfortunates, leaving others to the uncomfortable, inconvenient and altogether unsuitable quarters afforded by county asylums. We therefore urge that an appropriation be made for new buildings to meet the still pressing demands of the district tributary to this institution.

The fact that this institution has been singularly free from infectious zymotic fevers is a matter of gratulation; but there can be no guarantee of perpetual immunity from contagious diseases. Hence, and because of the presence, always, of cases of tuberculosis, which is now quite universally conceded to be infectious, we urge an appropriation of \$30,000 for two hospital cottages, and essential equipments, as needed for the isolation and treatment of infected patients and for the protection of those not so afflicted.

Because of the action of the State Board of Health, in condemnation of the system by which sewage from the institution

is now disposed of, we recommend an appropriation of \$8,000 to make changes such as will eradicate the cause of complaint.

Because of an addition of about 20 per cent. to the number of patients in the institution, their acceptance made possible by increased accommodations, growing out of new construction, we urge an increase of \$10,000 to the maintenance appropriation for the ensuing year.

And for the same reason, we urge that the appropriation to be made by the incoming General Assembly for the fiscal years 1897-8 and 1898-9, be fixed at \$110,000 per annum.

In closing this report, your Board of Control desire to commend Dr. S. E. Smith, Medical Superintendent, for his untiring energy, his self sacrificing zeal, his intelligent efforts and his superior executive ability in the management of the institution, and his earnest solicitude for and skillful treatment of all the wards of the State that come under his care.

Respectfully,

WILLIAM D. PAGE,
E. GURNEY HILL,
SILAS W. HALE,

Board of Control.

MEDICAL SUPERINTENDENT'S REPORT.

To the Board of Control:

GENTLEMEN:—I beg leave to submit the following report of this Hospital for the biennial period ending October 31, 1896:

MOVEMENT OF PATIENTS.

Fiscal Year—1894-95.

	Men.	Women.	Total.
Enrolled October 31, 1894	217	233	450
Admitted	37	39	76
Discharged, recovered	14	13	27
Discharged, improved	8	3	11
Discharged, unimproved	1	4	5
Discharged, not insane	1	2	3
Died	11	13	24
Enrolled October 31, 1895	219	237	456

Fiscal Year—1895-96.

	Men.	Women.	Total.
Enrolled October 31, 1895	219	237	456
Admitted	79	56	135
Discharged, recovered	13	11	24
Discharged, improved	7	8	15
Discharged, unimproved	2	2	4
Discharged, idiotic	2	2	2
Died	13	14	27
Enrolled October 31, 1896	263	256	519

The highest number enrolled during the period was 524; the lowest, 450. The daily average actually present during the fiscal year ending October 31, 1895, was 211.2 men, 225.2 women—total, 436.4; for the fiscal year ending October 31, 1896, 228.3 men, 237.3 women—total, 465.6. The daily average enrollment for the first fiscal year was 220.1 men, 234.8 women—total, 454.9; for the second year, 238.5 men, 248.6 women—total, 487.1.

Since the opening of the Hospital August 1, 1890, there have been admitted 540 men, 491 women—total, 1,031. Of this number there were discharged as recovered, 202; improved, 66; unimproved, 17; idiotic, 11; not insane, 11; transferred to other hospitals, 30, and died while under treatment, 176.

MEDICAL HISTORY.

There were under treatment during the first year of the period 254 men, 272 women, total 526; during the last year 298 men, 293 women, total 591.

Admissions.—On analysis of the statistical tables we find the total admissions of the first year to be 76–37 men and 39 women. Of the total admissions, approximately 34 per cent. were cases of melancholia; 23 per cent., acute mania; 17 per cent., chronic mania; 13 per cent., general paresis; 5 per cent., secondary dementia; 4 per cent., not insane; and 2 per cent., senile dementia.

The admissions of the second year were 79 men, 56 women, total 135. Of these approximately 33 per cent. were cases of melancholia; 24 per cent., acute mania; 14 per cent., recurrent mania; 13 per cent., chronic mania; 5 per cent., epileptic mania; 4 per cent., secondary dementia; 3 per cent., general paresis; 3 per cent., senile dementia.

The number of admissions of the last year exceed those of the first by fifty-nine. This is the result of the increased capacity made possible by the introduction of the associate dining halls. The various forms of mental disease are represented in about the same proportion in the two years. Of the seven cases of general paresis admitted, one was a woman. Of the number (491) of women admitted to the Hospital since its opening, there were only three cases of general paresis. In each, a clear history of syphilitic infection was obtainable, and the husband of one died, while an inmate of the Hospital, of the same affection.

Of the 211 admissions during the period, 1 was 13 years of age, 7 between 15 and 20 years, 34 between 20 and 30 years, 68 between 30 and 40 years, 64 between 40 and 50 years, 22 between 50 and 60 years, 11 between 60 and 70 years, and 4 over 70 years.

Of the same admissions, 37, or 17 per cent., were recurrent in character. Twenty-six represent two admissions; six, three admissions; four, four admissions, and one, five admissions.

As to nativity, 26 were foreign born, and 109 were born in the United States. The duration of disease was one month and less in 30 cases, two months in 27, three months in 19, four months in 11, five months in 8, six months in 25, eight months in 5, one year in 36, two years in 8, five years or longer in 9, and unknown in two cases.

Three insane convicts were, by order of the Governor, under the operation of an enactment of the last Legislature, transferred from the State Prison North, and these are included as regular admissions.

DISCHARGED CASES.—Of the whole number under treatment during the period, 7.7 per cent. were discharged as recovered; of the admissions, 25.3 per cent. recovered. During the first year, 35.7 per cent. of the admissions recovered, and during the last year, 17.7 per cent. recovered. Of the 51 recovered cases, 27 were men and 24 women. The greater proportion of recoveries in the first year, notwithstanding a less number of admissions, is due to the fact of nearly all the admissions of the last year occurring in the latter part of the year. These patients are now in the Hospital, and the major portion of them is presumably curable.

There were discharged improved, 15 men, 11 women, total 26; unimproved, 3 men, 6 women, total 9; not insane, 1 man, 2 women, total 3; and idiotic, 2 women. The nine cases discharged as unimproved were quiet and harmless or in states of decline, and were properly provided for by friends at home. All other chronic cases have been detained in the Hospital.

Of those recovered, 24 were cases of melancholia, 13 acute mania, 12 recurrent mania, and 2 chronic mania. Three cases recovered after a duration of three months, 1 after five months, 3 after six months, 5 after eight months, 1 after nine months, 17 after one year, 11 after two years, 5 after three years, 2 after four years, and 3 after five years.

As to age of those recovered, 1 was thirteen years of age, 1 between fifteen and twenty years, 7 between twenty and thirty years, 16 between thirty and forty years, 14 between forty and fifty years, 9 between fifty and sixty years, and 3 between sixty and seventy years.

The two cases discharged as idiotic during the last year were women, and were afterwards admitted to the School for Feeble-Minded Youth.

One case discharged as not insane was a pardoned convict, transferred to this Hospital from the State Prison North.

Deaths.—During the first year of the period, 24 deaths, 11 men and 13 women, or 4.3 per cent. of the whole number under treatment; during the last year, 27 deaths, 13 men and 14 women, or 4.5 per cent. of the whole number under treatment during that year.

Of those who died, 3 were cases of acute mania, 10 of chronic mania, 5 of recurrent mania, 2 of epileptic mania, 13 of melancholia, 6 of secondary dementia, 5 of senile dementia, 2 of epileptic dementia and 5 of general paresis.

The immediate causes of death in these cases are set forth in Medical Tables Nos. 8 and 9, which accompany this report.

Four patients died while absent from the Hospital on extended furlough; one is reported to have suicided, and the causes of death in the other three were not reported.

A male patient suffering from general paresis slipped and fell on the floor, sustaining an intracapsular fracture of the left femur. Death occurred five months afterwards from the disease of which he was a victim. It was charged that the injury, and indirectly the death, was the result of unkind treatment, but the charge was clearly disproved, as elsewhere appears in this report.

A female patient was received at the Hospital in a comatose condition and died within twenty-two hours after admission. An autopsy, conducted by the Coroner, revealed an intussusception eight inches long, as the cause of death.

A male patient died suddenly during the night from a perforation of a duodenal ulcer, which was demonstrated by an autopsy.

No deaths within the Hospital from violence, self-inflicted or accidental, have occurred. During the past six months numerous attempts at suicide from an unusually large number of patients with this tendency were made, but fortunately none was successful.

Appended to this report are numerous tabulated statements of information concerning the patients under treatment.

General.—The institution has not been visited by an epidemic of any kind during the period, or at any time in its history. One case of measles developed in a patient two weeks after returning to the Hospital from a visit home. From this case one other patient contracted the disease, but perfect isolation prevented other infection.

Only one case of typhoid fever is to be reported, and the subject was an attendant who had visited a relative suffering from the disease. Within the institution's history of six years, four cases of typhoid fever have occurred, and in each instance an attendant or employe was the afflicted person. The source of infection of three cases was clearly assigned, but in the fourth it could not be traced.

The general sanitary condition is excellent. The water supply continues ample and of the highest quality in spite of the severe test of the long-continued drought of the first year. The consumption is about 150 gallons per capita, while ordinarily fifty per cent. of that amount is considered sufficient. The sewerage system is in good condition within the institution, although as elsewhere stated, the plan of disposal is defective. Care is exercised to keep the channels of this system free by frequent flushing and prompt removal of accumulations as they occur. The ventilation has been improved on all wards where new grates were lately placed, and the absence of dark rooms and halls is notable throughout the cottages.

The classification of patients, excellent heretofore by reason of the proportionately large number of wards, has, on account of overcrowding, become less complete and satisfactory. This condition is to be deplored, but is unavoidable so long as all interest must be subordinated to the demands for admission. For want of sufficient capacity the management is powerless to prevent the obliteration of a classification peculiar to the institution and surpassed in point of advantage and opportunity for treatment and observation of patients by no similar institution in the land. The institution's chief duty is to the patients within and its next to those without its precincts. To those within the obligation exists, and the right belongs to them by virtue of admission, to furnish every opportunity known to science which promises restoration to health. Whatever provision is made for enlarging capacity for the benefit of patients outside the institution it should be sufficiently ample to extend

equipment and means of treatment *pari passu* with it without sacrificing advantages already secured. Overcrowding should be avoided and every tendency toward it discouraged. It begets intermingling of patients without due regard for classification and impairs sanitary excellence. It does not harmonize with the hospital idea, but belongs to the asylum period of the past.

It is my duty to repeat the recommendation contained in my last biennial report that steps be taken to provide two cottages to be devoted exclusively to hospital purposes without increasing the capacity. The grounds for these suggestions are so apparent that it is scarcely necessary to detail them. The crowded state of the wards prevents isolation of tuberculous and other infectious diseases. In spite of all care on the part of both medical officers and nurses, who have a proper appreciation of the dangers of infection, it is impossible to reduce the relative number of cases of tuberculosis. During the past year there was a mortality of ten from this cause. There are in the Hospital at the present time a number of cases in various stages of the disease, and while nothing is omitted to procure thorough disinfection it is imperfect, and as possible centers of infection these cases are a constant menace. There can be no question as to the infectious nature of this malady, and recognizing it as such, there is imposed a responsibility for treatment and prevention which can not be shifted or ignored. What is true of this disease which is omnipresent is equally true of other diseases equally infectious and fatal, and liable at any moment to invade the institution. Separation of acute diseases and infirm and bedridden from the general population is desirable, and is possible only with a hospital building. The medical work can be more satisfactorily grouped and executed and the nursing improved and specialized. In the original and complete plan of this institution provision was made for the erection of two cottages, one in either department, with the essential features of small hospitals, to provide for patients suffering from acute diseases requiring special nursing and medical treatment. For lack of funds to complete the institution as originally planned the authorities saw fit to omit these cottages and prepare all other buildings for occupancy, with the expectation that at no distant day the General Assembly would by special appropriation of funds for the purpose require this

much-needed addition to be made. Nothing, however, has yet been done in this direction, although the Hospital just closed its sixth fiscal year. In the location and arrangement of buildings on the grounds sites for these cottages were selected and have since been preserved. It is hoped both for the benefit of the sick and feeble and for the protection of the more vigorous patients that this work may now be undertaken and pushed to early completion. The cottages contemplated should have a capacity of not less than thirty beds each, arranged with two dormitories and a few single rooms in such manner as to permit complete isolation from all other departments and at the same time some safe separation within the cottages. Each should have ample verandas, a cheerful day-room, a well-equipped special-diet kitchen, an improved bath-room, an operating and examining room, a small laboratory, and in the basement a mortuary in connection with a pathological room. Construction and equipment should be substantial and complete and in accord with the most modern sanitary rules, and would cost about \$30,000 for the two buildings.

The policy of calling the Coroner to view the remains of all patients dying suddenly or under circumstances unusual or peculiar is still followed. During the period this officer has been called upon in four instances and the fair judgments rendered, when all facts were at hand, have doubtless been a protection to the institution. The plan will be continued.

The opportunities for autopsies are slightly better than in the past, although not yet as numerous as desired. Permission is invariably obtained from relatives before a post-mortem examination is held and if any prejudice against it is apparent in the response to the request, it is omitted, unless ordered by the Coroner.

During the past year there has been an unavoidable increase in the amount of seclusion, and two or three more instances of restraint, due to the overcrowding of certain day-rooms and an excess of the suicidal and noisy classes. These means are resorted to in rare cases only and are carefully guarded to keep them at the minimum amount. Chemical restraint is likewise small and avoided whenever possible. The average number of cases of hypnotic medicine remains at about two for each week as for the previous biennial period. Exercise in the open air, and agreeable employment have been substituted.

The amount of employment found for the able-bodied patients has exceeded the experience of any previous period. The farm, garden and lawns have furnished light work for a few hours each day to a number of male patients, accustomed to the labor of outdoor occupations. Others find agreeable work in the kitchen, dining-hall and laundry. As to the amount of employment furnished the records for the month of October, the last month of the period, may be taken as a fair example. These show a daily average of 87.1 men employed both indoors and out for a daily average of 312.1 hours. Women find employment in the sewing-room, ironing-room, dining-hall and kitchen, aside from the fancy work, repairing and domestic work of the wards. The records for the same month indicate a daily average of 67.3 women employed inside for a daily average of 91.2 hours, and 36.2 women employed in kitchen, sewing-room and places other than on wards for a daily average of 212.2 hours. Including both men and women, the daily average number of patients employed was 190.6 for a total of 617.5 hours each day.

The amusements have been continued as frequently and in such variety as our resources have allowed. The enlarged Assembly Hall has enabled a larger proportion of patients to attend the entertainments and religious services regularly held there. The usual dances are had weekly, and concerts, theatricals and other entertainments, by the attendants, employes and friends of the Institution, are given at irregular intervals. The national holidays are always commemorated in some manner fitting the special day, and these are always agreeable occasions. All persons who could do so have contributed, directly and indirectly, to these entertainments, and the zealous spirit and interest manifested have been commendable.

Weather permitting, all patients are taken out daily for exercise in the open air. The completion of the walks about the buildings enables this exercise to be continued even in bad weather. During the warmer weather the major portion of patients spend several hours daily in the park, which affords a pleasant lounging-place. Often not more than a total of ten or twelve feeble patients are left in the two departments on these occasions.

Associate Dining-Halls.—The inauguration of the associate dining-halls makes it necessary for a large number of patients

to go out regularly for meals. Seventy per cent. of the patients go out for this purpose, and it is probable that the number may be still further increased. The introduction of the small square dining tables in lieu of the rows of long tables is a decided improvement and worthy of mention. Family groups of eight are arranged, giving a home-like effect not otherwise obtainable.

THE EASTERN DISTRICT FOR THE INSANE.

No change has been made in the Eastern District for the Insane, and it comprises the following sixteen counties:

Adams,	Decatur,	Henry,	Rush,
Allen,	Fayette,	Jay,	Union,
Blackford,	Franklin,	Madison,	Wayne,
Delaware,	Grant,	Randolph,	Wells.

Tables Nos. XXII and XXIII indicate the number of patients admitted from each county during the period.

In the admission of 135 patients of the last year of the period, effort was made to receive the most urgent cases, preference, as required by law, being always given to the presumably curable. Only a few epileptics were received, and while several cases of senile insanity were admitted, quite a number of this class was suspended in order to exercise the above-named preference.

The population of this district, as reported by the census of 1890, was 406,339. This has very greatly increased during the past few years on account of the introduction and development of manufacturing interests in the natural gas belt, as is shown by various sources of information. In the absence, however, of more accurate figures, those of 1890 are used as the basis for estimating the quota of patients to be received from each county. The new capacity furnished one bed for every 752 of population, or provides accommodations for the normal number of insane upon the basis of one insane person to 600 of population, of 324,000 of the population of the district. This leaves the insane of 72,339 of the population unprovided for in the Hospital and to be accommodated in county poor-houses, jails or private families. These figures would be much higher in the event of another enumeration.

In every county of the district there are from two to four cases of epileptic insanity, urgent in character and requiring custodial care. Applications for the admission of these cases have been made, but they have been suspended in accordance with the law in order to give preference to curable cases. It is a deplorable fact that no treatment has yet been outlined which is effective in these cases beyond occasionally and temporarily reducing the number of epileptic seizures; hence there is no alternative to regarding them incurable and inadmissible as long as acute cases are in sight. They are difficult cases to provide for, and, in fact, with the means at the disposal of county authorities for the custody of defectives, it is impossible to give them the care they deserve and such as humanity dictates they should have. Until the State establishes a special institution for the custody of this class—a colony with an ample estate for abundant employment—these unfortunates will continue to be a harassing source of perplexity to the local officials and a disturbing element in every community. It is hoped the day is not distant when the State will see the wisdom of the action taken by other States upon this question and give to the counties much needed relief by establishing an epileptic colony.

At the present time there are only two patients in the Hospital having a legal settlement in counties other than those of the Eastern District, and both are accredited to Hancock County, of the Central District. They were admitted in 1890, prior to the transfer of this county to the Central District. No patients have been transferred to or from other Hospitals during the period.

The law requiring the Sheriff to provide a female attendant to accompany all female patients to the Hospital is being carefully observed.

CAPACITY.

The capacity of the Hospital is 540. In the Department for Men there are 257 beds, and in the Department for Women 283. The increase of capacity during the period is 102, and is due to the new construction authorized by the special act of 1895. The conversion of ward kitchens and dining-rooms into dormitories, permitted the addition of forty-five beds to the capacity of the Department for Men and 57 to the Department for

Women. The latter may be still further increased by making a dormitory of the former sewing-room and a small ward in the rear center of the triplet cottage. The latter is a small building formerly occupied as a kitchen and night attendant's quarters. As many as twenty-five beds may be added in this manner when required. Unfortunately this latitude for expansion does not exist in the department where most needed. The Department for Women even now furnishes accommodations for twenty-six patients more than the Department for Men, and the applications for admission to the latter department are very much greater than to the former. This is not due to the popular and erroneous belief that there are proportionately more men than women insane, but to the fact that as a rule an insane man is more difficult to care for and control in the private home and excites more fear in a community by his abnormal conduct than an insane woman, who comes less in contact with the general public.

The additional forty-five beds made available during the past year in the Department for Men are all, excepting one, now occupied. This department permits no further expansion without additional construction. The wards are now overcrowded in a few instances, and the admission of more patients would require serious violation of accepted sanitary laws. The doors must now again be closed to men, until the construction and equipment of other cottages are authorized.

During the latter half of the past year of the period, the jails in the Eastern District have been relieved of their insane, and all acute cases have received prompt admission. This is as it should be, and it is a matter of grave misfortune to the curable cases that the practice can not be continued. That delay in the admission and treatment of the acute cases is harmful and diminishes the chances of recovery, is a fact denied by no one. Aside from the humane motive, which is chief in the treatment of these cases, it is, from a monetary standpoint, to the interest of the State to offer every possible chance of recovery to the insane, that chronicity and life long dependence upon its charity may be avoided in every instance possible. Discrimination on the part of the State in the care and treatment of its insane is an injustice which the State has no intention of inflicting, yet under present conditions such discrimination unavoidably exists.

In my biennial report of 1894 it was estimated upon the basis of the whole number of insane in the State that there were in the Eastern District 677 insane persons. There is no reason to suppose that this number has diminished. Granting the accuracy of this estimate, there is a discrepancy between the number of insane in the district and the capacity of the Hospital of 137. These cases are all chronic in character, and are confined in the county poor-houses and in private families, although the major portion of them is entitled to State care, if the policy so often defined by legislative enactment is to be adhered to.

This Hospital should have a capacity large enough to accommodate both of these classes. For this purpose two cottages should be erected and equipped, one in each department, to accommodate sixty patients, each, of the violent, untidy and dangerous class. In this way the capacity can be increased 120 beds, and while permitting some improvement in classification of those now in the Hospital, would at the same time make possible the early admission of new cases as they arise. At present there are located in all the wards in the Hospital a number of patients of the violent class properly belonging to the disturbed wards. To the quieter and tidy patients these are a source of irritation and excitation not conducive to good health or comfort. These noisy and restless cases are improperly assigned because the disturbed wards, ample for the original capacity, are insufficient to accommodate all of its class in a population increased twenty per cent. during the past year. A cottage, such as is suggested, should contain two wards with thirty beds each. The sleeping-rooms should be single, except one or two which could advantageously be used as dormitories. The day-room, bath-room, water-closet and clothing-room should be arranged similarly to those now in use. Unless the capacity is increased in this or some other manner, six months will not have elapsed before the jails and county houses must again receive the new cases as they develop in the district. It is sincerely hoped such a situation may be averted.

The impression should not prevail that insanity is increasing to an alarming extent because the additional room recently provided in this Hospital was so rapidly filled. As a matter of fact, insanity is not increasing in Indiana out of proportion to the increase of population. The increase is only relative, and

not actual. The proportion of insanity to normal mental health (1 to 600) has been uniformly maintained in this State, according to the best information obtainable, during the past fifteen years. The additional beds were taken promptly because there already existed in the various counties of the district more than twice as many insane persons as beds provided. The patients were practically knocking at the doors of the Hospital long before any steps were taken toward providing accommodations for them. Indiana is no exception to the rule that no State provides institutions, in whole or in part, for its defectives until a sufficient number is in sight to fill them.

FINANCIAL HISTORY.

The appropriation for maintenance, repairs, and minor improvements for the fiscal year ending October 31, 1895, was \$95,000; for the fiscal year ending October 31, 1896, \$90,000.

The disbursements for the fiscal year ending October 31, 1895, for maintenance, repairs and minor improvements, amounted to \$94,973.96, and may be classified as follows:

Subsistence	\$21,367 34
Clothing.....	2,176 67
Trustees' salaries	375 00
Officers' salaries	7,015 92
Attendants' wages.....	14,658 30
Employes' wages.....	12,360 72
Repairs.....	5,944 97
Minor improvements.....	9,653 26
Additional household equipment.....	2,893 62
Fuel, light and other classified expenditures.....	18,528 16

The cost per capita for the daily average number of patients actually present during the year for maintenance was \$175.27; for maintenance and repairs, \$191.14; for maintenance, repairs, minor improvements and all other expenditures, \$217.63.

The cost of food for each day's board during the year was 10.7 cents.

For the fiscal year ending October 31, 1896, the disbursements for maintenance, repairs and minor improvements amounted to \$89,996.22, and are classified as follows:

Subsistence	\$23,293 35
Clothing.....	1,911 08
Officers' salaries	6,973 12
Attendants' wages.....	14,825 57
Employes' wages.....	12,192 32
Rapairs and minor improvements.....	10,574 10
Fuel, light and other classified expenditures.....	20,226 68

The cost *per capita* for the daily average number of patients actually present during the year for maintenance was \$170.58; for maintenance, repairs, minor improvements and all other expenditures, \$193.29. The cost of food for each day's board furnished during the year was 11 cents.

During the first year of the period, disbursements for repairs and minor improvements aggregated \$15,598.23, and are detailed elsewhere in this report. Of this amount, \$9,653.26 were expended for additional equipment and minor improvements of a permanent character. In this item is included with other items the additional household equipment for 120 patients, extensions of the steam-heating and electric-light plants and alterations in the rear center.

The appropriation for maintenance, repairs and minor improvements for the second year was \$90,000, a reduction of \$5,000 from that of the previous year. For repairs and minor improvements in this year there were expended \$10,574.10, and for other items approximately the same amounts, notwithstanding an increase of 29.2 patients in the daily average number of patients maintained. A reduction of \$4.99 in the *per capita* cost of maintenance, and \$24.63 in the *per capita* cost of maintenance, repairs and minor improvements is shown for the second year. This is due to the prevailing low prices of supplies and the decrease in expenditures for repairs and minor improvements. At the end of the last fiscal year the stock of subsistence supplies in store was large, and while debited to that year in estimating *per capita* cost, these articles will be consumed during the ensuing year.

The fiscal year was closed without outstanding financial obligations of any kind, with all urgent repairs completed, a few much-needed minor improvements made, and a fair stock of subsistence and general supplies in store.

The supply of food is plain and substantial, and abundant in variety. The centralization of cooking and preparation of

food supplies in the general kitchen, accomplished a few months ago, is fully equal to expectations. Supervision is easier and better, and doubtless the present arrangement, after complete adjustment, will prove more economical. That it is more sanitary and agreeable there is no question. Our system of issuing food supplies is simplified, and already there is apparent a saving over the former plan of distribution.

Supplies are purchased by competitive bids based upon estimates prepared monthly and advertised in the local papers. All needs which can be anticipated, including groceries, meats, breadstuffs, provender, drygoods, drugs and the like, are listed in these estimates. Experience has made it possible to make the estimates cover the quantity and number of items needed for a given month with reasonable accuracy, and as a result only a few minor purchases are made on the market. This plan is required by law, and is a commendable one. While it is possible at times to obtain some articles on the market at a less price than is quoted in proposals for future delivery, the cost in the total of supplies obtained by competitive purchase is unquestionably less. Scrupulous care is exercised in the examination of all supplies on delivery as to quality and quantity.

In previous reports attention has been called to the higher cost of maintenance in this Hospital as compared with other institutions. The chief causes of this difference are still operative and will continue effective, although probably to a less degree, for all time to come. The cost of attendance is unavoidably large on account of the cottage plan of construction. Each cottage, without regard to capacity, must be entirely independent in point of organization of all others. Each requires one night attendant and two to four day attendants to provide requisite supervision of patients. During the past year there were 38.7 patients to one night attendant and 8.2 patients to one day attendant. While this is a greater proportion than for any previous year, it is still lower than usually obtains in similar institutions. It is not desirable or advisable to further increase this ratio. The point is reached beyond which it is inexpedient to go and at the same time assure the quality of nursing and supervision essential to the best results. The items of fuel, light and repairs are necessarily higher than in institutions of congregate construction, by reason of the number of cottages and the greater distances from the central plant. The small

ward kitchens have been merged into one general kitchen, and some reduction may be expected in cost of substance and its preparation. This reference to the higher cost of maintenance is explanatory only and not made in the sense of adverse criticism of the cottage plan of construction, which daily demonstrates its advantages over any other plan. Observation of the system in an experience of nearly six years permits an endorsement of it, and the statement that the slight increased cost of maintenance is more than outweighed by other numerous points of superiority.

The receipts from the sale of rags, old iron, hides, boxes, dead tree and the like amount, for the period, to \$127.23. This revenue the Treasurer of the Hospital has covered into the general fund of the State Treasury, and the Auditor's quittances for the several payments are on file in this office, as required by law. Exhibits Nos. 13 and 14 of this report set forth the items.

The monthly inventories of all personal property continue to be made, and they are checked with great care. The system of requisitions and condemnation of personal property introduced four years ago is well adapted to the requirements and continues in use without alteration.

A summary of the inventories of October 31, 1895, and October 31, 1896, appears in Exhibits Nos. 5 and 6.

The appropriation for maintenance and repairs for the fiscal year 1896-7 is \$90,000. This is insufficient to preserve the present standard of maintenance and care of a population progressively increasing and to make the necessary repairs to the buildings. The year opens with 506 patients in the Hospital, and, if deserving cases are promptly admitted, this number will be raised in a short time to 540. The appropriation provides for this number a per capita expense of only \$166.66. This allowance can not maintain them. A special appropriation of \$10,000 for maintenance should be made available for the fiscal year 1896-7 to prevent a deficit and permit the admission of additional patients. When the extension of the capacity was authorized by the Legislature at its last session, no provision whatever was made for maintaining the patients for whom the extension was intended. The majority of these patients are already in the institution, and others are being admitted daily, and additional provision for their care must be made if the

State's obligation to them is discharged. It is a serious period in the institution's history, and I beg to earnestly urge your careful attention to it to the end that it may be presented to the proper authorities at an early day.

It is estimated upon a basis of 565 patients to be maintained, an appropriation of \$110,000 for maintenance, repairs and minor improvements will be required for the fiscal year ending October 31, 1898; and the same amount for the fiscal year ending October 31, 1899.

In the event, however, the recommendations of this report of further increase of capacity are adopted and authorized, the appropriations for maintenance should be increased in proportion.

SPECIAL APPROPRIATION OF 1895.

The General Assembly of 1895 appropriated \$50,000 for the purpose of increasing the capacity of the institution. Of this appropriation \$25,000 were made available for the fiscal year ending October 31, 1895, and the same amount for the fiscal year ending October 31, 1896. The object of this appropriation was to extend the accommodations for patients, in order to provide for a number of insane, both acute and chronic, confined in county jails, infirmaries and running at large throughout the Eastern District. In the original equipment of the Hospital provision was made for 400 beds, and these were occupied before the end of the fiscal year 1891-92. During the succeeding three years only such patients were admitted as vacancies from death and discharges would permit. The number of admissions was small, for the reason that the chronic cases, under existing laws, were detained and had accumulated, thereby diminishing the group of curable cases, which class alone furnished the recoveries. The result of this congested state of the wards was to practically close the doors and to require the suspension of nearly all applications for admission. At the beginning of this biennial period there were on file in this office 108 such suspended applications, and probably as many more deserving cases in the district for whom application for admission had not been made. To provide for at least a part of these cases was the purpose of this specific appropriation. The management, after a careful consideration

of several plans for enlargement, recommended that two associate dining-halls, a large general kitchen and a new assembly hall be built and the ward dining-rooms and kitchens abandoned and converted into small dormitories. This suggestion was approved by the legislative committees, and this specific appropriation was made for the purpose. This scheme of additional construction contemplated the erection of two buildings in the form of annexes, one to the rear center building and one to the boiler house, the latter for an extension of the steam-heating plant for the former. In view of the pressing needs it was decided at the regular meeting of the Board of Control of April, 1895, to undertake the work without delay and push it rapidly to completion.

FIRST FLOOR PLAN OF REAR CENTER.

- | | | |
|---------------------|----------------------------|-----------------------|
| 1. Dining-halls. | 4. Employees' Dining-room. | 7. Lobbies. |
| 2. Sculleries. | 5. Cold Store. | 8. Vegetable Cellars. |
| 3. General Kitchen. | 6. Bakery. | |

From outlines furnished the plans and specifications for both structures prepared and submitted by J. A. Hasecoster, architect, were accepted and approved on May 1, 1895, and contractors were invited through the Richmond, Ft. Wayne and Indianapolis daily papers to submit proposals for furnishing materials and labor for the completion of the work.

On May 14, 1895, proposals were opened as follows:

	Annex to Rear Center.	Annex to Boiler House.	Total.
Roberts & Hasecoster	\$55,017 00	\$1,318 00	\$57,335 00
O. L. Pulse & Co.	44,480 00	3,000 00	47,480 00
Wm. Moellering & Son	51,550 00	2,128 00	53,678 00
Down, Ready & Co.	44,061 00	2,000 00	46,061 00
Louck & Hill	43,733 00	1,454 00	45,187 00
James E. Shover	54,863 95	2,616 00	57,482 95
A. G. Caulfield	44,461 00	1,669 00	46,130 00
James DeVault	44,592 00	1,292 00	47,884 00

The proposal of Messrs. Louck & Hill, being the lowest, was accepted and a contract was made with this firm. Ground was broken on May 19, 1895, and the buildings under the contract were accepted and the final payment made January 14, 1896. One month prior to this date, however, the new general kitchen was put into service.

ANNEX TO THE REAR CENTER.

The original rear center was an oblong building, 45x119 feet, located 52 feet in the rear and north of the administration building, and was used for domestic purposes. It contained, also, on the second floor a small assembly-room. The proposed addition involved many changes to this building, and since it could not be entirely vacated during the process of alteration many serious obstacles developed, but all were finally, with much labor and the exercise of no little patience, satisfactorily overcome.

In lieu of the old kitchen, of necessity abandoned, a temporary frame kitchen was constructed and occupied during the period covered by the work.

This rear center building was extended north 68 feet and wings 63x112, built at right angles to its extreme north end. The structure has two stories, a large basement and an attic. The superstructure is made of brick and rests upon Eaton lime-stone foundation twenty-four inches thick, with two courses of range work and a cut-stone water table. The roof is arranged in three sections, is high and hipped, that of the wings being higher than the central extension. The latter are each provided with two dormer windows, a gable projecting from the center and fronting north, and two large ventilators of wood construction, while that of the central extension has only one ventilator. The covering is slate, ornamented by

painted galvanized iron cresting, hip rolls, coping and finials. Cornice and corrugated leads of the same material are used.

The north elevation presents to the view a building 266 feet and 8 inches long, 29 feet from the water-table to the eve, with a recess ten feet deep across the entire north front of the general kitchen.

There are three entrances to each of the wings—one at the end and two in the south front—and all are provided with massive stone steps, double-oak doors and vestibules or lobbies. Hardware manufactured by the Yale & Towne Mfg. Co. was used throughout the new construction.

The building is plain, but pleasing in outline, and conforms generally in appearance with the other structures about it.

Basements.—These receive ample light through windows opening into large areas. They are 8 feet 6 inches high and are divided into compartments by brick cross walls and piers which furnish bearings for the heavy floor above. That of the east wing is devoted to a large store room. It is floored with cement. That of the central extension has likewise a cement floor and is used for the preparation of vegetables. It communicates directly with two spacious sub-pavement vegetable cellars—one on either side. The basement of the west wing is arranged for a gymnasium, but has not been completed for want of funds. No floor has been put into it.

A Warner hand-power elevator with overhead gearing, and a platform 5x6, is located in the north end and near the store-room door. Two small dumb waiters are also provided to convey vegetables to the kitchen above.

General Kitchen.—The entire first floor of the central extension forms the general kitchen. The end wall of the old kitchen was removed and this with the new addition makes a kitchen 114 feet long and 42 feet wide, and a ceiling 12 feet high. The floor is of Portland cement, laid on brick arches, which are built between 8 inch and 12 inch steel I beams weighing 25 and 50 pounds to the foot. These beams are set five feet between centers, resting on brick piers, and are tied by iron rods seven-eighths inches in diameter. The walls are made of smooth brick painted with three coats of lead and oil. The ceiling is decorated sheet steel arranged in panels of neat design, with Moore's patent lock joints, and painted in two coats. Two rows of iron columns 8 inches in diameter support the floor above. On either side is a large vent shaft. This kitchen communicates by a large exchange with the employes' dining-room at the south end, by double acting doors with the sculleries and associate dining-halls at the northeast and northwest corners, and by doors directly with the bakery on one side, and the butcher shop and cold store on the other. It has four outside doors and is well lighted and ventilated. The special features of this kitchen are its large dimensions, convenience of serving the three dining-rooms, and the arrangement of its equipment. A Miller center steel range 7 feet wide by 15 feet 6 inches long, weighing 7,000 pounds is located in the center of the room. The smoke pipe passes through the center of the vent pipe and into a special flue in the shaft, thereby insuring a good circulation. The steam cookers are placed around the room and four feet from the wall, leaving no excuse for unsanitary conditions. Two large scullery sinks are the only part of the equipment against the wall. Large open spaces towards the end of the room are preserved for the preparation of vegetables and fruits by the patients. Being two such spaces, sex separation is possible while at the same time the entire force is at once under the eye of the chief cook. The equipment is not yet complete, but it is hoped some additions may be made to it in the near future.

Associate Dining-Halls.—In the original outline of this annex these halls were the chief feature and finished, they appear as two very handsome rooms, spacious and comfortable, and not surpassed in adaptation to their special purposes by similar rooms of any institution in the country. They are 86 feet long, 42 feet wide, and the walls are 16 feet, 6 inches high. They are separated from the general kitchen by two large sculleries 24 feet long and 18 feet wide. They communicate by double double-acting doors and large exchanges. At the end of each scullery is a bread-room 14 feet long and 7 feet wide. The dining-halls are entered from lobbies by three double double-acting doors. The floor is paved with encaustic tile of first quality, plain and neatly designed, and finished at the walls with a slate base, eight inches high. The floor is constructed, as in the kitchen, of brick arches supported by heavy steel I beams. The walls are faced five and one-half feet above the floor with light blue enameled brick surmounted by three rows of ornamental brick in relief. The walls above are faced with buff pressed brick and all are laid with small joints in white mortar. A large fireplace with mantel of enameled brick and stone is centrally located on the north side. The floor above rests on a steel girder supported by a row of five iron columns, eight inches in diameter. The ceiling is made of decorated steel sheeting, in panels eight inches deep with a cornice. In two of the lobbies are lavatories and water-closets, fitted with Madden's closets, Clow's open lavatories and slop sinks on trap standards and all are double-trapped and back-vented. The floors of lobbies, lavatories and vestibules are laid with encaustic tile, finished with a slate baseboard. The room is heated by direct radiation with the exception of three large round direct radiators encircling posts, which serve as plate warmers. The equipment of these halls consist chiefly of furniture and other supplies removed from the ward dining-rooms. The only innovation is the introduction of square tables at which eight persons are seated. These are substituted for the prison-like lines of long tables, almost universally used, and permit the formation of family-like groups. The seating capacity of the two halls is 600, which with crowding may be increased to 700. They will provide for a liberal extension of the institution for several years to come. The illumination is good, and chiefly north light, although there are four large windows on the south side. All windows in dining-halls, lobbies, closets and vestibules are provided with inside folding pine blinds. The sanitary condition of this entire floor is the best, and there is no reason why it can not be kept so. The enameled walls of the dining-halls tolerate washing and scrubbing without absorption, and the encaustic tile and slate baseboards in all parts allow flushing, if necessary, without damage.

SECOND FLOOR PLAN OF REAR CENTER.

- | | |
|-------------------|----------------------------------|
| 1. Assembly Hall. | 3. Employes' Quarters. |
| 2. Stage. | 4. Superintendents' Dining-room. |

Assembly Hall.—The location of this essential adjunct is on the second floor, over the employes' dining-room and the new general kitchen. It is 119 feet long, 42 feet wide, and the walls are 16 feet 6 inches high. At the south end is a gallery, ten feet deep, and extending across the entire room. It is supported by oak posts and tied to the roof truss by heavy iron rods. It is made entirely of oak and finished in the natural wood. At the north end is a stage 42 feet wide and 28 feet 6 inches deep. The height to the ceiling is 22 feet, affording ample space for setting the scenery. In the corners of the stage are small, triangular dressing-rooms. The proscenium arch is recessed 26 inches and is 22 feet long and 14 feet high, and closed by a neat drop curtain. An orchestra rail of oak and iron is placed 6 feet from the curved front of the stage and in conformity with it. The stage wall is finished in adamant, painted in the rear and frescoed in front. The auditorium is 90 feet long and 42 feet 6 inches wide. The floor is of maple, double, and with an interspace of two inches packed with mineral wool. The ceiling is oak and the trusses are encased with the same material, finished in the natural wood. The walls are brick, painted in four coats of oil and lead. Two fire escapes, consisting of a broad iron stairs, with hand-rails and large landings, lead from windows on either side to the ground. The windows are wide and high and equipped with folding pine blinds. The room is heated by direct radiators and ventilated by cold air ducts and ventilators in the ceiling. All parts are equally illuminated by well-diffused and soft radiation from incandescent electric lights, studded into the under surface of the encased ceiling beams. A system of carefully arranged groups of lights illuminate the stage. The seating capacity is 550, and the folding chairs were furnished by Thos. Kane & Co., of Chicago. This Assembly Hall is a blessing to the institution, since never before in its history has it been possible to provide amusement for a sufficient proportion of the population.

Employes' Quarters.—The employes, heretofore lodged in undesirable rooms in the unfinished attics of two cottages occupied by patients, are now comfortably quartered in the second floor of the annex over the dining-halls. Men occupy the west side, and the east side is reserved for women. These quarters are intervened by the assembly hall, and have no means of direct communication with each other or the assembly hall. They are, in point of arrangement, construction and equipment, exact counterparts, and are denominated rear center east and rear center west. They are approached by two stairways each, broad and easy, of black slate with bearings in the wall, wrought iron hand-rails and balustrades, which arise from the south lobbies of the dining halls. They, alike, land at the extreme end of a wide and long hall, which, in its course, makes two right angles in such manner as to bisect the compartment. On the sides of this hall are twenty bedrooms of various sizes, and each with an outside exposure. A parlor, 16x18 feet, centrally located, equipped with a small grate and wood mantel, and separated from the hall by large, sliding doors, adds infinitely to the good cheer and comfort of the place. The ceiling is of yellow pine, matched, beaded and varnished, and the partitions are made of solid pine studding two inches thick, lathed and plastered with adamant, rough finished. The brick walls are likewise plastered. The floor is double, the upper maple deadened with mineral wool. There are four large linen closets, a bath-room and a water-closet. The latter two are located in the remote end of the quarters, and are provided with an enameled, roll-rim bath-tub, a Madden closet, Clow's open lavatory and slop basin. All fixtures are carefully put in, back-vented and double-trapped. Steam heating, by both direct and indirect radiation, is used, and the artificial illumination is by incandescent electric lamps, set in the ceiling of the hall and on single brackets in bedrooms.

Fire Protection.—In addition to the outside fire protection afforded by three water hydrants in proximity to the new structure, five two inch stand pipes are placed at points most advantageous for inside protection. To each pipe is attached in the basement, on each floor and in the attic, a section of fifty feet of one and one-half inch linen hose with a brass nozzle. It is the intention to add, as soon as possible, a number of fire extinguishers.

Covered Hallway.—A covered way, bridge like in construction, was erected between the rear center and the administration buildings at a cost of \$1,355.00. It spans the open court and is fifty-two feet long and connects the upper floors of the two buildings. It is supported by two heavy steel lintels, made of web-plates and angle-irons, weighing four tons each, and is fifty-four feet long and four feet high. These are placed on edge on stone and wrought-iron bearings in the walls side by side, eight feet apart, and securely tied together by heavy iron rods, and on these is placed a wooden superstructure, making a passageway eight feet wide and eight feet high. The sides are covered with corrugated steel sheeting and paneled galvanized iron, and the roof with tin. It is finished inside in yellow pine matched and beaded. The purpose of this addition is to make conveniently accessible the Superintendent's dining-room, which has been located on the second floor of the rear center building, and directly above the officers' dining-room.

Walks and Grading.—The necessary grading about the new buildings was done during the early spring of the present year. Walks and approaches were put in wherever needed and the intermediate plats filled to the grade line with good soil and sodded. The walks were made chiefly of Star paving blocks, with a foundation of twelve inches of gravel and bedded in two inches of sand, the same kind of blocks placed on end serving as a curb. Of this material 4,731 square feet were laid at a cost of 11½ cents per square foot. While the cost is less, it is the most satisfactory of the various kinds in use about the institution. Athens paving blocks were used for crossings and approaches over which vehicles necessarily pass. The total cost of grading, sodding and paving was \$667.88.

Changes in the Rear Center.—A few alterations were made in the south end of the rear center incident to the transfer, of the Superintendent's dining-room to the second floor and the officers' kitchen to the basement. These consisted in the construction of a flue and the removal of certain partition walls. From this fund \$335.18 were expended for this work and for finishing lumber, mantel and closets.

Stage Equipment.—The scenery, consisting of four complete settings and numerous accessories, were prepared by J. N. Tschudi, of Chicago, for \$107.30. Expenditures for other supplies for the stage equipment made a total outlay of \$140.70.

ANNEX TO THE BOILER HOUSE.

The expansion of the institution made necessary an extension of both the steam heating and electric light plants. In order to make room for an additional steam boiler, it became imperative to enlarge the boiler-house. This was done, concurrently with the construction of the rear center annex. As elsewhere indicated, the work was done and all materials furnished under contract by Louck & Hill, of Richmond, for \$1,485.01. This annex was built on the north side of the boiler-house, and is a room forty-five feet long and twenty five feet wide. The floor, to conform to that of the boiler-house, is ten feet below the grade line. The walls of the excavated portion are stone, twenty four inches thick, on which are thirteen-inch brick walls, sixteen feet high on the south side and twelve feet high on the north side. The roof is one-half sp in, and a mere extension of the roof of the boiler-house, and is made of tin, with a hanging gutter and four-inch, corru-

gated, galvanized iron leads. An elevator well, eight feet long and six feet wide, is placed at the northwest corner, equipped with a hand-power elevator, with over-head gearing. A coal pit was made at the west end of the addition, twenty-five feet long, twenty-four feet wide and ten feet deep. A tin roof covers one-half of it, while the other is open and crossed by the railway siding, supported by massive beams bearing upon the walls and a brick and stone pier. Coal, received in bottom dump cars, is unloaded by dumping directly into the pit. The floor of this pit is paved with hard brick laid in concrete, and that of the annex is made of cement.

A summary of the disbursements for new construction from the special appropriation, aggregating \$50,000, may be set forth as follows:

Annex to Rear Center—

Construction	\$44,260 76	
Household and kitchen equipment	1,291 23	
Fire protection and plumbing	599 51	
Walks and grading	667 88	
	<hr/>	\$46,819 38
Annex to boiler-house		1,485 01
Covered hallway		1,355 00
Alterations to rear center		335 18
Covered into General Fund		5 43
		<hr/>
Total		\$50,000 00

GENERAL HISTORY.

At the end of another biennial period there are to be reported numerous minor improvements, repairs and alterations in the physical arrangement of the institution. These improvements and changes have been made only after the most careful consideration by the management, and always with an earnest conviction that the best interests of the institution were being conserved. Without a special fund for these needs, and with only such as remains from year to year from the current expense fund after having carefully provided for necessary maintenance, little latitude exists for repairs and the numerous minor improvements which would unquestionably increase the institution's usefulness. The physical conditions are certainly superior to those of any period of the past. The process of development is a slow one, but a judicious application of the means at hand and a constant attention to details have brought during the past year ample reward by an increased degree of good cheer and improvement in general appearance in and about the institution. The trees and shrubs, put out in large numbers in the years past, have, by careful nursing, substituted for bad soil, developed sufficiently to give the grounds an agree-

able park like effect. The lawns show the benefit of better care, and are fairly well set in blue grass. Never before have the flower-beds been so numerous as during the past season, and never have the blooming and foliage plants been so luxuriant and beautiful. The greenhouse, wisely provided a few years ago, has proved an invaluable adjunct, and is well stocked with a great variety of plants, from which is drawn the supply for decoration, both on the wards and on the grounds. No attempt at elaborate landscape gardening has ever been made. Necessity has compelled us to be content with such simple ornamentation as could be obtained by the efforts of a small amount of labor, chiefly furnished by able bodied patients encouraged in light occupation as a therapeutic measure. The flowers and plants are in the immediate care of a competent florist, and trees, shrubs and lawns are kept in order by the Outside Supervisor, assisted by a requisite number of patients. The extent of this work may be appreciated when it is remembered that the cottages occupy a plat of forty acres of land. The experiment tried last winter of transplanting large trees is apparently successful. Others will be transplanted during the ensuing winter. The most attractive spot on the grounds, alike to patients and visitors, is the lately completed winding path to the railway station. It is bordered by rows of poplars and salisburias and narrow ribbons of the old garden plants—the phloxes, pinks, zinnias and the like—in great abundance and variety.

Painting—During the past season three or four painters were employed for the greater portion of the time in painting the cottages. Experience has taught us that all exposed wood-work, if it is properly preserved, must be given a coat of paint once in two years, at least. All verandas, windows, doors, frames, tin roofs, gutters and leads have been painted. The inside walls of the cottages in most instances received a coat of lead and oil, and the wood-work varnished. All exposed pipes are painted three or four times annually. The frame structures on the premises, such as the carriage-house, stables, farmer's residence, engineer's dwelling, and all out-houses were lately painted or whitewashed.

Roofs.—The usual repairs on the roofs have been made. Annually it is necessary to examine and repair, before painting, all slate and tin roofs, gutters and leads. The peculiar con-

struction of the original roofs has been a source of considerable outlay for repairs, and as a result, in the new buildings effort was made to avoid the objectionable features of the old. No terra cotta was used, and gutters and cornices extend slightly beyond, instead of resting directly upon the walls. It is only a matter of a few years when the terra-cotta cresting, hip-rolls and coping so generally used on the cottages must be replaced by galvanized iron or more durable material of some kind. Strong winds blow the cresting and coping off, and in the fall the sections usually are broken and rendered useless. It can not be replaced except at great expense and with long delay, as it is not a staple article.

Additional Electric Light Equipment.—The enlargement of the institution has made necessary an extension of the incandescent electric light plant. In the original equipment there were two Edison dynamos, with a total capacity of 30 K. W. at 109 volts, operated by two high-speed engines—an Ideal of 40 horse-power and an Ideal of 80 horse-power. It was deemed advisable to substitute a large dynamo for the small (10 K. W.) Edison machine, and increase the capacity of the plant about 500 incandescent lamps of 16 candle-power. The leading firms of the country were invited to submit proposals on a dynamo with a capacity of 30 K. W. at 110 volts, direct current, and a switch-board fitted with volt-meters, am-meters, switches and ground detector for the entire plant. Proposals were received, as follows:

Commercial Electric Co., dynamo and board, \$730.00; Western Electric Co., dynamo only, \$1,250.00; General Electric Co., dynamo only, \$695.00; Fort Wayne Electric Corporation, dynamo only, \$725.00.

The proposition of the Commercial Electric Co., of Indianapolis, was accepted and the contract promptly and satisfactorily filled within the specifications, for \$730.00. The machine furnished is a multi-polar type of the above-named capacity; the switch board is marble supplied with a round Weston Volt meter, two Weston Shunt am-meters, one ground detector and nine double poll switches. In the course of the alterations of the rear center it became necessary to remove nearly all of the electrical work, which was replaced with new material. This, with that used in the new building, cost for wire, tubing, fixtures and lamps, \$888.48. This work was

most carefully done by the regular force. The wiring is concealed, and with few exceptions, is protected by plain conduit supplied by the Central Electric Co., of Chicago. In attics where wire is laid in conduits on the floor, it is still further protected by asphalted moulding. All switches are placed in neat boxes under lock and key. Every possible safeguard was taken in this work to make it safe from the dangers of fire.

Additional Steam-Heating and Plumbing.—The four steam boilers heretofore in use have been run to their full capacity during the past three years. When demands upon this plant were made heavier by the addition of another large building, some expansion became necessary. For this purpose the annex to the boiler-house was built. It was deemed advisable to procure only a high-grade water-tube boiler for this work, and after the consideration of propositions on various boilers from the Babcock & Wilcox Co. and the Heine Safety Boiler Co., one from the former company was accepted. The cost of the boiler, including foundations and setting, was \$3,142.05. It has a total heating surface of 1,426 square feet and a capacity of about 150 horse-power. Two steam and water drums, thirty inches in diameter and fifteen feet long, are placed above and in communication with seventy wrought-iron water tubes four inches in diameter. Grate-bars of the *Ætna* pattern are used. Materials and labor for heating and plumbing the annex to the rear center were furnished by F. M. Curtis, of Richmond, for \$3,089.86. This includes a new eight-inch return line from the rear end of the original rear center to the boiler-house. For heating purposes, both direct and indirect radiation are used. The Detroit ornamental fluted and perfection pin radiators have also been placed in the day-rooms of Wards 1 and A and in the new sewing-room. During the last few months the boilers have been carefully cleaned and put in a high state of repair, preparatory to the heavy demands upon them of the ensuing winter season. All tubes and shells have been carefully and thoroughly freed from incrustations, tubes expanded or replaced where needed, all leaks stopped and walls and furnaces rebuilt. Official inspection is made quarterly of these boilers by the Hartford Steam Boiler Inspection and Insurance Company, under the terms of the insurance carried in that company. The reports indicate a safe condition and good care. Another small feed-water pump has been added to this plant.

The cost of this equipment and repairs was defrayed from the maintenance fund.

Additional Household Equipment.—In order to utilize the vacated ward dining rooms, and to carry into effect the chief aim of the new construction, some additional household equipment was required. This consisted mainly of beds and bedding. It was estimated that the new dormitories, the sewing-room and the triplet cottage kitchen would accommodate 120 beds. This number was made available at a total cost of \$2,321.25. The same quality and design in both beds and bedding as hitherto adopted were adhered to, except feather pillows were substituted for hair. The bedsteads were supplied by J. W. Henderson & Sons, of Logansport; hair mattresses and pillows by the Cold Blast Feather Co., of Chicago; blankets by Beckman & Co., of Cleveland; woven wire mattresses by the Laycock Manufacturing Co., of Indianapolis, and quilts by Wm. H. Thomas & Co., of Philadelphia.

Addition to the Pumping Station.—The entire water supply of the institution has, for the past six years, been drawn from five wells by one pump, and steam for it furnished by a single boiler. While the boiler was of sufficient capacity, the pump was inadequate and was constantly burdened during a service of eight or ten hours daily. The consumption of water is approximately 100,000 gallons daily, and three cisterns near the boiler house, with a total capacity of nearly 50,000 gallons, provided the only means of storage. It is apparent that any serious accident to the pump or boiler would develop a very grave situation, especially so since there is no connection with the city system or any other source of supply. Even simple repairs and cleaning of the pump and boiler were attended with difficulty, for the reason they could not be taken out of service for a proper length of time. A slight accident, not long ago, to the pump shut off the entire water supply, even stopping the cooking in the general kitchen. On account of this condition, it was deemed imperative to take some steps towards extending the capacity of the pumping station. An addition twenty feet long and eighteen feet wide was built of brick, abutting the west end of the old station, and a large Worthington pump purchased and placed in it. This is a compound, duplex, direct-acting pump, having two high-pressure steam cylinders ten inches in diameter, two low-pressure

steam cylinders sixteen inches in diameter, and two water plungers eight and one-half inches in diameter, with bronze piston rods. It develops a water pressure of 125 pounds when running at a speed of 100 feet per minute, and is guaranteed to deliver to the buildings 750,000 gallons of water in twenty-four hours. It cost, delivered at the Hospital, \$890.00. It was set and connected by our own force. The suction and discharge pipes in the station have been so rearranged as to make possible further extension with greater convenience and at much less cost. The old pump has been put in good state of repairs and is run alternately with the new one. The floor has not yet been put in the new addition; otherwise it is completed. To complete this plant another boiler is needed. In the event of an accident to the one now in use, the water supply of the entire institution would be entirely shut off, and possibly develop serious complications.

Carpenter Shop.—During the past summer a brick workshop for the carpenter's use was erected and is now in service. This was built by Wm. P. Taylor, of Richmond, by contract. The award was made to the lowest of four bidders, as follows: H. C. Kaufman, \$1,393.00; Henry Hasecoster, \$1,194.00; Louck & Hill, \$1,405.00; Wm. P. Taylor, \$1,191.25. During the course of construction, it was found advisable to make the walls one foot higher than called for in the specifications. This alteration increased the cost of construction \$18.50. This building is placed abreast of the laundry and boiler-house, and sixty feet west of the latter. It is a plain and substantial structure forty feet long, twenty-six feet wide, and walls seventeen feet high. It contains one large room for a workshop and a well-lighted and commodious attic for storage purposes. The design and finish harmonize with the buildings about it. The shop fulfills a need which has existed for many years. Heretofore, a small frame addition to the boiler house has furnished an inadequate workroom for both the carpenter and the engineer. With a progressive increase of work in the two departments, independent and enlarged quarters became necessary.

Bakery.—The changes in the original rear center building necessitated remodeling the bakery. The old ovens, which formerly abutted the wall between the bakery and kitchen, were removed and rebuilt on the opposite side. A doorway was cut in the wall, permitting direct communication with the new kitchen. The cost of this work was \$416.

Superintendent's and Officers' Dining rooms and Kitchen.—The changes in the rear center, elsewhere referred to, have permitted a more satisfactory arrangement of these quarters. The officers' kitchen was transferred from the first floor to the room in the basement lately occupied as a store-room and beneath the officers' dining-room. A Superintendent's dining-room was arranged on the second floor and above the officers' dining-room by the removal of partitions and other changes in certain former sleeping quarters. A large chimney was built in the south end of the building, providing flues for the kitchen and for grates in either dining-room. A dumb waiter passes from the kitchen in the basement through both sculleries. The rooms vacated will be used for a sewing room, and the old sewing room will be converted into a dormitory for eight or ten additional patients.

Tunnel.—The cross in the tunnel near the boiler house was recently enlarged. The increase in the number of pipe lines running through the old cross had so nearly filled it that repairs were made only by removing the arch. This entailed both delay and additional expense, which are entirely relieved by the newly enlarged tunnel. The new tunnel is nineteen feet long, eight feet wide and nine feet deep. The walls are nine inches thick and made of hard brick laid in Portland cement mortar. Ample space is now afforded for repairs and alterations of pipe lines and electric wires. The day is not distant when this tunnel must be enlarged through its entire length between the boiler house and the rear center. It is even now a physical impossibility to run an additional pipe line through it.

Drives.—A driveway has been made north of the rear center annex, which serves as a connection between the rear main drive and at the same time furnishes an approach to the rear of the general kitchen. This is eighteen feet wide and 350 feet long, made of gravel and under-drained by a line of six-inch farm tile. The labor was done by the regular force during last winter. All other drives have been kept in good condition. The main drive entering the grounds was considerably damaged by heavy carting during the new construction and required some labor to restore it to its former condition. Another driveway is laid out north of the boiler house and will be completed at an early day.

Lake.—For the purpose of furnishing ice a small lake was made during the past season in the swale west of the cottages. It is 110 feet wide and 275 feet long, and is supplied through numerous lines of tile by the surface water of a large area of land lying north and west. It is susceptible of extension at some future time.

Grates.—The cheerfulness of the day rooms of six additional wards has been greatly enhanced by grates lately installed. Outside chimneys were built for this purpose. All were lined with tile, hearths of encaustic tile laid and each grate covered with a heavy wire guard, hung on hinges and secured by lock and key. The total cost was \$300. All wards save two are now supplied with open fires, fed by natural gas. These not only add greatly to the comfort of the sitting rooms, but improve the ventilation to a marked degree. Heretofore the use of open fires was considered unsafe in the wards, particularly for disturbed patients, but it is now believed by the exercise of due caution they can be introduced without serious risk.

Fuel.—During the winter of the first year of the period crude oil was burned under the boilers and natural gas was used during the summer season and throughout the year for domestic purposes, the cost of oil was \$6,310.72 and gas \$2,617.44, making a total of \$8,928.16. At the beginning of the second year the price of crude oil was raised to two cents per gallon, and consequently became more expensive for fuel purposes than coal. It was abandoned, and a contract was made with The General Hocking Coal Co., of Columbus, Ohio, for run-of-the-mine coal at \$2.10 per ton, delivered on the siding. Coal consumed cost \$1,915.12 and gas \$5,589.66, a total of \$7,504.78 for fuel purposes. The decrease in the cost of fuel during the last year was due chiefly to the mild winter and an improved gas service. Gas is supplied during the winter months at ten cents and during the summer at eight cents per thousand cubic feet. It is preferable for many reasons to other fuel, but it must be admitted it is more injurious to boilers than coal and less so than crude oil. The service of the past year was vastly superior to previous years.

Garbage House.—For sanitary reasons, a garbage house was erected north of the general kitchen. It is of sufficient size to receive the wagon into which garbage is placed, and accommodates numerous other containers. It is made of patent siding,

covered with cedar shingles and neatly painted. The floor is made of hard brick, laid in cement mortar, and in its center is a trapped cesspool with a sewer connection. The garbage is removed daily and the house flushed with water as required.

Other Minor Improvements—The butcher-shop and cold-store have been repaired and painted. A new cement floor was put in the former and some minor additions made to the equipment. A water-line of 1-inch pipe was extended to the railway station, a distance of 600 feet. The trench was made by the P., C., C. & St. L. Ry. Co. The purpose of this line is to supply water for sprinkling the flowers and lawns along the walk and at the station. The railway siding has been lowered 6 inches between the new building and the boiler house. Unfortunately it runs very near the west end of the rear center annex, and it was lowered to permit proper grading. The steam and hot-water pipes in the rear center, boiler-house and dynamo-room have all been covered. The materials cost \$273.23, and consisted of sectional mineral wool and molded asbestos for high-pressure lines and wool felt for low-pressure and water lines. Windows of the first floor of the rear center annex have all been screened and storm windows have been put in the most exposed places of six wards. To the engineer's workshop has been added at a cost of \$290 a Curtis & Curtis pipe machine for cutting and threading pipe 1 to 6 inches in diameter. Work heretofore done in the city is now more promptly turned out here.

Farm and Garden.—The condition of the farm and gardens has steadily improved during the period. Tiling, rotation of crops and liberal fertilizing have enhanced productivity both in quality and quantity. Land not under actual cultivation is in bluegrass and clover for dairy purposes. The woodland on the west side of the farm has been highly improved by the removal of defective trees and undergrowth. This formerly brought small returns, but is now well set in bluegrass and affords excellent pasturage. The fencing built two years ago is kept in good repair, but about 400 rods additional are still needed. The line fence on the west and part of the north side must be renewed during the ensuing year. About 100 trees in the park have died and been removed. A number of large trees—oaks and elms—which stood in the west field have been cut and made into lumber for general purposes. The proven-

der, with a few minor exceptions, consumed by the live stock is produced on the place.

The returns from the farm and garden are set forth in Exhibit No. 16 of this report. Estimated at the time of the consumption on the basis of the wholesale market price the value of all products of farm and garden amounted for the fiscal year 1894-95 to \$6,530.59 and for the fiscal year 1895-96 to \$7,159.12. The overflow during the past summer of Clear Creek, which runs through the garden, produced a severe loss. Winter vegetables were nearly all ruined. The loss of cabbage alone amounted to 20,000 heads, and not less than 2,500 bushels of potatoes, on account of continuous rains, decayed in the ground. The garden products have heretofore been ample, except a part of the potatoes, to supply the needs of the entire population, but recent losses will make it necessary to buy on the market during the coming winter. The large tanks formerly used for storage of fuel oil have been transferred to a site near the gardens, with a view to utilizing them for irrigating purposes when occasion demands. In the stable are ten head of horses and one span of mules.

Dairy.—This continues in successful operation and supplies all the fresh milk consumed in the institution. It should be enlarged, but the amount of available land will not justify an increase of the dairy herd. During the first year of the period 11,858 gallons of milk were produced and the second year 13,676 gallons. The herd is composed of twenty-seven head of cattle, seven heifers and five calves of pure and high-grade Jersey stock. The plan of silage feeding, introduced two years ago, has proven eminently satisfactory. The silo accommodates a sufficiency of corn ensilage for the entire year. During the first year of the period 210 tons of corn ensilage were consumed and during the second year 213 tons. For the ensuing year's consumption 225 tons have been stored. The small cottage erected two years ago for the use of the dairyman was destroyed by fire during the past year. The loss was about \$150. Another and somewhat larger cottage has been built at a cost of \$150. It has two small rooms, one of which will be occupied by an able-bodied patient, who will assist the dairyman. A well 6 inches in diameter was drilled near the dairy barn. It is 64 feet deep and cased with iron pipe for a distance of 34 feet, and the pump is operated by a Star windmill 35 feet high.

Piggery.—At the end of the period there were 93 head of swine in the piggery. Of these 50 head will be slaughtered during the year. The garbage from the kitchen sustains this stock, but all hogs are corn-fed from four to six weeks prior to slaughtering. There were produced for the first year 13,026 pounds of dressed pork. Early in the second year disease developed in the herd and afterwards no pork was used.

SEWERAGE SYSTEM.

Some improvements have been made in the sewerage system during the period, and without a complete change in its plan of arrangement it is probably as nearly satisfactory as can be made. Three additional intercepting pits, on the same plan as others heretofore constructed, have been put in the main sewer near Clear Creek. These basins have served fairly well for the collection of the sludge of the sewage, but can only be regarded as incomplete and a step preliminary to some plan of filtration. A few improvements of a minor character have also been made in the lines at various points, by enlarging, establishing vents and catch-basins. The sewage from the annex is carried into the old main line, which is ample in size for all immediate purposes. The major portion of the storm water, however, of the new building is carried into the cistern near the boiler house, rather than into the sewerage system. In the original arrangement the storm-water of all the buildings was unwisely disposed of through the same channel as the sewage. It is inexpedient and furnishes a serious obstacle to completion of the system by some improved method of disposal. The quantity of sewage is so greatly augmented by dilution in the storm-water that disposal by irrigation, filtration or precipitation in accordance with modern sanitary rules is impossible except at a cost wholly beyond the institution's means. It is a fundamental law of sanitation that the storm-water of all institutions and communities should be removed by an independent system of sewers. When this law is disregarded in any original construction it is only a question of time until obedience to it becomes imperative, and compliance then is at a greatly increased expenditure of money. Such a condition now obtains in this Hospital.

In common with many other institutions and communities, a formal charge of stream pollution has been made against this

Hospital. Within the past few months a complaint was filed by the property-owners along Clear Creek with the State Board of Health, charging that our plan of disposal of sewage into the stream had rendered it offensive and a menace to health, and praying for proper relief. This is the first complaint of the kind which has ever reached the management. A thorough inspection of the system and surroundings was made August 26, last, by Dr. James F. Hibberd, Secretary of the Wayne County Board of Health; Dr. T. Henry Davis, City Health Officer and member of the State Board of Health, and Dr. J. N. Hurty, Secretary of the State Board of Health. To these gentlemen the evils, always recognized by the management, of the system, incomplete for want of a method of thorough purification, was at once apparent, and they recommended that steps be taken to render the effluent harmless and inoffensive before it is discharged into the stream. To this end, plans of a system of purification by intermittent filtration, previously prepared, were submitted for consideration. As yet nothing has been done for want of funds to build and put into operation some system which will satisfactorily meet the requirements. It is estimated that \$8,000 will be necessary to make the provision, and I beg to recommend, through you, to the Legislature that a specific appropriation of the amount be made.

The sanitary condition of the Hospital is excellent in every particular. Nothing is left undone which promises prevention of disease or improvement in the appearance of order and cleanliness, both within and without the buildings. It becomes more difficult from year to year to maintain this status, owing to the steady growth of population, and particularly so in certain overcrowded cottages.

INSURANCE.

No insurance is carried upon the property of the Hospital, except on farm property and the five steam boilers. On the farm cottage, barns, silo, harness, vehicles, implements and live stock insurance to the amount of \$8,700 is carried in the Home and Aetna Companies; and on five steam boilers, \$20,000, in the Hartford Steam Boiler Insurance and Inspection Company. Other insurance is not carried for the reasons stated in previous reports, that insurance companies will not issue a general

policy; and, in view of the large number of buildings, it is impossible, at the rates demanded, to pay out of the limited maintenance fund the premiums of policies on each structure in sufficient amounts to be desirable and valuable. The recommendation of two years ago of some special legislation upon the subject of insurance of the property of the State institutions is repeated. There is need of a well-defined policy in this matter, and some provision for carrying it out. The majority of the institutions carries no insurance whatever, while the property of the minority is insured for a large amount. There can not be uniformity of action in this direction unless legislative enactment definitely outlines and makes mandatory the State's policy. I would, therefore, respectfully recommend the presentation of the question to the next Legislature in the hope that it may be fully and finally determined.

BOARD OF STATE CHARITIES.

The customary quarterly and monthly statistical reports have been made to the Board of State Charities, and the policy of reporting promptly deaths and serious accidents has been continued. Numerous visits to the institution were made during the period by the Secretary and the resident member, Mr. Timothy Nicholson, and in addition, annual inspections were made by the Board.

Once during the period an investigation, at my request, was made of a rumor, unfounded on fact, which had appeared in the public prints, charging that a patient's death was indirectly the result of an injury caused by ill-treatment. The investigation was prompt and thorough, and the facts revealed that death occurred five months after an accidental injury—a fracture of the femur—and the finding showed “no truth in the implied charge of ill-treatment.”

ACKNOWLEDGMENTS.

The management is grateful for numerous courtesies extended by the friends of the institution. The publishers of the *Wt. Wayne Daily News*, *Decatur Democrat* and *Greenfield Herald* have kindly furnished gratuitously copies of their papers to patients interested in general and local news. Mr. Grodzik and the band of the Indiana School for Feeble-Minded Youth

have twice visited the institution and pleased the entire population by two excellent concerts. The firm of Nicholson & Bro. continues to generously remember the patients by numerous donations of magazines and periodicals, and Mr. W. D. Page and Mr. E. Gurney Hill, members of the Board of Control, have kindly given books, flowers and plants. The clergy of Richmond has considerately and promptly responded to all requests for its assistance in conducting religious services and visiting the sick. Through the kindness and assistance of Hon. Henry U. Johnson valuable information has, on various occasions, been obtained from the departments at Washington.

To all these and numerous others, thanks are due.

All sections of the district are represented among the patients, some of whom are without friends and relatives, and the publishers of the weekly press of the district can add not a little to the comfort of these and others if they will kindly send to the Hospital one or more copies of their papers. Books, magazines, pictures and the like are always appreciated and relieve many a weary hour in a life which, in spite of every effort, has in it too much monotony. Local friends, gifted in music and dramatic art, are invited to lend their assistance in the entertainments for the patients. The assembly hall is large and the stage ample and well equipped. These are at the disposal of any of our friends inclined to aid us in entertaining the inmates.

ORGANIZATION.

The general plan of organization remains as at the beginning of the period. A few changes on the official staff are to be reported. After a faithful and efficient service of more than two years, Dr. William S. Tomlin, Assistant Physician, resigned April 30, 1895, to enter the general practice of his profession in Indianapolis. I am indebted to him for excellent and valued assistance, and am pleased to observe the degree of success attained and merited in his new field of labor. The vacancy thus created was agreeably filled by the appointment of Dr. Frank F. Hutchins, formerly in general practice in Indianapolis, and Lecturer on Anatomy and Minor Surgery in Butler University. The excellent character of his service has more than justified his selection and the high endorsements on which it was based. Mr. E. E. Howell, Storekeeper, after an incumbency of nearly four years, resigned January 1, 1896, and was

succeeded by the promotion of Mr. William Alderson, formerly Supervisor. To accept a more lucrative engagement, Mr. Alderson resigned May 1, 1896, and was succeeded by the appointment of Mr. Will P. Edmonson, who continues to fill the position in an acceptable manner.

Four changes, all by resignation after capable service of greater or less duration, have occurred in the position of Apothecary. In the order of the names, Mr. John H. Miller, Jr., Mr. George B. Sloan, Mr. H. Peterson and Mr. Harry Best have served ably in this position. Mr. Best remains in the service.

Dr. Clinton T. Zaring, Senior Assistant Physician; Mr. John P. Thistlewaite, Steward, and Miss Minnie Young, Superintendent's Clerk, continue in their respective official positions, and I am grateful to them for loyal and competent aid and support and the general excellence of their work.

I appreciate the earnest effort of the heads of departments, the attendants and employes, to perform the duties assigned fully and faithfully. Their devotion, directly and indirectly, to the welfare of the patients—the chief and only aim of the institution's existence—has, with few exceptions, been constant and commendable.

MERIT SYSTEM.

The operation of the law recognizing and legalizing the merit system in this and other benevolent institutions is successful and satisfactory. The State is to be congratulated for this step in the right direction. With a single exception, no State in the Union has embodied in legislative enactment so clearly and positively this essential principle of successful management.

CONCLUSION.

In conclusion, I beg to thank you for your liberal policy, always wise and just, which has uniformly supported and aided me through the busiest period of the institution's history. Duties and responsibilities, numerous and exacting, were made agreeable by your confidence and kind consideration.

Respectfully,

S. E. SMITH,

Medical Superintendent.

Easthaven, November 10, 1896.

By counties	46	23	69
Total	79	56	135

SUPPLEMENTARY MEDICAL TABLES.

Medical Tables A-G are supplementary and are adopted upon the recommendation of the Committee on Statistical Tables, of the American Medico-Psychological Association at its session of 1896. The classification does not conform fully to that heretofore in use in this Hospital and for this reason a period of one year only is covered by this tabulation of the results of treatment. Only the cases present November 1, 1895, and those admitted during the fiscal year ending October 31, 1896, are considered in these tables.

It is the purpose to use these forms for future reports, independently of the preceding tables, which will appear as heretofore. While these are incomplete and of little value in themselves, they furnish a starting point in the history of this Hospital for the recently adopted tables.

TABLE A.

Results of Treatment in Presumably Curable Cases, Fiscal Year 1895-96.

	CURABLE CONDITIONS.																			
	PRESENT AT BEGINNING OF YEAR.					ADMITTED DURING YEAR.					TRANSFERRED FROM OTHER GROUPS.					UNDER TREATMENT DURING YEAR.

HERBERT DEARDORFF, Storekeeper.

TRUSTEES' REPORT.

FORT WAYNE, IND., October 31, 1896

To HON. CLAUDE MATTHEWS, *Governor of Indiana* :

We have the honor to present the Eighteenth Annual Report of the Indiana School for Feeble Minded Youth, for the fiscal year ending October 31, 1896.

The year has been one of steady progress in all departments. The buildings mentioned in last year's report as under construction have been completed. The extension of the hospital not only gives us ample room without crowding the wards, but also affords some small rooms for special cases of sickness, which were very much needed.

The addition to the old farm house makes room for forty-seven boys on The Colony. By a change in the arrangements of the main building, this has enabled us to accept a number of the most pressing of the many suspended applications for admission, giving the preference to those from counties whose quota has hitherto not been complete.

The total increase of enrollment since the last session of the Legislature has been seventy-one, or a little more than fourteen per cent.

With an appropriation reduced by over $12\frac{1}{2}$ per cent., and the fact that a deficiency of revenue in any case was almost unavoidable, if the standard of care should be maintained; it was only after much hesitation that we decided to accept as many of the most pressing applications as it was possible to provide room for. In doing so, we must depend upon the benevolence of the Legislature of 1897 to restore at least a portion of the maintenance fund reduced by the Legislature of 1895.

Besides the increased cost for maintenance and the new furniture necessitated by the larger number of inmates, there have been several other extraordinary expenses during the year that have been unavoidable and for which we must ask a special appropriation. These include the heating and completion of the hospital addition, not included in original estimates;

insurance (made obligatory by our organic law) this year renewed in three-year policies; rewiring and repairs of the electric light plant, necessitated by the action of the National Board of Underwriters; repairs to the roof, the boilers, and other parts of the main building; a large barn and other buildings on the farm that could not be postponed over another winter without serious loss and inconvenience, and other items set forth in detail in the report of the Superintendent. The total amount of these extraordinary expenses has been \$12,243.07. Of this amount about one-half has been already paid from our reduced maintenance fund, and the remainder is still outstanding, to be paid during the coming year, some of the repairs being still in progress.

We respectfully ask for a special appropriation of \$10,000, payable in 1897, to make up the inevitable deficiency of the years 1896 and 1897. This amount is less than one-half of the reduction made by the last Legislature, and it will require strenuous economy and reasonable success with our farm, to come out even at the close of 1897, if this shall be allowed.

It is possible that we may be criticised from some quarters because we do not make room for new cases by discharging a large number of our inmates who have learned all that the school can teach them, and have arrived at the age of manhood and womanhood. We should answer the criticism by saying that the experience of many years has abundantly confirmed us in the opinion that the vast majority of our inmates should here find their permanent home. We are satisfied that no money expended by the State is used more wisely than what is spent in the care of the feeble minded, that every dollar expended in their custodial care by the present generation, means many dollars saved by the next. We are also convinced that under the present system of permanent care a reasonable number of our inmates are made almost, if not quite, self-supporting with us, where their labor can be utilized in the care of the more dependent, while if these same inmates were dismissed from our controlling care, they would be not only useless but mischievous outside.

To gain the greatest good for the State that this institution can effect, a very large increase of its capacity is necessary. We believe that the time is ripe for beginning a systematic extension of this work upon a comprehensive plan. We be-

lieve that public opinion has been awakened to a large extent, and that the time is coming very rapidly when a State which does not protect the idiotic and feeble-minded among its citizens from the results of their own uncontrolled impulses, and from the abuse of evil men, will be considered far behind in the progress of civilization. We believe, and our belief is sustained by many years of experience, that such care as we indicate above is not only best for the defectives, but is the only wise, humane and economical thing for the State to do.

In proposing a definite system of extension based upon our present plant, we have carefully studied the various classes to be provided for. We would not propose to erect any one institution which should be for all time of sufficient capacity for our great State, since we think that would necessitate a much larger plant than can be wisely and economically conducted under a single administration. According to the best statistics at present available, viz.: the U. S. Census of 1890, there are not less than 5,700 idiotic and feeble minded persons in Indiana. Of this number certainly 50 per cent., and probably more, *ought* to be in the care of a State institution. Notwithstanding that we have admitted seventy-eight new inmates since the publication of our last annual report, we have still eighty-six applications on the suspended list, and new applications are being made every week. We therefore present a brief statement of what we think this present institution might wisely be allowed to grow to in the next few years.

We have to consider the original estate and the colony which was commenced last year. Upon the original plot, fifty-five acres in extent, we now have accommodation for about 500 inmates. The present buildings are well suited for the care of the better grade children and the small children who go to school. We would propose to add upon this ground four detached cottages, each of a capacity for 100 inmates. Two of these should be for the lower custodial grades, whom the State law directs we shall keep separate from the better grade, and the other two should be used for epileptics. This would give a total on the present grounds of about 900, and would be all that there is room for here. The advantages of the cottage plan for the grades mentioned above are too well known to need rehearsing by us.

Upon the colony we should propose to erect two groups of buildings—one group of cottages, with appropriate central buildings, to accommodate 250 custodial women; another group to take care of 150 grown-up boys. As we have in the colony 255 acres of land, and as it is separated by natural features so that each group can be out of sight of the other, we consider that we have room there for the number mentioned of these classes. If this plan should be carried out, it would bring our entire capacity to about 1,300. This we believe to be the extreme limit of any single institution which can be wisely and economically controlled by one administration. The next step beyond that will be to construct another institution in another part of the State.

We need hardly say that it is not our intention to ask the present Legislature for so large an appropriation as would be necessary to complete any such plan as outlined above, but we think it is right for us, in asking for extensions, to state in this manner what we think our complete plan ought eventually to include. We urgently need at the present moment the two cottages for custodials. These ought to be well built, in a very substantial but a very plain manner. They can be erected, equipped and furnished for about \$325 per capita, and we would respectfully ask a special appropriation, one-half available during the fiscal year ending October 31, 1897, and half during the fiscal year ending October 31, 1898, of \$65,000, for this purpose. We believe that it will be more profitable for the State to make appropriations of such a nature from year to year than to make a very large appropriation at any one time, but we believe that the time has come when we ought at least to begin with one cottage for the custodials, and subsequently increase our capacity by not less than 100 inmates per annum.

We need not say that if the increase of accommodation asked for above shall be granted, we shall need a larger maintenance fund. The appropriation for the fiscal years of 1896 and 1897 was very much less than for the previous two years. Our expenses have been much less, also; but as we have increased our enrollment, we have been compelled to ask for the deficiency appropriation mentioned above. For the next two years, if our number shall remain about the same, we shall need \$80,000 per annum. If our number shall increase by the building of new cottages, as outlined above, we ask for

\$90,000 per annum. In considering appropriations it must not be forgotten that our buildings are now getting to an age when the necessary cost of repairs naturally increases. We may expect an annual repair bill of about \$3,500 from this on.

The reports of the Superintendent and other officers which follow contain much of interest. Although the financial returns from the farm have been less than we hoped for during the past year, yet the report of the colony, on the whole, is satisfactory. Just as soon as the Legislature shall see fit to grant an extension of accommodation, we are confident that still better results are not only possible, but practically certain.

The health of the institution has been remarkably good, and considering the increased enrollment the death rate has been proportionately less than for many years past.

On the 29th of May last Alexander Johnson was re-elected Superintendent for a term of three years, and it gives the members of the Board great pleasure to state that Mr. Johnson has not only given the very best satisfaction, but by his careful management the institution has been brought up to a standard of excellence equal to any in this country. We also desire to testify to the efficiency of the Matron, Mrs. Alexander Johnson. The experience of three years has demonstrated the wisdom of the selection of a man for Superintendent whose wife is qualified for the position of Matron, such a combination being almost necessary for the management of such an institution. Mrs. Johnson is very kind, and acts as a mother to the children of the home.

The other members of the staff are all worthy of commendation, and it gives us pleasure to speak of their excellent worth and qualifications.

Respectfully submitted,

E. A. K. HACKETT, *President.*

JOHN M. SPANN, *Treasurer.*

MRS. LAURA H. BASS, *Secretary.*

Trustees of the Indiana School for Feeble-Minded Youth.

SUPERINTENDENT'S REPORT.

To the Board of Trustees :

I have the honor to present my fourth report, being the eighteenth report of the institution.

INCREASE OF POPULATION.

Notwithstanding that the report made a year ago announced that the School was completely full, we have taken in during the year 78 inmates, and have only lost by death, discharge or withdrawal, 29. Our actual enrollment, October 31, is 553, and there are acceptances now outstanding which will bring up our number to 563 by the end of November, 1896.

The additional room for this large increase of population has been gained by a readjustment of the divisions and the completion of the addition to the farm house. We have made room on The Colony for forty-seven of the larger and older boys. If we had then simply filled the places of these boys in the house by admitting others, the disproportion between the sexes, caused by the original construction of our buildings, would have been increased. We, therefore, in March last transferred the inmates, placing the girls in the west and the boys in the east wing. We thus made room for a number of additional girls, chiefly of the custodial and semi-custodial classes for whom more than for any one else the paternal care of the State is an imperative necessity if they are to be controlled and protected.

The numbers of the sexes are now more nearly equal than they have been at any previous time since the institution began. There is still a slight preponderance of boys, and a large preponderance of boys in the list of applications pending. The results of the change of wings upon the discipline of the house has been rather beneficial than otherwise. As a result of the change we were able to gain the use of a much needed associate dormitory for epileptic girls. This was fitted up with neat iron beds, the mattresses and pillows for which were made in our own mattress shop. In purchasing furniture for the new departments, we have given the preference to iron in all cases.

THE SCHOOL.

The methods and practice of this department continue to improve from year to year. This year we have to report an increase in classes for physical exercise and music, especially for the custodial grades. The Principal's report on another page contains some interesting details of the newer methods adopted, with their results.

THE MEDICAL DEPARTMENT.

I am pleased to be able to report that our medical department is in an eminently satisfactory condition. We have never had less sickness nor a lower death rate than during the past year. The Physician's report, which is appended, will be found very interesting.

THE MATRON'S DEPARTMENT.

This continues very satisfactory. The children's clothing is being well and economically cared for. We continue, as in the past, to make everything that the children wear, except their hosiery, hats and caps and knitted underwear. The amount of canned goods, preserving and pickling is larger than ever before, and we hope very soon to reach the point of doing all this class of work for ourselves. A numerical statement of pickling and preserving for the year appears upon another page, and will give a slight idea of what is done in the kitchen. No more common leak occurs than in the direction of wasted food, and no department needs more constant oversight. Our cold storage is now in good condition, and the closest watch is kept to avoid waste of food supply. The amount of slop sent daily to the hog-pens is considerably less than formerly. The expense of rebuilding our cold-storage has probably been saved twice over in the past summer.

A recent successful experiment in slow cooking, by which the principle of the Aladdin oven has been applied to steam kettles, is of interest. All foods needing long cooking, such as grains, soups, stews, etc., are now placed in steam kettles, the steam turned on and the food brought to a boiling point; the whole kettle is then shut up tightly in a heat-proof boxing, the steam is shut off and the food slowly cooks by the heat already received. Cracked wheat for breakfast is put on

at 5 P. M., brought to a boil in fifteen minutes, it is then shut up tightly, with no further heat or attention, and at breakfast time next morning it is hot and perfectly cooked. The same system is employed in making soup and stews; the value of the bones and other usually waste material is all developed by the slow-cooking process. Besides a saving in the use of material, there is a still greater saving in the supply of high-pressure steam, as fifteen minutes' of steam supply does the work which formerly required several hours of the same.

THE INDUSTRIAL DEPARTMENTS.

A brief statistical report of the work of each of these departments appears on another page. I would call especial attention to the carpenters and wood-working department. With no outside help except that of a few carpenters, we have constructed buildings of a high order of merit. Our new barn at the farm has received much praise from all who have seen it. It is an octagon of eighty feet diameter, with a self-supporting roof, and presented some problems in construction, which we were pleased to think our regular staff of employes could successfully solve.

Our shoe shop continues to supply the foot-wear for all the children, and to teach several new boys each year a good, useful trade.

Our mattress shop is one of the most valuable adjuncts, and the band of which our mattress maker is also the leader and instructor is simply invaluable.

The painting department is kept busy and helps to make our house presentable and creditable to the State at all times.

The engineer's department cares for the heating, lighting, water supply and sewerage. We have a larger amount of help in this department than formerly, but we are doing a great deal more, both of repairs and new work, by our own help, instead of by outside contracts, so that the actual expense is rather less than more. Our rule in all repairs is that timely attention to small things saves the need of doing large ones.

REPAIRS AND MINOR IMPROVEMENTS.

The addition to the hospital was completed in December last. This gives us now good accommodation for all our sick, and includes a number of small rooms for special cases which were urgently needed. The new part of the hospital was equipped with neat iron bedsteads and presents a pleasing appearance. The total expense for furniture for the additional inmates in the west wing and at the farm and for the hospital has been about \$750. All tables, cupboards, etc., have been made in the institution shops, as well as the mattresses and pillows. The general repairs of the house have been kept up. As the building gets older, the expense of this must inevitably increase from year to year. Owing to the diminished appropriation, only such minor improvements as were imperatively required have been made. The cold storage was internally rebuilt at a cost of \$336.43; repairs to the boilers have cost \$259.70; repairs on roofs, \$287.46. The general repairs and minor improvements which have been made by the labor of our own employes, including extensive repairs to our plumbing system, additional water-closets, a quantity of tile draining necessary to protect our gravel roads and walks, has amounted to \$2,457.56. We have expended for shade trees, berries and hedge plants, \$223. The planting done was much less than we would have liked to undertake had funds been available for the purpose.

An inspection of our electric lighting plant, made by order of the National Board of Underwriters, disclosed a dangerous condition of much of our wiring and other fittings. The necessary repairs are being made under the direction of our chief engineer, at an expense up to date, for materials and extra labor employed, of \$514.60. The total expense will reach about \$650 by the time the work has been completed. Sundry items on the hospital, not included in the original estimates, have cost \$287.39. The heating plant for the addition to the hospital is a hot-water system, and was put in by Messrs. Hattersley & Sons, of Ft. Wayne, who kindly offered to allow their bill for the same to go over until the next session of the Legislature. This bill, which amounts to \$1,650.00, is still pending, not having been allowed by the Board of Trustees.

Another unavoidable extraordinary expense has been for the renewal of our fire insurance. This has always been carried

in three-year policies. During the past fiscal year a large number of the policies ran out. In renewing them we took the opportunity to revise all our policies, and they are now concurrent in every detail. The total amount of insurance carried is \$90,000, which is about one-third of the value of the buildings and furniture. The amount paid for insurance has been \$1,815.79. All the above mentioned extra expenses have been incurred at the main institution. Expenses of a similar nature at the farm appear in the report of the Colony.

THE HOME GARDEN.

Here the year has been a very satisfactory one. The excessive rainfall, which hindered the farm work and destroyed some of our crops there, was rather beneficial than otherwise to the sandy knolls upon which our home garden grows. Our small fruits, of which a large acreage was planted in 1893, have done well this year. Never have we had such profusion and so great a variety of vegetables and fruits. A statement of the garden product is given on another page.

The apparently very low cost of food supply, which appears in The Bulletin of the Board of State Charities as that of this institution, comes from the fact that we grow so large a proportion of what we consume, while only what is purchased is charged as food supply cost.

THE FARM COLONY.

When last year's report was made we had 13 boys on the farm. There are now 47 living there regularly. Of these 18 belong to our brighter or industrial grade. The remaining 29 are of the upper custodial class. All of them are usefully and healthfully employed. Although our buildings are simple and very plain, and the house at Colonia lacks many of the modern improvements enjoyed at the home place, yet we have no boys among our inmates so well satisfied and so healthy as the farm boys. The life they lead is a simpler and more natural one than that of a large institution. "Their feet are nearer to the ground."

During the year our expenses at the farm have been much larger than our income from it. This has been caused by the amount of improvements that have been made. These have

all been of such a nature that they could not be longer postponed without serious loss and inconvenience. They have included completion of the addition to the farm-house, \$400; wells and water supply, \$776.18; cow barn to contain fifty head of stock, with abundant mows for fodder and grain, \$2,226.42; this is a very handsome and well built barn; new fencing, \$67.50; tile draining, \$276.62; chicken house and yard, \$115; fruit trees, \$100.50; a total for permanent improvements of \$3,684.72, in addition to the amount charged to the fund for land and new building.

During the middle of summer our farm crops were seriously injured by excessive rains. Our principal loss was to the potato crop, of which we had barely one-third that we expected, and owing to the scarcity of barn room our wheat, oats and rye were caught in the rain, while waiting in the field for the threshers, and very seriously injured. To add to our losses, the barn on the farm which we rent took fire at 4 o'clock one morning, and our year's crops of hay, oats and wheat, as well as some valuable machinery, were all destroyed. The net loss, over and above the insurance collected, was \$503.

The result of the unfavorable season and the fire has been that although we have made some profit, yet our farm has not given us nearly the help we had hoped for, and that it will most likely give next year. Since building the new barn we have ample room to save the crops we make. Land cleared and drained this year with much labor and expense will probably yield a good return next season. Of course we may be disappointed. A farmer is at the mercy of the elements. A swine plague or a cattle disease may take away in a few days, as the fire did in a few minutes, the profits of the labor of an entire season.

NEEDED MINOR IMPROVEMENTS.

Among the more urgent of these are an extension of the laundry, to give room for an additional steam washer and a larger dry-house; a larger root cellar, so that we can better care for the garden crops; a room fitted up for canning and preserving, with a good, cool cellar in connection therewith; an additional ice-house, so that we may be able to store two years' supply when we have a good ice season; an extension of the general kitchen; an improved store-room; a small cot-

tage in a quiet corner of the grounds, containing four or five sleeping-rooms, for the use of our people who are on duty at night. These improvements we can make by our regular help with little outside assistance, without asking for a special appropriation, if our former maintenance shall be restored and the deficiency asked for for this year be granted.

EXTENSION OF THE INSTITUTION.

None of the above-mentioned improvements contemplate extension of accommodation, and our present number of 563 seems to be the limit until we have more room in some way. Possibly the best plan for immediate extension would be by the erection upon the grounds, not too far from the main building, of two cottages for the custodial grades, one for girls and one for boys, each to accommodate 100 inmates. Properly equipped and furnished these would cost \$32,500 each. This plan of building custodial cottages has been adopted by most of the large State institutions, and is probably the best and cheapest way to extend accommodations. Our present buildings, although well adapted for the brighter grades of school children, do not give the kind of rooms we need for the custodial departments. When the custodials are properly provided for, the next class for whom special provision should be made is the epileptics.

PER CAPITA COST.

Taking into account every source of revenue, and every expenditure for all purposes, excluding only those for improvements which have given permanently additional value to our property, the average per capita cost for the past year has been about \$138. We have long felt, and have frequently asserted that a reasonable proportion of our inmates can be made actually self-supporting, and a careful analysis of the different classes of children will show that this has been already gained with a few, and that the number is increasing every year. The enrolled inmates are now divided as follows: Enrollment, 281 boys, 272 girls; total, 553. Attending school, 139 boys, 182 girls; total, 321. In the industrial departments, 82 boys, 75 girls; total, 157. Of these, 22 attend school half time. Upper custodial department, 89 boys, 77 girls; total, 166. Of these, 112 attend school part time, and about the same number do

some useful work in the domestic departments. Lower custodial department, 38 boys, 51 girls; total 89. Of these, 51 attend school part of the time, but none do any useful work.

The following estimate of the per capita cost of the different grades of children during the past year will be found interesting. It must not be taken as anything but an approximation, since the value of the work performed by each is difficult to estimate, and the relative cost for food, clothing, attendance and tuition, also varies indefinitely. The figures upon which the estimate is based are the total expenditure less the cost of permanent improvements, and the actual daily average attendance for the year. This gives a considerably higher per capita than the method frequently followed of basing per capita upon the total enrollment without allowing for temporary absences on vacation, etc.

Industrial Department—		No.	Per Capita Cost per Annum.
Fully self-supporting.....	30,		Nil.
Partially self-supporting, not attending school	93, Average		\$75.
Partially self-supporting and attending school half time	20,	"	160.
Custodial Department—			
Upper custodial grade, not attending school	40, Average		\$125.
Upper custodials, attending school	90,	"	150.
Lower custodial grade	87,	"	150.
Educational Department—			
Younger children and those attending school full time.....	146, Average		\$200.

In closing this report I would express my hearty appreciation of the employes of every grade whose faithful and efficient service has made possible the success which has been achieved. I would also acknowledge with gratitude your continued appreciation of my efforts to discharge with entire faithfulness the onerous duties of this office and to promise you my best and undivided efforts to make our common work successful in the highest degree.

Very respectfully,

ALEXANDER JOHNSON,

Superintendent.

INDUSTRIAL DEPARTMENTS.

In Charge of the Matron.

PRINCIPAL'S REPORT.

Mr. Alexander Johnson, Superintendent :

DEAR SIR — I herewith submit the report of the Educational Department for the fiscal year ending October 31, 1896 :

The schools are in a flourishing condition. We have demonstrated that much work which was experimental last year is now entitled to be placed in the regular school curriculum. The greatest improvements have been made along the line of physical culture. Formerly we had a graded series of exercises advancing step by step. This was used in all classes, each taking that which was most suitable. We know that the great aim of any education is to teach the child, not to teach some branch of learning ; therefore, after finding what the children need, they are classified, and each class now has a series of exercises designed especially for it. As soon as a child gets all the good possible from the class to which he belongs, he is advanced.

The lowest, or custodial class, comes to school for games and exercise only. They are much given to automatic, purposeless movements, such as are seen in young children, but the feeble mind having been too weak to receive other impressions, the body followed the first stimulus received, the chain of habit was formed, and now whenever the mind is not under direct stimulation, these movements are made automatically. We strive to direct them to some definite end, and persistent, earnest effort is beginning to show its result. Small, colored wooden balls are rolled across the floor. The bright colors and the rattling noise stimulate the senses, and the child who needed to be pushed from place to place or led by the hand is now found chasing these balls across the room. Large canvas balls stuffed with hair are used by these children. Many are so inert that when the ball is thrown at them they will not put up their hands to protect themselves. After many repetitions the instinct of self-preservation asserts itself, the hands ward off the ball, step by step advancement is made until the ball is caught, thrown back, and even simple games played.

The semi-custodials easily divide into two classes—those who can make a perceptible mental and physical advancement and those whose physical improvement only can be seen. I shall speak first of the latter class. Their first exercises are with large, soft balls, weighing about two pounds. These are held with both hands above the head when throwing; thus the muscles of the chest, arms, hands and legs are all brought into play.

The calisthenics for this class are very simple, Beginning with trunk exercises, they approach the extremities, following the order of development of the muscle centers from the large to the small. In many cases it is necessary to take the passive arms and raise and lower them in time, saying aloud, “Up—down, up—down,” etc., and after many trials the brain associates the word with the action until finally at the word of command the exercise is performed. About twenty-five girls of this class do simple exercises with the dumb-bells.

The shambling, slovenly gait becomes more graceful and precise by the use of the floor ladder. A sixteen-foot ladder with flat rungs is placed upon the floor. A regular course of exercises is followed; on the rungs, between the rungs, one foot on, one off, straddling and crossing, forward and backward, these classes stagger along, making a gradual advancement until at last most of them improve perceptibly. In addition to the above, the upper class of semi-custodials have balancing exercises; walking on the edge of a thick plank or the rungs of a ladder, one end of which is raised a few feet from the floor. They use the balls and bean bags in games, the rule of the game proving an excellent disciplinarian. They also use the horizontal ladder. Placed just above the child's reach, once he catches it he must hold on or fall. First he swings by his arms, then reaches the next rung, and gradually travels the entire length of the ladder holding by his hands.

The brighter classes advance still farther in this work. During the past year our boys' class in dumb bells, and the girls' classes with ribbons and clubs, made a very creditable showing at the public entertainment. Systematic calisthenics are carried on in every class. Three of the boys' divisions have special exercises in their dormitories every morning upon arising. Before leaving this subject, I must again urge the necessity of a gymnasium. Our children do not need general exercise so

much as special exercise, and apparatus is very necessary. What we now have has been made here, but we should have much more which our shops can not furnish.

MUSIC.

One can not see the faces of these children while the band is playing without realizing the great importance of music. It appeals most strongly to the lower classes. It soothes and quiets them, and some will hum tunes which they have heard played or sung. There is hardly a branch of the school work in which it does not play an important part. It accompanies all of the calisthenics, but shows, perhaps, its greatest value in the teaching of speech and articulation. A tune is hummed and sung by the teacher over and over again; at last comes some response; the lips which have never spoken, part, and the tongue, till now silent, finds itself forming indistinct sounds. Children who can not speak need this training while still young, as the percentage of those who learn to speak after the age of seven years is very small. When set to music, syllabic combinations impossible alone are easy. Stammering and stuttering are avoided.

Two afternoons each week all of the school children and the girls from the industrial departments assemble in the school hall for singing, and every morning for half an hour about sixty of the semi-custodial girls form a class for the same purpose. There are two classes, one of boys, one of girls, formed of the best voices, who meet in the chapel one night each week.

Our piano pupils continue to advance. We have now three or four who can play for the calisthenic classes and the dances, and several furnish music for Chapel on Sunday afternoons. They are learning to read by note, and many of the selections are classic. Our band is as popular as ever. A short time ago some of the citizens presented the band with a beautiful banner as a token of their appreciation of the music they so often hear.

KINDERGARTEN.

The value of kindergarten work can not be overestimated. All of our school classes use it to some extent. Two classes are purely kindergarten. The gift work is very hard for our

children to understand, but the occupations are excellent, and are such an adjunct to primary teaching that now the public schools are realizing not only their worth, but the necessity of using them. The games are particularly useful to us. Attention, politeness, obedience, affection—in all of these the child is trained when he thinks he is but playing.

PRIMARY SCHOOLS.

The primary schools more nearly approach the public school system. The "word method" is used entirely in reading. Penmanship, being from a psychological standpoint an act of imitation, is comparatively easily learned, but the complicated, muscular coördination required makes it an excellent exercise, particularly for the lower classes. The vertical system, of course, is used, it being easier to teach, easier to write and easier to read. Only blackboard work is used the first year. Arithmetic is the great stumbling block. Abstract work is almost impossible. Devices such as corn, beans, beads, etc., are necessary. The first number to be taught is 2, then 4, then 1, etc. The group method is used in all classes. Addition and subtraction are taught together; also multiplication and division. Only exceptional children are able to do good work beyond the four fundamentals, and problems involving combinations requiring more than one step in the process of reasoning are rarely done.

With most of our children drawing is done very slowly and with much uncertainty. They do not understand perspective, and need a model. In drawing, even more than in writing, the children are taught to use both hands. The mental benefits derived from the equal use of both hands are sufficient to warrant more instruction in that line in the common school. About 88 per cent. of normal children are right-handed, and nearly all of the remaining 12 per cent. are left-handed. With feeble-minded children, however, only 72 per cent. are right-handed, 12 per cent. are left-handed, and the remaining 16 are ambidexterous.

Language is always given as an art. The reproduction of stories, description of pictures and scenes, correct forms of expression at all times, these constitute almost the entire work in this branch.

History and geography can not be taught together as well as to normal children, but the opportunity to correlate them is never lost. The facts of history are grouped around prominent characters. Geography is best taught from real and imaginary journeys.

SPECIAL CLASSES.

We have fifty-four children receiving special instruction in speech. Thirty-five of these are learning to talk, and nineteen to articulate properly. With the former we begin with the simplest sounds, am, ma, ba. If any part of the articular organs is weak, gymnastics are given to strengthen it. Bright and attractive objects with easily pronounceable names are placed before the children. When they say the name they are permitted to play with the object. We have a special class in color work for boys and another for girls.

Twenty girls are learning fancy needle work, and nine boys hammock weaving.

AMUSEMENTS.

The divisions are supplied with blocks, balls, checkers, dominoes, etc., and the brighter ones with parchesi and chess besides. Three nights each week the teachers devote one hour to amusing and entertaining the children. Children who work in the Industrial Department have singing and drills one night each week. There is a regular entertainment for the children every Tuesday night. One night each month is set apart for the celebration of the birthdays of all children born in that month. Here they have taffy pulling and games. The dances have continued to be a great success. The girls dance every Wednesday, and the boys every Thursday night. All of the festivals, Christmas, Thanksgiving, Harvest Day, Hallowe'en, etc., are celebrated in an appropriate manner. During the past year the children gave two entertainments to the public, both of which were successful. The Fourth of July saw the greatest celebration in the history of the institution. In the morning fire crackers were passed to the children, and there was a patriotic address, also singing of patriotic songs by the children. After dinner races, jumping, etc., were indulged in, the winners proudly bearing off their prizes. After supper

there was a masquerade parade on bicycles and wagons, and the day closed with a grand display of fireworks.

Among the numerous factors of the problem of education, probably none is attracting such widespread attention as that of child study. We have been using it for some time as a means of classification, but its greatest value is to the teacher, and indirectly through her to the pupil. We emphasize the fact that we must teach the pupil not the subject, that we must know our pupils before we can teach them, that we must train our eyes so that we may see as the child sees, and that we must extend a heart full of genuine sympathy and love to our children, for, "If sympathy for the child does not develop, we can not grow in our power to serve him. No man or woman whose heart is not touched by the cry of a child, or whose eye does not kindle as he hears its merry prattle, is fit to become a teacher. Sympathy, rich and warm as the blood that flows through the veins of youth, tender and spontaneous as a mother's love, should crown the other graces that make up the ideal teacher."

In conclusion I wish to thank the teachers for their energy and patience, and you for your kind encouragement and assistance.

Sincerely,

EDWARD R. JOHNSTON,

Principal.

PHYSICIAN'S REPORT.

*To Mr. Alexander Johnson, Superintendent,
Indiana School for Feeble-Minded Youth:*

DEAR SIR—At your request, I submit the following report of the Medical Department of the Indiana School for Feeble-Minded Youth for the fiscal year beginning November 1, 1895, and ending October 31, 1896:

During January, of 1896, the new addition to the hospital was so far completed as to permit occupation, and the previously overcrowded condition of the hospital wards was thus relieved. The hygienic conditions of the building are now almost ideal.

The addition also provides an excellent operating-room, well-lighted and capable of perfect asepsis, with conveniences for sterilizing instruments and dressings. These are now kept constantly ready for use, so that in case of accident no time is lost in preparation for operation.

The girls, who formerly occupied the second story of the old building, now occupy the first floor of the same, the boys being entirely provided for in the new part, and the rooms formerly used for the girls' sick wards have been converted into an examination room, drug room and laboratory.

In the examination room children from all departments of the school are seen each morning, examinations made, and the various ailments not requiring hospital care are treated.

In this room, also, on Saturdays, clinics are given by professors of the Fort Wayne Medical College to members of the graduating class of the college, in which careful studies of instructive cases are presented.

The drug room is well arranged, convenient, and always liberally supplied with standard drugs. Here we have also faradic, galvanic and cautery batteries.

The laboratory is small, but well lighted by day, and supplied with gas and electric light for night work. It is also supplied with hot and cold water. A fine Leitz microscope, with Abbe condenser and oil emersion lens is in daily use in this department, and during the seven months since the opening of the

laboratory many examinations of urine, feces, sputum, blood, etc., have been made for diagnostic purposes, as well as a large number of slides prepared for pathological tissues. The laboratory is also furnished with an excellent microtome and a good centrifuge.

Photographing of sections as seen through the microscope has been done by the medical interne.

There is much apparatus still needed for the completion of the laboratory, but the necessity for rigid economy has forced us to abandon some fields of investigation that might have proven valuable.

A well-stored reference library of medical works, including the leading magazines of the day, is of the greatest importance to one attempting to carry on original investigation or scientific work in institutions of this character. A small nucleus for such a library has this year been formed. I would venture to ask that the beginning thus made may be continued by a moderate appropriation from the maintenance fund each year for the purchase of books.

I wish gratefully to acknowledge that in spite of the financial pressure during the year just closed, the medical department has always received most generous consideration, and has never appealed in vain for anything that might add to the comfort and proper treatment of any patient.

In surgery considerable work has been done, the most important operations being as follows:

Operation for club foot	1
Operation for radical cure of hernia	1
Amputation through thigh for diseased knee joint	1
Amputation through leg for diseased ankle joint	1
Re-amputation of humerus	1
Excision of diseased glands	1
Amputation of finger	1
Amputation of toe	1
Skin grafting	4
Suturing of severed tendons	4
Setting fractured clavicle	1
Setting fractured metacarpal bones	2
Setting dislocated thumb	1
Section of contracted tendons	1
Operation for caries of ankle joint	1
Operation for mastoiditis	1
Operation for caries of vertebrae	1
Eye operations	3

A large number of smaller operations, such as the opening of abscesses and suturing of wounds, have been made; also about 40 much enlarged tonsils have been removed, and post nasal adenoid growths have been removed in a number of cases.

Through our connection with the Fort Wayne Medical College, we are fortunate in having secured as consulting physicians and surgeons the following well-known medical men who give their services free of cost to the School:

Dr. Miles F. Porter, Surgery.

Dr. K. K. Wheelock, Diseases of the Eye and Ear.

Dr. G. W. McCaskey, Nervous and Mental Diseases.

Dr. A. E. Bulson, Diseases of Nose and Throat.

The appointment of an interne who gives his service for the experience that he derives has made it possible for work to be done in the medical department that could not have been otherwise accomplished. The plan has proven highly satisfactory, and I would warmly commend it to other institutions of this character.

Another interne, who has given very satisfactory service, was kindly secured for us by the Dean of the Indiana Dental College at Indianapolis, so that for the first time we have had a resident dentist. He remained with us long enough to put in good condition, so far as that was possible, the teeth of every child in the institution. Hundreds of fillings, gold, amalgam and cement, were placed, and much other work done. The cost of this was slight as compared with what it would have been to have had the same work done in any other way. Many children who could not have been taken to town were thus enabled to have the care of a dentist.

The following is a list of the dental operations which have been performed:

Number of teeth extracted	375
Number of cement fillings	113
Number of amalgam fillings	580
Number of gold fillings	33
Number of Logan crown	2

The two internes mentioned above are appointed by competitive examination from their respective colleges; the medical and surgical interne for a period of one year, the dental interne

for a minimum period of three months. We hope to continue these arrangements, and extend thanks to the faculty of the respective colleges for their coöperation which has been very helpful to the institution.

We have been so fortunate as to escape all contagious diseases during this fiscal year, with the exception of a few cases of chicken-pox.

The general health of the institution is good, the free, outdoor life of the children contributing largely to this end. The hygienic conditions and excellent supplies, both of food and medicine in the hospital, have assisted much in the rapid recovery of most of the cases that have been treated there. Two hundred and fifty-nine different children have been in the hospital for treatment during the year. A few of these are chronic cases, and some are so young and helpless as to require constant hospital care, although not suffering from definite physical disease.

There have occurred but seven deaths during the year. They are tabulated below:

NAME.	Age.	DATE OF DEATH.	CAUSE OF DEATH.
Elzie Mills	8	December 21, 1895 . .	Cerebral sclerosis with epileptiform convulsions
Emma Cain	15	January 24, 1896 . . .	Status epilepticus.
Odessa Penrod	12	May 9, 1896	Diabetes mellitus.
Forest Allen	22	May 19, 1896	Edema of lungs from valvular heart disease.
Lulu Burkdall	10	July 13, 1896	Ulcerative endo carditis.
Anna Jacobs	22	August 28, 1896 . . .	Pulmonary tuberculosis.
Sylvester Everett . . .	18	September 1, 1896 . .	Cerebral sclerosis and hemorrhage, with epileptiform convulsions.

Yours respectfully,

DELIA E. HOWE,
Resident Physician.

W. C. GRIGSON,
Baker.

L. C. HIATT,
In Charge of Teams and Barn.

D. M. GILHOOLEY,
Chief of Night-Watch Service.

W. F. LYONS,
Second Night-Watch.

JAMES A. HICKMAN,
Third Night-Watch.

LADY EMPLOYEES.

MISS DRUSILLA HENRY,
Assistant Matron.

MRS. PHAIRIS W. BARRETT,
Assistant in Public Office.

MISS BETTIE BELL,
Teacher First Primary Grade.

MISS JENNIE CULBERTSON,
Teacher Second Primary Grade.

MISS ANNA S. RUSCHIZKA,
In Charge of Tailor Shop.

MISS LIZZIE DECKARD,
In Charge of Repairing and Darning Department.

MISS MAGGIE D. BARRETT,
Hospital Nurse.

MISS ELIZA NEAVILLE,
In Charge Ironing Department.

MISS EFFIE SMITH,
In Charge of North Side Buildings.

MISS IDA WOODMANSEE,
In Charge of South Side Buildings.

MRS. C. E. FOUNTAIN,
In Charge of Officers' Dining-Room.

MISS LAURA RAFFIGNONE,
In Charge of Officers' Kitchen.

MISS MARY KENNEDY,
In Charge of Boys' Dining-Room.

MISS CLARA VAN ARMEN,
In Charge of Boys' Kitchen.

THIRTIETH ANNUAL REPORT

OF THE

BOARD OF CONTROL

OF THE

Indiana Reform School for Boys.

PLAINFIELD, IND., November 1, 1896.

CLAUDE MATTHEWS, *Governor of Indiana*:

An act of the Legislature, passed on the twenty-third day of February, 1883, is now the law governing the Indiana Reform School for Boys. The act itself will be incorporated in this report for the information of such persons, interested in the School, as do not have ready access to the statutes of the State.

One section of the statute, it will be noted, provides that "the Board of Control shall, at the close of each fiscal year, make to the Governor a full and detailed report of the doings of said Board and of the expense of said institution and such other information relating thereto as may be interesting or useful to the people of the State."

Your own intelligent interest in the school and intimate knowledge of its work from personal observation; your familiarity with its aims and objects and the methods adopted for their accomplishment, almost render unnecessary the making of this report, in so far as it may be supposed to have for its object the supplying you with information.

It might well be condensed into the statement that the work of the School has continued steadily and satisfactorily during

the past year along the lines with which you are already familiar; that the general health has been good; that the farm has yielded satisfactory crops; that the schools and manifold industrial occupations have continued without interruption, and then conclude with the financial exhibit and the statement that by the practice of rigid economy the institution this year, as always hitherto, though operated on a decreased appropriation, has managed to live within its income, and that, too, without lowering the standard of efficiency. But the statute contemplates supplying such information relating to the school as may be interesting or useful to the people of the State. As the boys committed to this Reform School come from all over Indiana, it may be both interesting and useful to the people, very few of whom ever can visit it and learn of it from personal observation, to supply them, through the medium of this annual report, with needed information.

This may be useful to them in giving them a correct understanding of the reasons for the establishment and maintenance of such a school, the offenses that cause boys to be committed to it, what is done to and for them at the School and how they go out from it. Of equal or greater importance to the School itself and to the proper supplementing of its training and the crowning and completion of its work is it that the people at large should know what instruction and discipline the boys receive. Knowing all the facts, they may intelligently and helpfully take the graduates of the School to their homes, to their farms and factories. By employment and encouragement they can complete the work of merging them into the body of useful, honest and law-abiding citizenship.

ESTABLISHMENT AND EVOLUTION OF THE SCHOOL.

What is now known as the Indiana Reform School for Boys was originally established in 1868 on a farm adjoining the town of Plainfield, Hendricks County, on the Terre Haute & Indianapolis Railroad and the old National Road, fourteen miles west of Indianapolis. At the first it was known as the House of Refuge. Of the institution as it now is there was scarcely a prophecy in the original conception.

It was seen that many boys, and especially those in the cities, from evil associations and bad home influences and surroundings, were traveling that downward career always broad and easy of descent.

They were a danger to themselves and a menace to their several communities, the circle of their baleful influence constantly widening. And so this House of Refuge was established, chiefly with the idea of preventing the spread of the contagion produced by their presence.

They were gathered up and placed in the institution, not so much for their own welfare as for the good of others whom they were likely to contaminate if unconfined. Each one was taken away from his home as a decaying apple is taken from a pile, where the motive is to save the sound fruit, and with no especial thought about or concern for the one already partially decayed.

This was in 1868. That is not so very long ago, but it was the beginning of things in juvenile reformatory work.

Indiana's House of Refuge was one of the pioneer institutions of its kind in the country. In the evolution from that beginning Indiana has been constantly in the fore front.

In March, 1880, T. J. Charlton became the Superintendent. He has been at its head ever since, serving the State with increasing usefulness each year.

Under his intelligent guidance the School has become what it is to-day. One of the first things done by him was to change the organic law of the institution. This he did by securing the enactment of the law of 1883, which has continued to be the law governing the School ever since, and which made the present institution a possibility. That act is as follows:

THE LAW OF 1883.

AN ACT designating a name by which the House of Refuge for the Correction and Reformation of Juvenile Offenders shall hereafter be known; providing for the appointment of Commissioners and their compensation, and prescribing their powers and duties; regulating the commitments thereto, and for the more efficient and uniform government of said institution; authorizing the Governor to commute the sentences of boys under twenty-one years; declaring how the expenses of maintaining the institution shall be paid; repealing all laws in conflict with this act and declaring an emergency.

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana, That the House of Refuge for the Correction and Reformation of Juvenile Offenders shall hereafter be known as "The Indiana Reform School for Boys."*

SEC. 2. The general supervision and government of said institution shall be vested in a Board of Control, consisting of three Commissioners, to be known and designated as the Board of Control of the Indiana Reform School for Boys. The members of the first Board, to be appointed under this act, shall be Lewis Jordan, Levi A. Barnett and Hamet N. Helms, the first two of them shall hold their offices for the term of four years, and the last named for a term of two years and until their successors shall be appointed, confirmed and qualified. As vacancies subsequently occur in the Board, their successors shall be appointed by the Governor, by and with the advice and consent of the Senate, and shall hold their offices for the term of four years from their appointment and until their successors are appointed, confirmed and qualified. All vacancies occasioned by death or resignation of a Commissioner shall be filled by appointment by the Governor, subject to the approval of the Senate at its next succeeding session, and the person appointed to fill a vacancy shall be entitled to hold his office for the unexpired portion of the term of the person whom he may be appointed to succeed. Said Commissioners, before entering upon the discharge of their duties, shall take an oath faithfully to perform the duties of their office, which oath shall be filed and preserved in the office of the Secretary of State. Said Commissioners shall organize by electing one of their number President, and shall meet at least once each month, and as much oftener as they may deem necessary, and shall each receive a compensation of \$500 per annum, payable by the Superintendent out of the general appropriation, for the support of said institution, and no traveling expenses, or any other allowance, shall be paid said Commissioner or any of them.

SEC. 3. Said Board of Control shall appoint a suitable Superintendent of said institution, and all necessary subordinates, and fix their salaries. Said Board shall have power to make and enforce all such rules, regulations, ordinances and by-laws for the government and discipline of said institution as it may deem just and proper.

SEC. 4. Before entering upon his duties, the Superintendent shall give a bond to the State of Indiana in a sum of not less than \$10,000 with securities to be approved by said Board of Control, conditioned for the faithful performance of his duties as such Superintendent, and that he will faithfully account for

all moneys, property and effects entrusted to him as such Superintendent, and shall take an oath faithfully to discharge the duties of said office; said bond and oath shall be spread upon the records of the Board, and then filed in the office of the Secretary of State.

SEC. 5. The Superintendent shall reside at the institution, and have charge of the buildings and other property, and of the boys committed to said institution. He shall govern said boys in accordance with such rules and regulations as the Board of Control may prescribe, and shall employ such methods of discipline as will, as far as possible, reform their characters, preserve their health, promote regular improvement in their studies, trades and employment, and secure to them fixed habits of industry, morality and religion, and shall see that they are well instructed in all the elementary branches of an education.

SEC. 6. All purchases of supplies for the institution shall be made by the Superintendent at the best advantage to the State, and he shall take vouchers for the same; but such vouchers shall not be passed to his credit until approved by the Board. Previous to the regular monthly meetings of the Board, he shall prepare an estimate of the amount necessary for the expenses of the succeeding month, which shall be approved by the Board. Said estimate, together, with a monthly account current of the receipts and expenditures during the preceding month, and the vouchers for said expenditures shall be spread upon the records of the institution and then be filed with the Auditor of State, whereupon said Auditor shall draw his warrant on the State Treasury in favor of the Superintendent for the amount of said estimate, to be paid out of the appropriation for said institution.

SEC. 7. No commitment of a boy to said institution shall be for a shorter period than until he shall attain the age of twenty-one years.

SEC. 8. If any boy, over the age of eight years and under the age of sixteen years, be arraigned for trial in any court having criminal jurisdiction, on a charge of any violation of any criminal law of this State, the court or jury trying the same may commit said boy to this institution, instead of the jail of the county or State's prison; and the Judge may, with the consent of the accused, arrest at any stage of the cause, any further proceedings on the part of the prosecution, and commit

the accused to the guardianship of said institution, provided that no commitments shall be for a shorter period than until the boy shall attain the age of twenty-one years.

SEC. 9. Any Judge of a Circuit or Criminal Court may commit any boy over ten years and under seventeen years of age to the guardianship of said institution, where complaint in writing, setting out the acts of said boy, has been filed, which complaint shall be sworn to, and due proof shall be made in open court, in the presence of said boy, that he is a proper subject for the guardianship of said institution in consequence of incorrigible or vicious conduct.

SEC. 10. No boy shall be committed to said institution who is not of sound intellect and free from cutaneous and other contagious diseases, or who is subject to epileptic or other fits; and he must be possessed of that degree of bodily health which would render him a fit subject for the discipline of said institution. And it shall be the duty of the court committing him to cause said boy to be examined by a reputable county physician who will certify to the above facts, which certificate shall be forwarded to the institution with the commitment.

SEC. 11. A Judge committing a boy to the institution shall make out and sign a commitment in the following form, which shall also be certified by the clerk under the seal of the court:

STATE OF INDIANA, COUNTY, ss:

Be it remembered that on the.....day of....., A. D. 18.. ,, a boy of said county, was, on complaint of....., brought before me, and the undersigned, Judge of the..... Court, of the State of Indiana, and upon due proof I do find that said boy is a suitable person to be committed to the instruction and discipline of the Indiana Reform School for Boys. Wherefore it is hereby ordered that said.....be and he is hereby committed to said institution until he attains the age of twenty-one years, or until he is legally discharged by the Board of Control. I find that said boy was charged with.....; that he was born on the.....day of..... A. D. 18...; that his father's name is.....; that his mother's name is.....; that his father resides at....., and his occupation is.....;

that his mother resides at....., and her occupation is.....;
His near relatives and their residences are as follows :.....

Witness my hand this day of 18...
....., Judge.

Provided, That no commitment shall be void for failure to comply with this provision.

SEC. 12. Said Board of Control shall estimate and determine, as near as may be, the actual expense per annum of keeping and taking care of each boy committed to said institution, not including the use of the grounds and buildings, and shall include a statement of such cost in each annual report. One half of the cost of keeping each boy, according to such estimate, together with the entire cost of conveying each boy to the institution, shall be paid by the county from which said boy may be committed. The expense which any county may be liable to pay on account of any boy committed to said institution under the provisions of this act, shall be paid by the Treasurer of said county into the State Treasury on a certified and detailed statement as to the amount due therefor from such county being furnished to the Treasurer of State by the Superintendent of said institution, and in no case shall the amount charged to any county for the keeping of any boy exceed one-half the estimated cost of his support as fixed by the Board of Control as above provided.

SEC. 13. The Board of Control may, by general rules, provide that boys, for whatever cause committed, may at any time be discharged or released on trial; but in all cases where a boy is released on trial he must, at stated intervals, report his conduct to the Superintendent, and present certificates of good behavior, whereupon his leave may be extended. It shall be the duty of the Superintendent to recall any boy who may not be conducting himself properly, or any boy who may not have a suitable home.

SEC. 14. *Any fugitive from said institution may be arrested and returned to said institution by any officer or citizen.*

SEC. 15. Whenever any boy under the age of twenty-one years shall be sentenced by any court of competent jurisdiction, to imprisonment in any county jail, or to the State's prison, it shall be lawful for the Governor, on the application of such

boy, his parents, or guardian, to commute the punishment by substituting therefor the commitment of such boy to the Indiana Reform School for Boys during the minority of such boy, unless sooner discharged by the Board of Control, under the regulations hereinbefore provided. But should such boy, after being sent to said institution, persist in a depraved course, or escape therefrom, it shall be in the power of the Governor to revoke said commutation, and to remand him to the State's prison or jail whence he came, to serve out his unexpired term, and the time so spent by him at the Reform School, or while a refugee therefrom, shall not be considered as part of his original term of commitment.

SEC. 16. No Commissioner or employe of said institution shall be personally, directly or indirectly, interested in any contract, purchase or sale made, or in any business carried on in behalf of or for said institution. All contracts, purchases or sales made in violation of this section shall be held and declared null and void, and all moneys paid to such Commissioner, employe, or any person, for his benefit, in whole or in part, in consideration of such purchases, contracts or sales, may be recovered back by civil suit to be instituted in the name of the State of Indiana against such Commissioner, employe, or person acting in his behalf; and in addition it is hereby made the duty of the Governor or the Board of Control, as the case may be, upon satisfactory proof of the facts of such interest, to immediately remove the Commissioner or employe as aforesaid, and to report the facts to the Attorney-General, who shall take such legal steps in the premises as he shall deem expedient.

SEC. 17. Said Board of Control shall, at the close of each fiscal year, make to the Governor a full and detailed report of the doings of said Board, and of the expense of said institution, and such other information relating thereto as may be interesting or useful to the people of the State, which report shall be submitted by the Governor to the General Assembly at the next succeeding session thereof.

SEC. 18. All laws and parts of laws inconsistent herewith are hereby repealed; and whereas, the present laws for the government of said institution are very defective, it is, therefore, hereby declared that an emergency exists for the immediate taking effect of this act, and the same shall be in force from and after its passage.

THE CHANGE EFFECTED.

The law copied above worked a transformation. The whole aim and object of the institution was changed. What had been a house of refuge, a place of detention for boys, an institution the chief object of which was to rid communities, where they were a nuisance, of their unwelcome and obnoxious presence, became a school where boys, mentally and morally malformed and deformed in any way or from any cause, could be transformed and reformed. It rid the communities of them, but also recognized the fact that the boys themselves were worth reclaiming, and could be reclaimed—could, by removal from bad environments and associations and by rigid discipline and training, be restored to healthful mental and moral life, and be given back, after a time, to the communities whence they came, under such conditions as would make them useful, honest, law-abiding and law-loving citizens.

DISCIPLINE AND TRAINING.

The key to the success of the School is the fact that all the boys committed to it are sentenced until they are twenty-one years of age. If any boy goes out before reaching that age—and most of them do—it is because, by exemplary conduct, by studious habits in school, by industry in that one of the many occupations to which he may be assigned, by prompt and cheerful obedience to all rules, he has earned his honor and the right to go back into the world on probation.

This ability of a boy to work his own way out of the School honorably and honestly, and the knowledge that nothing other than his own good conduct can terminate his sentence, is an object-lesson in the fundamental law of life of incalculable value to him.

AGES AND OFFENSES FOR WHICH BOYS ARE COMMITTED TO THE SCHOOL.

Boys between ten and seventeen years of age may be committed to the Reform School for incorrigibility, upon complaint, sworn to by the parents or person swearing to it and upon due proof of the facts alleged made in the court.

Boys between eight and sixteen, who have been arrested for crime, indicted, tried and found guilty may be sentenced to the School. In addition to these the Governor can commute the sentences of youths or young men between sixteen and twenty-one who have been convicted and sentenced to the State prison.

BADGE NUMBERS.

When a boy enters the School, what is known as a badge number is given him. It is the equivalent of a demerit mark. These numbers range from 12 to 50, according to the gravity of the offense for which he was committed.

Every month the reports are compiled, and if the boy's conduct has been good for the month this badge number is reduced by one or more units.

When, by successive monthly subtractions, his badge number has been reduced to zero, the boy receives what is known as his "Honor," and is entitled to go out of the institution on his "honor."

Reports are required from him from time to time after his release, and if he is conducting himself properly his leave is extended until he reaches the age of twenty-one. At that age the institution ceases to have further control over him, though it keeps in communication, as long as possible, with all the boys who have gone out from it.

One of the most gratifying features of their work, to those to whom the management of the School has been confided, is the knowledge that nearly 90 per cent. of those who have gone back to the world on their "honor" have become law-abiding and useful citizens.

Of these, it is a conservative estimate, 90 per cent., but for the helpful training of the Reform School, would have become criminals.

When the monthly reports are compiled, if it is ascertained that a boy has broken any of the many stringent but salutary rules of the School, his badge number is increased, and this means stricter discipline and a longer detention for him. Every boy has full knowledge of his reports and of the record and free access to the Superintendent to plead his own case if he doubts the accuracy of the reports or denies their justice.

Each boy thus becomes the architect of his own fortune, the arbiter of his own fate and is made to feel the force and realize the inexorableness and the justice of the law of nature that "as a man sows so shall he reap."

It is within the power of any boy committed to the institution to work his own way out of it, honestly and honorably, in a year's time. Unless he does work his own way out by his own good conduct, it is impossible, under the law, for him to be released until he is twenty-one years of age.

The maintenance of discipline in the School—for it is a school and not a prison, and is surrounded by no wall—renders it necessary that this wise and salutary rule be rigidly enforced. For any boy to leave the school from favoritism within or influence without, or in any way other than by his own exemplary conduct, would be to destroy for him the whole value of the institution and cripple its power for good to all the others by undermining their confidence in its justice.

OCCUPATION.

Of the multiplicity of occupations that make up the life at the School, the report of the Superintendent gives a comprehensive view. The Indiana Reform School for Boys is a farm and village, with many industries in progress; with schools, a chapel, a hospital, a printing office, and various other shops. The buildings in this village are heated by steam, and it is lighted by gas, for light is the most efficient of watchmen, and there are no walls about the farm. All the work on this farm and in this village is carried on by the boys themselves, under the direction of competent instructors. On the farm, up to the limit of its productive capacity, is raised all that the boys eat.

They make and mend their own clothes; make, in large part, and repair all of their own shoes; cook and serve their own food; wash and iron their clothes in a steam laundry, and do the blacksmithing that the farm and steam plant require. A carpenter shop enables work of this kind to be done by the boys. This has lately been added to, in order that there might be given them a wider opportunity for learning this trade. Each year many thousands of bricks are made and burned on

the farm by the boys, thus teaching a valuable trade, at which many have subsequently earned a livelihood on leaving the School.

All the buildings on the farm, except the first few, have been constructed by the boys.

All the work done on the farm is to provide the inmates with something they use themselves. It is borne in mind all the time that the School was not organized so much to get something out of the boy, except it be his bad habits, as to get into him some useful occupation whereby he may make an honest living. Idleness, helplessness and poverty are the prolific breeders of crime, which it is sought to secure those who leave the institution against.

A printing office is one of the equipments of the School. There are cases for sixteen boys, and by working different squads in the morning and afternoon, thirty two can be taught how to set type. A paper is printed each week. All the type-setting and press-work is done by the boys. It is one of the trades that many are eager to learn, and it serves the added useful purpose of assisting materially in their education. The hope is cherished that many of the graduates of the School may find situations in printing offices when they go back into the world. They will be prepared to do good work, and employers needing help would frequently serve themselves and be giving a boy a start in life by communicating with the Superintendent.

Indeed, it may be said in this connection that employing printers, carpenters, blacksmiths, farmers, gardeners, stockraisers, florists, and many others who have need of, and could use, and would use, well an intelligent boy, fairly well schooled and carefully taught a part, at least, of the occupation in question, could often find what they wanted by communicating with Superintendent Carlton. Boys are every month gaining their "honor," and for some of them homes and occupations must be secured, for to cast a boy adrift without knowing where he is going, and that he will either be set to work or sent to school, or to send him back to parents who are unfit or incapable of caring for him, is not to be thought of.

HOMES FOR THE BOYS.

Any reputable person communicating with the Superintendent, stating his needs and what he could and would do for a boy, would be dealt with in a spirit of absolute candor and fairness, and mutually satisfactory results be achieved. These boys are not criminals in the ordinary acceptance of the word. They may become criminals if not lent a helping hand. But they are not criminals now. They are boys, and they fell by the wayside. What perilously slippery ground all walk on if one false step shall prove fatal! There ought to be citizens ready, in their individual capacities, to supplement, by supplying boys with situations, the noble work done by them and all citizens of Indiana, in their collective capacity, in originating and organizing and maintaining an institution where the boys who have fallen are picked up and set upon their feet again.

It seems the more pertinent to urge this when it is known that at not infrequent intervals large numbers of boys picked up in the streets of eastern cities are sent to Indiana and homes found for them. It is with no intention of preventing any boy, no matter where born, from finding a good home that this is urged, but to give a boy a home has a charitable side to it and charity should at least begin at home. All our own boys should be cared for first and the boy in the Indiana Reform School who has earned his "honor" and the right to leave the institution by good behavior, by obedience to the rules, by patience and teachableness and diligence in school, and at whatever his hands were set to do, is a home boy, is a Hoosier boy, and deserves the first and the highest consideration. If the boy does not do right the institution will take him back. If he is abused or badly treated, he will be found another home.

HEATING APPARATUS.

The Board feels that in detailing its own experience of the past year in the matter of heating apparatus it may be able to supply information of value to the Boards of Control of some of the other institutions of the State. During the year, after careful examination of the subject, it decided that a considerable saving of money could probably be effected in its fuel account by the introduction of mechanical stokers.

All the heat for the many buildings comprising the institution—the administration building, dormitories, dining rooms, school rooms, laundry and various shops, in fact all the steam for power and all the heat for warmth, except such as is needed in certain portions of the cooking and the bakery, is supplied from one central battery of four Babcock & Wilcox boilers. This plant has been in use for seven years, and does efficient work.

The nearest coal, and therefore the cheapest, is that obtainable from the Brazil block coal mines.

Investigation of mechanical stokers led to the belief that by using them a considerable saving of money could possibly be effected.

It seemed probable that by using mechanical stokers as much, or nearly as much, heat could be generated from slack or screenings—the cheapest grades of coal—as the boilers, without such equipment, generated when fired with a costlier quality of coal.

If this could be done it would represent a considerable saving, for the coal hitherto used has averaged, laid down at Plainfield in car-load lots, \$1.50 per ton. Slack can be obtained in car-load lots at Plainfield at 80c. per ton.

A problem confronting the Board was the necessity of effecting such saving, by the introduction of the stokers, in the fuel bill for one year as would enable it to pay for the equipment out of that portion of the annual maintenance fund that would be expended for fuel.

If this could not be done it would be necessary to postpone the matter and secure from the Legislature a special appropriation.

Bids were invited from the leading manufacturers of mechanical stokers, the Board reserving to itself the right to reject any and all bids. The boilers had been previously carefully tested, and it was known just how many pounds of water one pound of the best quality of Brazil block coal would evaporate.

In inviting bids the manufacturers, in addition to stating the price at which they would equip two boilers with their stokers, were required to guarantee the number of pounds of water the boilers, when equipped with their stokers, would evaporate per pound of washed nut and slack coal.

The result was that two Roney mechanical stokers were ordered from Westinghouse, Church, Kerr & Co., of Chicago, and installed.

In their bid they guaranteed to evaporate 20 per cent. more water, using washed nut and slack coal, than had been evaporated at the tests previously made and used as a basis for the bids, with the best quality of the Brazil black coal.

Tests made, after the stokers were installed, showed results slightly better than the manufacturers had guaranteed.

The net result, not to burden this report with the figures from the tests is that, by the introduction of these mechanical stokers, a saving of over one-half of the fuel bill has been effected.

Little, if any, smoke comes from the stack. A dense volume poured out of it before.

Smoke is of no special consequence in an institution located off by itself in the country, whereas in a city it is a nuisance, but a saving of over 50 per cent. in fuel bills is a matter of importance.

The Board invites those in charge of the other public institutions of the State, where coal is the fuel used, to visit the Reform School and judge for themselves whether some such appliance might not prove useful and economical for them.

THE NEW FARM.

The increased acreage of the farm, due to a legislative appropriation made three years ago, whereby 195 acres were purchased, has proved useful and has had something to do with diminishing the expenditures of maintenance to a figure below, as we believe, that of any similar institution in the United States. It has furnished wider opportunity for the boys to become familiar with farming operations.

Farming is an occupation in which it is especially desirable they should engage upon going out into the world, as it is measurably free from those temptations of city life to which many of them fell victims.

A NEW COTTAGE.

During the year a handsome and much needed new cottage has been erected on an eminence commanding a view of the entrance to the farm. It will be occupied by one of the house-fathers, and will be found useful. The work upon it has been done by the boys themselves under the direction of their instructors. They made the brick and laid them in the walls, did the plastering, carpenter work, painting, etc.,—in fact built the house themselves.

THE AGES OF THE BOYS.

The following circular, which has been sent to the judiciary of the State, sufficiently explains itself. So generally have the Judges heeded the request it makes, that few boys are now received without the desired affidavit.

“To the Judges and Clerks of Courts :

“We have in past years had much trouble in the Reform School for Boys because of the very imperfect manner in which the age of our inmates is determined by the Courts. Usually the testimony of the boy or some witness is taken. Frequently the parents are not present. So no one is sworn as to the age of the boy sent to this School. In numerous cases after the boy reaches here the parents make affidavit that he is twenty-one years of age. In many of these cases these affidavits are false, but the Reform School has no means of disproving their statements. They have brought “Habeas Corpus” suits and taken our worst boys from us. Under the Third Section of the act of 1883 this Board has authority to make such rules, etc., as the “government and discipline” of the School may require.

We have, therefore, ordered an addition to the blanks used in committing boys here. This is a blank affidavit which we MOST EARNESTLY ask the Judges of the State to have made out by the parents of the boy. This and this alone will protect this School from perjury.”

THE BOARD OF STATE CHARITIES.

We desire to commend the work of the Board of State Charities in so far as its supervision has extended to this School. It has been a helpful thing to know that the State has provided a board whose members are familiar with the work of this and the other institutions of a reformatory, correctional and charitable character, and who can be depended upon for advice and assistance whenever needed.

THE FINANCIAL EXHIBITS.

The Board of Control takes pleasure and feels a pardonable pride in the financial exhibit, which will be found in detail, with much other information of a specific character in regard to the work of the School during the past year, in the report of Superintendent T. J. Charlton, which is filed herewith and made a part hereof. A comprehensive review of the work of the Institution will be found in it and in the accompanying reports of the physician, Dr. Amos Carter, and the chaplain, A. G. Cox.

IN CONCLUSION.

In concluding its report the Board would fall short of the full discharge of its duty if it failed to refer to the work of Superintendent T. J. Charlton and of Mrs. Alice R. Charlton, the Matron, and of all the officers of the Institution.

Their constant loyalty, their tireless industry and large knowledge of what to do and how to do it, their abiding interest in, and concern for and care of the boys confided to their keeping, have made the supervisory work of this Board a burden easy to bear.

GEO. F. MCGINNIS, President,
W. J. HILLIGOSS, Secretary,
WM. C. BALL,

Commissioners.

SUPERINTENDENT'S REPORT.

To the Board of Control :

I submit to you my seventeenth annual report, as a part of the thirtieth annual report of the Indiana Reform School for Boys.

HEALTH.

The general health has been excellent. One boy died of a disease which he had already contracted when he was admitted. This extraordinary showing is due to the almost perfect sanitary conditions that exist here, the wholesome food, the excellent water and superior sewerage. For fuller report see the report of our very efficient physician, Dr. Amos Carter.

REVIEW.

The Indiana Reform School for Boys was opened for inmates January 1, 1868. Since that time 4,208 boys have been admitted to the School. These came from nearly every portion of this State. The most of them, however, came from the cities, towns and villages, and but very few from country homes. The farms are not feeders for reform schools. In view of the fact that village life is becoming baneful to boyhood, it has been aptly remarked that "God made the country, man made the town, and the devil made the village."

Be that as it may, the causes which are blasting the lives of boys are rapidly on the increase. About 3,500 boys have been released and have returned to their homes to adjust themselves once more to social conditions. To correspond with these furloughed boys, at least until they become twenty-one years of age, is one of the duties of the Superintendent and his clerk.

Careful study of the lives of boys who have passed through this School confirms me in the conclusion that they have made records as follows :

1. Those who do well six months, 98 per cent.
2. Those who do well one year, 94 per cent.
3. Those who do well three years, 89 per cent.
4. Those who do well through life, 80 per cent.

“DO REFORM SCHOOLS REFORM?”

I answer unhesitatingly, “yes.” To deny this would indicate that there is no recuperative powers in boyhood. If a boy who had become somewhat wayward can not reform what would become of our men? It is a fact that many a model citizen is the outgrowth of just such a boy. The Reform School takes boys who had become bad members of society and were rapidly growing worse. As a rule they come to us having never been taught any lessons of industry and their elementary education greatly neglected. As a rule Reform School boys were confirmed truants. Under the strict discipline of the School they at once begin their course of study, viz.: to “Cease to do evil and learn to do well.” Every week witnesses the transformation in such boys, not only in their general appearance and bearing but in their physical features.

Not only does our Reform School train the boys who are its inmates while at the School, but it also exercises a watchcare over those who are at their homes on “tickets-of-leave.” Further than this it has also a reflective influence on all the delinquent boys of the State. This influence may be illustrated by the effect on the army of tramps when a city establishes a workhouse. The news of this soon spreads among those for whom it was established, and they mutually agree that it is well to turn their courses away from that city. So all over the State, when a boy is inclined to wander from the path of rectitude he is reminded that such a course will “land him” in the Reform School. These warnings deter many a wayward boy. To add to this warning the monitor frequently describes many imaginary penalties which are said to prevail here. Such falsehoods, like the goblins of superstition, seem to play a part in checking the course of some boys. Before a boy comes to the Reform School he should look upon it as a

place to be dreaded. After his arrival he should be pleasantly disappointed in finding it a place where everything is done for his good. In the pleasant lawns, neat and comfortable buildings, kind officers and teachers he should see provisions to enable him to make up for lost time.

THE WORK OF DISCIPLINE.

A Reform School is measured by its discipline. If that is bad the School is bad. This discipline should begin with the moment a boy is admitted. It may be a request to remove his cap when he enters the room; or, as is sometimes the case, when he sullenly refuses to say "good-bye" to the officer who has brought him. Then, as "Cleanliness is next to Godliness," he is taken to an adjoining room and given a bath. He then puts on his uniform and reports to a school or workshop. It would surprise those who knew the boy at home, where he defied all authority, to see how readily he adjusts himself to the new order of things here. He, who was a terror to his family and neighbors, now marching along in his line like a cadet at a military school. When accosted he is prompt and polite. He may never have attended school a day. He now cheerfully attends school, yielding a respectful obedience to all school rules, and is a good student. The discipline here is much as it is at West Point and Annapolis, except in this—that, instead of the "placing under arrest," as is done with the worst offenders there, we use some corporal punishments.

PUNISHMENTS.

No reform school could exist unless there were punishments for the infractions of rules. In some of those reform schools which have adopted the "military system," "guard-houses" are used. In these the young offenders are placed for punishment. Inside the guard-house, which is well ventilated and lighted, the boy is put to bed, his food while there being bread and water. At times, for his physical exercise, he is made to dress and drill with vigor through the hallways. But while in these "chambers of reflection" the boy misses his school and his shop training. After a careful investigation of this system,

I am convinced that a well-regulated system of corporal punishments is the better system. I do not believe that any boy should miss a single day's instruction in school because of his stubbornness. If he is ever to learn to obey law he should first learn to obey rules.

BADGES.

When a boy enters this School he is given a standing indicated by the following numbers opposite the various offenses for which he is committed.

	<i>Badge.</i>
1. Obstructing railway	50
2. Murder	40
3. Highway robbery	36
4. Rape.....	36
5. Arson	36
6. Burglary	36
7. Manslaughter.....	30
8. Perjury	30
9. Obtaining goods under false pretenses.....	30
10. Carrying concealed weapons	26
11. Grand larceny	24
12. Assault and battery with intent to kill.....	20
13. Forgery	20
14. Petit larceny	20
15. Embezzlement.....	18
16. Malicious trespass.....	18
17. Aiding prisoners to escape.....	18
18. Incurigibility.....	12

When this School was started every new boy was given "Badge 8." The second month seven and so on to one. Then followed Grade 3, Grade 2 and Grade 1, and then followed "Honor." The present entrance "Badges" now vary as indicated above.

Under the old system the policy boy who had committed some heinous crime could win his "Honor Badge" in a few months. This standing entitled him to release long before it was safe to return him to society. I do not believe that it is right to start such boys on a par with boys who are committed to the School for minor offenses.

In the courts of law the offenses committed by criminals regulate the length of their sentences. The same principle should hold good with youthful criminals. In no other respect is any difference made here. All are treated alike so long as they prove alike worthy. Each boy's record is entirely in his own hands.

These "Badges" may be lessened each month by good and increased by bad conduct.

Some boys improve their badges each month, and about one out of thirty win their release on ticket-of leave at the end of one year. About the same per cent. are detained here until they become twenty-one years of age.

BADGE CHANGES.

The real punishment which boys fear more than any other is the lowering of their badges. At the end of each month the reports received during the month by each boy are carefully considered and the boy is accordingly promoted or demoted. In cases where an offense is committed which the officer thinks requires with corporal punishment, he makes written application to the Superintendent as follows:

....., 189...

T. J. CHARLTON, *Superintendent*:

I desire instruction whether or not to punish,
No. ... Offense, My own judgment is that
he should receive strokes.

....., *Officer*.

If a boy desires to present his case to the Superintendent for investigation, he is sent to the Superintendent with his application.

Then, if the Superintendent approves the application or modifies it, he replies to the officer as follows:

PLAINFIELD, IND., , 189...

You are hereby permitted to punish, No. ...,
..... strokes, but not until you have kindly shown him the
gravity of his offense, and that you are discharging what is, to
you, a painful duty.

T. J. CHARLTON, *Superintendent*.

The application is retained by the Superintendent. On the back of the permit granted are printed the following rules :

1. Never use a strap unless one supplied by the Superintendent.
2. Punish below waistband and without anger.
3. All punishment must be inflicted in the family cottage.
4. No punishment must be inflicted before a permit is granted, and none must ever exceed the limit of the permit.
5. Every boy has a right to appeal to the Superintendent.
6. No other corporal punishment is allowed except the one contemplated in this permit.

SATURDAY HALF HOLIDAYS.

Saturday afternoons are given to bathing, hair-cutting, shaving, weekly inspections of clothing and play.

OUR SCHOOL WORK.

The half-day system of schools is adopted here. The boys who attend schools in the forenoons, work in the afternoons, while those who work in the forenoons attend school in the afternoon.

EXCEPTIONS.

In the summer season the higher grades are given a vacation, but the primary grades continue all the year.

New boys who can not read nor write are put into school the day they are admitted and are kept in school all of each day until they make such progress that they can read well and write a good letter, at which time they are allowed to work one half of the day. The length of the school or work-day is eight hours in the summer and seven and a-half hours in the winter. At this season these hours are from 7 A. M. to 11 A. M., and from 12:30 P. M. to 4:30 P. M., allowing 30 minutes for the two recesses. Our schools are graded as strictly as in the best graded schools of our cities. As all educational men know, the "graded system" multiplies the power of the teacher several fold. We see here the good results of our well graded schools. Each grade is divided into two sections, A and B:

INDIANA REFORM SCHOOL FOR BOYS.

DAILY SCHOOL PROGRAM.

MORNING.

*Recitations.**Studies.*

- 7:00 to 7:30 A Section Recites Reading . . . B Section Studies Reading.
 7:30 to 8:00 B Section Recites Reading . . . A Section Studies Arithmetic.
 8:00 to 8:30 A Section Recites Arithmetic . . . B Section Studies Arithmetic.
 8:30 to 9:00 B Section Recites Arithmetic . . . A Section Studies Spelling.

Recess from 9:00 to 9:15.

- 9:15 to 9:30 A Section Recites Oral Spelling . . B Section Studies Oral Spelling.
 9:30 to 9:45 B Section Recites Oral Spelling . . A Sec. Studies Written Spelling.
 9:45 to 10:30 All in Penmanship.
 10:30 to 11:00 All in Written Spelling.

Followed by a careful correction of the same.

AFTERNOON.

- 12:30 to 1:00 A Section Recites Reading . . . B Section Studies Reading.
 1:00 to 1:30 B Section Recites Reading . . . A Section Studies Arithmetic.
 1:30 to 2:00 A Section Recites Arithmetic . . . B Section Studies Arithmetic.
 2:00 to 2:30 B Section Recites Arithmetic . . . A Section Studies Spelling.
 2:30 to 2:45 A Section Recites Oral Spelling . . B Section Studies Oral Spelling.
 2:45 to 3:00 B Section Recites Oral Spelling . . A Sec. Studies Written Spelling.

Recess from 3:00 to 3:15.

- 3:15 to 4:00 All in Penmanship.
 4:00 to 4:30 All in Written Spelling, followed by a careful correction of same.

UNITED STATES HISTORY.

It will be noticed that this study is omitted in the Daily School Program for want of time. History is studied in each family during five evenings of the week and recited in the chapel every Saturday evening. When from any cause I am absent Assistant Superintendent Barrett, who is a first-class teacher, takes charge of these lessons. Last year we purchased six hundred copies of "Barnes' Brief History of the United States." Each boy has his own history. After nearly seventeen years of experience I can say that this study has proved to be a very attractive one. After the History lesson is recited the meeting takes the nature of an entertainment. Boys sing their best ballads and comic songs, others declaim, while others furnish music from guitars, violins, French harps, etc. This

session continues from 5:30 P. M. to 9 P. M., but owing to its entertaining features, it is regarded as the happiest evening of the week. Physical exercises are not neglected, and even dancing is allowed. In this way each year we take the entire school (small boys as well as large) through the history of our country.

RELIGIOUS WORK.

Our regular Chaplain, Bro. A. G. Cox, comes to the School each Saturday and remains over till the following Monday. He preaches a short sermon Sunday forenoon and aids in the Sunday-school lessons in the afternoon. The remainder of his work is personal. All the boys are glad to see Brother Cox each week. They go to him with their troubles and find in him a kind friend and wise counselor. His long experience enables him to help all boys with whom he talks. His work greatly aids the discipline of the School. My experience is that the Chaplain's work is invaluable in a Reform School.

CATHOLIC BOYS.

Our School is still favored by the helpful visits to the Catholic boys of Rev. Father F. H. Gavisk, pastor of the St. John's Church, Indianapolis, Indiana. Miss Maggie Barrett, who has charge of our hospital, gives the Catholic boys special instruction each Sunday during the hour just before the general forenoon service. Her work is very helpful. Father Gavisk recently gave the boys and officers a valuable lecture on "How a President is made," which was greatly appreciated by all. I trust that this earnest and devoted priest may long continue his work here.

MANUAL TRAINING.

I have, as you know, given much attention to manual training. I helped to organize the National Manual Training Teachers' Association, at the Drexel Institute in Philadelphia.

I have given much effort to examine the work of various manual training schools of our country, but I have never seen better work than is done in our Wood and Iron Departments here.

The old "Chair Shop" (one hundred feet long and fifty feet wide) was converted into the present "Manual Training Wood

Shop." Forty-three model work-benches, made after the most approved pattern, and each well equipped with tools, took the places of the old forms used for chair caning. Two classes, forty-three in the forenoon and another of forty three in the afternoon, eighty-six in all, now receive daily instruction there in the Swedish system of working in wood.

SLOYD WORK.

This is generally known by the term "sloyd." It involves every mechanical principle. The success of this shop is due largely to its efficient instructor, Geo. F. Bastman, a graduate of the Sloyd School at Nääs, Sweden. The following are the various models made in this wood shop, arranged in the order they are made. It will be seen that the second course is altogether work in joinery:

LIST OF MODELS TO BE MADE IN THE MANUAL TRAINING SHOP AT THE INDIANA REFORM SCHOOL FOR BOYS.

FIRST COURSE.

- | | |
|------------------------------------|-------------------------------|
| Round Flower Stick. | 26. Ladle. |
| Parcel Pin. | 27. Barrel Cover. |
| 3. Rectangular Flower Stick. | 28. Flower Press Cover. |
| 4. Slate Pencil Holder. | 29. Coat Stretcher. |
| 5. Pen Holder. | 30. Ruler. |
| 6. Key Label. | 31. Bootjack. |
| 7. Thread Winder. | 32. Lamp Bracket. |
| 8. Key Board. | 33. Weaving Shuttle. |
| 9. Dibble. | 34. Knife Box. |
| 0. Pen Rack. | 35. Axe Handle. |
| 11. Paper Cutter. | 36. Match Box. |
| 12. Strap Stick. | 37. Triangle. |
| 13. Small Bowl. | 38. Pen Box. |
| 14. Hammer Handle. | 39. Stool. |
| 15. Pen Tray. | 40. Try Square. |
| 16. Chopping Board. | 41. Drawing-board with Frame. |
| 17. Flower Pot Cross. | 42. Marking Gauge. |
| 18. Two Foot Measure. | 43. Bracket. |
| 19. Scoop. | 44. Picture Frame. |
| 20. Clothes Rack. | 45. Tool Rack. |
| 21. Flower Pot Stand. | 46. Tea Tray. |
| 22. Flower Press, Roller and Sets. | 47. Book Stand. |
| 23. Foot-stool. | 48. Rake. |
| 24. Book Carrier. | 49. Cabinet. |
| 25. Box. | 50. Table. |

SECOND COURSE.

- | | |
|---|--|
| 1. Lap Joint.
(3 exercises) End, cross and mitre joint. | mitre joint with half blind mortise and tenon and mitre joint with blind mortise and tenon. |
| 2. Open Mortise and Tenon.
(3 exercises) End, cross and mitre joint. | 8. Models.
Three Frames. |
| 3. Half-blind Mortise and Tenon.
(3 exercises) End, cross and mitre joint. | 9. Mitre Joint with glued tongues. |
| 4. Double Mortise and Tenon.
(3 exercises) End, cross and mitre joint. | 10. Model.
Box. |
| 5. Blind Mortise and Tenon.
(3 exercises) End, cross and mitre joint. | 11. Dowel Joints.
(5 exercises) Dowel joint open, half blind, blind, blind with a mitre, blind with a post. |
| 6. Models.
Camp-chair, Lawn-chair and Consol. | 12. Model.
Chess-box. |
| 7. Mitre Joints.
(3 exercises) Mitre joint, mitre joint with open mortise and tenon, | 13. Blind Dovetail Joint. |
| | 14. Model.
Tool-box. |
| | 15. Combination Writing-desk and Book-case. |

GEORGE F. BASTMAN,
Teacher.

THE BLACKSMITH SHOP.

This is a combination of what in technical schools is called the "Iron Shop" and the regular "Blacksmith Shop." It is equipped with 16 forges. Thirty-two boys each day receive instruction there. We are indebted to the State Industrial School at Rochester, N. Y., for the first part of the course of study in this shop. The second course is one devised by ourselves.

LESSONS IN BLACKSMITHING.

 FIRST COURSE.

Lesson 1. In the forge shop consists: First, in building the fire; second, the different degrees in heat, five in number; third, the treatment of the iron under the hammer; fourth, welding and drawing.

Lesson 2. In this lesson the student forms a shoulder; drawing a taper and turning a circle.

Lesson 3. A piece of round iron is cross-sectioned to a square; then to an octagon, and the end drawn to a taper.

Lesson 4. Consists in bending round and flat iron to true circles, and in making staples.

Lesson 5. In this lesson three pieces are welded together and drawn out square, and both ends rounded.

Lesson 6. A piece of round iron is upset and squared so that the diameter will be the same as when round.

Lesson 7. This lesson consists in upsetting, while bending and forming to a right angle inside and outside.

Lesson 8. The same as lesson 7, except that the iron is upset in the center first.

Lesson 9. This lesson consists in making a floor timber hanger.

Lesson 10. A hook is made and twisted to show the way ornamental work is done; also an **S** hook, which gives practice in curving iron gracefully.

Lesson 11. This shows the way tools are made for forming heads on bolts, nails, etc.

Lesson 12. This lesson is similar to 7 and 8, except that one side is turned parallel to the other while drawing.

Lesson 13. A strap, the ends being formed first, then welded to the center.

Lesson 14. A jump weld in the center, showing how a buldge can be made in the center of a rod of iron.

Lesson 15. Clout nails and rivets, bringing into use the tools made in Lesson 11.

Lesson 16. Bolts—these are formed by upsetting one end, then forming the head in the heading tool.

Lesson 17. Forming a square and a hexagonal nut.

Lesson 18. Solid eye-stay, or brace, bringing in upsetting, welding, and punching round iron.

Lesson 19. Show how a hasp can be made without the proper tools.

Lesson 20. Making and welding iron for forming links.

Lesson 21. This lesson shows how flat iron can be welded in two ways for forming circles.

Lesson 22. Shows how a bolt can be made for a ring.

Lesson 23. Solid eye-hook, the eye being formed by punching the iron.

Lesson 24. A pair of blacksmith's tongs; practice in drawing, forming, welding, punching, grooving and riveting.

Lesson 25. Shows how round iron can be welded in the form of a circle and connected to a bolt.

Lesson 26. Give a proper knowledge of the formation of scarfs for a **T** weld.

Lesson 27. Same as 26, except that the scarfs are formed for an **L** weld.

Lesson 28. Shows how a round piece can be welded to a flat piece.

Lesson 29. A tripod, giving practice for riveting cold iron.

Lesson 30. Welding steel to iron, and steel to steel.

SECOND COURSE.

Lesson 1. Open ring.

Lesson 2. Singletree hook.

Lesson 3. Tug-iron.

Lesson 4. Clevises.

Lesson 5. Wagon wrench.

Lesson 6. Singletree clip.

Lesson 7. Spring gate-latch.

Lesson 8. Ring.

Lesson 9. Horseshoe, toed and calked.

Lesson 10. Horseshoe, plain.

Lesson 11. Horseshoe toe-weight.

Lesson 12. Horseshoe side-weights.

Lesson 13. Hame hook.

Lesson 14. Gate ring.

Lesson 15. Single bridle-bit.

Lesson 16. Double bridle-bit.

Lesson 17. **S** wrench.

Lesson 18. Forging hammer.

Lesson 19. Splitting chisel.

Lesson 20. Punch and chisel.

Our well-equipped printing office is a very attractive feature of our school. From forty to fifty boys learn the printers' trade there, and several of the graduates from this department are filling responsible places in newspaper and job printing establishments all over the land. Our paper, the "Plainfield Reformatory," a six-column quarto, is printed by the boys. Its object is primarily to aid in teaching the boys to become good printers, and not to attempt to make "editors." Secondly it aims to supply them with the very choicest reading matter.

The following trades are also taught:

- | | |
|---------------------------|-----------------------|
| 1. Brick making. | 9. Cooking. |
| 2. Brick burning. | 10. Tailoring. |
| 3. Bricklaying. | 11. Shoemaking. |
| 4. Plastering. | 12. Gardening. |
| 5. Painting. | 13. Caring for stock. |
| 6. Gas making. | 14. Floriculture. |
| 7. Gas and steam fitting. | 15. Carpentering. |
| 8. Bread baking. | 16. Laundrywork. |
| | 17. Farming. |

In the shops of the manufactures the chief aim is the *manufactured product*, which is to be sold.

In all our training shops the one thing aimed at is THE BOY. As Professor Woodward aptly said, "HE IS THE ONLY ARTICLE PUT UPON THE MARKET."

INDUSTRIAL TRAINING.

Truly this is an age of tools. When this school was organized the sole aim, at first, was to train boys to be farmers. It was soon ascertained that nearly all the boys came from towns and cities, and that, no matter how much training had been given them here, they would invariably gravitate back to the cities and towns. Then it became evident that this School must in some other way prepare the boys to become "bread-earners."

As "necessity is the mother of invention," the consequence was the development of our present trade-teaching.

It is all very well for the colleges and universities to have the higher departments of technological training, but what these children of the poor need is a complete trade, one which they can follow without much outlay of money. Hence the

introduction of such trades here as bricklaying. The last season that we carried on a brick-yard we made and burned 1,053,000 bricks. We still have enough of these to erect another cottage and a Library and Reading Room next year.

THE NEW COTTAGE.

As we had the bricks already made, and as the small triangular lot on the north side of the National Road could not be utilized to any great extent, you consented to let the boys erect a four-room cottage on the knoll there. The lumber and milled work in it cost \$471.40; cistern, sewerage, lime, tin work, paint, etc., cost \$352.40; instructors in bricklaying and plastering, \$96.75; hardware, \$91.31; furnace, \$100—making the total of this neat cottage \$1,111.86.

ITS PURPOSE.

Its purpose is to supply an officer who has a family with a home near at hand. Hitherto, owing to our isolated condition, we have had to rely largely upon unmarried officers. In this way we have lost the services of several of our most valuable workers. In this connection I recommend that the Legislature be asked to appropriate to erect another cottage to be erected on the high ground southwest of where this cottage is situated.

A LIBRARY BUILDING.

This School is in need of a good library, including a "reading-room" and a "hall" in second story, which could be used for a boys' assembly hall.

If we are to prepare boys for citizenship I know of no more effective agency than a literary society, which would teach boys to discuss public questions and to express their thoughts in essays.

OUR HOLIDAYS.

During the year we observed the following four patriotic holidays:

1. Lincoln's Birthday (Feb. 12).
2. Washington's Birthday (Feb. 22).
3. Memorial Day (May 30).
4. Indiana Day (Dec. 11).

This last being the anniversary of the admission of the State into the Union.

Also three religious holidays :

1. Christmas.
2. Easter Sunday.
3. Thanksgiving Day.

On each of these days we have chapel exercise appropriate to the day, and in some cases an additional entertainment at night.

TEACHING OF PATRIOTISM.

To train up a boy to become a good citizen is the primary object of the State in establishing reform schools. To teach those who have once been law breakers to obey the laws of a State we must first teach them to respect the State or nation which makes and executes the laws. No one can truly respect a government and be ignorant of its history and its benefits. Therefore, we teach the history of our country during nine months of each year.

We constantly teach those things about our country which all should admire, and to honor the flag as the representative of our Republic. I do not believe that there are boys in this country who are more patriotic than those of our school. Patriotic teaching is a great aid in the moral upbuilding of character. True patriotism means good citizenship, and that involves moral uprightness.

MUSIC.

We still maintain our two brass bands—the first or advanced band, the other the second or primary band. Vacancies in the first are filled by promotion from the second band. The new room above the cold storage has been given to the band for practice. The first band is taught from 12:30 to 3 P. M. Bro. Sands is the present efficient band instructor.

VOCAL MUSIC.

In other years we have had teachers of vocal music come at regular intervals to teach our boys. We have not done so the past year, but the singing of our boys has kept up to their former high standard.

FOOD.

As you know, the boys have been well fed with the best of wholesome food. Miss Van Armen deserves great credit for the way in which she has managed the boys' kitchen. During the past season she and her boys have canned 1,000 gallons of tomato butter and put up twenty-one barrels of sweet pickles.

THE TAILOR SHOP.

The following table shows the work done in the tailor shop for the year ending November 1, 1896, Miss Ruschizka in charge:

Coats	361
Vests	236
Pants	930
Overalls	300
Waists	84
Shirts	937
Hospital shirts	46
Boys' aprons	345
Bed ticks	254
Sheets	228
Pillow cases	776
Bolster cases	11
Towels	700
Band suits	19
Boys' mittens	255
Hat bands	42 doz.
Window curtains	12
Cushions	3
Carpets	6
Mattress made over	1

In addition to the above much repairing was done, such as blankets, comforts, vests, etc.

Clothing on hand in Matron's store-room Nov. 1, 1896:

Coats	549
Vests	686
Pants	902
Overalls	79
Blouse waists	26
Shirts	175

REPAIRING DEPARTMENT.

“A stitch in time saves nine.” Acting upon this our patching and darning department keeps boys’ clothing well repaired.

ANNUAL PER CAPITA.

As one-half of the per capita cost of maintaining boys at the Reform School is borne by the counties sending such boys, and as that has for some years been fixed at \$120 a year, I recommend that the same be designated the per capita cost for the coming year.

The following number of boys were admitted during the year by months :

November, 1895	13
December, 1895	13
January, 1896	4
February, 1896.	11
March, 1896.	11
April, 1896	11
May, 1896	21
June, 1896.	18
July, 1896	13
August, 1896	1
September, 1896	9
October, 1896	20
Total	145

The following table shows the age of the 145 boys admitted :

Between nine and ten years	3
Between ten and eleven years	9
Between eleven and twelve years	12
Between twelve and thirteen years	27
Between thirteen and fourteen years	19
Between fourteen and fifteen years	22
Between fifteen and sixteen years	33
Between sixteen and seventeen years	16
Between seventeen and eighteen years	2
Between eighteen and nineteen years	2
Total	145

Average age at time of admission, 13 years 6 months.

Offenses for which boys were committed during the year.

Forgery and petit larceny	1
Burglary	3
Robbery	1
Grand larceny	10
Petit larceny	41
Malicious trespass	3
Receiving stolen goods	1
Arson	3
Forgery	1
Incorrigibility and vicious conduct	9
Incorrigibility	58
Incorrigibility, vicious conduct and larceny	3
Vicious conduct	2
Incorrigibility and petit larceny	3
Burglary and grand larceny	1
Incorrigibility and running away	1
Burglary and petit larceny	1
Assault and battery with intent to kill	3
Total	145

It will be noticed that the same offenses send boys to a reformatory as send adults to the State Prison.

The following boys were released on tickets-of-leave during the year:

November, 1895	15
December, 1895	33
January, 1896	7
February, 1896	19
March, 1896	42
April, 1896	7
May, 1896	17
June, 1896	16
July, 1896	13
August, 1896	18
September, 1896	9
October, 1896	9
Total	205

The average time spent by these boys at the School was three years, one month, and twenty-three days.

The average number present for the year was 512.

Largest number present at any one time, 537.

Smallest number present at any one time, 485.

There are now 74 colored boys in the School.

Boys returned during the year for not doing well :

November, 1895	3
December, 1895	1
January, 1896	4
February, 1896	3
March, 1896	3
April, 1896	1
May, 1896	4
June, 1896	3
July, 1896	9
August, 1896	2
September, 1896	1
October, 1896	2
Total	36

When a boy leaves the School he is given a ticket-of-leave for thirty days. At the expiration of that time he must report his conduct to the Superintendent. If the report is satisfactory, his *leave* is extended sixty days longer and so on until he becomes twenty-one years of age. If, on the other hand, he does not do well, he is recalled to the School, as was done in each of these thirty-six cases.

The following table shows number of boys received from counties this year and since the opening of the School January 1, 1868 :

	This Year.	Since Opening.
1. Adams	2	11
2. Allen	2	164
3. Bartholomew	1	53
4. Benton	1	13

92. U. S. Prisoners		2
Total	145	4,208

Counties not represented this year, ten—viz.:

Brown, Franklin, Jasper, Lagrange, Ohio, Pulaski, Starke, Scott, Washington and Steuben.

Scott County has never have a representative in the School.

“COMMUTED” BOYS.

Section 15 of our law is as follows:

SEC. 15. Whenever any boy under the age of twenty-one years shall be sentenced, by any court of competent jurisdiction to imprisonment in any county jail, or to the State's prison, it shall be lawful for the Governor, on the application of such boy, his parents, or guardian, to commute the punishment by substituting therefor the commitment of such boy to the Indiana Reform School for Boys during the minority of such boy, unless sooner discharged by the Board of Control, under the regulations hereinbefore provided. But should such boy, after being sent to said institution, persist in a depraved course or escape therefrom, it shall be in the power of the Governor to

revoke said commutation and to remand him to the State's prison or jail whence he came, to serve out his unexpired term, and the time so spent by him at the Reform School, or while a refugee therefrom, shall not be considered as part of his original term of commitment.

Under this law, during the year the Governor commuted five boys to this School, and at present all are doing well.

THE PARDONING POWER.

I am convinced that under the present law these boys can not be released except by the Board of Control of this School. The Governors of this State, with one exception, have refused to even entertain the proposition to pardon a boy from this School.

The following table shows the number boys received each year since the School was established.

1868	112	1883	1-9
1869	29	1884	182
1870	142	1885	179
1871	37	1886	203
1872	64	1887	166
1873	95	1888	190
1874	113	1889	201
1875	153	1890	233
1876	129	1891	211
1877	117	1892	129
1878	145	1893	147
1879	107	1894	184
1880	149	1895	163
1881	157	1896	145
1882	177		—
Total			4,208

The following shows the number of boys remaining at the school at the close of each fiscal year:

1868, first year	112
1869, second year	113
1870, third year	217
1871, fourth year	196
1872, fifth year	191
1873, sixth year	216
1874, seventh year	265
1875, eighth year	328
1876, ninth year	326
1877, tenth year	339

1878, eleventh year	383
1879, twelfth year	330
1880, thirteenth year	347
1881, fourteenth year	330
1882, fifteenth year	370
1883, sixteenth year	393
1884, seventeenth year	437
1885, eighteenth year	440
1886, nineteenth year	516
1887, twentieth year	439
1888, twenty-first year	462
1889, twenty-second year	449
1890, twenty-third year	516
1891, twenty-fourth year	520
1892, twenty-fifth year	478
1893, twenty-sixth year	472
1894, twenty-seventh year	557
1895, twenty-eighth year	537
1896, twenty-ninth year	513

Owing to the reduction of the annual appropriation by the last Legislature we have been somewhat cramped for means to properly investigate the boys on furlough.

VISITING AGENT.

What this School needs is a visiting agent. An officer whose duty it would be to give his entire time to correspondence with the boys who are out on tickets-of-leave. At stated times this officer should visit the counties where such boys live, and where he finds a boy doing badly he should return him to the School.

The following is a list of deaths which have occurred in the School since opening, November 1, 1868:

1868	1	1884	2
1869		1885	6
1870	6	1886	
1871	1	1887	2
1872	1	1888	4
1873		1889	2
1874	2	1890	1
1875	3	1891	1
1876	8	1892	1
1877	8	1893	1
1878	1	1894	3
1879	6	1895	5
1880	9	1896	2
1881	1		
1882		Total	80
1883	3

	\$5,654 58

TOTAL EXPENDITURES BY DEPARTMENT.

Support.	\$12,387 09
Furnishing goods	2,580 92
Boys' clothing	6,038 06
Heat and light	6,517 77
Live stock and feed.	1,483 50
Agricultural implements	335 07
Salaries of officers	17,367 84
Contingent expenses	4,757 25
Books, papers and stationery	1,898 90
Buildings and repairs	4,535 82
Hospital expenses	597 78
Total.	<u>\$58,500 00</u>

EXPENDITURES OF EACH MONTH.

November, 1895	\$3,975 20
December, 1895	5,369 92
January, 1896	5,260 43
February, 1896	4,129 14
March, 1896	5,001 52
April, 1896	5,967 63
May, 1896	4,564 89
June, 1896	4,512 39
July, 1896	5,037 92
August, 1896	4,295 27
September, 1896	4,731 11
October, 1896	5,654 58
Total appropriation for the year	<u>\$58,500 00</u>

If we deduct from this the amounts paid into the State Treasury or yet to be paid in by counties which had boys here, which amount to \$30,666, also proceeds of sale of coal tar, \$177.55, we find that the net cost of the Reform School for Boys to the State Treasury would be \$27,656.45.

BLACKSMITH SHOP REPORT.

The following is the list of tools and stock on hand in the blacksmith shop:

16 blowers and bellows.	2 dye stacks.
16 anvils.	14 dyes.
4 vices.	14 dye pins.
2 drills.	200 lbs. horse shoes.
34 drill bits.	5 bars $\frac{5}{8}$ R. iron.
9 hand hammers.	1 bar 1x1 inch square.
6 rivet hammers.	6 bars $\frac{5}{8}$ R. iron.

2 monkey wrenches.	2 bars $1\frac{1}{4}$ S. iron.
11 tongs.	2 bars $1\frac{3}{8}$ S. iron.
18 wedging tools.	7 bars $\frac{1}{2}$ R. iron.
2 braces.	7 bunches hoop iron.
19 brace bits.	28 spade and shovel handles.
4 shoeing tongs.	7 ax handles.
2 shoeing knives.	24 pick handles.
3 shoeing rasps.	26 hoe handles.
4 squares.	21 fork handles.
1 hand saw.	2 grindstones (worn out).
1 rip saw.	1 shoeing hammer.
1 plain saw.	70 lbs. horseshoe nails.
1 drawing knife.	4 set hammers.
1 tin square.	

The following is the report of farm and garden products for the year ending October 31, 1896 :

Asparagus	15	bushels.
Beans, green	126	"
Beans, dried	50	"
Beets	350	"
Celery	800	bunches.
Cabbage	20,000	heads.
Cucumbers, sliced	350	dozen.
Cucumbers, pickled	33 $\frac{1}{2}$	barrels.
Greens	6	bushels.
Lettuce	140	"
Muskmelons	9,897	"
Onions, green	70	"
Onions, dry	456 $\frac{1}{2}$	"
Potatoes, Irish	160	"
Potatoes, sweet	421 $\frac{1}{2}$	"
Peas	30 $\frac{5}{8}$	"
Radishes	800	"
Rhubarb	123	"
Squash	93	"
Tomatoes, green	179	"
Tomatoes, ripe	1,000 $\frac{1}{4}$	"
Turnips	600	"
Pop corn	25	"

FARM PRODUCTS.

Pears	35	bushels.
Apples	150	"
Beans	250	"
Corn, sweet	750	"
Corn, field	1,920	"
Ensilage	300	tons.
Oats	1,100	dozen.

Pumpkins	500	
Potatoes, Irish	3,000	bushels.
Strawberries	750	gallons.
Wheat	500	bushels.

I desire to commend Bro. S. L. Kain for his able management of the garden. I regret that he will not be with us after this season, as he will remove to California.

The following is a list of stock and farming implements on hand :

REPORT OF STOCK.

13 horses (2 old).	19 calves (11 steers, 8 heifers).
6 mules (2 old).	16 yearlings (8 steers, 8 heifers).
24 sows.	1 Holstein bull.
27 milch cows.	3 fattening hogs.
61 pigs.	1 Poland China boar.
2 dry cows.	

FARMING IMPLEMENTS.

6 road wagons.	2 disc harrows (old.)
1 spring wagon (old).	1 mower.
2 carts (old).	1 sulky rake.
3 buggies (old).	1 wheat drill.
1 carriage.	1 corn drill.
6 plows.	1 fan mill.
1 cultivator.	1 potato digger
6 tooth harrows.	

I submit the following :

PHYSICIAN'S REPORT.

Superintendent T. J. Charlton:

The general health of the boys has been better the past year than any year since my connection with the School, which began in the year 1882.

We have had but one death in the School, Charles Logan, who died from tuberculosis, June 26, 1896, after being confined to the hospital from March 3. He was in very delicate health when he came to the School and was in the hospital frequently from the time he came. He had this disease when committed. Scarlatina was brought to one of the boys in a letter from an

afflicted family, and from it six cases developed. All proved to be of mild form and made good recoveries. The small number of cases attests successful quarantining.

We have recently had twelve cases of typhoid fever, four of which were very serious ones. All but two have recovered and they are safely convalescent. The above are the cases of importance that have occurred during the year.

We have made vigorous search for the source of the typhoid trouble, but have, as yet, been unsuccessful in ascertaining it.

A careful analysis of the water supply failed to disclose anything deleterious in it.

Each year marks improved sanitary conditions and evidences due care to prevent sickness.

Miss Maggie Barrett has been untiring in her care of the sick, and to her intelligent nursing is due, in great measure, the recovery of all of our typhoid patients.

Thanking yourself, Mrs. Charlton, the Board of Control and officers for kindness shown, I submit this, my fifteenth annual report.

November 1, 1896.

AMOS CARTER, M. D.

CHAPLAIN'S REPORT.

Superintendent T. J. Charlton:

I submit my report of work as Chaplain for the year ending November 1, 1896.

I have been with you now thirty-nine months, during which time I have missed but three Sabbaths. In my work of the last year I have been called upon only once to hold funeral services at the School and once at the Boys' Home, both of whom had professed a faith in and acceptance of their Saviour.

I have tried to preach a simple gospel of faith and right living, to make brighter the history lessons of Saturday nights and furnish my quota of pleasure to the ever enjoyable entertainments that succeed them; to visit the boys in their homes and on their playgrounds, and to know personally each of them. Especially have I tried to enforce your teaching that this institution is a home, built and supported on the broad

foundation of human charity, which says that a boy shall not be cast out for a first offense, but shall be prepared and sent into the busy world again to have another chance to make a good citizen.

I have endeavored to give them as much good reading matter as possible, such as books, magazines, Youths' Companions, church papers, etc., kindly furnished me gratuitously by my friends and others who know something of the good done by the School. I have been fortunate in securing a large amount of this kind of literature.

I have endeavored to keep in touch with many of the boys who have gone out on honor badges, both by personal contact and correspondence, and some of my most valued boy friends are among the graduates of this School.

That many homes are brightened and mothers' hearts comforted by our work is a fact of which I receive evidence very frequently. Surely nothing can give a person greater pleasure than seeing a good life come out of chaos, and that we have our share of that reward is well known to all who are acquainted with the results of our work.

That it may continue on the same lines as long as there is an erring boy to set right is my sincere wish.

Respectfully,

A. G. Cox,
Chaplain.

In conclusion, I desire to return my thanks to you, gentlemen of the Board of Control, for the hearty support you have given me during the past year.

To all the officers and ladies, who have labored so faithfully fourteen hours a day, I desire to return my sincere thanks.

T. J. CHARLTON,
Superintendent.

14
TWENTY-FIFTH ANNUAL REPORT

OF THE

MANAGERS

OF THE

Indiana Reform School for Girls
and Woman's Prison,

FOR THE YEAR ENDING OCTOBER 31, 1896.

TO THE GOVERNOR.

INDIANAPOLIS: .

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1896.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, December 11, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 12, 1896. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILY,
Auditor of State.

THOMAS BARNETT	Night Watchman.
JOSEPH SCHNEIDER	Laundry Collector.
JOHN C. COX	Lodge Keeper.

MANAGERS' REPORT.

INDIANAPOLIS, IND., October 31, 1896.

To the HON. CLAUDE MATTHEWS, Governor of Indiana:

SIR—We have the honor to submit the twenty-fifth annual report of the Board of Managers of the Indiana Reform School for Girls and Woman's Prison, and also the reports of the Superintendent, Physician and Secretary of the Board. These reports give a satisfactory summary of the financial, sanitary and moral condition of the institution.

There has been no change in the membership of the Board since the last report. On March 4, 1896, Mrs. Claire A. Walker was elected, for the second time, President of the Board of Managers, and still holds that position. Miss Sarah F. Keely was re-elected Superintendent; Susanna J. Pray, Assistant Superintendent; Sarah Stockton, Physician, and Sara E. Downing, Secretary and Bookkeeper.

The regular meetings of the Board have been held monthly, as required by law, and many special meetings have been held, as the interests of the institution required.

While the number of commitments to the Prison has been larger during this year than last, the number of commitments to the Reform School has been but one-half as large as that of last year, owing to a statement from the Board of Managers and Superintendent to the various courts throughout the State from which girls are committed to the Reform School that there are no longer accommodations for more girls.

The two institutions together now have two hundred and forty-eight inmates, all under one roof. We have not sufficient accommodations for this number of inmates. The Reform School part of the building is crowded. Nearly sixty girls are crowded into dormitories, beyond their capacity, or are sleeping in hallways. This condition is likely to grow worse from year

to year. For this and obvious moral reasons, we are of the opinion that the two institutions should be separated. If this suggestion meets with your approval, we would respectfully ask that you bring the subject to the attention of the Legislature, in order that an appropriation may be made for a separate building for the Woman's Prison. As the number of prisoners is now only forty-six, and not likely to be much greater for many years to come, the expense of such a building would not be great, and the benefits resulting from the change would be very decided.

During the last year only such repairs have been made as were required in a sanitary way and for the preservation of the buildings at an expense of \$2,433.38.

As required by Section 6192, R. S. 1881, the Board has estimated and determined the "actual expense per annum of clothing and subsisting an infant committed to the Reform School for Girls," and has fixed the amount at \$168, the counties to pay one-half of this amount.

There was reported to the Treasurer of State during the fiscal year from this source	\$14,971 04
The earnings and receipts paid to the State Treasurer quarterly have amounted to.....	1,540 60
<hr/>	
Thus we have a credit of	\$16,511 64
Leaving a net cost to the State of	23,988 36
<hr/>	
Total amount expended	\$40,500 00

We are of opinion that the time has come when we should have a Cooking School for our girls. It is the fixed policy of the institution to train them to be helpful and self-supporting upon their discharge. There is no better means of doing this than to give them systematic instruction in cooking and kitchen work. They, themselves, realize this, and are as anxious to have such instruction, as we are, that they should receive it. To do this would require the erection of a small two-story cottage building. We, therefore, respectfully ask that you recommend an appropriation for this purpose.

Our annual appropriation during the last two years for maintenance and repairs was \$40,500.

On account of the considerable increase in the number of inmates in the institution we respectfully ask that the annual maintenance be increased to \$45,000.

In order to remove the stigma that now clings to girls after their discharge from the institution, we respectfully recommend that its name be changed from "Indiana Reform School for Girls" to "Indiana Industrial Home for Girls."

We desire to thank you for the sympathetic interest which you have shown in the welfare of the institution and your helpful advice and aid in many directions. During your administration and by your aid we have succeeded, for the first time in the history of the institution, in having insane prisoners removed to the Hospitals for the Insane, where they properly belong.

Respectfully submitted,

CLAIRE A. WALKER,
LAURA REAM,
ISABELLA W. ROACHE,
Managers.

SARA E. DOWNING, *Secretary.*

APPENDIX.

The Superintendent and two members of the Board attended the annual State Conference of Charities and Correction held at Richmond in November, 1896, where a paper was read by the President of the Board, on "Reforms in Our Woman's Prison and Reform School for Girls."

We feel that these annual conferences are very beneficial to those who attend them, and productive of much good in making people acquainted with the management of their public institutions.

SUPERINTENDENT'S REPORT.

INSTITUTION OFFICE, October 31, 1896.

To the Board of Managers:

LADIES—It is with pleasure that I present to you the twenty-fifth annual report of the Reform School for Girls and Woman's Prison, the same being my eleventh annual report as Superintendent:

Since the opening of the institution we have received	1,079 girls
Have received during the year	30 girls
Have returned from ticket-of-leave during the year..	11 girls
Have sent out on ticket-of-leave during the year....	14 girls
Have now out on ticket-of-leave.....	84 girls
Have discharged (being scrofulous)	1 girl
Transferred to Hospital for Insane.....	1 girl
Remaining October 31, 1896.....	202 girls

We have received only one-half as many girls this year as last, because of your decision to retain girls in the institution for a longer time, hoping thereby to tide over the years so full of temptation and danger to young girls, many of whom are almost destitute of any moral power or responsibility.

As we have capacity for only one hundred and sixty, it has not been possible, when we retain the old girls for a longer period, to receive as many new girls as formerly; therefore, notice was sent to the Clerks of the Courts that no more girls could be accommodated.

Now we have two hundred and eighty-six girls under our supervision, since we must keep in touch with the eighty-four girls out on ticket-of-leave by letters, and often visits. They look upon and speak of this as home, and in some instances their clothing is purchased and made.

We continue to be a double institution or rather two separate institutions under the same roof and management. We hope the day is not far distant when the Woman's Prison will be removed to some other location, thus separating more successfully women criminals from incorrigibles, vagrants and first offenders.

The building now occupied by this class is greatly needed in properly caring for the girls in the School, where every available space is now occupied by a bed. The dining-rooms are full to overflowing. It is impossible to teach children proper table manners under existing circumstances. In many respects we are crippled in this work for the lack of room, besides we fully believe the time has come when this separation should be accomplished. The small number of women criminals in the State would not require a large building and if State ground could be utilized the expense would not be great. Even if it should cost a great deal of money, what is the value of money in comparison with the proper education and training of an immortal soul?

This year has been our best year in many respects. The discipline of both institutions has steadily improved. Fewer corrections or punishments have been necessary and these have been much lighter and of shorter duration. The faithful instruction daily given is bringing about better results and we look forward with courage to the years that are to come.

By prudent expenditure and close economy we have been enabled to meet all expenses out of our appropriation and we close our annual account without a dollar's indebtedness.

For the first time since the disastrous fire of 1892 we are out of debt. This good financial condition has only been reached by the most rigid economy. We have made some valuable improvements, but there remains much to be done. The addition of the \$4,500 which was deducted from our appropriation of 1895 would be of the greatest value in the proper extension of this work and I would heartily join with you in asking for an annual appropriation of \$45,000.

The different statements, tables and exhibits following this report will show you all of the receipts and disbursements for the year.

The report of our most excellent and faithful physician will give the proper sanitary and hygienic conditions of our home.

We can not present to your careful consideration a greater need than that of a cooking school. We are expected to train carefully over two hundred girls in this most important industry without any facility for so doing. We have two kitchens where all the food for the Superintendent and her assistant, besides officers and teachers and any guests must be prepared, besides the food necessary to satisfy the appetites of over two hundred hungry girls.

We have no hired help. The cooking, baking and brewing in these kitchens is all done by the girls under the competent supervision of a lady officer or teacher. We have no separate bakery, superintended by a regular baker, as in other institutions. Over a barrel of flour must be moulded and baked each day by inexperienced girls. To have good bread, it is impossible to change bread bakers or cooks as often as is necessary to give some other girl a chance to learn. The bread must be good, the food must be well seasoned and properly cooked. A new girl can not do this, and the officer overseeing all this work has neither time nor opportunity to teach many beginners or exercise the necessary patience with their failures.

We do change girls as often as we possibly can in order to distribute the benefits of these departments, but the daily cry from scores of others is "Oh, please let me go to the kitchen, I do want to learn to cook." There is no room in the entire building that can be utilized for a cooking school. If even a small space could have been found, we would have begun it long ago on a small scale. This necessity has been emphasized day by day for many months and we do strongly urge a special appropriation to take immediate effect for a small cottage building west of the drive to be used for this purpose. We have already waited too long for the facilities to give to these children the proper instructions in this industry which they need in order to fit them for the practical life that awaits them upon their release from this School.

With the entire separation from the penal department and the addition of a cooking school there is nothing to prevent this from becoming the most practical training-school for girls in the world.

Notwithstanding all of the hindrances, it has already a very fine beginning. Very few of the citizens of our own State are

aware of the great success it has already attained, but it never can accomplish its full mission until some of these much needed reforms are made.

GRADES.

The grading system was inaugurated in the School some time past, but has not been designated by a change in dress as it will be hereafter.

A change in our system of marking has also proved very effective. Merits and demerits have almost entirely done away with other punishments. These girls are generally joyous and happy. They have plenty to eat and plenty to wear. Their dresses must be well fitted and neatly made, and are not entirely devoid of the prevailing style. Simplicity of costume, however, is always taught them, and that to be genteel in appearance is far better than to be gaudy.

HEALTH.

Our facilities for personal cleanliness have been increased by the addition of bath-rooms granted. The frequent baths, the well prepared and nutritious food, plenty of fresh air and well ventilated sleeping as well as living rooms have added to our good health. No epidemics have prevailed, no deaths have occurred, no serious disasters have befallen us. Our drainage is good. A driven well supplies the household with filtered drinking water.

Quite a number have been sick and medicine is frequently taken, but places at the table are seldom vacant long at a time.

INDUSTRIES.

We all work, and almost all love to work. What is more honorable than honest toil, and what more delightful than to be able to do things nicely? We encourage the doing of everything that woman's hands can do. We hire no help, but do our own work. Some of the girls are becoming expert painters, and many walls have been cleaned and freshened by their work with brush and paint. They frequently mix the paint, most carefully studying the combination of colors for certain effects. Whitewashing and scrubbing have always been favorite occupations. We continue to do some work for patrons in the

laundry, but not so much as formerly, owing to the increased amount of housework. There are four classes in the girls' laundry—A, B, C and D—A being the highest. Beginners enter Class D, and are transferred from class to class as they become proficient in doing certain kinds of work. When they become perfect in Class A, they are transferred to some other industrial department or made a guard of honor.

The work in the laundry is made more attractive by studying while at work and storing the mind with beautiful quotations from favorite authors. Gems of thought repeated by their officer enter into the brains of the youthful toilers while the foaming soapsuds does its work, and thus they almost forget what might otherwise seem an unpleasant task. An evening party was given one month to the perfect girls by the officer in charge, the ironing room becoming for the occasion an attractive reception room. Thus in every way we seek to dignify labor and make the useful as attractive as the beautiful.

The sewing classes have done much better, and a greater variety of work than in former years. Besides making all the wearing apparel and bedding, classes in embroidery, crocheting, hemstitching and drawnwork have been taught. Especial attention has been given to cutting and fitting by chart. The same course of instruction is taught here that is used in the Sewing Department of our Manual Training School. The work done by the children has been especially praiseworthy. The matching of plaids and stripes, putting in of gussets, overcasting and felling, blindstitching and hemming, as well as the darning, has elicited many words of praise from friends and visitors. The employment of machinery has closed our Caning Department. We still cane for private individuals.

RECREATIONS.

Some hours are set apart for work, some for study and some for play. Exercise in the open air must be taken when the weather permits.

Daily lessons in physical culture and fancy drills and marches are given during the winter months. Illustrated lectures, concerts and home entertainments are frequently given. Games of all kinds are provided for amusement. Each little girl

had her garden spot during the summer where she raised vegetables and flowers. The vegetables were cooked for the children's table.

ESCAPES.

We have had no escapes from the institution. Several girls out on ticket-of-leave have left the homes in which they had been placed and sought other homes, but they have been returned to the institution. Several others drifted into wrongdoing, but they were also returned.

RELIGIOUS INSTRUCTION.

There has been no change in our religious instructions. Sabbath school facilities are unlimited. A weekly prayer-meeting is held in the chapel every Wednesday evening, led in turn by Superintendent and officers. Each day begins and closes with a Bible lesson and prayers.

A great improvement has been made in our vocal music. A song service is held every Friday evening. Ministers from all denominations continue to preach for us on Sunday afternoons. Our band meetings on Sunday morning are times of spiritual refreshment.

LIBRARY.

We have received a number of valuable donations to our library of books, magazines and papers, both religious and secular, but, because of our reduced appropriation and many other expenses, we have not been able to purchase as many new books as were desired and needed. A good book is a safe companion.

We receive regularly from other institutions: "The Dawn," "The Silent Hoosier," "The Advance," "Record and Appeal," "The Home Journal," "The Gem," "Our Companion," "Glen Mills' Daily," "The Plainfield Reformatory," "The Organizer," "The Boy's Lantern," "Lend a Hand," "The Boy's Journal," "The Indiana Farmer" and "The Industrial Gem." These are all read with pleasure. We are also greatly indebted to the Bible Colportage Society of Chicago for a number of religious volumes, also to S. B. Shaw

and wife, of Grand Rapids, for seventy volumes of valuable literature. We still subscribe for "St. Nicholas," "Youth's Companion," "Review of Reviews," "Silver Cross," "Ram's Horn," "The Chatauquan," "Sunday-School Advocate" and "Children's Picture Papers" or illustrated lesson leaves.

SCHOOLS.

Our population is divided into Primary, Intermediate and Grammar Schools. These have maintained as high a standard of scholarship as in the previous years. The attendance at school is compulsory. One-half day is spent in the school-room and the other half-day in some industrial department. There is no choice either of study or work. Lessons are assigned and work is given. The teachers are enthusiastic in their work, the scholars generally studious and obedient. Three teachers are regularly employed, and one of the more advanced scholars teaches a class of eighteen pupils every afternoon. A synopsis of the school work has been furnished me by the teachers, which I give to you in their own words.

PRIMARY SCHOOL.

Our Primary School is composed of the youngest class of girls, and covers both primary and intermediate departments. This year we have thirty-nine girls classified into four grades—First, Second, Fourth and Fifth grades. The classification and methods of teaching are like those of our best public schools. In addition to the common branches, we have vocal music, drawing, physiology, hygiene and calisthenics.

Exercises of interest and of a spicy nature are woven in or take the place occasionally of the daily routine. Last year a literary society was organized and conducted by the pupils according to parliamentary rules. While the girls of this school range from ten to fifteen years, a number of them are in advance of many of the older ones.

The Fifth grade especially has made wonderful progress the past year. In connection with their language work, they have written some good abstracts from sermons delivered by our best city ministers. The study of geography is very fascinating to

this class. It leads their minds outside their limited surroundings. All but the first grade write their own letters.

On account of new young girls coming in, a number of the larger girls who attended school all day last year had to be, because of limited seating capacity, retired to the half day list. This class of girls, eighteen in number, sit and recite in the children's play-room. One of the advanced girls assists with this afternoon class.

As a rule, the girls who come to this school have had few educational advantages. Some are not able to read or write.

A great effort has been made to advance the pupils mentally, morally and spiritually, and to judge from results, the efforts in many instances have been crowned with success.

During the summer vacation the children are given instruction in needlework. The decision of the many visitors who examined the work of this class declared their hemming, back-stitching, darning, matching stripes and mending to be beautiful.

Through vacation the children spend one hour each day in clay modeling. When the weather is pleasant this exercise is conducted in the yard.

GRAMMAR AND INTERMEDIATE DEPARTMENT.

We have six grades, corresponding to the third, fourth, fifth, sixth, seventh and eighth grades in the public school. The "Morning Session" is from 8:45 to 12 o'clock. The third, fourth, fifth, sixth and seventh grades attend this session. Branches taught: Complete arithmetic, Young Folks' History of the United States, Primary geography, Fifth, Fourth, Third and Second Readers (Indiana Series).

Special attention is given to orthography. Dictionaries are used by all the pupils. Language lessons, text-books, complete grammar, intermediate lessons in English grammar, composition and letter writing.

We have an "Afternoon Session" from 1:10 until 5 o'clock. The more advanced pupils all attend this session.

There are three grades. Eighth grade, "A" class, are using the following text-books: Complete Arithmetic, United States History by Montgomery, Complete Geography, Complete Grammar (Indiana Series).

Seventh and sixth grades: Complete Arithmetic, Complete Geography, Intermediate Lessons in the English Grammar, Young Folks' History of the United States.

Special attention is given to orthography with use of dictionary; mental arithmetic, forming original problems, expending stated amounts in house furnishings and wardrobes, groceries, planning a wise distribution of imaginary income, etc.

Language lessons are varied by work in composition, letter writing, descriptions of imaginary travels, stories, etc.

The girls are taught self-reliance, and are led to personal investigation by the use of encyclopedias and outside helps. The girls are kept informed about the current events. They are allowed the daily newspapers. Lessons in zoölogy and botany formed an interesting feature of the "Opening Exercises" during the spring term.

The methods used with the advanced pupils are carried through all the grades.

The girls are studious and obedient in school. They are eager to learn, many of them possessing bright minds.

THE WOMAN'S PRISON.

It never was the intention of the organizers of this work to call this a prison. The name was changed in 1889 in order to better separate in name and public thought those here for crime from the children and girls. It is a reformatory for women convicts. Nothing about it indicates a prison but the iron work that must be used. It is reformatory in all of its details. The letters written by new women always express surprise at their surroundings. They praise their food, their beds, the clean rooms they occupy. They speak in the kindest terms of the Christian influences about them and the advantages they now have to learn and become better women.

They make the garden after the ground is broken and prepared for seed. They gather in the product of their labors. They raise the chickens, milk the cows and attend to the flowers. They make all the mattresses used in the house.

We have a Laundry Department, an Overall Department, a Family Sewing Department and a Dressmaking Department. The finest quilting is done, as well as the piecing of quilts—cotton, woolen and silk. The making and recovering of comforts is also an industry here.

All kinds of fancy work fill the passing hours. The knitting of laces, infants' caps, mittens, both silk and woolen; yokes and insertions. They cook and clean, whitewash and paint. One long-time colored woman is becoming quite proficient as a nurse in the hospital. The training and experience she is receiving will give her an honest living when she is discharged from the institution.

Since the opening of this Prison, October 8, 1873,

there have been received.....	588 women
Discharged	516 women
Died	16 women
Pardoned and paroled by the Governor.....	24 women
Admitted during the year.....	28 women
Transferred to Insane Hospital during the year.....	1 woman
Pardoned by the Governor during the year	1 woman
Discharged during the year.....	16 women
Remaining October 31, 1896	46 women

Religious services are held daily. Sunday-school, which all who are able attend, is taught at 11 o'clock Sunday mornings. The women attend chapel services at 3 o'clock Sunday afternoon, occupying the gallery opposite the pulpit. A night school is taught during the winter months for those who can neither read or write, or do so imperfectly.

HOLIDAYS.

All legal holidays have been observed, generally with some kind of an entertainment in the Reform School, and a day of rest and different amusements in the Prison, with a relaxation of all rules. No opportunity escapes of giving to these unfortunate women a change in daily life and food. Outdoor recreations are freely indulged in during the summer months. All who work well during the week have the privilege of putting up work on Saturday afternoon at 3 o'clock during the summer.

A system of grading was introduced October 1 similar to that in use in the Southern Prison. There are three grades. All new women enter the second grade. The dress for this grade is the same now in use, a very genteel plaid Amoskeag gingham. On the 1st of January, 1897, all who have made a perfect record, both in work and deportment, for three months will go into the first grade, with an entirely different dress, some change in food and additional privileges. Those who have made a bad record in work and deportment will be degraded to the third grade, with a very large plaid gingham dress and fewer privileges. There seems to be a general desire to reach the first grade, and many are looking forward to January 1 with a great degree of interest.

The same Sabbath-school and religious privileges are granted to the women as to the girls, but they are entirely separated from the girls; only during the 3 o'clock chapel service are they in the same room.

In the Prison Laundry there have been laundered

for patrons.....	15,949 pieces
For the institution.....	41,772 pieces

Cash received and turned into State Treasury	\$618 84
--	----------

We do not receive very many strong women. All are broken down in health by the lives they have been leading or other causes. Women often have to be in the hospital for nursing and treatment for weeks before they are able to do any kind of work. Upon their discharge, they always weigh more than when they enter, and we do not remember that any woman ever went away without expressing the desire to lead a different life.

The arrangement of the present building is not at all satisfactory for the proper carrying out of the grading system. A new building would add greatly in properly classifying the inmates.

We have had a few changes in our official force, but none interfering at all with the general routine and effectiveness of the work.

Fourteen hours a day upon duty is often required. A constant spirit of watchfulness is also necessary, lest some word or thought should be dropped that would hinder rather than help

the work. It is not an easy work, but is often very perplexing and troublesome with so many dispositions to study and peculiar temperaments to consider.

It is to the faithful and constant labors of our officers and teachers that much of our success belongs. We would be glad if our school teachers could be relieved entirely from department work, and also that the industrial teachers might have their noons and evening hours free from duty, but with our present number of officers this is impossible.

An officer or agent to watch over the ticket-of-leave girls would be of the greatest benefit to this work.

Since very few of these girls in the School had proper home surroundings before coming here, and as we wish to supply as far as possible this lack which many of them feel, I do fully agree with you in requesting that the name "Indiana Reform School for Girls" be changed to "Indiana Industrial Home for Girls" fully believing that this change will be for the future good of those placed under the guardianship of the State.

In closing, I would express my gratitude to our corps of faithful officers and employes who have been so untiring in their labors, as well as to all ministers and helpers in service or song.

The many words of appreciation spoken by known and unknown friends will never be forgotten. They have been like rays of sunshine coming with their cheer when most overburdened with care and responsibility.

To you, as a Board, our most heartfelt thanks are due for your constant support and kindly consideration.

While to the All-wise God, Who rules over all and to Whom we have ever looked for direction and help, we ascribe all the praise of any success we may have achieved.

Respectfully submitted,

SARAH F. KEELY,
Superintendent.

PHYSICIAN'S REPORT.

LADIES—I herewith submit the report of the Hospital Department of the institution for the year ending October 31, 1896.

There have been but few cases of serious illness in either department. In the Reform School there have been ten cases of malaria; twenty-five of gastric and intestinal derangement; ten of follicular pharyngitis; thirty-four of acute coryza with some respiratory complications; ten of tonsilitis with more or less ulceration, three were recurrent three or four times during the year; two cases of la grippe; four of rheumatism; six of general debility; one of bronchitis; one of pleurisy; one case of taenia solium; two of scrofulous enlargement of the cervical glands. One case of hystero-epilepsy, which has very much improved since menstruation was established; one case of exophthalmic goiter; six of incontinence of urine; fourteen cases of menstrual derangements, ranging in character from painful and irregular to suppressed, profuse or scant flow. Three were suffering from syphilis and other forms of venereal disease when admitted. Quite a number have had various slight ailments, such as mild forms of neuralgia, indigestion, constipation and nervous disturbances due to the age of puberty. One case of melancholia with suicidal and destructive tendencies; she was committed to the Hospital for the Insane.

Requiring surgical attention: One knee was bruised by falling on a door step; one of sprained ankle; one was slightly injured on the head by a flat-iron at the hands of another inmate; one case of fracture of the humerus at the lower third of the bone. One severe case of burn on the right hand, arm, lower limb and breast, caused by falling while carrying a vessel filled with hot fluid. Her recovery was complete and without marring or deformity. One case of in-growing toenail. A number have suffered from painful and carious teeth. One

hundred and ten have been in the Hospital during the year. Some only for a few days and none exceeding twenty-one days at any one time. A number of them have been recurrent. All cases have yielded readily to treatment. No disability has resulted from either injury or illness, and no deaths have occurred.

In the Prison Department there were eight cases of acute gastritis accompanied by more or less intestinal disorder; four cases of general debility, complicated with chronic catarrhal bronchitis; four of la grippe; four of chronic gastritis, associated with atonic dyspepsia; three cases of dysentery; two of chronic cystitis; five of rheumatism.

A few were suffering from venereal disease when admitted. Several have received local treatment for various forms of uterine, pelvic and rectal derangements. Two cases, when admitted, were addicted to the excessive use of opium—one of them left the institution cured of the habit. There have been a few cases of painful and suppressed menstruation; two of menorrhagia; two of mild attack of hysteria. One case of paralysis hemiplegica—she was afflicted when admitted. One case of hemorrhage, the bleeding occurring from the mouth, nose, eyes and ears until she was very anaemic. There was a syphilitic complication of the tertiary form. She was at times irrational, very melancholy, with suicidal tendency, and was committed to the Hospital for the Insane. There is one case of periodic insanity remaining in the institution.

One case when admitted was suffering from syphilitic ozena, in which there has been some ulceration, resulting in a loss of a portion of the soft tissues and bony structure of the nasal tract. Three births have occurred during the year. An octo-roon female child (illegitimate) was born March 5; a white female child (illegitimate) was born April 5; a male fœtus, mulatto, of about four and a half months' development was born July 8. No cause for the premature delivery could be ascertained.

Requiring surgical attention was a severe burn, accidentally caused by a gas flame. Her recovery has been very satisfactory. There has been one scrofulous abscess; one case of incomplete extracapsular fracture of the neck of the right femur. There was a chronic rheumatic condition of the foot and lower limb which has somewhat retarded recovery of the use of the

limb, although the treatment of the fracture was successful. There have been forty-four of primary admissions to the hospital during the year. The recurrent cases have greatly increased that number. No deaths have occurred.

The generous supply of good food and clothing, the excellent sanitary condition and good management of the institution, have largely contributed to the success of the hospital work.

Respectfully,

SARAH STOCKTON,
Physician.

BOOKKEEPER'S REPORT.

OFFICE OF THE REFORM SCHOOL FOR
GIRLS AND WOMAN'S PRISON. }

To the Board of Managers:

I have the honor to submit to you herewith the statistical and financial statements which show the operations and condition of the Reform School for Girls and Woman's Prison for the fiscal year ending October 31, 1896, the same being the twenty-fifth annual report of the institution.

Very respectfully,

SARA E. DOWNING.

Secretary and Bookkeeper.

FINANCIAL TABLES.

EXHIBIT A.

GOVERNING AND CONTROLLING

The Reform School for Girls

—AND—

WOMAN'S PRISON.

LAWS.

AN ACT to establish a female prison and reformatory institution for girls and women, to provide for the organization and government thereof and making appropriations.

[APPROVED MAY 13, 1869.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That there shall be established, as soon as practicable after the taking effect of this act, at or near the city of Indianapolis, an institution to be known as the Indiana Reformatory Institution for Women and Girls.

SEC. 2. The general supervision and government of said Institution shall be vested in a Board of Managers, consisting of three persons, to be known and designated as the Board of Managers of the Indiana Reformatory Institution for Women and Girls; and the members of said Board shall be appointed by the Governor, by and with the advice and consent of the Senate, and shall hold their offices for the respective terms of two, three and four years from the first day of May, 1869, and until their successors are appointed and qualified, the term of each Manager to be designated in his certificate of appointment, and thereafter, upon the expiration of the term of service of any member of the Board of Managers, one Manager shall be appointed in the same manner, whose term of office shall continue four years from and after the expiration of the term of his predecessor, and until his successor is appointed and qualified, and all vacancies in said Board shall be filled by appointment by the Governor, subject to the approval of the Senate at its next succeeding session, and the person appointed to fill a vacancy shall be entitled to hold his office for the unexpired portion of the term of the person whom he may be appointed to succeed. Said Managers, before entering upon the

discharge of their duties, shall take an oath faithfully to perform the duties of their office, which oath shall be filed and preserved in the office of the Secretary of State.

SEC. 3. The said Board of Managers shall appoint one of their number as President of the Board.

SEC. 4. The Governor is hereby empowered to select and establish a site for said Institution, which shall not be more than five miles distant from the corporate limits of the city of Indianapolis, and for that purpose he is authorized to receive, in the name of the State, by donation or purchase, not less than three nor more than ten acres of land, and he shall deposit a certificate of his location of the Institution, together with the deed or deeds of conveyance of such land, with the Secretary of State.

SEC. 5. The said Institution shall consist of two separate and distinct departments, one of which shall be designated as the Reformatory Department, and the other as the Penal Department. Both of said departments shall be under the management of the same officers, but separate buildings for the inmates of each department shall be provided on the same grounds.

SEC. 6. The Board of Managers shall, with the approval of the Governor, prepare and adopt plans for the grounds, buildings and fixtures necessary and proper for such an Institution, within the limits of the appropriation hereinafter made, and if practicable, the plans shall be so arranged that the buildings can be enlarged or added to without injury to their symmetry or usefulness, and the said Board may, with the like approval of the Governor, make and execute all necessary contracts for the construction of such buildings and fixtures, and the improvement of the grounds, according to the plans which may have been so adopted.

SEC. 7. Said Board of Managers may, with the approval of the Governor, appoint a suitable Superintendent of said Institution, and all necessary subordinates, not exceeding a number to be fixed by the Governor, and fix their respective salaries, and shall have power, with the like approval, to make and enforce all such rules, regulations, ordinances and by-laws, for the government and discipline of said Institution, and for the admission of girls into the reformatory department thereof, as they may deem just and proper. The Superintendent and all

the subordinate officers of said Institution shall be females: *Provided, however,* That if a married women shall be appointed Superintendent, or to any subordinate position, the husband of such appointee may, with the consent of the Board, reside in the Institution, and may be assigned such duties or employment as the Board of Managers may prescribe.

SEC. 8. Before entering upon the discharge of her duties the Superintendent shall give bond to the State of Indiana in the sum of ten thousand dollars or over, with security to be approved by said Board of Managers, conditioned for the faithful performance of her duties as such Superintendent, and that she will faithfully account for all moneys, property and effects entrusted to her as such, and shall take an oath or affirmation to discharge the duties of her said office with fidelity, and if said Superintendent shall be a married woman such bond shall be executed by her husband and her sureties, but need not be signed by herself.

SEC. 9. The Superintendent shall reside at the Institution, and shall have the charge and custody of the buildings and other property thereof, and of the inmates who may be committed to both departments of the Institution, and shall govern them in accordance with such rules and regulations as the Board of Managers may prescribe, and shall employ such methods of discipline as will, as far as possible, reform the characters, preserve the health, promote regular improvement in the studies and industrial employment of the inmates of the Institution, and secure to them fixed habits of industry, morality and religion, but the rules, regulations and discipline of each department of the Institution shall be adapted to the character of the inmates thereof.

SEC. 10. No manager, officer or employe of said Institution shall be personally interested, directly or indirectly, in any contract, purchase or sale, made by or to, or on behalf of said Institution; or in any business carried on for or on behalf of said Institution; and all contracts, purchases or sales made in violation of this section shall be deemed and held null and void; and all money paid to such managers, officers or employes, or to any person for their benefit, in whole or in part consideration of such purchase, contract or sale, may be recovered back by a civil action, in the name of the State of Indiana, against such manager, officer or employe, or against

any person acting in his or her behalf; and it is hereby made the duty of the Governor and the Board of Managers, upon satisfactory proof of such interest, to immediately remove such manager, officer or employe so offending, and to report the facts to the Attorney-General, who shall take such legal steps in the premises as he may deem expedient.

SEC. 11. Said Board of Managers shall, on or before the first day of January in each year after the Institution is open for the reception of inmates, make to the Governor a full and detailed report of their doings as such Managers, and of the receipts and expenditures of said Institution, with such other information relating to the condition of the Institution and its inmates, and the results attained, as may be deemed interesting or useful to the public, which report shall be communicated by the Governor to the General Assembly at the next succeeding session thereof.

SEC. 12. Whenever said Institution, or either department thereof, shall have been so far completed as to admit of the reception of inmates intended to be committed thereto, the Governor shall make due proclamation of the fact, and thereafter it shall be lawful for said Board of Managers to receive into their care, custody or guardianship, such inmates as may be committed or transferred to either of the departments of said Institution in the manner hereinafter prescribed.

SEC. 13. The Penal Department of said Institution shall be used for the imprisonment, safe custody and reformation of such women and girls as shall heretofore have been convicted of criminal offenses, and sentenced to the State's Prison at Jeffersonville, and who are now undergoing imprisonment in that prison in pursuance of such sentences, and also of such women and girls over the age of fifteen years who may hereafter be sentenced to imprisonment in the Penal Department of the Institution created by this act, upon conviction by any court of competent jurisdiction, of any crime for which such woman or girl might, prior to the passage of this act, have been sentenced to said State Prison.

SEC. 14. As soon as the Penal Department of the Institution created by this act shall be ready for the reception of inmates, it shall be the duty of the Warden of said State Prison, upon the order of the Governor, to transfer and convey to the Institution created by this act, all the female convicts who may be

then confined in said prison, and deliver them to the Superintendent of said Institution, with a certified statement in writing, signed by such Warden, setting forth the name of each convict, the court by which, and the offense of, and for which she was convicted and sentenced, the date of the sentence, the term of the court at which sentence was pronounced, and the term for which such convict was sentenced; which certified statement in writing shall be sufficient authority for the confinement of such convict in the Institution created by this act, for the portion of the term of such convict which may be and remain unexpired at the time when she shall be transferred to said Institution as aforesaid.

SEC. 15. When the Penal Department of said Institution shall be ready for the reception of inmates as aforesaid, the Governor may, as to any or all of the female convicts who may then be confined as aforesaid in said State Prison, instead of making an order for their transfer as aforesaid, commute the sentences of said convicts, or any or either of them, by substituting imprisonment in the Penal Department of said Institution for the residue of the term for which they may have been respectively sentenced, or for any less period of time.

SEC. 16. After the Penal Department of said Institution shall have been proclaimed open for the reception of female convicts as hereinbefore provided, it shall not be lawful for any court to sentence any female convict to the State Prison upon conviction of any crime, but thereafter every female convict shall be sentenced to imprisonment in the Penal Department of the Institution created by this act, and the term of imprisonment for which such female convict may be sentenced shall be any period of time for which she might, on conviction, have been sentenced to the State Prison, at and prior to the passage of this act.

SEC. 17. If at any time the Penal Department of said Institution shall become so filled with female convicts that no more can be received therein for the time being, nor until it shall be enlarged or relieved of some of its inmates, then the Governor shall proclaim the fact, and after such proclamation any court may sentence a female convict over the age of fifteen years to the State Prison to the same extent and in the same manner as if this act had never been passed, and any female convict so sentenced may at any time thereafter, when she can

be received in the Penal Department of the Institution created by this act, be transferred thereto and imprisoned therein in either of the modes hereinbefore provided for.

SEC. 18. Nothing in the provisions of this act contained shall be so construed as to prevent any court, upon the conviction of any woman or any girl over fifteen years of age, of any criminal offense, from sentencing such convict to imprisonment in the county jail of the proper county under the provisions of any law in force in this State prior to and at the time of the taking effect of this act.

SEC. 19. Whenever said Institution shall have been proclaimed to be open for the reception of girls in the Reformatory Department thereof, it shall be lawful for said Board of Managers to receive into their care and management in said Reformatory Department, girls under the age of fifteen years, who may be committed to their custody in either of the following modes, to wit:

First. When committed by any Judge of a Circuit or Common Pleas Court, either in term time or in vacation, on complaint and due proof by the parent or guardian, that by reason of her incorrigible or vicious conduct she has rendered her control beyond the power of such parent or guardian and made it manifestly requisite that from regard to the future welfare of such infant and for the protection of society, she should be placed under such guardianship.

Second. When such infant shall be committed by such Judge as aforesaid, upon complaint by any citizen, and due proof of such complaint, that such infant is a proper subject for the guardianship of said Institution, in consequence of her vagrancy or incorrigibility or vicious conduct, and that from moral depravity or otherwise of her parent or guardian, in whose custody she may be, such parent or guardian is incapable or unwilling to exercise the proper care or discipline over such incorrigible or vicious infant.

Third. When such infant shall be committed by such Judge as aforesaid, on complaint and due proof thereof, by the Township Trustee of the township where such infant resides, that such infant is destitute of a suitable home and of adequate means of obtaining an honest living, or that she is in danger of being brought up to lead an idle and immoral life.

SEC. 20. All commitments to the Penal Department made under the provisions of this act shall be until the infants committed respectively attain the age of eighteen years; and all commitments to the Reformatory Department until they respectively attain the age of eighteen years, unless sooner discharged from either department by authority of the Board of Managers, or otherwise, as elsewhere provided in this act.

SEC. 21. If any girl under the age of fifteen years shall, under existing laws, or under those which may hereafter be enacted, be tried by any court of competent jurisdiction for any criminal offense for which she might, on conviction, be sentenced for any period of time to be imprisoned in the proper county jail, it shall be competent for the court or jury by which the case may be tried, at their discretion, on conviction, to substitute confinement in the Reformatory Department of the institution created by this act for imprisonment in the county jail, and such confinement shall be until the infant attains the age of eighteen years, unless sooner lawfully discharged by the Board of Managers or otherwise.

SEC. 22. If any girl, under the age of fifteen years, shall be accused before any grand jury of any crime or misdemeanor, and the charge is supported by evidence sufficient to put the accused upon trial, the grand jurors may, in their discretion, instead of finding an indictment against the accused, make a return to the court that it appears to them that the accused is a suitable person to be committed to the guardianship of the Reformatory Department of the Institution created by this act, and the court may thereupon order such commitment until the infant shall attain the age of eighteen years, unless sooner discharged as aforesaid, if satisfied from evidence adduced that such commitment ought to be made: *Provided, however,* That the production of evidence may be waived by the parent or guardian.

SEC. 23. If any girl, under the age of fifteen years, shall be arraigned for trial before any court of competent jurisdiction, charged with the violation of any criminal law of this State, the Judge of such court may, with the consent of the accused, arrest at any stage of the cause any further proceedings on the part of the prosecution, and commit the accused to the Reformatory Department of said Institution, until she shall attain

the age of eighteen years, unless sooner lawfully discharged by the Board of Managers or otherwise.

SEC. 24. Whenever any girl under the age of fifteen years shall be imprisoned to await her trial on any charge punishable with imprisonment, such girl may be brought before the proper Circuit or Common Pleas Judge, in term time or vacation, on a writ of *habeas corpus*, and shall be entitled to a private examination and trial before such Judge, with a view to the question whether such infant ought to be committed to said Institution. Only the parties to the case and the parents or guardian of the accused shall be admitted to such examination, unless one of the parents, the guardian or the legal representatives of the accused shall demand a public trial; in which case all proceedings shall be in the usual manner. And upon such hearing it shall be competent for such Judge to make an order committing the accused to the Reformatory Department of said Institution until she shall attain the age of eighteen years, unless sooner lawfully discharged by the Board of Managers or otherwise.

SEC. 25. Whenever any infant under the age of fifteen years shall be committed to the Reformatory Department of said Institution under the provisions of this act, the order of commitment shall be signed by the Judge by whom it is made, and authenticated by the Clerk of the proper court, under the seal of the court, and such order shall state the name and age of the infant, and the section of this act under which she may be committed, without setting forth or mentioning the offense with which she may have been charged, and no other or further record of the proceedings shall be made unless demanded by the infant, or her parents or guardian. If, however, there shall be a regular trial and conviction under the twenty-first section of this act, the usual record shall be made, and in such cases a certified copy of the judgment shall constitute the order of commitment.

SEC. 26. When a commitment shall be made under either of the specifications of Section 19 of this act, the order of commitment shall also specify under which of the clauses or specifications of said section such order is made.

SEC. 27. The Board of Managers of said Institution may provide by general regulations for the discharge of girls committed to the Reformatory Department of said Institution,

under any section or provision of this act, such discharge to be made by the Superintendent and with the approval of the Board.

SEC. 28. Any person who may be committed to or confined in either department of said Institution, and who may escape therefrom, may be arrested and returned to said Institution by any officer or citizen on the written order or request of the Superintendent or Board of Managers.

SEC. 29. The Superintendent of said Institution shall have power to place any girl committed to the Reformatory Department thereof at any employment for account of the Institution, or otherwise, and cause her to be instructed in such branches of useful knowledge as such Superintendent may think proper, and shall also have power to bind out such infant, with her consent, during her minority, and may execute indentures of apprenticeship for such infant, which shall have the like force and effect as other indentures of apprenticeship made under the laws of this State, but every indenture of apprenticeship so made, before the delivery thereof, shall be approved by the Board of Managers of said Institution, which approval shall be indorsed on the indenture and signed by the President of the Board, and a record of such approval shall be made in the minutes of the business transactions of the Board; and in case any girl so apprenticed shall prove untrustworthy or unreformed, the Superintendent may permit her to be returned to the Institution to be held in the same manner as before any such apprenticeship, whereupon the indenture may be canceled by order of the Board; and if such infant shall have an undesirable master or mistress, the Superintendent may, with the approval of the Board, take her back into said Institution with or without the consent of such master or mistress, and thereupon the indenture shall be canceled. All indentures so made shall be filed and kept in said Institution, and it shall not be necessary to file or record them in any other office or place, but the master or mistress of any girl so apprenticed shall, on request, be entitled to a copy of her indenture.

SEC. 30. If any girl shall be committed to the Reformatory Department of said Institution, upon the complaint or at the instance of her parent or guardian, the cost of transporting such girl to the Institution, and the cost of her subsistence and clothing, shall be paid by such parent or guardian, unless such

parent is unable, by reason of his or her poverty, to pay the same, or unless such guardian has no funds, effects or estate of such infant, out of which the same could be paid. The order of commitment shall, in every such case, state whether the parent is able to pay the cost of the subsistence and clothing of the infant, or whether the guardian has any estate or effects of the infant out of which such costs can be paid. The Board of Managers shall, in every such case, estimate and fix the amount to be paid, and the same shall be paid by the Superintendent quarterly in advance.

SEC. 31. Said Board of Managers shall, with the approval of the Governor, estimate and determine, as near as may be, the actual expense per annum of clothing and subsisting an infant committed to the Reformatory Department of said Institution, and include a statement of such estimated price in each annual report, one-half of the cost of keeping, according to such estimates, together with the entire cost of conveying each infant to the Institution, shall be paid by the county from which such infant may be committed, except in cases where the cost of transporting such infant to the Institution, and her subsistence and clothing, is chargeable to her parent or guardian, under the last preceding section.

SEC. 32. The expenses which any county may be liable to pay for the clothing and subsistence of any girl committed to the Reformatory Department of said Institution, under the provisions of this act shall be paid by the Board of County Commissioners of such county into the State Treasury, on a certified statement in detail of the amount due therefor from such county being transmitted by the Superintendent of the Institution through the Treasurer of State to the Auditor of the proper county.

SEC. 33. And whenever an inmate of the Penal Department, by continuous good conduct, gives evidence of permanent reformation, she may, in like manner, be transferred to the Reformatory Department on probation, and may be continued therein so long as her conduct may, in the opinion of the Board of Managers and Superintendent, justify it.

SEC. 34. For the purpose of carrying out the provisions of this act, the sum of \$50,000 is hereby appropriated, to be paid out of the State Treasury upon the warrants of the Governor: *Provided*, That no building shall be erected under this act, which

shall exceed in cost to the State the sum hereby appropriated. * * *

SEC. 35. If a parent, guardian or master of any infant committed to the Reformatory Department of said Institution, or any person occupying the position of parent or guardian in fact, or any relation by blood or marriage not more remote than first cousin to such infant, shall feel aggrieved by the commitment of such infant to said Institution, he may make written application to the Board of Managers of said Institution for the discharge of such infant, which application shall be filed with the Superintendent, who shall inform the Managers thereof, and the same shall be heard and determined by said Managers at such time as they shall appoint for that purpose, not later than the next regular meeting of the Board. Such application shall state the grounds of the applicant's claim to the custody of the infant and the reasons for claiming such custody. Within ten days after the hearing of such application the Board of Managers shall make and announce their decision thereon, and if they shall be of the opinion that the welfare of such infant would be promoted by granting the application, they shall make an order to that effect; otherwise they shall deny the application. The applicant may, upon the denial of the application, by first giving security for the payment of all costs (the security to be approved by the Clerk of the proper court), commence an action in the Circuit Court or Court of Common Pleas of the county in which the Institution may be situated, for the recovery of the custody of such infant against the managers of the Institution, and the complaint in said action shall state the facts and manner of the commitment, and the making of the plaintiff's application to the managers for the custody of such infant, and the denial of such application by said managers, as well as the ground upon which the plaintiff relies for the recovery of the custody of such infant. Said action shall be prosecuted in like manner as other civil actions, and the costs thereof shall be paid by the plaintiff, without reference to the result of the action, unless the court shall state in the judgment that the refusal of the managers to grant the application of the plaintiff was plainly unreasonable, or that the original commitment was manifestly unnecessary and improper.

SEC. 36. Whenever any female under the age of fifteen years shall be sentenced by any court of competent jurisdiction to imprisonment in any county jail, it shall be lawful for the Governor, on the application of such infant, her parent, guardian, or any other person, to commute her punishment by substituting therefor the commitment of such infant to the Reformatory Department of the Institution created by this act, during the minority of such infant, unless sooner lawfully discharged by the Board of Managers or otherwise.

SEC. 37. Said Managers shall be allowed for their services the sum of one hundred and sixty dollars per annum, payable quarterly on the warrant of the Governor, out of the treasury of the State, and no traveling expenses or other allowances shall be paid to said Managers, or any of them.

SEC. 38. It shall be the duty of said Board of Managers to provide teachers and as far as practicable instruct the inmates of said Institution in reading, writing and arithmetic.

SEC. 39. It shall be the duty of the Governor from time to time, as he may deem it necessary, to appoint a Board of Visitors to visit and inspect said Institution and examine as to the treatment, employment and condition of its inmates, and the management of its affairs, including the expenditures thereof; and to enable them to do so, the Board of Managers and Superintendent of the Institution shall afford such Board of Visitors all needful facilities to enable them thoroughly to perform their duty, including an inspection of the books, records and accounts of the Institution. Such Board of Visitors shall consist of one man and two women, and at least two visitations shall be made each year, and the result thereof shall be reported to the Governor, but such visitations shall be made without any cost or expense to the State.

CHAPTER L.

AN ACT supplemental to an act entitled "An act to establish a female prison and reformatory institution for girls and women, and to provide for the organization and government thereof, and making appropriations;" approved May 13, 1869.

[APPROVED FEBRUARY 3, 1873.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana*, That there be, and is hereby, appropriated the sum

of fifty thousand dollars, for the purpose of completing and finishing the building already erected for said institution, and for fencing and putting in order the grounds appurtenant to said building; the said appropriation to be drawn from the treasury in the manner prescribed by the original act, to which this is a supplement.

SEC. 2. Whenever said institution or any portion or department thereof is ready to be furnished, the Board of Managers thereof shall present to the Auditor of State an itemized estimate of the articles needed for that purpose, with the estimated cost of each item or article, which estimate or statement shall be verified by the oath of the President of said Board, and upon the presentation of said estimate or statement to the Auditor of State, said Auditor shall, as soon as practicable, notify the Governor, Secretary and Treasurer of State of the filing of such statement, and if the majority of said officers shall be of the opinion that the proposed expenditure or some part thereof is necessary for the proper furnishing of said institution, or any part or department thereof, they shall direct, in writing, the Auditor of State to draw his warrant for the amount so estimated for, or such part or portion thereof as they may approve, on the Treasurer of State, who shall pay the same to the President of said Board, or to his order, out of any money in the treasury not otherwise appropriated.

SEC. 3. As it is almost impossible, without knowing the number of inmates that will be in said institution, and the number of officers that will be necessary to manage and govern its affairs, the current expenses of said institution shall be estimated for, allowed, and drawn from the treasury as follows, viz.:

At the commencement of each month the Superintendent of the institution shall prepare and verify by his oath an estimated itemized statement in writing of the amounts that will be required to meet the current expenses of such institution during such month, and present the same to the Auditor of State, who shall notify the Governor, Secretary and Treasurer of the State thereof, and if a majority of said officers shall approve and allow said estimate, or a part thereof, they shall direct in writing the Auditor of State to draw his warrant on the Treasurer of State for the amount which may be so allowed by said State officers, or by a majority of them, and said Treasurer shall pay

said warrant out of any moneys in the Treasury not otherwise appropriated. Every such estimated itemized statement shall set forth the number of inmates in each of the departments of the institution, and also the number of officers and persons employed therein.

SEC. 4. The Board of Managers and Superintendent of said institution shall, at the end of every period of six months, commencing with the first money which may be drawn from the Treasury on any estimate made under either of the previous sections of this act, make an itemized report of the expenditure of the money which may have been so drawn from the Treasury under this act, and the Auditor shall carefully examine such report, and if, in his opinion, any money shall have been improperly expended by the purchase of unnecessary articles, or by paying too much therefor, or otherwise, said Auditor shall immediately notify the Governor, Secretary and Treasurer of State, who, in conjunction with such Auditor, shall immediately proceed to investigate the matter, and in accordance with the decision of a majority of these officers the account shall be audited: *Provided, however,* That before rendering an adverse decision upon any such account, or any part thereof, they shall notify the disbursing officer and allow him to present such explanations or adduce such testimony as he may desire in regard to the matter, and they shall have the same power to summon and require the attendance of witnesses as are given to the Circuit Courts of this State.

SEC. 5. The Auditor of State shall keep and preserve a full record of all the proceedings of said officers of the State under the foregoing provisions of this act.

SEC. 6. An emergency is hereby declared to exist for the immediate taking effect of this act; therefore, the same shall take effect and be in force from and after its passage.

CHAPTER XLV.

AN ACT to amend section twenty-one of an act entitled "An act to establish a Female Prison and Reformatory Institution for Girls and Women, to provide for the organization and government thereof, and making appropriations," approved May 13, 1869.

[APPROVED MARCH 11, 1875.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana*, That section twenty-one of "An act to establish a Female Prison and Reformatory Institution for Girls and Women, to provide for the organization and government thereof, and making appropriations," approved May 13, 1869, be amended to read as follows, to wit: Section 21. If any girl under the age of sixteen years shall, under existing laws, or under those which may hereafter be enacted, be tried by any court of competent jurisdiction, for any criminal offense for which she might, on conviction, be sentenced for any period of time to be imprisoned in the proper county jail, it shall be competent for the court or jury by which the case may be tried, at their discretion, on conviction, to substitute confinement in the reformatory department of the institution created by this act, for imprisonment in the county jail, and such confinement shall be until the infant attains the age of eighteen years, unless sooner lawfully discharged by the Board of Managers or otherwise.

SEC. 2. This act shall be in force from and after its passage.

CHAPTER LIII.

AN ACT to amend section five of an act entitled "An act regulating the adoption of heirs," approved March 2, 1855, and declaring an emergency.

[APPROVED FEBRUARY 27, 1875.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana*, That section five of an act entitled "An act regulating the adoption of heirs," approved March 2, 1855, be and the same is hereby amended so as to read as follows, to wit: Section 5. Such court shall not adopt such child if it have a father or mother living, unless such father or mother appear in open court and give consent thereto: *Provided*, That if such petitioner show, by two competent witnesses, that the

residence of such father or mother be unknown, then such court may adopt such child: *And provided further*, That if such child be, at the time of filing and hearing such petition, an inmate of the House of Refuge for Juvenile Offenders, or of the Indiana Reformatory Institution for Women and Girls, committed thereto by law, for other reason than the conviction for crime or incorrigibility, such petition may be filed in any Circuit or Superior Court of this State, and upon the filing of the written consent of the Board of Control or Board of Managers of such institution, to such adoption, then such court may adopt such child.

SEC. 2. Whereas, an emergency exists for the immediate taking effect of this act, the same shall take effect and be in force from and after its passage.

CHAPTER XLII.

AN ACT to amend section two and repealing section 39 of an act entitled "An act to establish a Female Prison and Reformatory Institution for Girls and Women, to provide for the organization and government thereof, and making appropriations," approved May 13, 1869.

[APPROVED MARCH 3, 1877.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana*, That section two of an act entitled "An act to establish a Female Prison and Reformatory Institution for Girls and Women, to provide for the organization and government thereof, and making appropriations," approved May 13, 1869, be and the same is hereby amended so as to read as follows, to wit:

SEC. 2. The general supervision and government of said institution shall be vested in a Board of Managers consisting of three persons, who shall be women, to be known and designated as the Board of Managers of the Indiana Reformatory Institute for Women and Girls. The members of the first Board, to be appointed under this act, shall be Mrs. Emily A. Roache, Mrs. Rhoda M. Coffin and Mrs. Eliza Hendricks, whose terms of office shall be respectively two, four and six years; said terms of office to expire in the same order as the names occur in this act. As vacancies subsequently occur in the Board, their successors shall be appointed by the Governor, by and with the

advice and consent of the Senate, and shall hold their offices for the term of four years from their appointment, and until their successors are appointed and qualified; the term of each manager to be designated in her certificate of appointment; and thereafter, upon the expiration of the term of service of any member of the Board of Managers, one Manager shall be appointed in the same manner, whose term of office shall continue four years from and after the expiration of the term of her predecessor, and until her successor is appointed and qualified. And all vacancies in said Board shall be filled by appointment by the Governor, subject to the approval of the Senate at its next succeeding session; and the person appointed to fill a vacancy shall be entitled to hold her office for the unexpired portion of the term of the person whom she may be appointed to succeed. Said Managers, before entering upon the discharge of their duties, shall take an oath or affirmation faithfully to perform the duties of their office, which oath or affirmation shall be filed and preserved in the office of Secretary of State: *Provided, however,* That the Governor, Auditor and Secretary of State shall constitute a Board of Audit, whose duty it shall be to examine, audit and approve all of the accounts and acts of said Board of Managers, appointed under the provisions of this act. And Section 39 of an act entitled "An act to establish a Female Prison and Reformatory Institution for Girls and Women, to provide for the organization and government thereof, and making appropriations," approved May 13, 1869, is hereby repealed.

SEC. 2. Whereas, an emergency exists for the immediate taking effect of this act, it shall therefore take effect and be in full force from and after its passage.

CHAPTER CLXXIV.

AN ACT entitled an act changing the name of the Indiana Reformatory Institution for Women and Girls to the Reform School for Girls and Woman's Prison, changing the age at which girls may be committed to and discharged from the Reformatory Department of said Institution; an appropriation for said Institution, and declaring an emergency.

[APPROVED MARCH 9, 1889.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That the name of the Indiana Reformatory Institu-

tion for Women and Girls be changed to the Reform School for Girls and Woman's Prison.

SEC. 2. That commitments under existing law, or laws which may hereafter be passed, to the Reformatory Department of the Institution mentioned in Section 1 of this act, may be made to read "for girls not under eight nor over fifteen years of age."

SEC. 3. That all girls who may be now or hereafter committed to said Reform School by virtue of any existing law, or laws which may hereafter be passed, shall be detained in or committed to said Reform School until they respectively attain the age of twenty one years: *Provided*, That the Board of Managers may release on parole all such girls at the age of eighteen years, under such regulations as they may provide, which release shall remain in force during the good behavior of such girl or girls.

SEC. 4. If any girl committed to the "Girls' Reform School," or any woman committed to the "Woman's Prison," shall while therein become insane, such woman or girl may be transferred to the "Asylum for the Insane," under the same rules and mode of procedure as those prescribed for other insane persons.

SEC. 5. There is hereby appropriated out of any money in the Treasury not otherwise appropriated by law the sum of six thousand (6,000) dollars for the construction of a wall on the east side of the grounds belonging to said "Reform School and Prison," and also the sum of six thousand (6,000) dollars for the erection of a hospital building, and equipments for the same, for the use of Prison and School aforesaid.

SEC. 6. Whereas, an emergency exists for the immediate taking effect of this act, therefore the same shall be in force and take effect from and after its passage.

FROM GENERAL APPROPRIATION ACT, 1893.

For the maintenance and repairs of the Indiana Reformatory Institution for Women and Girls, forty-five thousand dollars for the year 1893-4, also for the year 1894-5.

15
BIENNIAL REPORT

OF THE

DIRECTORS AND OFFICERS

OF THE

Indiana State Prison South,

JEFFERSONVILLE, IND.,

FOR THE

Seventy-Fourth and Seventy-Fifth Fiscal Years.

1895-1896.

TO THE GOVERNOR.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.
1896.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, November 28, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 2, 1896. }

To His Excellency, CLAUDE MATTHEWS, Governor of Indiana:

DEAR SIR—The within report is returned to you unsigned. The total amount of moneys disbursed is correct, but the amounts in funds reported as paid to the institution do not agree with the books of this office.

By the act of the Legislature of 1893 the Board of Trustees of this institution was authorized to use any unexpended part of each or either appropriation for maintenance for the fiscal years 1894 and 1895, not to exceed \$10,000 in any one year, in repairs. This money was erroneously drawn at the beginning of the year and is credited in the within report as "special appropriation," and the amount of money credited in the report as received by the Trustees for maintenance is \$74,999.67, while the books of this office show the amount paid for maintenance to have been \$84,999 67. With this exception the report, as far as financial items are concerned, is correct.

Respectfully,

A. C. DAILY,
Auditor of State.

DECEMBER 2, 1896.

Returned by the Auditor of State, with above statement, and transmitted to Secretary of State for publication upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, December 2, 1896.

WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer this 2d day of December, 1896.

THOS. J. CARTER,
Clerk Printing Bureau.

DIRECTORS' REPORT.

INDIANA STATE PRISON SOUTH, }
Jeffersonville, Ind. }

To His Excellency, CLAUDE MATTHEWS, Governor :

SIR.—The Directors of the Indiana State Prison South beg herewith to submit their biennial report for the fiscal years ending October 31, 1895, and October 31, 1896.

For the future needs of the institution we refer you to the report and recommendations of the Warden, which meets with our hearty approval.

When we assumed control of the Prison in the month of June, 1895, we found 489 idle convicts, which the former management had been unable to hire. Since that time we have been able to close contracts for convict labor until we now have every available man contracted.

During the year 1895, we had a proposition from J. B. Tarbox for the hire of three hundred (300) convicts, at forty (40) cents per day, per man, for the manufacture of shoes, and having no building suitable for such purpose, after consultation with the Board of State Officers, a contract was prepared by the Attorney-General, and entered into with J. B. Tarbox, for the hire of three hundred (300) convicts and the erection of a suitable building in which to carry on the manufacturing of shoes. A part of said contract is as follows, to wit:

“The party of the second part (J. B. Tarbox) shall proceed with all convenient speed, to erect at his own expense and charge, within the walls of said Prison, at such point as may be directed by the party of the first part, a brick building 350 feet long, 65 feet wide, with 3 floors, with slate, tin or gravel roof. The plans for said building, and all contracts with reference thereto, to first be submitted to and approved by the party of the first part and said Board of Directors. An

accurate account of the expense thereof shall be kept by the party of the second part, and all accounts and matters in relation to the erection of said building shall, at all times, be subject to the inspection and supervision of said party of the first part, and of the said Board of Directors.

“Said building shall be completed and ready for occupation with all convenient speed, and within sixty (60) days from and after the completion of said building, said second party shall begin his manufacturing business therein, and until the money due from the labor of said convicts, at the rate of thirty (30) cents per day, shall have equaled the amount invested by said Tarbox, in the erection of a said building, and interest thereon, said party of the second part (J. B. Tarbox) shall only be required to pay said party of the first part, in cash, the sum of ten (10) cents per day for the labor of each of said convicts, not only those mentioned in this contract, but in all additional contracts made hereafter, and from and after the time when the amount invested by said Tarbox in said building, with interest thereon, shall have been repaid to said party of the second part, by his applying money due from him to such repayment, as aforesaid, the title and ownership of said building shall be in the State of Indiana, but until such time, to the extent of the money and interest thereon not paid to him, invested by him in building said building, said title and ownership shall remain in the party of the second part, and in case, for any reason without default on the part of the party of the second part, said buildings shall not be paid out of the earnings of said prisoners so reserved by said second party to reimburse him for money advanced by him as aforesaid, the title to said building shall remain in the party of the second part to the extent aforesaid, with the right to remove the same from the premises where located within a reasonable time from and after the termination of this contract or any additional contract made as herein provided.”

Mr. Tarbox has faithfully carried out his part of the aforesaid contract, and under the supervision of the Prison officials the building has been completed, and we now have one of the finest buildings of the kind in the United States.

In addition to the above mentioned contract, we succeeded in making contract with the Bromwell Brush and Wire Goods Company for the hire and use of one hundred (100) convicts at

thirty-seven and one-half ($37\frac{1}{2}$) cents per day, and secured contract with the Taylor Manufacturing Company for fifty (50) convicts at forty (40) cents per day, for the manufacture of pants.

On the 20th day of June, 1896, the contract of the Patton Manufacturing Company was declared forfeited on account of non-payment of money due for convict labor.

We are pleased to say that within ten (10) days thereafter we succeeded in rehiring two hundred (200) of the men at fifty (50) cents per day on much more satisfactory terms than they were working under Patton Manufacturing Company, as we succeeded in hiring the men at fifty cents straight, not being subject to discounts or tasks, as had been the rule under former contracts.

The earning capacity of the Prison under existing contracts will be greater than ever before in the history of the institution, and insures the Prison to be nearly or quite self-sustaining for the next five (5) years, which is a condition seldom known in institutions of this kind.

The sanitary condition of the Prison is certainly satisfactory, as is proven by the general good health of its inmates.

Much attention has been given to cleanliness, and the cells, cell houses, buildings and Prison grounds are kept scrupulously clean.

There has been a marked improvement in the food supply furnished in both quality and quantity. A continued effort has been made to add to the quantity, quality and variety of food furnished the prisoners, as far as has been consistent with a proper regard for the cost.

As evidence of the strict economy practiced the cost for maintenance, per capita, has been reduced to \$102.78 for the year 1896, a reduction from the preceding year of \$11.51 per capita.

For tabulated statement of financial condition of the Prison, receipts, expenditures and other statistics, we refer you to the report of the efficient Clerk.

In closing this report we wish to acknowledge our indebtedness to the Warden, officers and guards for their promptness, intelligence and fidelity they have shown in the discharge of their duties.

With less faithful or capable men the success which has attended this administration of the affairs of this institution could not have been achieved.

W. S. CARPENTER,
JAS. R. HENRY,
JOHN NUGENT,
Directors.

WARDEN'S REPORT.

WARDEN'S OFFICE,
INDIANA STATE PRISON SOUTH,
JEFFERSONVILLE, IND., November 1, 1896. }

To the Honorable Board of Directors of the Indiana State Prison South:

GENTLEMEN—In compliance with law, I herewith submit this, my first biennial report to your honorable body for your action and consideration

Having taken charge of this institution on the first day of August, 1895, the report for the fiscal year ending October 31, 1895, must be made, largely, from the records of this institution as I find them.

FINANCIAL, 1895.

For tabulated statement of the financial condition of the institution for the fiscal year ending October 31, 1895, I refer you to the clerk's report.

A summary of that report shows that there was received for maintenance for the fiscal year ending October 31, 1895, from the Treasurer of State, \$74,999.67, and disbursed for maintenance \$93,147.40, thus showing a deficiency for the fiscal year ending October 31, 1895, of \$18,147.73.

On assuming charge of this institution, August 1, I found that of the appropriation of \$75,000, but \$2,478.56 remained for three (3) months' maintenance.

The Auditor of State would not permit warrants drawn out of the appropriation for 1896 to pay the expenses for the year 1895, hence, by direction of the Board of State Officers and yourselves, I gave my note to the State Bank of Indiana for the full amount of the deficiency, \$18,147.73, and for this purpose we will ask the Legislature to make a special appropriation of that amount, with accrued interest.

For the fiscal year ending October 31, 1895, the receipts for the year were \$49,917.56. The claim against the Patton Manufacturing Company has been given to the Attorney-General for collection, amounting in all to \$32,561.76. The per capita cost for the fiscal year ending October 31, 1895, was \$114.29.

FINANCIAL, 1896.

There was received from the Treasurer of State for maintenance, for the fiscal year ending October 31, 1896, \$85,000, and disbursed for maintenance, \$85,000.

I am pleased to inform you that for the fiscal year ending October 31, 1896, we were, by practicing the strictest economy, enabled to go through the year without a deficiency.

We reduced the per capita cost from \$114.29 for the year 1895 to \$102.78 per capita for the year 1896, the lowest per capita cost in the history of this institution, and probably the lowest of any similar institution of like population in any Northern State. This we have accomplished while we have certainly increased the food supply in both quantity and quality.

In addition to this we are on a better financial basis in way of earnings than ever before known in this Prison. On basis of present contracts the earnings will show an increase of about fifty thousand (\$50,000) per year more than when we assumed charge.

SPECIAL APPROPRIATION.

The ten thousand (\$10,000) dollars "Special Appropriation" for improvements and repairs was properly expended and vouchers filed with Auditor of State for same.

IMPROVEMENTS, 1895.

During the year 1895 thirty-six (36) new cells were added to "B" cell house.

IMPROVEMENTS, 1896.

WARDEN'S RESIDENCE.

When Warden Patton retired from this institution the residence formerly occupied by himself and family was in such condition as to cause him and the retiring prison physician, Dr. Peyton, to call the especial attention of the incoming officials to the necessity of immediate action on their part in way of improving same.

The Warden was authorized to remodel the buildings, which was done at nominal cost, and the residences for use of both Warden and Deputy Warden are now modern buildings, and are in keeping with other buildings belonging to the State.

NEW SHOE BUILDING.

The new shoe building is certainly one of the most handsome, durable and complete factory buildings in the United States. It is 360 ft. by 65 ft., and three (3) stories, made of pressed brick.

Of the first floor, we have 150 ft. by 65 ft. in use as a dining room, with seating capacity of one thousand (1,000), and 50 ft. by 65 ft. as kitchen, with new and modern appliances for cooking.

The floors of both are granolithic. The new closets made of pressed brick are modern, and their capacity is now sufficient for the institution, replacing the old wooded sheds in use heretofore.

Much paint and whitewash have been used during the year. The cells and cell houses have all been repainted and cleaned throughout until the marked improvement in the health of the inmates is noticeable.

Not a death has occurred in the Prison in past four (4) months and the health of the inmates is excellent.

We have erected a frame building covered with corrugated iron, 50 ft. by 100 ft., and two stories, now in use as a ware-room for the Merchants' Shoe and Leather Co. and the Indiana Mfg. Co.

In the building formerly used as brush factory we placed a splendid floor, two inches thick and 180 x 40 ft.

We also purchased a new boiler for the use of the Bromwell Brush and Wire Goods Co. contract.

The roof of "A" cell house was repaired and a part of the wareroom occupied by the Indiana Mfg. Co. was recovered with tin.

Many feet of new walks and guttering were made throughout the prison enclosure. ♦

THE BERTILLON SYSTEM.

Realizing the inadequate system in vogue here in the past, for the identification of convicts, should any escape or afterwards be re-committed for future crimes, I determined to adopt a new method of identification.

For years there has been in use in foreign penal institutions a mode of identification called the Bertillon Method, which consists of a photograph, both in profile and full face view of the prisoner, an exact measurement of his height, length and width of head, of the left foot, the outstretched arms, the trunk of the person seated, the four fingers of the left hand, the left arm and length of ear, together with the color of the eyes and any particular distinguishing marks. As will be seen, all the measurements mentioned are those of the bone dimensions of the human body, which remain unchanged after the body has attained its mature growth. It is conceded that the bones of no two mature persons are the same in length. The ear in its length and width and general formation varies with each individual, and forms a distinctive feature for identification.

This method has been introduced into many of the penal institutions and larger cities in the United States, and is meeting with deserved success. It was highly recommended at the National Congress of Wardens held at St. Paul, Minn., in June, 1894, by those who had demonstrated its practical advantages, and it is also warmly endorsed by prison experts generally. It assures positive identification. The expense of its introduction was merely nominal.

NEEDS OF THE INSTITUTION.

ELECTRIC LIGHT PLANT.

I would respectfully recommend to your honorable body that a complete system of electric lights be placed in this institution, so that the prison inclosure, all rooms of each building and every cell may be properly lighted.

We have no light for the cells but coal oil and candles. This is a very unsatisfactory light at any time, and more so now, since electricity has been made to furnish a better one.

The convicts are compelled to use candles and lamps in their cells to read, and on winter mornings they must use them to dress by, and the lights in the cell houses are totally inadequate for this purpose.

Such a system would be a most beneficial sanitary measure, as it would greatly decrease eye diseases, and will also, I have reason to believe, cause a diminution in the number of throat and pulmonary cases, which are largely attributable to the vitiated air of the cells from old, globeless, smoking, kerosene lamps, would also eliminate the ever threatening danger of explosion and conflagration and would add greatly to the comfort and convenience of all connected with the institution.

CELL HOUSES.

The present capacity of the cell houses is inadequate. We have but 584 cells, while the daily average population for the fiscal year ending October 31, 1896, was 827, an increase over the year preceding of 12.

We are for this reason compelled to require many of the inmates to sleep in corridors, and in two hundred cells we are compelled to place four hundred men. This is a vicious and deplorable condition and should be remedied.

The legislative committee of the session of 1895 recommended the building of a new and modern cell house, but failed to make the necessary appropriation.

The necessity for its construction yet exists and is apparent to all. The present cell houses should have better and forced ventilation.

HOSPITAL.

The hospital facilities are not what they should be. There should be a remodeling of the building now used as dining room and work shop and modernized for a hospital.

CHAPEL AND SCHOOL ROOM.

The room now used as hospital should be, in addition to the first floor of same building, remodeled for a chapel, and the room now used as chapel converted into a school room.

You will notice by reference to the Clerk's report that we have 276 inmates that can neither read nor write. Intellectual education is one of the best means of reformation.

LIBRARY.

By decision of the Attorney-General, we were compelled to turn into the State Treasury the Library Fund, amounting to \$1,986.05 that had been collected as fees from visitors.

This leaves the institution without any special fund for the improvement of the library.

I am not unmindful of the burdens already on the tax-payers of our State, and for this reason I hesitate in making other recommendations for needed improvements.

RELEASED CONVICTS.

The present law governing the discharge of convicts should be amended, authorizing the Prison officials to purchase tickets in any direction from the Prison to a distance equal the distance of place of conviction, and the men when released should be given a durable suit of clothing and ten (\$10) in money.

PRISON DISCIPLINE.

THE GRADING OF CONVICTS.

The improvement of public offenders is necessary for the security of society. The aim of Prison discipline is both to punish and reform the wrong doer. The quality, measure and method of its infliction have been gravely and variously discussed by very many of the ablest minds of the enlightened world for some score of years.

The advancing sweep of intelligence, modified by the softening and ameliorating influences of Christianity, have done much to mitigate the rigor and simplify and humanize the methods of punishments.

As in the church and the school, so in the prison; the internal policy of each has been growing more and more humane for many years past, and this tendency will no doubt continue, so long as the beneficent results afford the highest sanction.

It has been my aim to secure good order, industry and willing acquiescence in the necessary rules of the Prison, and to inspire all with the hope of social respectability and business success after the expiration of their term, by first winning their implicit confidence. This could best be accomplished by the adoption of the grade system, whereby the convicts are classified into three (2) separate and distinct grades, first, second and third, with certain privileges for each grade, and they are but very few indeed for those in the third grade. We have been enabled by the adoption of the grade system to abolish the whip entirely, and all other punishments have been reduced as well.

The inmates are shown that the relation of the prison official to them is not one of choice, but of duty to society, to the State and to themselves that whatever of exactions are required of them or discipline enforced against them, is not a mere exhibition of his power or their helpless weakness.

They are taught that they are men and entitled to just such treatment as their conduct shall logically challenge.

Authority is never exercised for the purpose of showing its rightful existence and possession, but for the purpose of reformation and discipline only. Judicious firmness, intelligent patience and inflexible impartiality are the qualities wherewith we are to execute our important trust.

To successfully carry out this idea, I deemed it advisable to go outside the State to secure the services of an experienced prison man, one who was capable and in full sympathy with the new order of things, and after making thorough and careful investigation, on June 1, 1896, I selected Mr. Albert Garvin, of Kansas, as my Deputy. Mr. Garvin has had over twenty (20) years successful experience in prison work in Illinois and Minnesota, and his selection has proven a wise one.

The discipline and the moral and physical condition of the prisoners and the institution in general have shown marked improvements in the past year.

The Senate Committee appointed by the Lieutenant-Governor during the session of 1895, has given much thought and time to the work assigned them, viz.: "The advisability of working convicts on the public highways."

If it were practicable to distribute the prisoners from the two prisons throughout the State in camps, and work them, as has been suggested, the spectacle thus presented would soon prove so revolting and degrading that the public would demand their speedy recall to the prisons. Happily this part of the question—the employment of the prisoners—has been settled by us, in so far as this institution is concerned, for five, and possibly ten, years to come.

If, however, in the discussion of this matter, public attention shall be called to the fact that, by herding men in our prisons without classification or attempt at separation of the novice in crime from the hardened and confirmed criminal, and without steady, persistent, well directed effort to either rescue the former from his downward course, or prevent the latter, at the expiration of his term, from going forth to resume his raids upon society, there is some danger that we, as a people, are really doing more to increase crime than diminish it, and if, as the result of such discussion, the policy shall be adopted of making our prisons not merely self-sustaining as their highest end, but institutions in which the incorrigible criminal shall be permanently held, and from which the man who honestly intends to become and remain a good citizen, may go forth with the aid and encouragement of the State to secure employment and regain his footing in society, while the authority of the State is continued over him in firm but considerate surveillance until he can stand alone, the present agitation will have brought forth fruit which shall be a blessing to future generations.

PRISON POPULATION.

The number of inmates during the year 1895 averaged 815, an increase of 107 over the year 1894, and for the year 1896, the daily average was 827, an increase of 12 over the year 1895.

For the past two years the greatest number was reached December 25, 1895, when 860 men were in confinement.

Since October 31, 1890, there has been a steady growth in the annual prison population here from 569 to 827, an increase of nearly forty-five (45) per cent. in six (6) years.

By reason of the increased number of guards, made necessary by the employment of all the inmates and the gradual increase in the prison population, the appropriation for the years 1897, 1898 and 1899, for maintenance, should be increased to one hundred thousand (\$100,000) dollars.

To you gentlemen, also Deputy Warden Garvin, Chief Clerk Pate, Dr. Sharp, Chaplain Wood, Steward Jenner and my other subordinate officers as well, I desire to render my sincere thanks for the assistance that you have given me in the management of the affairs of the institution, and I say to you all that I esteem your efforts in my behalf as personal friendship to me as well as your loyalty and faithfulness to your respective positions of trust.

Respectfully submitted,

ALVIN T. HERT.

Warden Indiana State Prison South.

CLERK'S REPORT.

INDIANA STATE PRISON SOUTH, }
JEFFERSONVILLE, November 20, 1896. }

To the Honorable Board of Directors :

GENTLEMEN—I have the honor to submit to you a full statement of the financial and statistical operations of the Indiana State Prison South for the years ending October 31, 1895, and October 31, 1896.

Very respectfully,

JOHN A. PATE,
Clerk.

PHYSICIAN'S REPORT.

JEFFERSONVILLE, IND., October 31, 1896.

To the Board of Directors:

GENTLEMEN—I respectfully submit herewith detailed statements, showing the condition of the Medical Department of the Indiana State Prison South, from October 31, 1894, to the present date. They show that the health of the institution has been satisfactory for the most part, and has improved materially within the last year, in that the total number of cases treated in the year ending October 31, 1895, was 971, and the total number for the year ending October 31, 1896, was 730, showing a decrease of nearly 25 per cent. This is due to the completion of an excellent water-closet and bucket dump, also the exceeding cleanliness of the yard, dining-room and cell-houses, and the strict attention given to airing the bed clothing of the cells and keeping the cells as well ventilated as our poorly constructed cell-houses will permit.

This reflects great credit upon the authorities, and has added greatly to the comfort and maintainance of general health. The cause of the deaths that have occurred in the institution has been due largely to tuberculosis. The institution has been free from epidemics, with the exception of measles, which prevailed during the months of April, May and June, 1895. The water supply during the summers of 1895 and 1896 was very bad and caused a great amount of diarrhoea and dysentery. A better water supply is badly needed. There are two insane persons confined in this institution. While you haven't the equipments to give them the proper care, I would therefore recommend that you make an effort to secure an arrangement by which you may be able to transfer these unfortunates to some hospital for the insane without delay.

The prisoners are well fed. They receive an abundance of fresh meat, bread and vegetables, as a result of which we have none of the diseases resulting from the sameness of diet—such as scurvy and kindred diseases.

The cell-houses contain entirely too many inmates for the number of cells for good sanitation, there being over 800 persons confined in some 580 cells, the majority of which are single cells with two occupants, while cell-houses B and C, in addition to their overcrowded condition, are very deficient in ventilation. It is agreed by the best medical authorities that overcrowded and poorly ventilated sleeping apartments are the chief causes of ill health. So as long as this condition exists it is impossible to maintain perfect health among the prisoners. I therefore recommend that B cell house be remodeled and that cell-house C be removed entirely and replaced by a modern and more commodious building, so that it will be possible to quarter the prisoners in separate and well ventilated cells.

The Prison Hospital is totally unfit for the successful treatment of disease, it being located in the same building and directly beneath the Chapel. The patients are greatly disturbed by the noise from both the orchestra and choir practice. It is also immediately over the pump-house and the guards' dining-room and kitchen. In consequence the patients are continually disturbed by the noise and shaking of the building with each revolution of the machinery of the pump-house, and the rattling of pans, pots and plates in the dining-room. Aside from these unfavorable conditions the arrangement and construction of the Hospital proper render it unfit for hospital purposes, there being but one ward and that containing but one room, thus making it impossible to isolate patients suffering from contagious or offensive diseases, and is in every way a hindrance to giving the patients proper quiet and freedom from disturbance from their fellow patients.

It is without sanitary appliances of any kind, there being no connection with the sewer, which necessitates the use of wooden buckets in the water closet, which is located in one corner of the Hospital, thus making it necessary that these buckets be carried through the Hospital, morning and evening, which is very unhealthy as well as unpleasant to the patients.

We also have a number of diseases that require grave surgical operation to effect a cure. These we are unable to do as

there are practically no instruments or operating room, nor any means by which we can take the proper aseptic precaution.

I, therefore, recommend that a new and properly equipped hospital building be constructed, separate and apart from all other buildings.

As it is useless to expect moral reformation when physical defects are very marked, I beg to commend to the attention of your Board, the system of physical training, which has been incorporated into the discipline and management of the best institutions of the East, and recommend that facilities be secured whereby, through baths, physical training and systematic massage can be practiced, which will prove beneficial to the intellectual and moral elevation of a class of inmates who are more unfortunate than criminal.

Total number of inmates attended morning sick call from November 1, 1894, to October 31, 1896, inclusive.....	36,745
Total number of inmates sent to infirmary for treatment, from November 1, 1894, to October 31, 1896, inclusive.....	1,039
Total number of inmates admitted to Hospital from November 1, 1894, to October 31, 1896, inclusive.....	662
Total number of inmates discharged from Hospital.....	628
Total number of inmates died in Hospital.....	27
Number of inmates remaining in Hospital October 31, 1896.....	7

DISEASES TREATED IN HOSPITAL.

From November 1, 1894, to October 31, 1896, Inclusive.

DISEASES.	No. of Cases.	DISEASES.	No. of Cases.

Insanity	3	Variocèle	1
Indigestion	1	Vertigo	1
Jaundice	1	Wound	21
La grippe	33		
Lumbago	6	Total	662
Lymphangitis	1		

Of the deaths that occurred, sixteen were of tuberculosis, one of mitral insufficiency, one of colliquative diarrhœa, one of general debility, one of pneumonia, one of internal injury received by jumping from a window, one of measles, one of erysipelas, one of dysentery, one of typhoid fever, one of pyæmia and one of tabes mesentericas.

In conclusion, I beg to acknowledge my grateful appreciation of the kindly consideration with which you have treated me, and wish to express my appreciation for the kindly manner in which I have been treated by the Warden, and the uniform courtesy shown me by the various other officials.

Respectfully,

HARRY C. SHARP,

Physician.

MORAL INSTRUCTOR'S REPORT.

JEFFERSONVILLE, IND., November, 1896.

To the Hon. Board of Directors :

GENTLEMEN—I take pleasure in submitting for your consideration my report, chief of which is the moral and spiritual reformation of those who have been led away from the true and honorable paths of virtue and right, and feeling the great responsibility that you have imposed upon me as an officer of this, one of the model institutions of the country.

And permit me to say it has been my ambition to be equal to your expectations, and also to assist the Warden and Deputy Warden of the institution in upholding the honor and discipline of said institution. I have gone in and out before guards and convicts with that Christian deportment and character that I trust will tell for time and eternity.

I have made this my whole duty and study ; I have not been an attorney to get pardons or paroles, which might have been done to the detriment of the convicts and the destruction of the confidence of the convicts, but in words and acts have led them to believe they had a friend in me. I have given special attention to the sick, in visiting them often in the Hospital and seeking through the outdoor charities in getting all the little delicacies to help the physician in building them up. I have attended to the burial of eight convicts, each time holding special service at the burying place. I have also placed head and foot boards at each grave of those who have died since I have been an officer of the institution.

PREACHING.

Services begin at 10:45 A. M. This service is compulsory, in which all are supposed to attend, with the exception of the sick and those who are on duty. Owing to our growing congregation we have not capacity for the men at this service. We have an orchestra and a choir in the preaching services.

but, as in the Sunday-school, we also insist on congregational singing. As to my method in preaching, it is to touch the head and heart alike, and to lead men to a noble pious life.

THE SUNDAY-SCHOOL.

This part of the work is well in hand, and could be called on the outside, a model school. I being superintendent in the main, I am always present to direct and control the school to the best advantage.

Our deportment is almost perfect, brought about by the personal help of Mr. Albert Garvin, Deputy Warden.

We have nine classes, the teachers being convicts, the most proficient we can find. We use the International lesson helps. By this method we keep the men who attend Sunday-school abreast with the Sunday-schools on the outside, so that when he goes out he is up with the work on the outside. We keep a bible in every cell so the men can be conversant with the bible itself. The average attendance has been 269 for the year ending November, 1896. This being not a compulsory service, therefore, its indications are splendid. We have a choir, but we insist on congregational singing. We have splendid music. We spend one hour in the entire service. Sunday-school opens at 8:45 A. M.

NIGHT SCHOOL.

We organized the school November 4, 1895, with 140 scholars, continued until April 27, 1896, Monday and Thursday nights of each week, in which were taught reading, arithmetic and geography. The reason for not teaching writing (only in a meager way) is because of the lack of desks in the school room. We had 11 classes taught by competent convicts, and closed with an average of 126. The school exhibited great interest, and some men advanced very rapidly. We believe that this, the night school, is one of the best moralizing influences in the prison, and we hope that you gentlemen, so far as lies in your power, will enlarge conditions and capacity for carrying out this much needed work in Prison South. Hoping you will recommend to the next Legislature an appropriation that will bring about material condition to this end.

THE PRISON LIBRARY.

The Prison Library is another auxillary to the moral and mental condition of the inmates of this Prison. We feel that the present library is not up to the needs of this Prison in any way. In the first place, we need a better class of books. There is one-third of the present library that ought to be expunged altogether, not because of their condition only, but they are not fit to be read. They would tear down reform, rather than build up. The greater part of the books are in a dilapidated condition, constantly under the hands of the librarian for repairs. In the last report of the moral instructor, Charles A. Manker, he says there are now 2,860 books in the library. A per cent. of this number are mutilated and unfit for circulation, and I have placed them upon the retired list. Now you can see, as there have been no books to replenish this library for four years, consequently the books, three fourths of them, are on the superannuated list. There is at this time one-fourth of the books in this library in a passable condition. We therefore pray that you will get us an appropriation to make the library what it should be. This is necessary from the fact that it would aid materially in the grade of the Prison. We could then have a catalogue and keep a record of what each man read, and would assist the Warden greatly in his work.

On Christmas day, '1895, we gave out to this Prison 840 books, donated by the Colportage Association, of Chicago, Ill., besides papers and periodicals in considerable numbers, donated at various times by the ladies of the W. C. T. U. Our library is on the second floor of the main building, and is not altogether what it should be for a library for this institution. Hoping some day to see a more convenient one on the inside of the Prison, which will give the men better access to the library. This will assist the Warden and Deputy Warden with the management of this department of the Prison. Thanking you gentlemen for your kind consideration and favors, I am

Very respectfully yours,

CHARLES W. WOODS,
Chaplain Prison South.

BIENNIAL REPORT

OF THE

OFFICIALS

OF THE

INDIANA STATE PRISON NORTH,

FOR THE

FISCAL YEARS ENDING OCTOBER 31, 1895-96

TO THE GOVERNOR.

INDIANAPOLIS:

WM B BURFORD, PRINTER, LITHOGRAPHER AND FINDER.

1896.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, November 13, 1896. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, November 25, 1896. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

A. C. DAILY,
Auditor of State.

NOVEMBER 25, 1896.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MYRON D. KING,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, November 25, 1896.

WILLIAM D. OWEN,
Secretary of State.

Received the within report and delivered to the printer this 25th day of November, 1896.

THOS. J. CARTER,
Clerk Printing Bureau.

DIRECTORS' REPORT.

MICHIGAN CITY, IND., October 31, 1896.

To His Excellency, CLAUDE MATTHEWS, Governor of Indiana:

The Directors of the Indiana State Prison North present their biennial report for the two years ending October 31, A. D. 1896, including the reports of the Warden, Clerk, Chaplain and Physician. These reports show in detail the operations of the Prison for the two years in the different departments.

While it is necessary for this Board to include full two years of work in this report, it is also due us to state that our management only dates from June 18, 1895.

We invite particular attention to the Warden's report. It is full, clear and furnishes valuable information as to details in all departments of the prison.

APPROPRIATIONS.

There was on hands at the time of taking charge, June 18, 1895, a special appropriation of fifteen hundred dollars (\$1,500) for roofing and flooring, and five thousand dollars (\$5,000) for new boilers, which has been well spent, as intended by the Legislature, and as will be seen by the Warden's report.

We will urge, in the strongest terms, that one hundred thousand dollars (\$100,000) is not sufficient for the maintenance of the Prison North and make the necessary repairs and improvements that are an absolute necessity at this time, and to bear us out in this proposition, and for the benefit of the next General Assembly, we will show the exact condition of the appropriation on taking charge June 18, 1895:

We found that for the eight months ending June 30, 1895, there had been used by the former administration \$77,964.49,

leaving us a balance of \$22,035.51 for the remaining four months of the year, when we should have had \$33,333.32. And just at this time a decision was rendered by the Attorney-General, and enforced by the Auditor of State, that the appropriation of 1896 could not be used for the maintenance of 1895.

This brought us face to face with the evil that has been permitted at this institution for several years past, *i. e.*, of anticipating appropriations, and showing conclusively that the appropriation, instead of one hundred thousand dollars (\$100,000), has been gradually crawling up by this method of reaching over into the next year, until, at the time of taking charge we found an overdraft of over twelve thousand dollars (\$12,000). This fact was at once called to the attention of the Board of State Officers at Indianapolis, to devise some means of meeting the balance of expense for the year 1895. At the close of the fiscal year ending October 31, 1895, the Warden was instructed to furnish a statement of all bills in excess of the one hundred thousand dollars (\$100,000) appropriation, which was done, and is now a matter of record, and amounts to twelve thousand and fifty dollars and forty-seven cents (\$12,050.47), not including seven hundred and eight dollars (\$708) due William Miller for sixty barrels of pork, at eleven dollars and eighty (\$11.80) per barrel, which was not presented until after this settlement was made.

Our record in part is as follows:

“Now, therefore, be it

“*Resolved*, That for the purpose of providing for such deficiency of \$12,050.47, until such time as the General Assembly can make provision therefor, and to the end that the faith and credit of the State of Indiana, so far as this Prison and its operations are concerned, may be preserved, the Warden of the Indiana State Prison North be authorized and requested to execute his note as such Warden to the First National Bank of Michigan City, Indiana, for the sum of \$12,050.47, payable on or before the 1st day of March, 1897, with 6 per cent. interest from date, and to obtain thereon, if possible, the money with which to pay and discharge the indebtedness so existing and outstanding, provided that said note shall only be executed by said Warden in the event that he can obtain thereon the money with which to pay and discharge such outstanding indebtedness, and provided, further, that the money so obtained on such

note, shall be used only for the purpose of defraying such indebtedness and for no other purpose whatever.

“Resolved, further, That in the event the money is obtained to pay such outstanding bills, the Warden shall keep the receipt therefor separate and distinct from all other papers and vouchers for the information of the General Assembly when it shall convene.

“Resolved, That as soon as it can be ascertained that the necessary moneys can be obtained on such note, the President of this Board shall report the action of the Board to the Board of State Officers for the election of Prison Directors, for such action in relation thereto as it may deem necessary and proper to make in the premises.”

And afterwards the following record was made:

“In the matter of the deficiency existing and unpaid vouchers now in the hands of the Warden.”

The Board met for “the purpose of further considering said deficiency, when Charley Harley presented his note, duly signed as Warden of said Prison, for the sum of \$12,050.47, payable to the First National Bank at Michigan City, Indiana, with interest at the rate of 6 per cent. per annum from date, and payable on or before the 1st day of March, 1897; and the Warden reported that upon final action of this Board and the Board of State Officers, that the First National Bank, of Michigan City, Indiana, will advance the money on said note for the purposes therein named.

“It is now ordered that E. H. Nebeker, President of this Board, furnish to the Board of State Officers for the election of Prison Directors a complete transcript of the proceedings had by this Board in relation to the deficiency existing at the Indiana State Prison North.”

After a complete transcript had been certified to the Board of State Officers, their record in part shows this order:

“The action of the Board of Directors of the Indiana State Prison North was considered by the reading of their report again, and, upon motion of Mr. Ketcham, duly seconded, their action was unanimously approved.” Signed, W. D. Owen, Vice-Chairman; A. C. Daily, Secretary.

The concluding entry was then made by our Board as follows, to wit:

“It is now ordered that Charley Harley give to the First National Bank of Michigan City, Ind., his note as Warden of the Indiana State Prison North for \$12,050.47, and to immediately thereafter pay off the indebtedness against said Prison as has been reported to this Board and the Board of State Officers for the election of Prison Directors.”

We now recommend, that on the convening of the General Assembly, that they take immediate steps to take up the note of \$12,050.47 held by the First National Bank of Michigan City, Ind., and that \$708 be appropriated to pay the bill of William Miller, heretofore mentioned.

IMPROVEMENTS.

We will not go into details of what is necessary in the way of improvements, but will refer you to the report of W. F. Sharpe, a competent architect, who has made a careful examination of all the buildings and has set out in detail the money that will be required to put the buildings of the Prison in proper repair.

We will, however, recommend, in the strongest terms, that the improvements so especially set out in the Warden's report, and on which estimates have been carefully made by a competent architect, be carefully considered by the Legislature, and that the necessary appropriation be made therefor.

We urge that a legislative committee visit the Prison and carefully inspect these proposed improvements. We know that these improvements should be made, and that they are of the utmost importance to the welfare of the Prison.

We would direct your attention especially to that part of the report of the Warden to the construction of a new Hospital.

A great many of the improvements heretofore made seem to have been temporary makeshifts, and have been, and will continue to be, a source of great expense to keep in repair. And we deem it a useless waste of public funds to continue such repairs, and many must be replaced with substantial and lasting improvements.

We refer particularly to the Administration building, Chapel, Hospital building, Warden's residence, cooper shops Nos. 1 and 3 and the heating system.

All other repairs as mentioned by the architect, such as street paving, flooring, roofing, stairways and the enlargement of the water plant, should be made, and we recommend that the amount of 50 per cent. of the earnings should be appropriated for the period of four years to be used in making said improvements, this undoubtedly being the proper method of accomplishing the desired results.

Further, we will state that the cleanliness and sanitary condition of the Prison is the very best that can be had with the present condition of the buildings.

It has been by the most strict economy that the management has been able to hold the expenditures within the appropriation of one hundred thousand dollars (\$100,000), and it is the first time that it has been done for years.

While all this has been accomplished, we want it understood that it will be to the detriment of those confined, and to all the property owned by the State at the Prison North, to longer continue to use this economy.

One hundred thousand dollars (\$100,000) is sufficient for the maintenance of the Prison with the present population and prices of commodities, but more money must be appropriated for repairs and improvements.

In conclusion, we take pleasure in expressing our obligation to Warden Charley Harley, Deputy Warden D. W. Tomlinson, Clerk W. H. Whittaker, Chaplain A. H. Currie, Dr. A. L. Spinning, Steward D. S. Durbin and all other officers for their kindness and efficiency in discharging their various duties and in maintaining order and discipline, without which no institution could exist; also in carefully looking after the finances by which its machinery is kept in motion.

Your obedient servants,

E. H. NEBEKER,
R. S. FOSTER,
H. VAN VOORST,
Directors.

WARDEN'S REPORT.

WARDEN'S OFFICE, STATE PRISON NORTH,
MICHIGAN CITY, ^{IND.}IND., October 31, 1896. }

To Hon. E. H. Nebeker, R. S. Foster and H. Van Voorst, Directors of Said Prison :

I herewith have the honor of making to you my biennial report of the management of this Prison for the fiscal years ending October 31, 1895-96 :

PRISON POPULATION.

	1895.		1896.	
Number in Prison November 1 of each year.	908		851	
Number received during each year	441		427	
Number recaptured	4			
Total		1,353		1,278
Number discharged by expiration of sentence during each year	423		396	
Number pardoned or paroled by Governor each year	40		22	
Number pardoned by President of United States each year	1		1	
Number died each year	18		10	
Number remanded for new trial each year	4		5	
Number escaped each year	8			
Number transferred to insane asylum	4		2	
Number witnesses out	4			
Total		502		436
Number remaining in Prison October 31 each year		851		842

RECEIPTS AND EARNINGS.

	1895.	1896.
The receipts and earnings for each fiscal year were . .	\$106,400 20	\$102,423 21

In the year 1895 there was earned from the Amazon Hosiery Company \$8,669.08, which they refused to pay, their contract having expired, claiming that under their contract the State should buy the machinery in the building used by them. This unpaid balance was filed with the Attorney-General for collection.

Afterward collected and merged into State Treasury.

EXPENDITURES.

	1895	1896.
The expenditures for the maintenance and ordinary repairs of each year were.	\$100,000 00	\$100,000 00

The expenditures for the year 1895 were in excess of \$100,000, the present administration being compelled to borrow \$12,050.47 for bills on hand and unpaid October 31, 1895.

October 31, 1896, every dollar of indebtedness against this institution was paid.

NET SURPLUS EARNINGS.

	1895.	1896.
The net surplus earnings for each fiscal year were. . .	\$3,500 20	\$2,423 21

ITEMS OF EXPENSE.

	1895.	1896.
The maintenance for each fiscal year was expended as follows:		
For Provisions	\$30,285 46	\$26,894 79
Guards	30,749 74	31,107 94
Clothing and bedding	4,271 19	5,103 46
Discharged inmates	4,575 00	
Fuel	7,831 76	6,026 38
Lights	1,053 09	1,362 17
Repairs and improvements	2,283 74	6,456 09
Expenses	3,105 44	6,385 73
Freight on supplies	1,645 45	1,018 31
Provender	1,111 61	941 12
Tobacco	436 57	714 78
Officers' salaries	7,860 28	7,800 00
Drugs and medicines	908 44	807 40
Household goods	909 31	1,063 19
Laundry	1,036 51	921 90
Stationery	757 21	775 19
Barn expenses	802 90	781 25
Escaped convict account	150 00	200 00
Clothing discharged inmates	226 30	1,640 30
Total expended during each year . .	\$100,000 00	\$100,000 00

COST OF MAINTENANCE.

	1895	1896.
Average cost of food per day per man for each year was	\$0 69 $\frac{1}{3}$	\$0 68 $\frac{2}{3}$
Average gross cost per man per day for each year was	30 $\frac{3}{10}$	32 $\frac{1}{3}$
Average gross cost per man per year for each year was	110 46 $\frac{1}{2}$	117 56 $\frac{1}{3}$

The increase as shown in the gross cost per man per day, and year, is caused by more repairs and improvements being made out of the general appropriation in 1896 than in 1895.

CONDITION OF CONTRACTS.

The following is the condition of contract labor in the Prison:

John G. Mott, cooperage:

75 men at 60 cents per day, expiring.....Dec. 16, 1897
 50 men at 42 cents per day, expiring.....Oct. 31, 1899
 25 men at 40 cents per day, expiring.....Oct. 1, 1899

Ford, Johnson & Co., chairs :

100 men at 60 cents per day, expiring.....Dec. 16, 1897

G. E. P. Dodge & Co., boots and shoes :

130 men at 49 cents per day, expiring.....Feb. 15, 1899

Lakeside Knitting Co., woolen gloves and mitts :

100 men at 40 cents per day, expiring.....Dec. 2, 1896

50 men at 40 cents per day, expiring.....Dec. 2, 1900

Allen manufacturing Co., bicycles, etc. :

125 men at 40 cents per day, expiringOct. 1, 1899

The contract, as originally made by the Allen Manufacturing Co., was for 150 men at forty cents per day for the first five years of their contract, commencing October 1, 1894, then they were to pay for the next five years, ending October 1, 1904, forty-four cents per day.

On the 1st day of August, 1896, a contract was entered into by the Allen Manufacturing Company and J. G. Mott, of the cooperage contract; duly signed by the Board of Directors of the Indiana State Prison North and the said parties of the said Allen Manufacturing Company and the said cooperage contract, wherein the Allen Manufacturing Company transfers twenty-five of its men to J. G. Mott, he agreeing to carry out in full the terms of the contract of the Allen Manufacturing Company with reference to the said twenty-five men.

For further information in regard to the financial and statistical operation of the Prison, I would refer you to the Clerk's report.

NEW IMPROVEMENTS COMPLETED.

The five thousand dollars (\$5,000) appropriated by the last General Assembly for new boilers have been used in the purchase and putting in place a battery of three tubular boilers of one hundred and thirty-five horse power each, made by the Atlas Engine Works, of Indianapolis.

In addition, with this appropriation, I have taken down the old engine and boiler house, and constructed in its place a substantial building of brick and slate, mansard roof, 42 by 66 feet, two stories, making, in addition to the boiler room, a suitable water closet, bath room with three new bath tubs for officers, and a suitable room for storing convict clothing.

The fifteen hundred dollars appropriated for roofing and flooring have been spent where most needed, but does not place the buildings in a condition they should be for the protection of the property owned by the State and the contractors.

STORE HOUSE.

In October, 1895, I constructed a store house of brick, 30 by 50 feet. which has sufficient capacity to store our supply of potatoes, turnips and other vegetables for the winter.

UNEXPENDED BALANCES.

The unexpended balance of the water-works fund, wall fund and street fund, amounting to \$4,038.65, as reported by Warden French in his biennial report of October 31, 1894, has been used in the betterment of these improvements and general repairs of the Prison. Of this amount the present administration used \$1,239.80. With the consent and under the direction of the Board of Directors the balance (\$2,798.85) was expended by the former administration.

NEEDED IMPROVEMENTS.

I assumed the management of the Prison on the 18th day of June, 1895, and have now had more than one year to study the needs of this institution, and have taken time and gone to the expense to visit the prisons of other States, in company with Warden A. T. Hert of the Southern Prison, Warden Henry Wolfer of the Stillwater Prison of Minnesota, and Ernest Bicknell, Secretary of the Board of State Charities of Indiana, and after a careful inspection of similar institutions of the States we visited, I must say that Indiana is far behind in the provisions it has made for the care of its criminals.

HOSPITAL.

First of all, I think the State should provide a place where those who are confined as criminals could be properly cared for when sick or disabled.

The hospital that we now have is a miserable place, situate as it is over the kitchen, where the cooking for 850 men is

done, within thirty feet of the boilers and engines of the prison, and within fifteen feet of the railroad track, where cars are taken in and out of the Prison almost every day in the year.

In addition to this, the patients of all kinds of diseases are compelled to occupy the same compartments.

I would earnestly call your attention to this, and ask you to carefully consider the Physician's report.

CHAPEL.

On the 1st day of August, 1896, W. F. Sharpe, of Crawfordsville, a competent architect, was employed, by order of the Directors, to make a careful examination of all the buildings and make an estimate, in detail, of what would be necessary to place the buildings of the Prison in proper repair. One of his first duties was the examination of the building known as the Dining Hall and Chapel, erected in 1893, the result of which can be seen in his written report to me, dated August 18, 1896. After going into the details of the construction of the buildings, he concludes his report by saying:

"The most casual observer can not fail to notice the almost total want of any evidence of good design in the building and the careless disregard of some very common principles of sound construction. In my judgment this building, in its present condition, is unsafe and dangerous.

"Respectfully submitted,

"W. F. SHARPE."

On this report I ordered the Chapel closed, leaving us the school room as the only place for holding religious services, and it is not possible to accommodate more than one hundred men at Sunday services there. We are still compelled to use the ground floor of the Chapel building for the dining hall and kitchen, and one-half of our hospital room is situate in the second story of the west end of this condemned building.

I would call your attention to the architect's report with reference to the Chapel, and urge that the proper appropriation be made to repair or rebuild this structure.

REPAIRS.

In connection with the duties of Architect Sharpe, he has submitted to me a detailed statement of the amounts of material and the approximate cost of placing the buildings and property of the Prison in proper repair; and I urge that his report, which is printed herein and made a part of my report, be carefully considered.

HEATING.

The present heating arrangement for the cell houses is wholly inadequate and worn out. It is impossible in severely cold weather to keep the men in their cells comfortable.

APPROPRIATIONS.

The annual appropriation of one hundred thousand dollars (\$100,000) that has been given this Prison is not sufficient for maintenance, repairs and improvements that are an absolute necessity at this time. The exact condition of the appropriation at the time the present management assumed control is fully set out in the Directors' report. One hundred thousand dollars (\$100,000) will be sufficient for the maintenance with the present population and prices of commodities, if the Legislature can only see its way clear to appropriate a liberal amount for repairs and improvements.

This Prison for years has been self-sustaining, and has not cost the tax-payers of Indiana practically a dollar. It is now high time some attention should be given this institution, that it may be brought up to the standard of similar institutions of other States. For the betterment of the Indiana State Prison North I would urge that the next General Assembly appropriate, in addition to the one hundred thousand dollars (\$100,000) for maintenance, an amount equal to 50 per cent. per annum of the earnings for a period of four years. With this amount, economically expended each year, in my judgment the Prison North could be made a model institution, and would place it in condition that the repairs would be a slight expense to the State for several years to come.

WATER PLANT.

The machinery of our water plant is in excellent condition and adequate to supply all the water we want for all purposes.

Our supply comes from driven wells situate in different parts of the Prison yard, which, during the dry season, did not furnish enough water and can not be depended upon.

Several of the contractors who had formerly taken water from us and paying the State a rental for it had to be supplied from the city mains, owing to the fact that we did not have a sufficient quantity of water and that it was very injurious to their boilers.

I wish to call your attention to the quality, and refer you to the pipes in which this water is conducted, both underground and above ground to different parts of the Prison. There is something in the water which will eat and destroy the pipes, and within from four to six months they have to be renewed. It seems the cold water and hot water have about the same action on the pipes, and I would call your attention to the Doctor's report on the quality of water for drinking purposes. It is totally unfit for use.

I submit you an estimate whereby pure water can be obtained from Lake Michigan at a distance of one mile from the Prison by locating a pumping station near the lake, as the Prison stands at an elevation of 40 feet 6 inches above the lake. The pumping station would only necessitate the buying of boilers of sufficient capacity to run the pumps. We have the pumps, that are as good as new, which could be moved there at a very little cost; and the cost of the building would not be great, owing to the fact that we have the labor here to erect the building. I have received an estimate of the total cost of the improvement, which is as follows: Two new boilers, and for moving the two pumps and a 10-inch intake into the lake for 2,000 feet, with the necessary ball joints and everything complete, so as to make it good with the proper inlet at the end; also secured by piling; also 5,630 feet of 8-inch force mains to pump through to the tower.

All this estimate is calculated by the Prison furnishing the labor—that is, the excavating for water mains, carpenter work and masonry work, and the steam fitting and all class of work,

not including services of an expert to superintend the construction.

All to be completed in good, first-class condition for \$15,000.

Considering the use of water for the hospital in this Prison, and the total unfitness of the water which we have to use for both drinking and cooking, which you can see from the Physician's report, I would recommend the appropriation of that amount for that specific purpose.

DISCHARGING PRISONERS.

I would recommend, in the discharge of prisoners, either an amendment or repeal of the law passed in 1895, as I can see the injustice done to prisoners.

The object of the old law was a good one, but the operative part was entirely wrong; therefore I would recommend that each prisoner, when discharged, should be taken by the Warden, or some proper officer, to the depot and purchase a ticket to any point he desires to go within the prison district.

That in addition, he should be given \$10.00 in money, and a good, warm suit of clothes; and any prisoner discharged between November 1 and March 31 should receive a good, comfortable overcoat.

GRADING SYSTEM.

I would cheerfully recommend to you the grading and parole law. In my opinion, that system is beneficial to the government of the Prison. It gives an incentive to a prisoner to do better and improve, and the history of all prisons where such system has been in vogue is one of the best.

While I have no particular system to recommend, but would think that if your committee would examine the parole and grading system of other States, one could be formulated on information derived from their experience, which would put us on an equal footing with our penal institutions with our sister States.

In addition to this, I would say, while it would be for the betterment of prison life, a man would go out and be received by the outside world in a different manner and be welcome, knowing that he has made for himself a record while in prison.

Then under this system the State will have control of the prisoner until his term of sentence expires, and could be recommit-
 ted at any time if he broke his parole.

Taking all this into consideration, I believe it would be the most beneficial of any law that could be passed for the government of our penal institutions.

FARM.

Connected with the Prison we have a farm of 100 acres, of which there is probably 25 acres under cultivation. With considerable work and attention we have been able this year to raise from this land a considerable amount of different kinds of vegetables. Last spring the guard who has charge of this department, secured from different parts of the city about 300 loads of manure, which has added much to the fertility of the soil and amount raised this year. We have already consumed, up to this time, the following: 192 $\frac{3}{4}$ bushels of potatoes, 14,525 pounds of onions, 7,814 heads of cabbage, 789 bushels of tomatoes, 15 bushels of carrots, 143 bushels of turnips, 882 bunches of celery, 47 bushels of beans, 15,575 ears of sweet corn, 94 bushels of cucumbers, 57,065 young onions, 1,200 stalks of rhubarb, 20,300 radishes, 11 bushels of beets and 14 bushels of peas.

In addition, we have in store for the winter 105 barrels of sauerkraut, 300 bushels of potatoes, 20 barrels of pickles, 15,000 heads of cabbage, 400 bushels of turnips, 90 bushels of carrots, 15 bushels of beets, 800 bunches of celery and 4 tons of corn fodder. All of these productions are from the State farm this year.

IN CONCLUSION.

Following my report is the complete report of W. F. Sharpe, a competent architect, setting out in detail the improvements that are needed and the estimated cost of the same.

I trust that the Legislature will appoint the proper committee to go over this report carefully, visit the Prison and make a careful inspection of the premises, and see that this report is not exaggerated.

During my wardenship I have given my undivided attention to the workings of the Prison, and feel that I have been rewarded by the savings that have been made to the State in

almost every department, and more especially in the Steward's department, where a saving alone of nearly \$4,000 has been made.

After all, the success or failure in an institution of this character depends largely upon the subordinate officers.

With thanks for their assistance, and to you in giving to me encouragement and assistance, I remain,

Respectfully yours,

CHARLEY HARLEY,
Warden.

OFFICE OF SHARPE & HOFFMAN, ARCHITECTS, }
CRAWFORDSVILLE, IND., October 16, 1896. }

To Charley Harley, Warden of the Indiana State Prison North:

SIR—I was recently appointed by you to inspect the buildings of the Indiana State Prison North and estimate the cost of necessary repairs, new buildings and other improvements required to place said Prison in a first class condition with due regard to convenience, comfort, sanitary conditions, efficient administration apartments and general improvement of the plant, the same to be estimated as of the most durable and safe construction consistent with true economy.

I hereby respectfully submit this, my report of the same.

This report is illustrated in detail by Exhibit A, of fifty (50) pages, size 8-in. x 15-in., bound separate from this the formal and condensed report.

Exhibit A forms a part of the general report.

I find that the prison wall incloses eight (8) acres, in the form of a square.

The grounds are laid out much like the business section of a city, or rather more like the grounds of an extensive manufacturing plant, having a street forty (40) feet wide around the ground of buildings, separating them from the prison walls, and with numerous cross streets and driveways to facilitate passage from place to place within the inclosure.

The Prison is virtually a city, equivalent to about four (4) blocks in area, and with a density of population of over 80,000 per square mile.

I find it wanting in many particulars of importance which common prudence and forethought will suggest as necessary in so densely populated a city.

Its incomplete system of sewerage should be extended and perfected, its streets paved, and additional walks provided.

Its system of steam heating is out of date and hopelessly out of repair, and is wholly inefficient in even moderately cold weather.

The cell ventilation and sanitary plumbing for the same, as well as other general sanitary arrangements, within the prison walls are about as bad as can be, and need to be greatly improved and enlarged.

The Administration Department is greatly hampered for want of room and a suitable special building.

As to hospital accommodations for the convicts, there is absolutely nothing in the way of modern hospital arrangements, and what accommodations there are is partially placed in building which is liable to collapse under any good high wind storm. The only way to supply this want is to construct an entirely new and separate hospital building on the most approved modern plan.

The principal materials used in the buildings have very properly been brick and stone.

The trusses and floor construction are of wood, and the roofs are slate and tin.

Certain parts of all buildings under constant use and under the action of our climate wear away rapidly, and need to be repaired and replaced from time to time. This is particularly the case with floors, roofs and the woodwork around openings, and also with brick jambs at openings. I find that this has been apparently lost sight of in the matter of the Indiana State Prison North, and that property of great value is allowed to deteriorate which could have been, and can now, be put in first-class condition by an expenditure of but a small fraction of the original cost.

Most of the buildings have stood for a generation, but have been so well built that the walls, flooring timbers, trusses and roofing timbers are, as a general rule, in good condition. On the other hand, the jar of heavy machinery and imperfect materials have made some of the walls unsafe, and more or less repairs are needed throughout the grounds to replace the parts of the buildings subjected to the greatest wear and tear.

I find also that one of the new buildings, the prison chapel and dining hall, is unsafe and dangerous in its present condition. This can be much improved by repairs and additions in detail, but it is not at all practicable to convert it into a first-class structure.

This building should be torn down and a new one built in place of it, and on a different plan, not involving such great truss strains. This can easily be done and inclose the equivalent of the same area now under roof.

The data are all from my own personal observations and measurements, and the estimates are based on present prices furnished me by Michigan City merchants and jobbers, and are, of course, subject to changes from time to time.

As the prevalent prices of materials are low compared with former years, the estimates should be taken as a minimum rather than as a maximum.

In my judgment, it is the best policy to carry out a work of this magnitude and diversity in from two to four years rather than in a single year.

The following is the estimated cost of the proposed improvements:

Sewerage extension	\$10,000
Outdoor pavements within prison walls	18,620
Iron stairways.....	2,000
Cell-houses with copper roofs	7,870
Kitchen and bakery	7,102
Dungeon and wash-house.....	7,763
Cooper shops and annexes.....	19,321
Woolen mills and annexes.....	5,218
Shoe shop.....	276
Chair shops and annexes	5,586
Chapel and dining-room.....	10,000
Pump-house and inflow water main from lake.....	15,000
Steam-heating and ventilating extensions.....	10,000
Sanitary plumbing.....	10,000
New hospital.....	17,500
New administration building	20,000
New Warden's residence.....	10,000
Working drawings, superintendence and foremen	8,812
Total estimated cost.....	<hr/> \$185,068

The foregoing estimates are shown in detail in Exhibit A, except for item 1, and also 12 to 17, inclusive.

It is customary to estimate the cost of complete working drawings, details and thorough personal supervision of public architectural and engineering works at from 5 per cent. to 10 per cent. of the total cost. I have in the estimate used the minimum rate.

Respectfully submitted,

W. F. SHARPE, Architect.

EXHIBIT A.

Containing sketches and detailed estimates of the cost, repairs, new buildings, and other improvements necessary to put in first-class condition the Indiana State Prison North.

This exhibit forms part of a report to the Warden of said Prison by W. F. Sharpe, Architect of Crawfordsville, Ind., appointed by the Warden to inspect the Prison buildings and report upon the matters covered in this exhibit. Completed at Crawfordsville, Ind., October 16, 1896.

Respectfully submitted,

W. F. SHARPE, Architect.

INDEX.

	PAGE.
Table of prevailing prices of building material	1
Summary of cost of proposed improvements	2
Outdoor pavements required within prison walls	3
Iron stairways	4
Cell houses	4 to 8
Kitchen and bakery	9 to 13
Dungeon and wash house	14 to 17
Cooper shop Nos. 1 and 2	18 to 19
Cooper shop No. 3 and annexes	20 to 22
Cooper shop No. 4	23 and 24
Cooper shop No. 5 and annexes	25
Summary of estimated cost of contemplated new buildings and repairs for all cooper shops and annexes	31
Woolen mills and annexes	32 to 36
Summary of estimated cost of contemplated new buildings and repairs for all woolen mills and annexes	36
Shoe shop	37
Chair shops Nos. 6 and 7	38
Chair shops Nos. 10 and 8 and annexes	39 to 44
Summary of estimated cost of contemplated new buildings and repairs for all chair shops and annexes	44
Chapel and dining hall	45 to 47
Inflow pipe line from Lake Michigan	48 to 49
Plat of prison wall inclosure	50

AVERAGE PREVAILING PRICES OF BUILDING MATERIAL SEPTEMBER, 1896.

LUMBER—

Maple flooring, per M feet	\$30 00
Truss timbers, per M feet	20 00
Joists, per M feet	14 00
Studding, per M feet	12 50
Sheathing and sub-floors, $\frac{7}{8}$ -inch, per M feet	11 00
Molding, $\frac{7}{8}$ inch, quarter-round, per 100 lineal feet	40
Molding, $1\frac{1}{8}$ inch, quarter-round, per 100 lineal feet	60

OPENINGS—

or frames and doors, or frames, sash, glass, pulleys and cords, complete for opening not over 4x9 feet	9 00
Each opening in cell-houses as above.	13 00
Brick, per M, delivered, (building brick)	6 00

STONE—

Water table sills, caps and coping, per lineal foot.	60
Lime, per bushel	18
Sand, per cubic yard	50
Gravel, per cubic yard	1 00

CEMENT—

Louisville, per barrel of 280 pounds	1 25
Portland, per barrel of 380 pounds.	3 25
Lime and sand per M brick	1 00

HARDWARE—

Sash-weights per cwt	1 80
Nails for joists, per cwt	2 75
Nails for bridging and sheathing, per cwt	3 25
Nails for flooring, per cwt.	3 33

TINNING AND ROOFING—

Best IC tin, per square	6 00
Gutters and down spouts (corrugated iron), per lineal foot	25

COPPER ROOFING—

Sixteen ounces per square foot, price per square.	18 00
---	-------

PAVEMENTS—

Cement pavements, per square foot.	15
Brick pavements, per square foot	14

The above prices are those given by Michigan City merchants and jobbers for month of September, 1896, and are subject to fluctuations.

SUMMARY OF COST OF NEW BUILDINGS, REPAIRS AND IMPROVEMENTS FOR INDIANA STATE PRISON NORTH.

Sewerage extension	\$10,000 00
Outdoor pavements within Prison walls	18,620 00
Iron stairways	2,000 00
Cell house repairs	7,870 00
Kitchen and bakery, new building	7,102 00
Dungeon and wash-house, repairs and extensions	7,763 00
Cooper shops and annexes	19,321 00
Woolen mills and annexes	5,218 00
Shoe shop, repairs	276 00
Chair shops and annexes	5,586 00
Chapel and dining-room	10,000 00
Pump house and water main from lake	15,000 00
Steam heating and ventilation	10,000 00
Sanitary plumbing	10,000 00
New prison hospital	17,500 00
New administration building	20,000 00
New Warden's residence	10,000 00
Working drawings, supervision and foremen, at 5 per cent.	8,812 00
Total estimated cost	<u>\$185,068 00</u>

Estimate in detail will be found on the following pages.

Estimated time in which to carry out the above work properly, from two to four years.

OUTDOOR PAVEMENTS REQUIRED WITHIN PRISON WALLS.

Area in square feet of street containing railroad and all west of same not under roof	110,000
Area east of street containing railroad, required to be paved	<u>23,000</u>
Total area in square feet, which should be paved	133,000
Cost of 133,000 feet, at 14c.	<u>\$18,620 00</u>

IRON STAIRWAYS.

There should be not less than ten (10) iron stairways erected within the Prison wall enclosure. Width of each, 48 inches; total rise of each (average), 16 feet.

ESTIMATE OF COST.

Ten (10) stairways, at \$200.00	\$2,000 00
---	------------

NORTH CELL HOUSE.

Extreme dimensions on plan, 50 feet by 231 feet 6 inches.

Thickness of walls, 30 inches.

Dimensions on plan, in the clear, 45x229 feet.

Area of roof on squares, 139.

Number feet of ceiling lumber required under rafters, 12,000.

Length of cornice line, 464 feet.

Length of down spouts (22x40 feet), 880 feet.

Number of windows, 52.

Number of pounds nails, 300.

Size of each window opening, 5 feet by 14 feet 6 inches.

See sketch on page 6.

ESTIMATE OF COST.

Sheathing under rafters for ceiling, 14,400 feet at \$11	\$158 00
Nails, 300 pounds at 3½c	10 00
Tin roof, 139 squares at \$6	834 00
Cornice line, 464 feet at 25c	116 00
Gutter and down spouts, 1,344 feet at 25c	336 00
Windows, 52 at \$13	676 00
Free labor	150 00

Total estimated cost \$2,280 00

NOTE.—A copper roof of 16 ounces per square foot will cost \$18.00 per square and would add to above estimate the sum of \$1,668.00.

SOUTH CELL HOUSE.

The data are the same as for the north cell house, which are given on page 5, except that there are in this cell house 50 windows against 52.

ESTIMATE OF COST.

Practically the same as for the north cell house less the cost of two windows.

Total estimated cost, \$2,254.00.

NOTE.—A copper roof of 16 ounces per square foot will cost \$18.00 per square and would add to above estimate the sum of \$1,668.00.

SUMMARY OF COST OF REPAIRS FOR CELL HOUSES.

North cell house, with tin roof	\$2,280 00
South cell house, with tin roof	2,254 00
Total cost, with tin roofs	\$4,534 00
For cost, with copper roofs, add	3,336 00
Total cost with copper roofs	\$7,870 00

KITCHEN AND BAKERY.

New brick building required, two stories and basement. Extreme dimensions on plan, 40x60 feet.

Length of water-table line, 200 feet.

Length of cornice line 120 feet.

Length of down spouting, 32x6, 192 feet.

Area of cement floors in basement, 1,800 square feet.

Number of brick required, 427,000.

Area of each floor in square feet, 2,000.

Number of roof trusses, 5.

Area of roof in squares, 29.

Number of openings, 77.

See sketches on pages 10 to 13, inclusive.

ESTIMATE OF COST.

Cement floor in basement, 1,800 square feet at 15c	\$270 00
Brick, 427,000, at \$6.00	2,562 00
Lime and sand for 427,000 brick, at \$1.00.	427 00
Water-table, coping, sills and caps, 973 feet at 60c.	583 00
Joists, 8,000 feet at \$14.00	112 00
Joist bridging, 750 feet at \$12	9 00
Steel beams, 4, each 15 inches by 10 feet, No. 80, at \$14.40.	57 00
Iron columns, 1	40 00
Wall plates, 300 feet at \$14.00	4 00
Truss lumber in 5 trusses, 3,100 feet at \$20.00	62 00
Truss-rods, bolts and iron work, 5 trusses at \$6.50	32 00
Wall-plate anchors.	10 00
Rafters, 1,930 feet at \$12.50	23 00
Sheathing for sub-floors and roof, 8,280 feet at \$11.00.	91 00
Cornice line, 120 feet at 25c	30 00
Tin roof, 29 squares at \$6.00.	174 00
Gutters and down spouts, 312 feet at 25c	78 00
Windows and doors, 77 openings at \$9.00	693 00
Maple flooring, 4,800 feet at \$30.00	144 00
Nails and hardware.	65 00
Second story ceiling beams, 1,680 feet at \$12.50	21 00
Inside stairways	300 00
Plastering, 2,000 yards at 25c	500 00
Base boards and molding	65 00
Free labor.	750 00
Total estimated cost	<hr/> \$7,102 00

DUNGEON AND WASH HOUSE.

A one-story brick building, at present 40x140 feet.

Size of annex required, 30x40 feet.

Both the new and old part to be two stories high.

Length of water table-line to annex, 100 feet.

Length of cornice line, 300 feet.

Length of valleys, 60 feet.

Length of down-spouting, 30x16 feet, 1,080 feet.

Floor area in blacksmith shop, 1,000 square feet.

Floor area of all other first floors, 4,960 square feet.

Total area of second-story floors, 5,960 square feet.

Number of roof trusses, 13.

Area of roof in squares, 82.

Number of openings, except for cells, 63.

Number of cells (13-inch walls), 12.

See sketches on pages 15 to 17 inclusive.

ESTIMATE OF COST.

Brick pavement in blacksmith shop, 1,000 feet at 14c	\$140 00
Cement pavement for other first floors, 4,960 feet, at 15c	744 00
Brick, 392,000 at \$6 per thousand	2,352 00
Lime and sand at \$1 per thousand brick	392 00
Water table, coping sills and caps, 787 feet at 60c.	472 00
Joists, 11,920 feet at \$14	166 00
Joists, bridging, 1,000 feet.	12 00
Beam over first-story columns, 1,200 feet at \$20	24 00
Wall plates, 800 feet at \$14	11 00
Iron columns, capitals and bases, 7 at \$40	280 00
Truss lumber in 13 trusses, 620 feet each, 8,060 feet at \$20	161 00
Truss rods, bolts and iron work, 13 trusses at \$6.50	84 00
Wall-plate anchors.	20 00
Ceiling sound-proofing in dungeon	160 00
Rafters, 5,460 feet at \$12.50	65 00
Sheathing for sub-floors and roof, 17,000 feet at \$11	187 00
Cornice line, 300 feet at 25c	75 00
Tin roof, 82 squares at \$6	492 00
Gutters, down-spouts and valleys, 1,440 feet at 25c.	360 00
Windows and doors, 63 at \$9	567 00
Maple flooring, 7,150 feet at \$30	214 00
Nails and hardware	35 00
Free labor.	750 00

Total estimated cost \$7,763 00

COOPER SHOP Nos. 1 AND 2.

Two-story building, new building required. Extreme dimensions on plan, 40 feet 2 inches by 132 feet.

Length of water-table line, 344 feet.

Area of each floor, 4,650 square feet.

Area of roof in squares, 63.

Number of openings, each 4x9 feet, 52.

Number of trusses, 10.

Amount of lumber in each truss, 620 feet.

For other data see sketch on page 19.

ESTIMATE OF COST.

Concrete footing, 350 lineal feet at 35c	\$122 00
Brick, 450,000 at \$6 per thousand	2,700 00
Lime and sand at \$1 per thousand brick	450 00
Water-table, coping, sills and caps, 890 lineal feet at 60c	534 00
Joists (4,650x4 feet), 18,600 feet of lumber at \$14	260 00
Joist-bridging, 1,500 feet of lumber at \$12	18 00
Beam over columns, 1,540 feet of lumber at \$20	30 00
Wall plates, 1,400 feet of lumber at \$14	19 00
Iron columns, bases and capitals, 10 at \$40	400 00
Truss lumber in 10 trusses, 6,200 feet at \$20	124 00
Truss rods, bolts and iron work for 10 trusses	65 00
Wall plate anchors	15 00
Ceiling beams, 3,100 feet at \$12.50	38 00
Rafters, 4,100 feet at \$12.50	51 00
Sheathing for sub-floors, ceiling and roof, 24,000 feet at \$11	264 00
Cornice line, 260 feet at 25c	65 00
Tin roof, 63 squares at \$6	378 00
Gutters and down spouts, 500 feet at 25c	125 00
Windows and doors, 52 openings at \$9	468 00
Maple flooring, 11,160 feet at \$30	334 00
Nails and hardware	35 00
Free labor	750 00
Stone bases to columns (bases under floor)	29 00
Total estimated cost	<hr/> \$7,274 00

COOPER SHOP No. 3.

A two-story building, to be repaired. Extreme dimensions on plan, 40x150 feet.

Thickness of walls, 22 inches.

Floor area in square feet for each floor, 5,400.

Number of double floors required, 2.

Roof area in squares, 72.

Length of down spouts required in feet, 31.

Number of openings, 60.

Size of openings, 4x9 feet.

ESTIMATE OF COST.

Repairs to brick wall	\$100 00
Floors, 12,960 feet, maple, at \$30.00	388 00
Sub-floors and roof sheathing, 21,600 feet, at \$11.00.	237 00
Tin roofs, 72 squares, at \$6.00	432 00
Cornice line, 300 feet, at 35c	105 00
Gutters and down spouts, 550 feet, at 25c	137 00
Window and door openings, 60, at \$9.00	540 00
Nails and hardware	30 00
Free labor required	150 00
Total estimated cost	<u>\$2,119 00</u>

COOPER SHOP No. 3, ANNEX.

An entirely new structure of brick required.

Girth of chimney, 131 feet.

Thickness of chimney walls, 13 inches.

Number of brick in chimney, 156,000.

Number of brick in brick walls under windows, 2,500.

Number of square feet of pavement, 870.

Number of 8-inch by 10-foot iron columns (1-inch metal), 9.

Number of No. 80 15-inch by 13 foot I beams (steel), 16.

Lineal feet of stone coping, caps and sills, 170.

For outline sketch, see page 22.

ESTIMATE OF COST.

Concrete footings, 500 square feet at 15c.	\$75 00
Pavement, 870 square feet at 15c.	130 00
Brick, 158,500 at \$6.00 per 1,000	951 00
Lime and sand at \$1.00 per 1,000 brick	158 00
Steel I beams, 16 No. 80 15-inch by 13-foot at \$18.75	300 00
Iron columns, bases and capitals, 9 at \$30.00	270 00
Stone caps, sills, column supports and coping	102 00
All framing lumber and roof sheathing	15 00
Nails and hardware	5 00
Openings, including ventilators, 6 at \$9.00	54 00
Tin roof, 8 squares at \$6.00	48 00
Free labor	100 00
Total estimated cost	<u>\$2,208 00</u>

COOPER SHOP No. 4.

A one-story building, brick, new building required.

Extreme dimensions on plan, 40 feet by 75 feet.

Thickness of walls, 22 inches.

Floor area in square feet, 2,550.

Roof area in squares, 36.

Length of down spouts in feet, 15.

Number of roof trusses, 6.

Number of openings, 20.

Length of concrete footing in feet, 300.

Length of water-table line in feet, 230.

For other data see outline sketch, page 24.

ESTIMATE OF COST.

Concrete footing, 300 lineal feet at 25c	\$75 00
Brick, 171,000 at \$6.00 per 1,000	1,026 00
Lime and sand	171 00
Water-table coping, sills and caps, 490 feet at 60c	294 00
Joists, 5,100 feet at \$14.00 per 1,000	71 00
Joist bridging, 400 feet at \$12.00 per 1,000	4 00
Wall plates, 400 feet at \$14.00 per 1,000	5 00
Truss lumber in 6 trusses, 3,600 feet at \$20.00	72 00
Truss rods, bolts and iron work for 6 trusses	39 00
Wall plate anchors	8 00
Rafters, 2,400 feet at \$12.50	30 00
Sheathing for sub-floor and roof, 7,320 feet at \$11.00	80 00
Cornice line, 150 feet at 25c	37 00
Tin roof, 36 squares at \$6.00	216 00
Gutters and down spouts, 270 feet at 25c	67 00
Windows and doors, 20 openings at \$9.00	180 00
Maple flooring, 3,060 feet at \$30.00	91 00
Nails and hardware	20 00
Free labor	150 00
Total estimated cost	<u>\$2,636 00.</u>

COOPER SHOP, DRY-HOUSE AND BLACKSMITH SHOP.

This is a one-story brick. New building required.

The data are the same as for Cooper Shop No. 4, except that this building is one foot longer.

See pages 23 and 24.

ESTIMATE OF COST.

Practically the same as for Cooper Shop No. 4.

Total estimated cost, \$2,700.

COOPER SHOP No. 5.

A one-story building.
 Extreme dimensions on plan, 40 feet by 150 feet 8 inches.
 Thickness of walls, 22 inches.
 Floor area in square feet, 5,300.
 Number of double floors required, 1.
 Roof is of slate and in two planes.
 Height of ridges above wall plates, 11 feet.
 Roof area (24 feet by 2) by 150 in squares, 72.
 Length of water-table line in feet, 380.
 Top of water-table above grade, 8 inches.
 Height of side walls above water-table, 15 feet 4 inches.
 Average height of gable walls above water-table, 26 feet.
 Length of down spouting required, 15 feet by 8 inches, 120 feet.
 Length of gutters required, 150 feet by 2, 300 feet.
 Size of window openings, 4 feet by 9 feet.
 Number of openings, 22.
 Joists, 2 by 12 inches by 20 feet, 12-inch centers.
 Number of feet of lumber required, 10,600.
 Joist-bridging, feet of lumber, 1,000.
 New frames, sash, glass, weights, pulleys and cords required, —

ESTIMATE OF COST.

Joists, 10,600 feet of lumber, at \$14	\$148 00
Joist-bridging, 1,000 feet, at \$12	12 00
Sub-floor, 6,360 feet, $\frac{7}{8}$ -inch, at \$11	70 00
Maple floor, 6,360 feet, $\frac{7}{8}$ -inch, at \$30	190 00
Openings, 22, at \$9	198 00
Slate roof patching	100 00
Gutters and down spouts, 420 feet, at 25 cents	105 00
Shoes to down spouts	5 00
Nails and hardware	25 00
Free labor required	150 00
Total estimated cost	<u>\$1,003 00</u>

COOPER SHOP, No. 5.

ANNEX "A."

One-story new brick building required. For outline sketch and dimensions, see page 28.

Length of water-table line, 105 feet.

Floor area in square feet, one floor, 880 feet.

Roof area in squares, 12 feet.

Size of window openings, 4x8 feet.

Number of window openings (doors included), 9.

Length of down spouts, 12x4, 48 feet.

Length of gutters required, 70 feet.

Number of roof trusses, as per sketch, 4.

Lumber required in four trusses, including bracing, 1,800 feet.

Roof sheathing, 1,200 feet.

Lumber required for rafters, 1,500 feet.

Lumber for wall plates, 200 feet.

Lineal feet of sills and caps for doors and windows, 80.

Number of brick in foundation walls, 12,000.

Number of brick in main walls, 26,000.

ESTIMATE OF COST.

Concrete footing, 110 lineal feet at 25c	\$27 00
Brick, 38,000, at \$6.	228 00
Lime and sand per 1,000 brick at \$1	38 00
Stone water-table, coping, sills and caps, 213 feet at 60c.	127 00
Windows (doors included), 9, at \$9.	81 00
Truss lumber, 1,800 feet at \$20 per 1,000	36 00
Truss rods and bolts and plate anchors	25 00
Rafters and wall plates, 1,700 feet at \$12.50 per 1,000.	21 00
Roof sheathing, 1,200 feet at \$11 per 1,000.	13 00
Eaves and cornice, 68 feet at 25c.	17 00
Tin roof, 12 squares at \$6	72 00
Gutters and down spouts, 118 feet at 25c	29 00
Concrete and cement floor, 880 feet at 15c.	132 00
Nails and hardware.	15 00
Free labor required.	100 00
Total estimated cost.	\$961 00

COOPER SHOP No. 5, ANNEX B AND C.

One-story new brick building required. For outline sketch and dimensions see page 30.

- Number of brick, 14,500.
- Roof area in squares, 2.6.
- Length of gutters and down spouts in feet, 28.
- Roof sheathing, in feet, 260.
- Moulding and eaves, cornice, 30 lineal feet.
- Number of openings, 2.
- Door sills and caps in lineal feet, 18.
- Rafters and wall plates in feet, 240.

ESTIMATE OF COST.

Brick, 14,500, at \$6.00 per M	\$87 00
Sand and lime, at \$1.00 per M brick	14 00
Tin roof, 2.6 squares, at \$6.00	15 00
Roof sheathing, 260 feet, at \$11.00	2 00
Rafters and wall plates, 240 feet, at \$12.50 per M	3 00
Wall anchors, nails and hardware	10 00
Openings, 2, at \$9.00	18 00
Free labor.	50 00
Door sills and caps, 18 feet, at 60c	10 00
Moulding and eaves cornice	1 00
Total estimated cost	\$210 00
Total cost of annex B and C = \$210.00 \times 2	420 00

SUMMARY OF COST OF NEW BUILDINGS AND REPAIRS AND
COOPER SHOPS AND ANNEXES.

Cooper shops Nos. 1 and 2	\$7,274 00
Cooper shop No. 3	2,119 00
Cooper shop No. 3, Annex A	2,278 00
Cooper shop No. 4	2,636 00
Dry house and blacksmith shop	2,700 00

Cooper shop No. 5, Annexes B and C.	420 00
Total estimated cost	\$19,321 00

WOOLEN MILLS Nos. 11, 13 AND 14.

- A three-story brick building.
- Extreme dimensions on plan, 63 feet 7 inches by 143 feet 8 inches.
- Thickness of walls, first story, 22 inches.
- Thickness of walls, second story, 17 inches.
- Floor area first story, 8,400 square feet.
- Floor area second story, 8,550 square feet.
- Number of feet joists, first floor, 16,800.
- Number of feet joist bridging, first floor, 1,600.
- Sub-floors required for the three floors.
- Maple floors required for the three floors.

ESTIMATE OF COST.

Joists for first floor, 16,800 feet at \$14	\$235 00
Joist bridging, 1,600 feet at \$12	19 00
Sub-floors for three floors, 30,600 feet at \$11.	336 00
Maple floors for three floors, 30,600 feet at \$30	918 00
Nails	30 00
Repairs to windows.	100 00
Free labor.	125 00
Total estimated cost	<u>\$1,763 00</u>

WOOLEN MILLS Nos. 11, 13 AND 14.

DYE HOUSE.

A one-story brick building required.
 Extreme dimensions on plan, 40x87 feet.
 Thickness of walls, 22 inches.
 Total height of walls, including footings, 20 feet.
 Floor area, 3,000 square feet.
 One end of wall omitted (next woolen mill).
 Number of roof trusses, 7.
 Roof area in squares, 41.
 Number of down spouts, 4.
 Length of exposed water-table line, 95 feet.
 Length of cornice line, 175 feet.
 Number of openings, 20.
 Number of brick required, 150,000.
 For other data see outline sketch page 34.

ESTIMATE OF COST.

Brick, 150,000 at \$6	\$900 00
Lime and sand, at \$1 per 1,000 brick	150 00
Water table, coping, sills and caps, 315 feet at 60c	189 00
Cement floor, 3,000 feet at 15c	450 00
Lumber for seven trusses, 4,200 feet at \$20	84 00
Truss rods, bolts and iron work	45 00
Rafters and wall plates, 4,000 feet at \$12.50	50 00
Roof sheathing, 4 920 feet at \$11	54 00
Wall plate anchors	8 00
Cornice line, 175 feet at 25c	41 00
Gutters and down spouts, 235 feet at 25c	58 00
Nails and hardware	17 00
Openings, 20 at \$9	180 00
Tin roof, 41 squares at \$6	246 00
Free labor.	150 00
Total estimated cost	<u>\$2,622 00</u>

WOOLEN MILLS Nos. 11, 13 AND 14.

DYE HOUSE.

Extreme dimensions, 15x87 feet.

Thickness of walls, 13 inches.

Floor area, 1,190 square feet.

Roof area in squares, 14.

Average height of walls, including footings, 15 feet.

Length of down spouts (10x4 feet), 40 feet.

Length of cornice line, 87 feet.

A one-story new brick building required, for other data see outline sketch, page 34.

ESTIMATE OF COST.

Brick, 36,000 at \$6	\$216 00
Lime and sand at \$1 per thousand brick	36 00
Window sills and caps, 90 feet at 60c.	54 00

SHOE SHOP.

A three story brick building.

Extreme dimensions on plan, 40 feet by 132 feet.

New floor required for third story.

Thickness of walls of third story, 17 inches.

Area of third floor in square feet, 5,000.

ESTIMATE OF COST.

Sub-floor, 6,000 feet at \$11 per thousand	\$66 00
Maple floor, 6,000 feet at \$30 per thousand	180 00
Nails	5 00
Free labor	25 00
Total estimated cost	<u>\$276 00</u>

CHAIR SHOP Nos. 6 AND 7.

Extreme dimensions on plan, 40 feet by 151 feet.
 Area of each of the two floors in square feet, 5,300.
 Thickness of walls, 22 inches.
 Number of squares in roof, 75.
 Length of a down spout in feet, 31.
 Length of cornice line in feet, 300.
 Number of openings, 50.

ESTIMATE OF COST.

Sheathing for sub-floor, second story, 6,360 feet at \$11	\$70 00
Maple flooring, 12,700 feet at \$30 per thousand	381 00
Cornice line, 300 feet at 25c	75 00
Gutters and down spouts, 600 feet at 25c	150 00
Tin roof, 75 squares at \$6	450 00
Windows and doors, 52 openings at \$9	468 00
Nails and hardware	15 00
Free labor	100 00
Total estimated cost	<u>\$1,709 00</u>

CHAIR SHOPS Nos. 10 AND 8.

Extreme dimensions on plan, 40 feet by 200 feet 6 inches.
 A two-story brick building.
 Area of each floor in square feet, 10,700.
 Thickness of walls, 22 inches.
 Number of squares in roof, 96.
 Length of each down spout in feet, 31.
 Length of cornice line in feet, 400.
 Number of openings, 60.

ESTIMATE OF COST.

Sheathing for sub-floors, 25,680 feet, at \$11	\$282 00
Cornice line, 400 feet, at 25 cents	100 00
Tin roof, 96 squares, at \$6	576 00
Gutters and down spouts, 900 feet, at 25 cents.	225 00
Windows and doors, 60 openings, at \$9.	540 00

Nails and hardware	50 00
Free labor	150 00
Total estimated cost	<u>\$2,693 00</u>

CHAIR SHOP Nos. 10 AND 8.

DRY HOUSE ANNEX.

Extreme dimensions on plan, 40 feet 6 inches by 61 feet.
 Roof area, 29 squares.
 Area of each of the two floors, 2,050 square feet.
 Length of cornice line, 120 feet.
 Length of a down spout, 24 feet.

ESTIMATE OF COST.

Sheathing for sub-floors, 2,460 feet at \$11	\$27 00
Maple floor, 2,460 feet at \$30	73 00
Cornice line, 120 feet at 25c	30 00
Down spouts and gutters, 260 feet at 25c	65 00
Tin roof, 29 squares at \$6.	174 00
Nails and hardware	10 00
Repairs to openings.	100 00
Free labor.	35 00
Total estimated cost	<u>\$514 00</u>

CHAIR SHOP Nos. 10 AND 8, ANNEX A, BOILER ROOM.

Extreme dimensions on plan, 36x60 feet.

Number of squares in roof, 24.

Length of cornice line in feet, 72.

ESTIMATE OF COST.

Tin roof, 24 squares, at \$6.00	\$144 00
Gutters and down spouts, 120 feet, at 25c	30 00
Total estimated cost	<u>\$174 00</u>

CHAIR SHOP Nos. 10 AND 8, BENDING ROOM.

One-story new brick building required.

Extreme dimensions on plan, 16 feet and 4 inches by 36 feet.

Floor area in square feet, 510.

Thickness of foundation wall, 17 inches.

Thickness of main wall, 13 inches.

Length of wall, three sides in feet, 69.

Roof area in squares, 6.8.

Lineal feet of window sills and caps, 45.

Number of openings, 5.

For other data see page 43.

ESTIMATE OF COST.

Brick, 31,500, at \$6.00	\$189 00
Lime and sand, at \$1.00 per M brick	31 00
Window sills and caps, 45 feet, at 60c	27 00
Joists, 1,000 feet, at \$14.00	14 00
Rafters, plates, ties and bridging, 1,000 feet, at \$12.50	12 00
Anchors and bolts	10 00
Nails and hardware	15 00
Sheathing and sub-floors and roof, 1,200 feet, at \$11.00	13 00
Cornice line, 69 feet, at 20c	13 00
Tin roof, 6.8 squares, at \$6.00	40 00
Gutters and down spouts, 90 feet, at 25c	22 00
Window openings, 5, at \$9.00	45 00
Maple flooring, 510 feet, at \$30.00	15 00
Free labor	50 00
Total estimated cost	<u>\$496 00</u>

SUMMARY OF COST OF NEW BUILDINGS AND REPAIRS FOR CHAIR SHOPS AND ANNEXES.

Chair shops Nos. 6 and 7	\$1,769 00
Chair shops Nos. 8 and 10.	2,693 00
Dry house	514 00
Annex A (to Nos. 8 and 10) boiler room	174 00
Bending room	496 00
Total estimated cost	<u>\$5,586 00</u>

CHAPEL AND DINING HALL.

Extreme dimensions on plan, 73 feet by 140 feet, 10 inches.

Walls of chapel, thickness in inches, 17.

Height of side walls above chapel floor, in feet, 26.

Center to center of trusses, 10 feet, 4 inches.

Outside wall pilasters (no piers or buttresses), 4 inches by 25 inches.

Center to center of pilasters, 12 feet, 8 inches.

No bracing from truss to truss.

But four trusses have the rods at the wall plate. (See the two following pages, which partially illustrate the weakness of the trussing.)

The building in its present condition is unsafe and dangerous.

ESTIMATE OF COST.

The cost of necessary alterations and repairs to put in safe condition would approach too near the expense of an entirely new building to justify the undertaking.

The building should be torn down, and as much of the old material used as possible in a new structure.

Cost of a new building by using old material, \$10,000.

Considerably more material should be used in a new building than was used in the old, to make strong and durable.

INFLOW PIPE LINE FROM LAKE MICHIGAN.

Distance from present pump-house within prison walls to Lake Michigan by nearest practicable route, in feet, 5,637.

Estimated extension into Lake Michigan, in feet, 1,000.

Total length of proposed water main inflow, in feet, 6,637.

Probable length of tunnel at lake side, in feet, 175.

Fall from surface of ground at base of stand pipe within prison walls to surface of Lake Michigan, in feet, 40.68.

(See fragment of profile on following page.)

ESTIMATE OF COST.

Cost of water main inflow pipe-line, including additional pump-house,
per hydraulic engineer's estimate \$15,000 00

PHYSICIAN'S REPORT.

To the Board of Directors of the Indiana State Prison North:

GENTLEMEN—I hereby submit for your consideration my biennial report, as Physician, for the term ending October 31, 1896, of the sanitary conditions and other matters at the Indiana State Prison North, as required by law.

I have been in charge as Physician of said prison since August 1, 1895, a period of fifteen months.

The sanitary conditions of said prison during the last two years have been as good as could be expected, taking into consideration the cramped condition of the hospital facilities and the condition and surroundings of the same, together with the lack of ventilation in the cell houses and hospital.

It has required the use of every available means at hand to keep the rate of mortality within what is considered safe limits. From the fact that the present hospital facilities are not sufficient to accommodate the seriously sick and tuberculosis patients that are beyond the stage of recovery, I have been compelled to treat many cases in their cells who are past recovering. Many of them being tubercular patients, who should be placed in a separate ward in a hospital, instead of coming in contact with others, as they must of necessity do when in the cell houses.

This condition of affairs should be remedied at the earliest possible moment, to the end that the laboring convict should not be compelled to undergo this constant source of infection, taking for granted that "tuberculosis is infectious, as is recognized by good medical authority."

I desire to call your attention to the location and surroundings of the present hospital, which, in my opinion, ought to be speedily remedied. The present hospital is located over the kitchen and store house of the large dining room, and the patients are compelled to inhale the fumes and vapors arising

from the place where the cooking is done for from 800 to 900 men, together with the noise naturally and of necessity made in doing the work of cooking, washing dishes and the heating of tanks of water by steam, which work begins at 4 o'clock in the morning.

There has been erected within the past few years an electric light plant on one side and a machine shop within fifty feet on another side of the present hospital, said machine shop making considerable noise by day and the light plant by night. Surrounded as the present hospital is, and containing the number of tubercular patients it does, it is plain to be seen that it is by no means a favorable place to keep and treat the laboring convicts who are sick for a short time, as the noise and confusion militates largely against their quiet and speedy recovery.

Instead of noise, foul vapors and infection for the sick, as near quiet and cleanness as possible ought to be obtained.

Owing to the limited capacity of the present hospital, as stated, quite a number of the sick have had to be treated in their cells. This is a source of disturbance to the discipline, as well as being unfavorable toward the proper treatment and militates against their recovery. Patients have died in their cells for want of hospital room. Such an occurrence is indeed to be regretted.

Owing to the limited facilities for caring for the insane patients, they are by necessity confined in very unsuitable places awaiting a permit to transfer them to an insane hospital.

I desire further to call your attention to the present heating and ventilating of the cell houses, which, in my opinion, is very defective. I would respectfully suggest for the purpose of improving the same a system of ventilating fans and hot air pipes be placed in each cell house, carrying fresh air to each cell and thereby materially lessen the death rate of the prison.

The water supplied by the prison water works is not considered safe for drinking purposes, and for a year it has not been used as such except in cases of necessity. About the hospital we can use it only after it has been boiled. The drinking water for nearly all is supplied by the wells in the cell houses. I would suggest that a supply of pure water be taken from Lake Michigan, which could be done at a nominal cost, and which would add largely to the health of all connected with the institution whether by choice or compulsion.

I would further earnestly recommend that a new hospital be erected, away from the noise and smoke of the factories, away from the noise and fumes of the large cooking apartments and in a good, pure atmosphere and sunlight. The plans of the proposed hospital should be approved by the State Board of Health. Said hospital should be of sufficient capacity to accommodate all convicts who need medical or surgical treatment, with separate wards for the acute, surgical, tubercular and insane patients; thus relieving our overtaxed medical facilities and give relief to the poor unfortunates who ought to be reformed instead of confined here for mere punishment, and at the same time prevent the spread of tuberculosis and other infectious diseases to the healthy convicts.

The table of deaths and their causes is appended. The danger from tuberculosis is apparent when the table shows over 71 per cent. of death from that one cause.

The mortality for the year ending October 31, 1895, was nearly 2.02 per cent., and for the year ending October 31, 1896, was nearly 1.11 per cent.

Robert Wilson died in his cell March 8, 1895.

Edward King, alias Ed. Keeling, was stabbed in the heart while in the shop by convict Harry Gibson, for which crime Gibson was given a life sentence.

John Lawhorn, alias Charley Haven, was injured by jumping from the prison wall during the night of August 10, 1895, while attempting to escape, which caused his death.

Omer Thomas, colored, was killed by a cut in the abdomen done by a knife in the hands of Henry Jones during chapel services July 5, 1896.

I desire, gentlemen of the Board of Directors, officers and guards, to express to you my thanks for your confidence and assistance in performance of my official duties.

Most respectfully submitted,

ALVA L. SPINNING,
Prison Physician.

LIST OF DEATHS FOR FISCAL YEAR ENDING OCTOBER 31, 1896.

No.	NAME.	Age.	DATE.	CAUSE.
1	Worden, Harry	25	Nov. 24, 1895 .	Tuberculosis.

18	Lawhorne, John, alias Chas. Haven.	34	Aug. 12, 1895 .	Concussion of spine.

CHAPLAIN'S REPORT.

To the Honorable Board of Directors of Indiana State Prison North:

Pursuant to the demands legally made upon me as Chaplain of this Prison, I herewith take pleasure in submitting the following report to your honorable body, showing the past and present status of the prison management intrusted to my care:

August 1, 1895, I assumed charge as Chaplain of this Prison. With a solemn and firm conviction that Christianity is the sovereign remedy for all crime and immorality, as well as the only restorer and hope of sin-scarred lives, I went to work. To my preaching the prisoners have always given the most respectful attention. Preaching services have been made attractive and interesting as possible by maintaining an excellent prison choir under my own personal direction, assisted by a prisoner organist and chorister.

To what extent these services move the men to resolutions for right and better living, I have no absolute means of knowing, but the tables which I append to this report will reveal to you some of the results emanating from our prison religious work.

On account of the chapel building being condemned as an unsafe structure in which to assemble so large a concourse of people, preaching services had to be abandoned on August 16, 1896.

THE PRISON CHURCH.

From personal contact with the prisoners and other indications, it became manifest to me that a church organization among the prisoners would be of value, and on September 29, 1895, such an organization was effected, with a charter membership of about one hundred. At its introduction, this movement was considered quite an innovation—which indeed it was—by the remaining prison regime, as well as myself. But so

many apparently sincere and penitent hearts were clamoring for baptism and some recognized church membership, that I felt in duty bound to attempt to answer their Macedonian cry. This work has progressed quietly and slowly, and with apparently excellent results. There are fifteen denominations represented in its membership, and communion service is observed every three months.

PRISON CHRISTIAN ENDEAVOR.

So well did the members of the church organization respect the relaxing of the prison discipline permitting their enlarged religious liberty that when, from my own desire and upon the recommendation of some outside philanthropists, I asked permission to organize a Christian Endeavor Society among the prisoners, Warden Harley cheerfully granted the request.

On October 20, 1895, a Christian Endeavor Society was organized, with a membership of about two hundred and fifty. Notwithstanding much doubt and skepticism, this work has grown, and obtained for itself a place and confidence of all who come in touch with it and its workings. Though the chapel is abandoned, the meetings of the Christian Endeavor are still held in the prison school-room. Efforts will be made to further interest the State Christian Endeavor body in the welfare of these all but hopeless and helpless men at its next State convention. All credit and thanks are due the Warden and his subordinates, who have made both the foregoing organizations possible by attendance in the meetings, and by their relaxing of the established prison discipline governing religious services in the institution. The contractors and foremen in the shops also report better conduct and work from our Christian Endeavor members. The church and endeavor society, as seen here, must eventually serve as powerful forces to make them new men in Christ Jesus.

THE SCHOOL.

In our prison school most gratifying results have been attained. Numbers who could neither read nor write upon entering the school, were able to read and also write letters to their loved ones at its close. It is to be regretted that a large number of men could not be accommodated because of limited

school room. The present law having diverted into other channels all the funds formerly used for replenishing text-books and other necessary school material, it leaves this feature of the Prison in an ineffectual condition.

THE LIBRARY.

This feature of the Prison has been, and is, of incalculable benefit to the prisoners. It is in need of additional and modern books, but the same law which renders the school destitute of funds also affects the Library in same manner.

IN CONCLUSION.

I would most respectfully add my indorsement to the suggestions offered by the preceding Chaplains in relation to classification of prisoners in this institution. Such action will render all other reformatory measures more effectual, and is the paramount need of the hour.

The appended tables will exhibit partial results of the religious work performed in this Prison during the last fifteen months. It will be noticed that Roman Catholic members are not included, they being in charge of their own spiritual instructor, in the person of Father Blakeman.

PRISON CHURCH STATISTICS.

	77
Present membership	353

Taken all in all, the religious work among the prisoners gives evidence that great advancement in reformation is possible among fallen men when such work is properly directed, and if it could only be warmly and earnestly seconded by outside co-operation much more good might be accomplished.

It gives me much pleasure to acknowledge my thanks to your honorable Board, and, through you, unto Warden Harley, Deputy Tomlinson and their subordinate officers, for the kind and courteous treatment and valuable assistance rendered me and my work.

Very respectfully,

A. H. CURRIE,

Chaplain

MICHIGAN CITY, IND., October 31, 1896.

After writing the above report, Rev. A. H. Currie died on November 3, 1896, after a week's illness, of pneumonia.

On the morning of the 4th, opportunity was given the prisoners to view the remains of Chaplain Currie, after which he was taken to his home at Windfall, Ind., accompanied by a committee from the Prison.

Words can not express the interest that has been shown by Rev. Mr. Currie in his work since assuming the duties as Chaplain and the high esteem in which he was held by the officers and inmates of the prison.

He devoted his whole time and energies toward the betterment and uplifting of the unfortunates in his charge, and great good has been accomplished by his efforts, both to the prisoners and discipline of the prison.

CHARLEY HARLEY,

Warden.

CLERK'S REPORT.

MICHIGAN CITY, IND., October 31, 1896.

Messrs. E. H. Nebeker, R. S. Foster

and H. Van Voorst, Directors:

I have the honor of submitting to you a statement of the financial and statistical operations of this Prison for the fiscal years ending October 31, 1895, and October 31, 1896.

Very respectfully,

WILL H. WHITTAKER,

Clerk.

TABLE A.
